CORPORATE PRODUCT CATALOGUE · 2026

Six platforms. One standard of engineering.

Enterprise business applications for education, people, talent and revenue teams.

- Agastya
- PragyanNxt
- Vortex HRMS
- ProtonNxt
- MavionLearn
- SalesPulse CRM

CATALOGUE BRIEF

Six platforms in this catalogue, at a glance

Agastya

Page 15 →

Cloud School ERP · Education

Multi-tenant cloud ERP that runs admissions, academics, fees, transport and parent communication for every school in a group.

PragyanNxt

Page 20 →

Assessment & Certification · Education

Author, deliver, proctor, score and certify assessments, with an integrity score and a verifiable credential for every result.

Vortex HRMS

Page 23 →

Unified People Platform · People & Talent

People platform for HR, Face-AI attendance, leave, policy-driven payroll and employee self-service, on one record.

ProtonNxt

Page 27 →

Enterprise ATS · People & Talent

AI-assisted applicant tracking for recruitment firms and talent teams, from requisition and sourcing to offer and joining.

MavionLearn

Page 31 →

Enterprise LMS · Skills & Compliance · People & Talent

Enterprise LMS that scores skills against role targets, runs compliance on its own and reports in your brand.

SalesPulse CRM

Page 35 →

India-first Sales CRM · Revenue

India-first sales CRM with privacy-masked calling, a live pipeline, GST billing and reports that build themselves.

ABOUT MAVIONTECH

An Indian product company for enterprise applications

COMPANY	**MavionTech Private Limited**
HEADQUARTERS	**Wakad, Pune, Maharashtra, India**
WHAT WE BUILD	Enterprise business applications
BRAND PROMISE	Momentum with Vision
PORTFOLIO	Six flagship platforms in this catalogue, plus further products on maviontech.com

OUR JOURNEY

2023 — **Training foundation**

Began as a training initiative under Sukrit EnVision Academy.

2024 — **Shift to product development**

The team moved from training to building software products.

2025 — **Independent product company**

Launched as MavionTech, an independent product company.

Today — **Six enterprise platforms**

Education, people, talent and revenue products, each shown in this catalogue with real screens.

COMPANY INTRODUCTION

We build the systems that run an organisation's daily operations

MavionTech builds enterprise business applications where every customer's data lives in its own database, and every operation is role-governed, audited and configurable without code.

Each part of this statement is demonstrated by at least five of our six products.

What we build

Complete operating platforms for schools, HR and payroll, recruitment, learning, assessment and sales: not point tools.

How we build

Workflow-first and multi-tenant. Production-grade UX, predictable performance and maintainable integrations, as our promise states.

Who we build for

Staffing and HR, IT companies, EdTech, consulting firms, finance and service providers, and MSMEs.

Where we are going, and how we get there

VISION

Create intelligent digital ecosystems that help teams move faster, make better decisions, and transform the way organizations operate.

MISSION

Automate and simplify operational workflows with secure, extensible enterprise software that empowers teams to focus on what matters most.

PROMISE

Production-grade UX, predictable performance, and maintainable integrations — built for real teams solving real problems.

Source: maviontech.com, Company page. Quoted as published.

TECHNOLOGY FOCUS

Six engineering principles, proven across the portfolio

Database per customer

Every product isolates each customer in its own database, not a shared table with a filter.

Role-governed and audited

Role-based access and audit trails across sensitive actions, in every product.

Configurable without code

Dashboards, fields, workflows, toggles and branding are set by administrators.

India-first commercial fit

INR, GST, statutory payroll, CTC structures and local payment rails.

Mobile where work happens

Student, recruiter, sales and employee apps for people away from a desk.

AI where it helps

Question generation, résumé parsing, visual proctoring and face recognition.

Dots show which products demonstrate each principle, in order: **Agastya · PragyanNxt · Vortex HRMS · ProtonNxt · MavionLearn · SalesPulse CRM.**

BUSINESS PROBLEMS WE ADDRESS

The operational problems customers bring to us

THE PROBLEM	WHERE IT SHOWS UP	ANSWERED BY
Operations run on registers, spreadsheets and chat groups	Nothing reconciles and every report is assembled by hand.	Agastya · Vortex HRMS
Customer and candidate data walks out with staff	Raw numbers and CVs sit in personal phones and inboxes.	SalesPulse CRM · ProtonNxt
Training that cannot prove capability	Completions are counted; skills and compliance are guessed.	MavionLearn
Assessments and certificates that can be disputed	Unsupervised exams and forgeable PDFs undermine trust.	PragyanNxt
Manual reconciliation between operations and finance	Attendance to payroll, fees to invoices, every cycle.	Vortex HRMS · Agastya
Leaders waiting days for the numbers	Visibility arrives after the decision was needed.	Agastya · SalesPulse CRM · MavionLearn

PORTFOLIO OVERVIEW

Six platforms, each a complete system for one part of the business

Agastya
Cloud School ERP

One operating system for every school in your group

Best for K-12 school groups and single schools

PragyanNxt
Assessment & Certification

Results you can defend. Credentials anyone can verify.

Best for Hiring teams and academic institutions

Vortex HRMS
Unified People Platform

Hire to retire. Attendance to payroll. On one record.

Best for HR, payroll and field workforces

ProtonNxt
Enterprise ATS

From requisition to hire, in one structured pipeline

Best for Recruitment firms and talent teams

MavionLearn
Enterprise LMS · Skills & Compliance

Skills that compound: training that becomes provable capability

Best for L&D, HR and compliance leaders

SalesPulse CRM
India-first Sales CRM

Your reps sell. Your customers' numbers stay yours.

Best for Indian sales organisations

PRODUCT SHOWCASE

CLOUD SCHOOL ERP

Agastya

One operating system for every school in your group

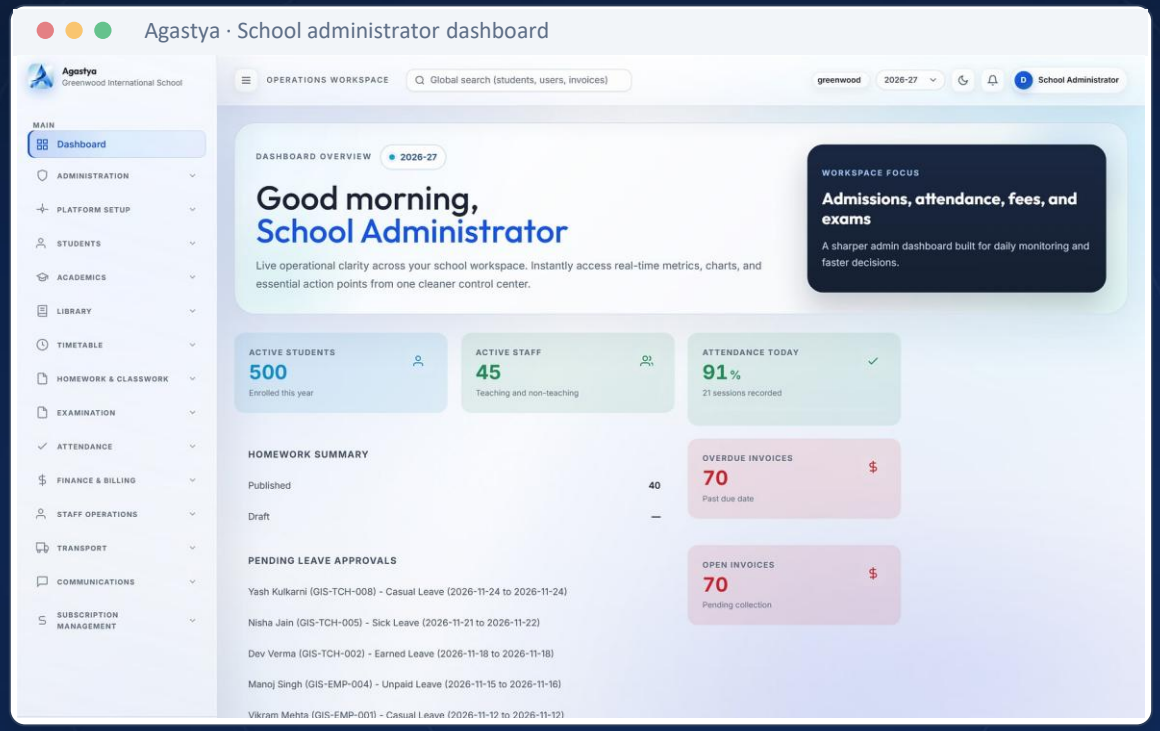

THE PROBLEM

School groups run on registers, spreadsheets and WhatsApp. Nothing reconciles, leaders wait days for numbers, and student data sits on personal phones.

OUR ANSWER

Admissions to report cards, fees to fleet: every department, persona and campus on one governed platform, with each school's data in its own database.

BUILT FOR **School groups & chains · Single schools · Group heads & principals**

19 integrated modules

8 role cockpits

96 permission codes

School administrator dashboard (demo data).

19 modules across six pillars, on one data model

Command & governance

3 modules

- Role dashboards & builder
- Administration & RBAC
- Platform setup & branding

Academics

6 modules

- Admissions & student lifecycle
- Academics & syllabus
- Timetable & substitution
- Attendance · Homework
- Exams & report cards

Operations & finance

5 modules

- Fees & billing
- Staff operations & HR
- Transport
- Inventory & procurement
- Service desk & front office

Campus life

2 modules

- Library
- Hostel, health & discipline

Engagement

2 modules

- Communications & WhatsApp inbox
- Student & parent portals, student app

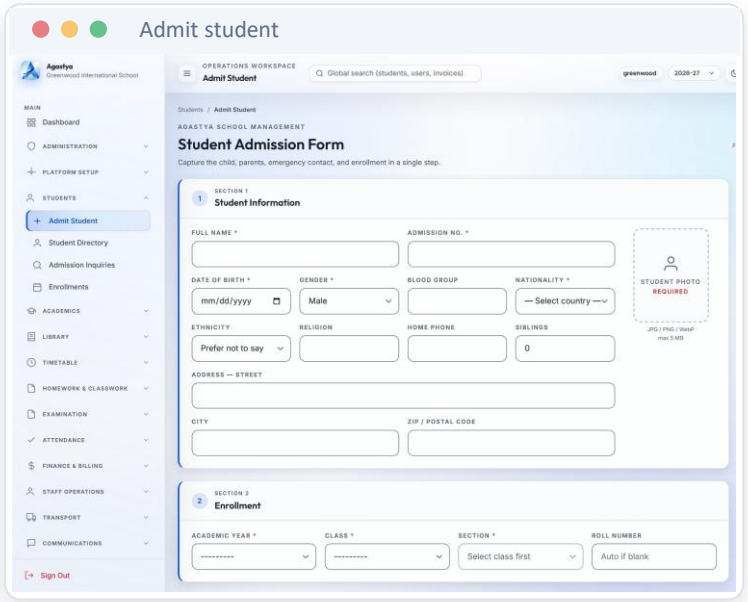

Platform

1 module

- Multi-tenant SaaS console
- Plans, subscriptions & billing

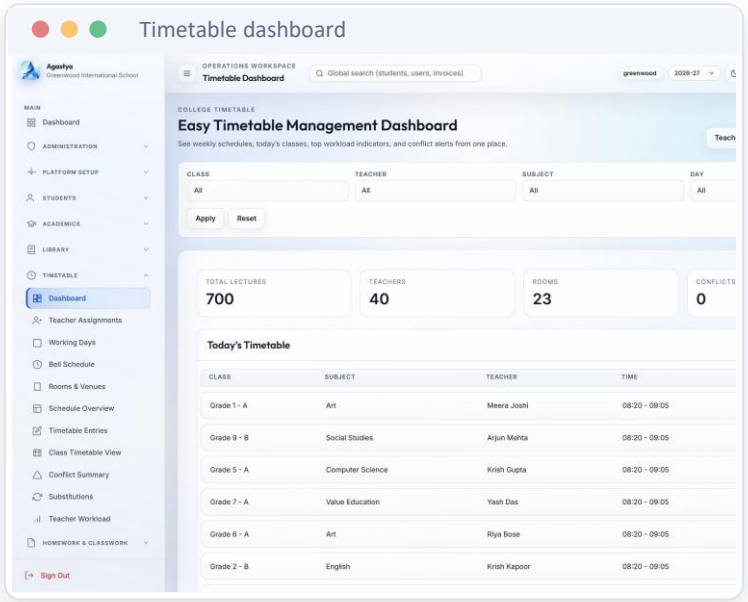

From first inquiry to report card, on one record for life

1 Inquiry → **2 Admit & enrol** → 3 Timetable & attendance → 4 Exams & report cards → 5 Fees & collections

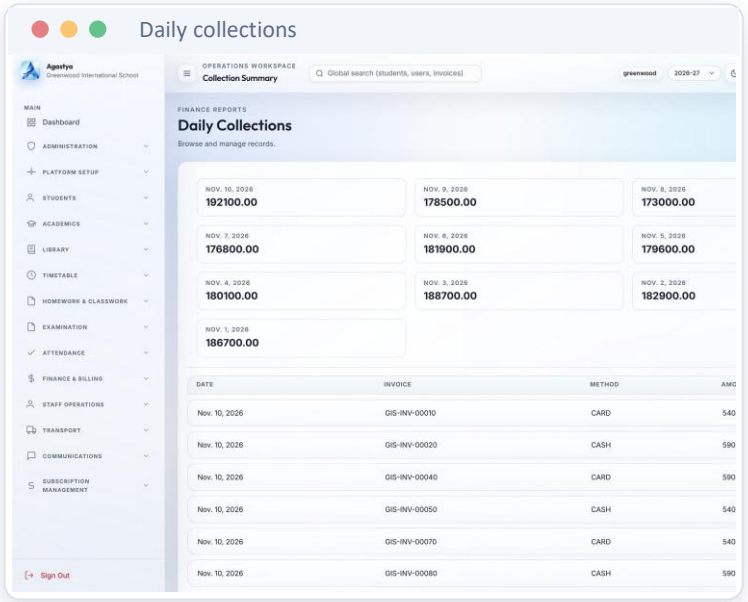

Admission in one screen

Student, enrolment, guardians and emergency contact in one step (demo data).

Clash-free timetables

700 weekly lectures across 40 teachers with zero conflicts (demo data).

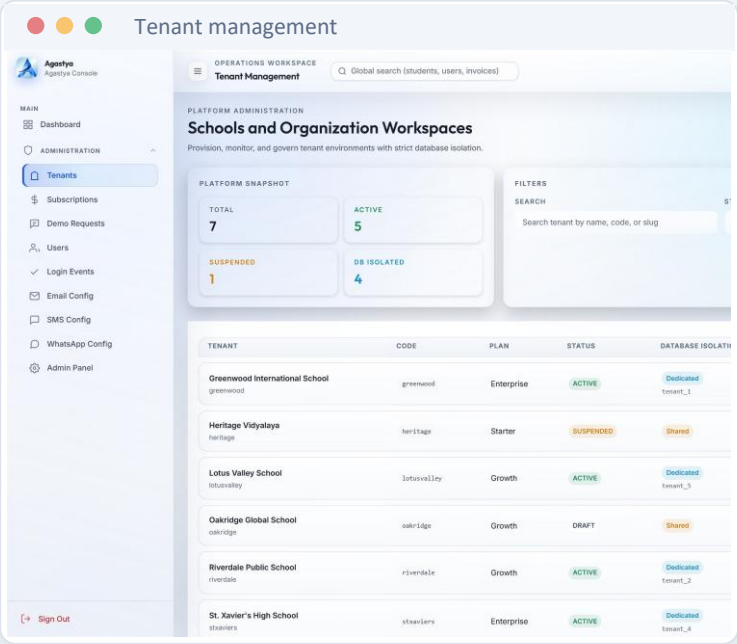

Collections in real time

Daily collections with payment-method breakdown (demo data).

Every campus governed from one console

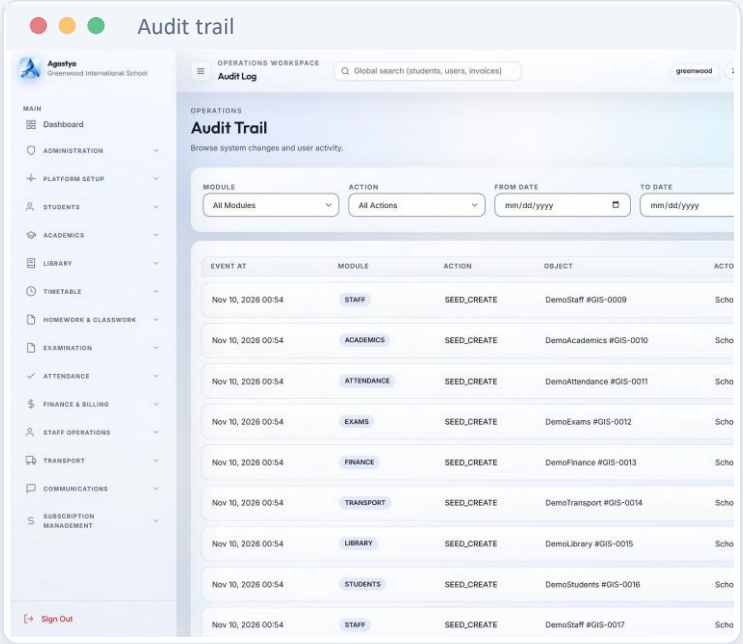

Tenant management

Onboard a school in minutes

Platform console: schools, plans and a dedicated database each (demo data).

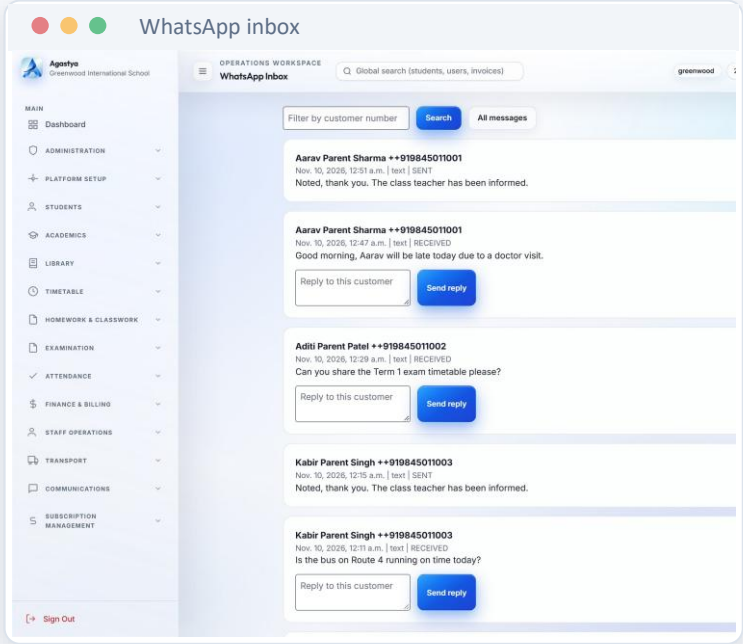

Audit trail

Every action traceable

Audit log with before/after values, filters and CSV export (demo data).

WhatsApp inbox

A school-owned parent channel

Two-way WhatsApp inbox through the Meta Cloud API (demo data).

Lockout after 3 failed logins · **One active session per user** · **4-hour sliding sessions** · **Signed webhooks** · **Database per school**

Agastya

What changes when a school group moves to Agastya

KEY DIFFERENTIATORS

Database per school

Each school gets its own database, created and migrated automatically.

Configurable without developers

Dashboard builder, permission matrix and feature toggles per school.

School-owned parent channel

Two-way WhatsApp inbox; no staff personal numbers.

Audit-grade governance

Before/after audit, login events, lockout and single sessions.

BUSINESS VALUE

- Live numbers for group heads, principals and accountants
- Faster collections with branded invoices and dues tracking
- Report cards published in one click
- New campuses provisioned from the console
- Parents informed without personal phone numbers

BEST FIT

School groups and chains running several campuses, and single schools that want group-grade governance.

Multi-tenant SaaS · Razorpay · Meta WhatsApp · Twilio SMS · Student app (Expo)

PRODUCT SHOWCASE

ASSESSMENT & CERTIFICATION

PragyanNxt

Results you can defend. Credentials anyone can verify.

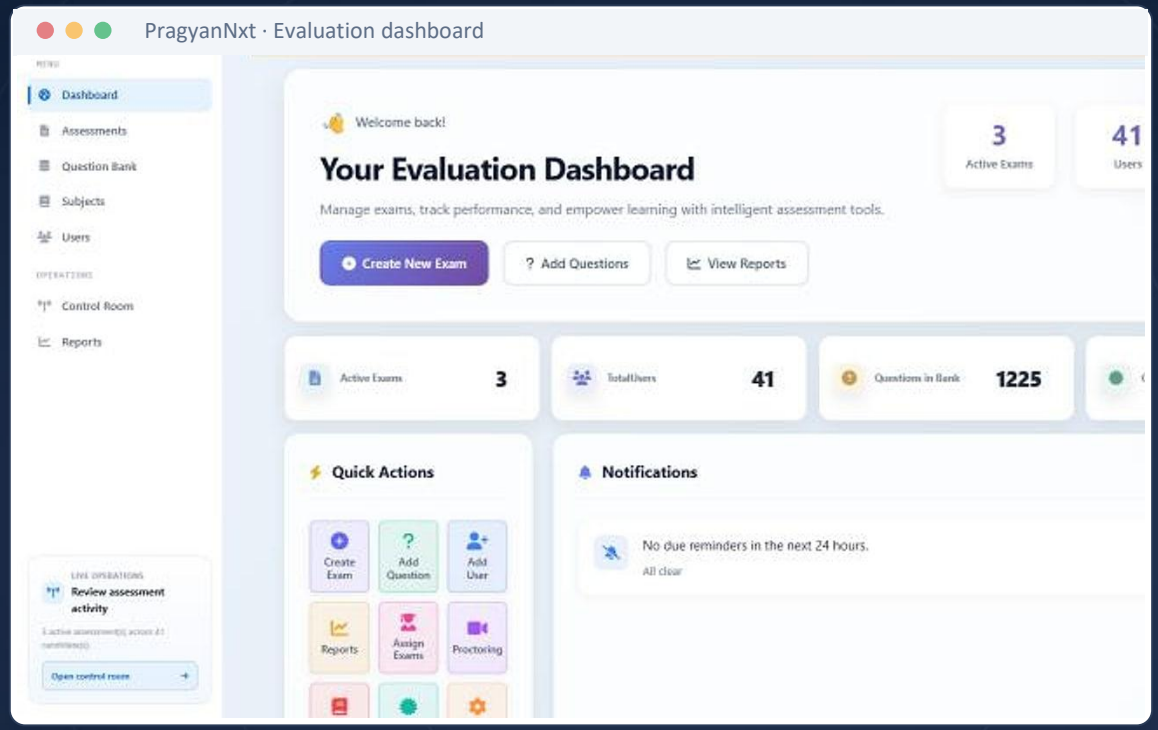

THE PROBLEM

Gamed screening tests push the wrong candidates forward, unmonitored exams devalue certificates, and point tools never talk to each other.

OUR ANSWER

One platform for corporates and academic institutions to author, deliver, proctor, score and certify, with an integrity score on every attempt.

BUILT FOR **Corporate hiring teams · Academic institutions · Certification programmes**

8
integrated modules

Ed25519
signed credentials

14-day
free trial

Evaluation dashboard: active exams, users and question bank (demo data).

PragyanNxt

Eight modules, one closed loop of trust

1 Author → 2 Deliver → 3 Proctor → 4 Score → 5 Certify

Authoring
Build

- Question bank & bulk import
- AI generation
- Bloom's & difficulty

Delivery
Run

- Public, assigned or invite
- Randomisation & timers
- Retakes

Proctoring
Watch

- Live monitoring
- Screen & webcam recording
- AI visual analysis

Integrity
Score

- Behavioural signals
- Integrity score
- Answer similarity

Results & analytics
Decide

- Auto & manual grading
- Report PDFs
- AI summaries

Certification
Prove

- Signed certificates
- Public verification
- Open Badges & appeals

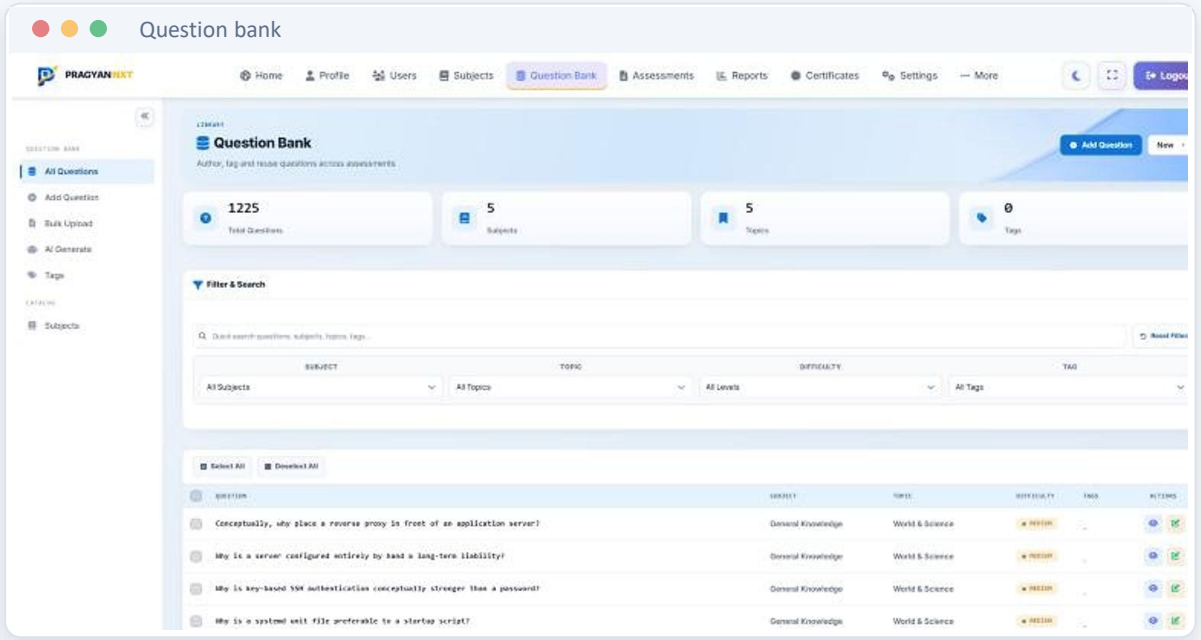

Multi-tenancy & admin
Govern

- Tenant isolation
- Roles & RBAC
- Activity logging

Commerce & AI
Scale

- Subscriptions & entitlements
- Metered AI credits
- Email invites

Not just a PDF: a credential the world can verify

Question bank: 1,225 questions across 5 subjects, with filters by subject, topic, difficulty and tag (demo data).

BUSINESS VALUE

- ✓ Hire on evidence, not gamed scores
- ✓ Exams that stand up to appeal
- ✓ Certificates verified in one click
- ✓ One platform instead of three

KEY DIFFERENTIATORS

Cryptographically signed

Ed25519-signed credentials that cannot be forged or altered.

Public verification

Anyone can confirm a certificate is genuine, instantly.

Integrity without a camera

Focus, tab and clipboard telemetry score non-proctored exams too.

Plugs into your LMS

LTI 1.3 writes results back to Canvas, Moodle and more.

Deploy as cloud SaaS, private cloud or on-premise · Basic, Plus and Pro tiers by monthly assessment volume

PRODUCT SHOWCASE

UNIFIED PEOPLE PLATFORM

Vortex HRMS

Hire to retire. Attendance to payroll. On one record.

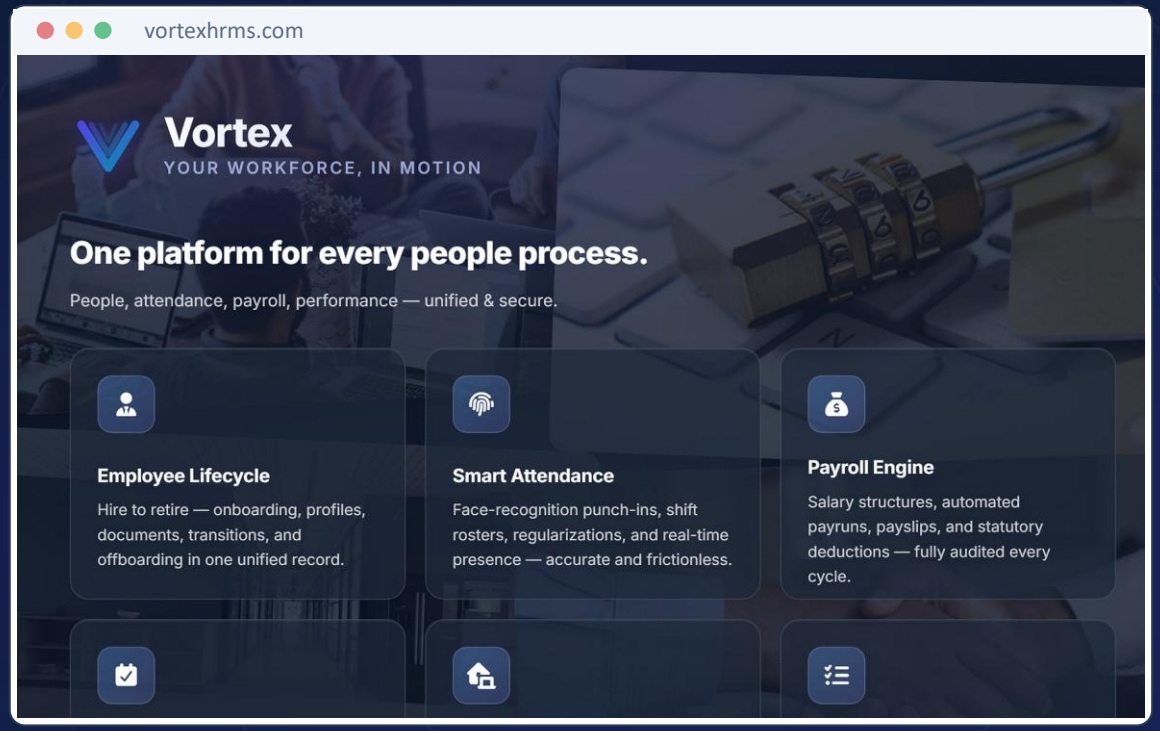

THE PROBLEM

HR, payroll, attendance and helpdesk live in separate tools. Finance reconciles attendance to payroll by hand, and statutory rules change faster than legacy systems.

OUR ANSWER

One people platform: Face-AI attendance, policy-driven payroll, leave, approvals and employee self-service, with a database per customer.

BUILT FOR **HR & people teams · Payroll & finance · Field & shift workforces**

14
modules

₹45
per employee / month base

Face-AI
attendance

Vortex HRMS public site, vortexhrms.com.

Start with core HR, then switch on exactly what you need

Base bundle

Every employee gets

- People management
- Attendance tracking
- Leave management
- Employee self-service
- Company policies

Premium modules

Switch on any month

- Payroll management
- Performance (PMS)
- Expenses · Helpdesk · Assets
- HR document generation
- Learning (LMS)

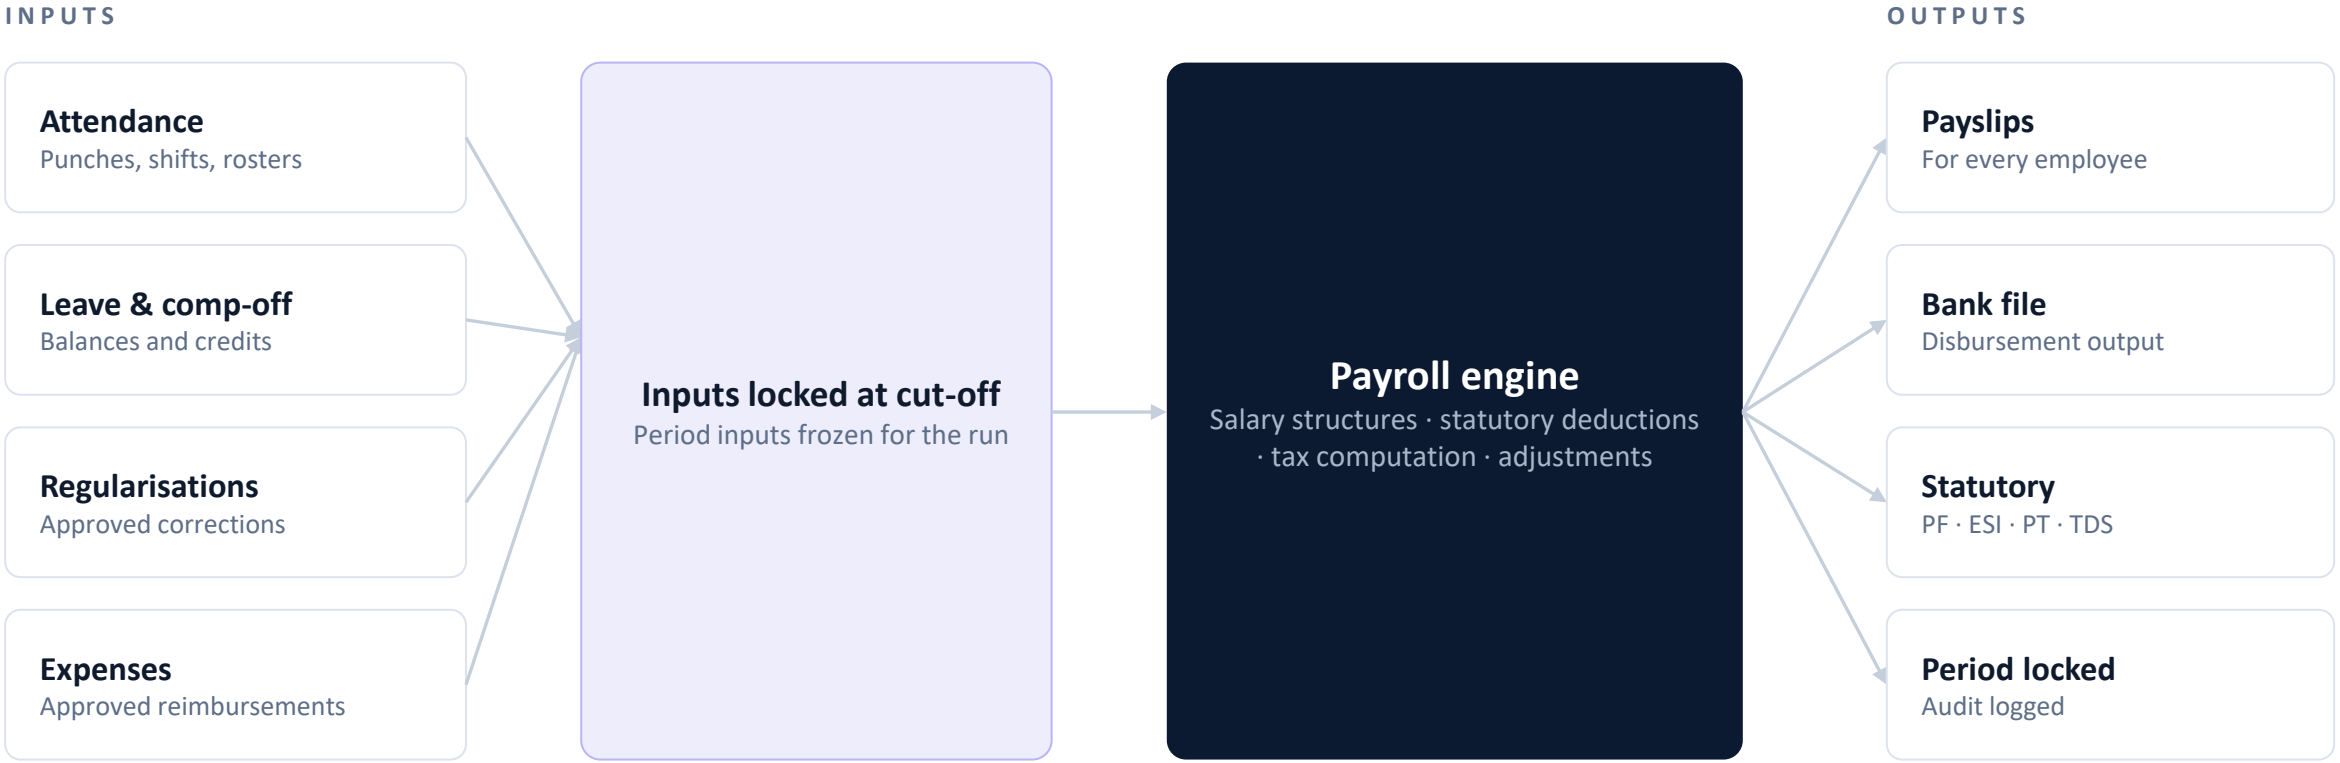

Attendance & mobile add-ons

For field and remote teams

- VortexGo mobile app
- Geo-fence attendance & remote punch-in
- On-shift location sharing
- Punch step-up verification

Underneath everything: the approvals and workflow engine, role-based security, audit logging and a database per customer.

Attendance and leave flow straight into payroll

Re-runs are versioned and periods lock after sign-off, so every payroll is reproducible and auditable. Approvals route by role, sequentially or in parallel, with escalation timers.

One record from hire to retire, priced by what you switch on

KEY DIFFERENTIATORS

Face-AI attendance

Face-recognition punch (InsightFace), geo-fencing and device integration.

Policy-first payroll

Versioned re-runs and locked periods make payroll reproducible.

VortexGo and SnapLens

Employee and on-site attendance apps, with privacy safeguards for location.

Pay for what you switch on

Published per-employee list prices; modules on or off any month.

BUSINESS VALUE

- No manual reconciliation of attendance to payroll
- Statutory deductions computed by policy
- Approvals that never stall, with escalation timers
- Employees serve themselves: balances, payslips, policies

BEST FIT

Organisations with HR, payroll and field or shift workforces that want one record from hire to retire.

Multi-tenant cloud | **Biometric devices & gates** | **REST APIs** | **30-day free trial**

PRODUCT SHOWCASE

ENTERPRISE ATS

ProtonNxt

From requisition to hire, in one structured pipeline

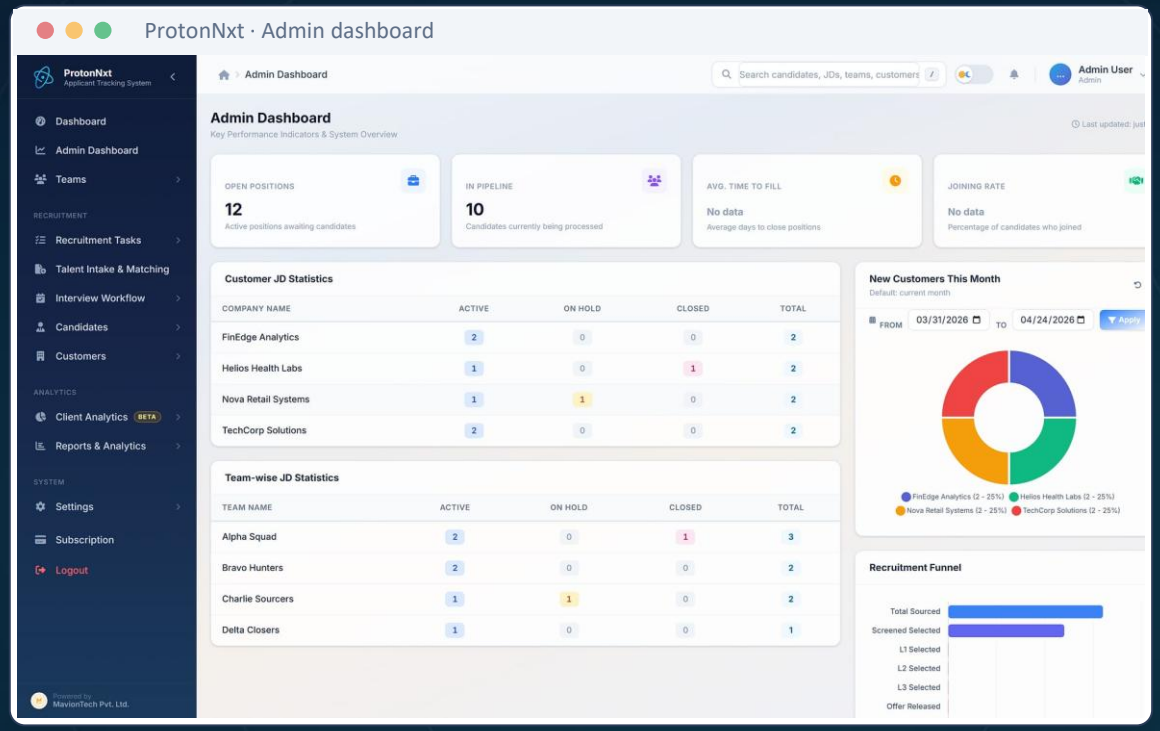

THE PROBLEM

Recruiters screen résumés by hand, ownership is unclear, feedback lives in inboxes, and vendor CVs arrive with no caps, duplicates or audit.

OUR ANSWER

A multi-tenant, AI-assisted ATS for recruitment firms and talent teams: sourcing, parsing, interviews, offers, vendors and client insight on one system.

BUILT FOR **Recruitment & staffing firms · Enterprise talent teams · Vendor agencies**

15
modules in every tenant

2
AI parsing paths

L1–L3
structured interviews

Admin dashboard: KPIs, customer JD statistics and recruitment funnel (demo data).

Fifteen modules, every one included in every tenant

Hiring pipeline
6 modules

- Job requisitions
- Candidate sourcing
- Talent intake & matching
- Applicant tracking
- Interview workflow
- Offer management

Operations
4 modules

- JD assignment
- Team collaboration
- Calendar & video
- Mobile recruiter app

External access
2 modules

- Careers URL & candidate portal
- Vendor management

Analytics
2 modules

- Reports & analytics
- Client engagement analytics (beta)

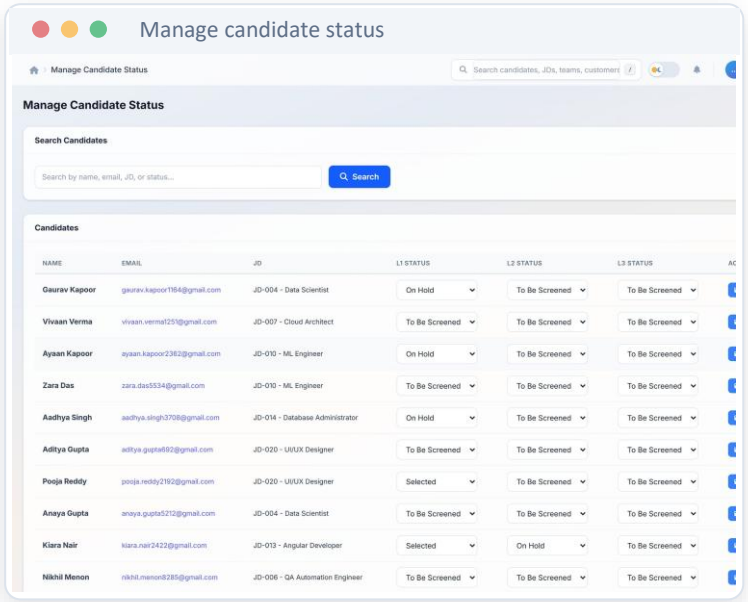

Governance
1 module

- Settings, admin & custom schema

No add-ons: every module ships to every tenant from day one. Client engagement analytics is in beta.

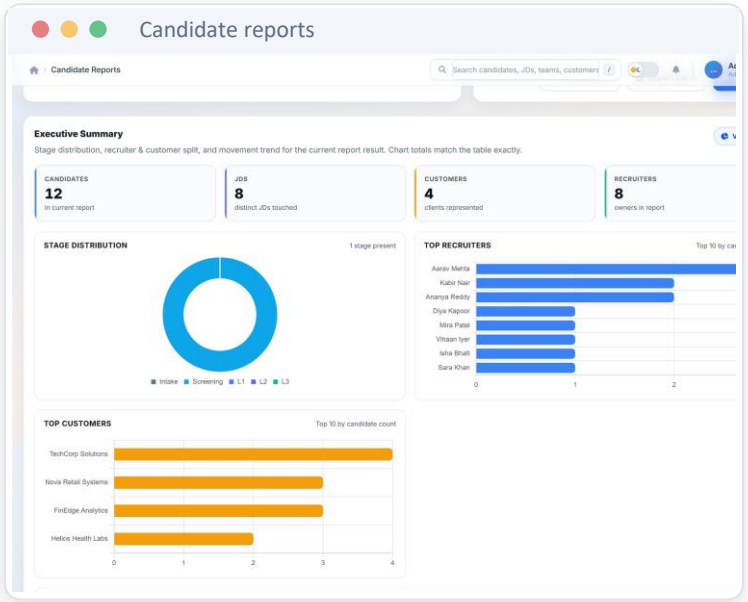

The pipeline always tells the truth

1 Requisition → **2 Source & AI parse** → 3 Track → 4 Interview L1–L3 → 5 Offer & join

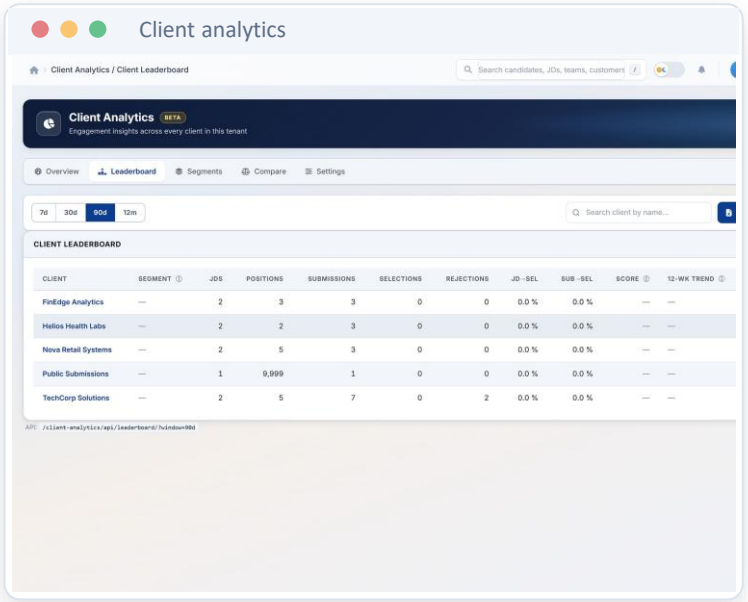

Every stage visible

Candidate status across L1, L2 and L3 per JD (demo data).

Answers that match the table

Executive summary over candidate reports (demo data).

Clients to grow (beta)

Client engagement leaderboard and segments (demo data).

Structure, speed and evidence across every hire

KEY DIFFERENTIATORS

AI without lock-in

OpenAI and Gemini parsing paths, with manual override.

Agencies inside the process

Per-vendor caps, duplicate protection and separate vendor logins.

Client engagement analytics

Scores and segments show which clients to grow (beta).

One candidate portal

A single candidate login across every employer on ProtonNxt.

BUSINESS VALUE

- Structured intake and interviews shorten the path to hire
- Clear ownership of every requisition and candidate
- Vendor submissions that are measurable and deduplicated
- Reports leaders trust, with saved templates and XLSX

BEST FIT

Recruitment firms serving many clients, and in-house talent teams that work with agency partners.

Multi-tenant SaaS · OpenAI · Gemini · MavionMeet video · Razorpay · ICS calendars

PRODUCT SHOWCASE

ENTERPRISE LMS · SKILLS & COMPLIANCE

MavionLearn

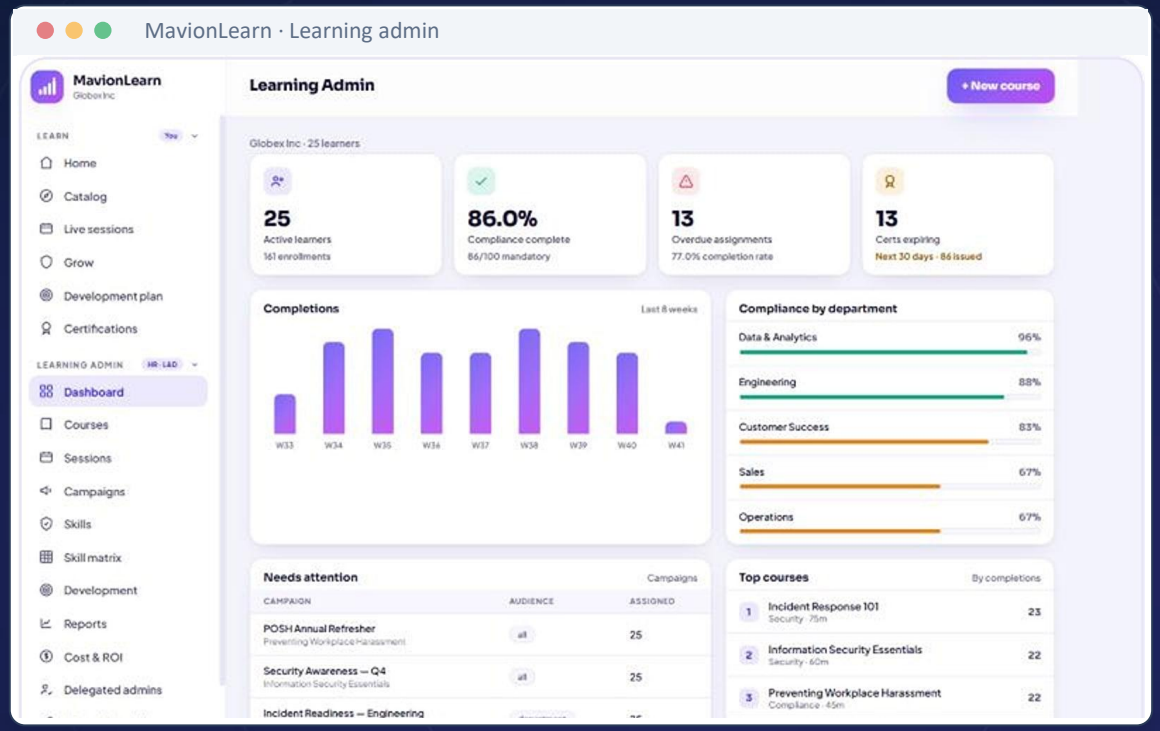

Skills that compound: training that becomes provable capability

THE PROBLEM

Finishing a course doesn't prove a skill, mandatory training is chased by hand, and leadership can't see what training spend returns.

OUR ANSWER

A multi-tenant enterprise LMS that scores every employee against role targets, runs compliance on its own and reports in your brand, with identity built in.

12
integrated modules

SSO
OIDC · SAML · SCIM

30-day
all-features trial

Learning admin: enrolments, compliance and completions by department (demo data).

BUILT FOR **L&D and HR · Compliance leads · IT & identity teams**

MavionLearn

Twelve modules across five capabilities

1 Set role targets → 2 Score the gaps → 3 Recommend courses → 4 Complete & certify → 5 Capability rises

Learn
4 modules

- Catalog & courses
- On-demand learning
- Live learning (ILT / VILT)
- Learner experience

Measure
1 module

- Skills & skill matrix
- Development plans

Comply
1 module

- Compliance campaigns
- Certifications & renewals

Report
2 modules

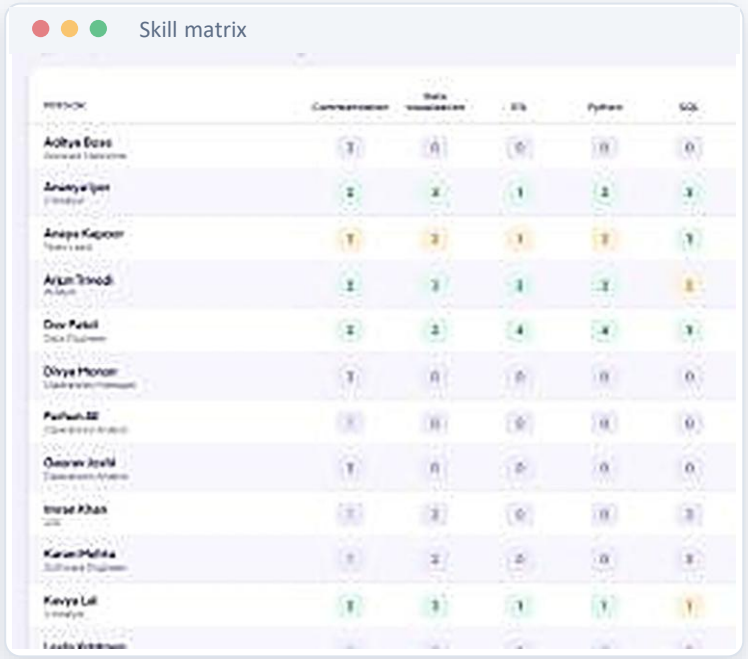

- Enterprise reporting
- Cost & ROI

Govern
4 modules

- People & delegated admin
- Identity & security
- Standards & integrations
- Platform console

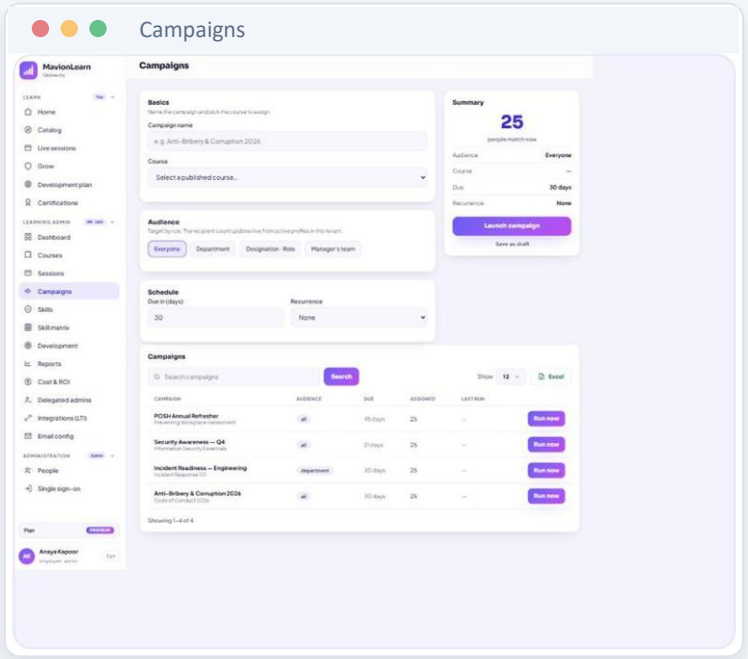

MavionLearn

See capability, run compliance, report in your brand

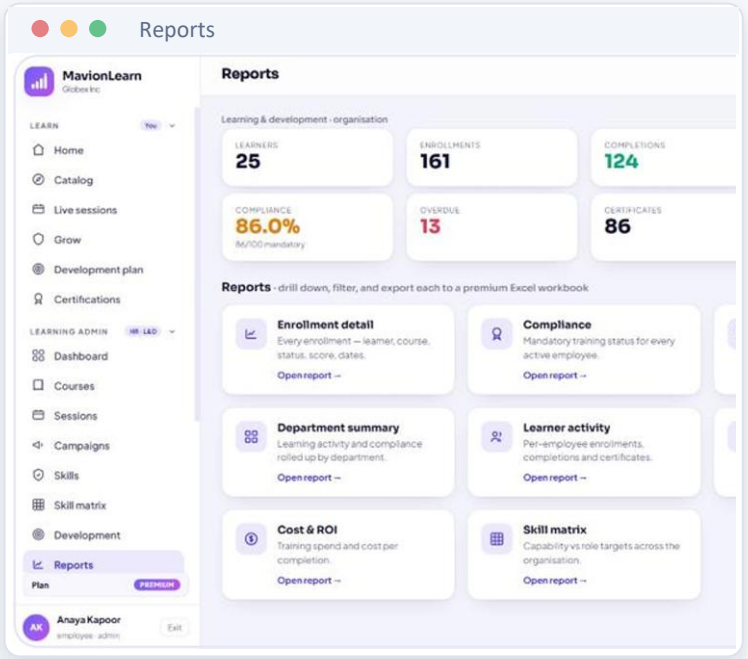

A living skill matrix

Employees scored against role targets (demo data).

Compliance that runs itself

Campaign builder: audience, course, schedule and status (demo data).

Board-ready reporting

Reports workspace: eight built-in report types (demo data).

Assign **Remind** **Certify** **Renew** **Export in your brand**

MavionLearn

Others track completions; MavionLearn proves capability

KEY DIFFERENTIATORS

Capability, not completions

A living skill matrix scored against role targets.

Compliance on autopilot

Assign, remind, certify and renew automatically.

Identity included

OIDC, SAML 2.0 and SCIM in the product, not a paid add-on.

Isolated by design

A dedicated database per customer, white-labelled.

BUSINESS VALUE

- Prove capability to leadership and auditors
- Audit-ready evidence exported in one click
- Board-ready Excel and PDF reports in your brand
- Training spend and cost per completion visible

BEST FIT

Enterprises that must prove skills and compliance across large, distributed organisations.

SaaS · private cloud · on-prem | SCORM | LTI 1.3 | OIDC · SAML · SCIM | Cloudflare R2 / S3

PRODUCT SHOWCASE

INDIA-FIRST SALES CRM

SalesPulse CRM

Your reps sell. Your customers' numbers stay yours.

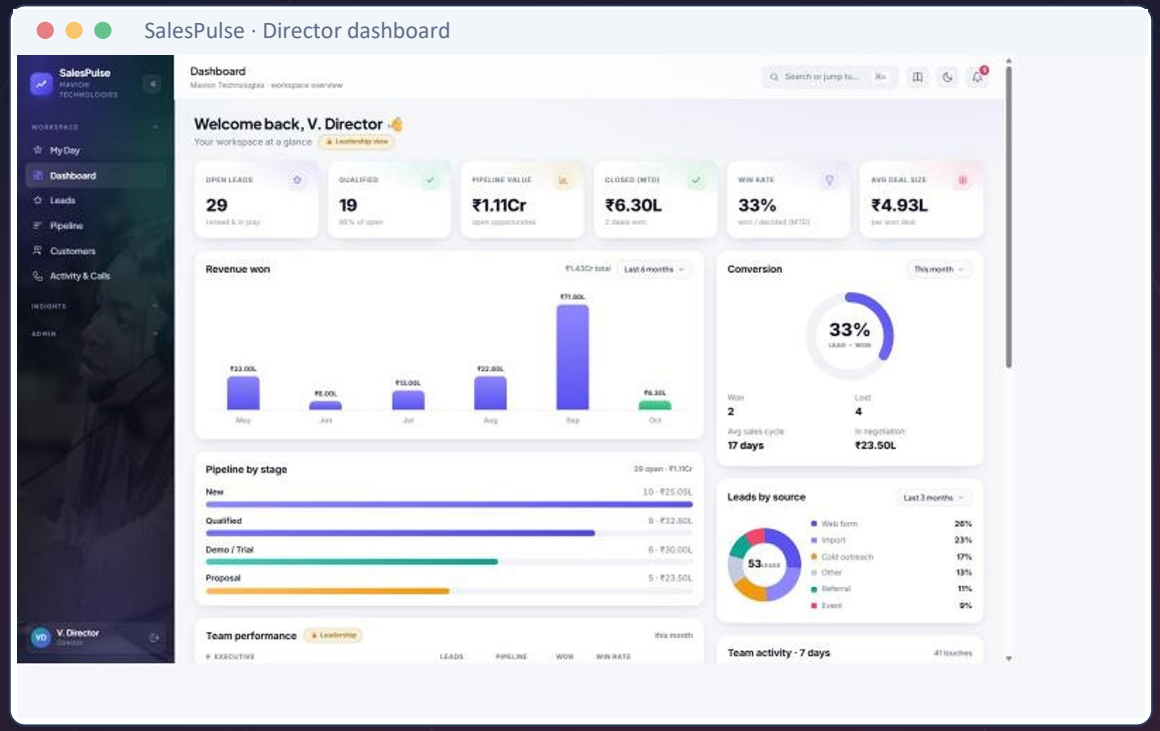

THE PROBLEM

Reps hold raw phone numbers, numbers are re-typed into spreadsheets, leaders lack live visibility, and global CRMs fit Indian billing poorly.

OUR ANSWER

A multi-tenant sales CRM with privacy-masked calling, a live weighted pipeline and reports that build themselves, made for how Indian sales teams work.

BUILT FOR **Indian sales teams · SMB & mid-market · Field and inside sales**

14
integrated modules

2-way
masked calling

GST
invoicing built in

Director dashboard: pipeline, closed value, conversion and lead sources (demo data).

Fourteen modules in one sales command center

Sell
4 modules

- My Day
- Leads
- Pipeline
- Customers & 360

Engage
3 modules

- Privacy-masked calling
- Email & WhatsApp
- Activity log & call journal

Lead
3 modules

- Command center
- Report builder
- Weekly reports

Protect & run
4 modules

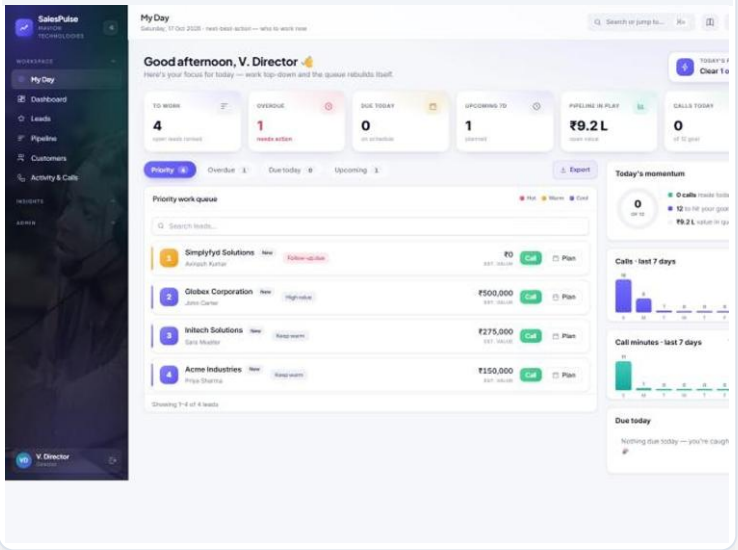

- Data protection controls
- Subscriptions & GST billing
- Native Android app
- Platform & multi-tenancy

Each company's data lives in its own database, and masking rules are enforced on the server for web, mobile and exports alike.

Your reps make the call. They never see the number.

1 My Day queue → **2 Masked call** → 3 Outcome logged → 4 Follow-up → 5 Weekly report

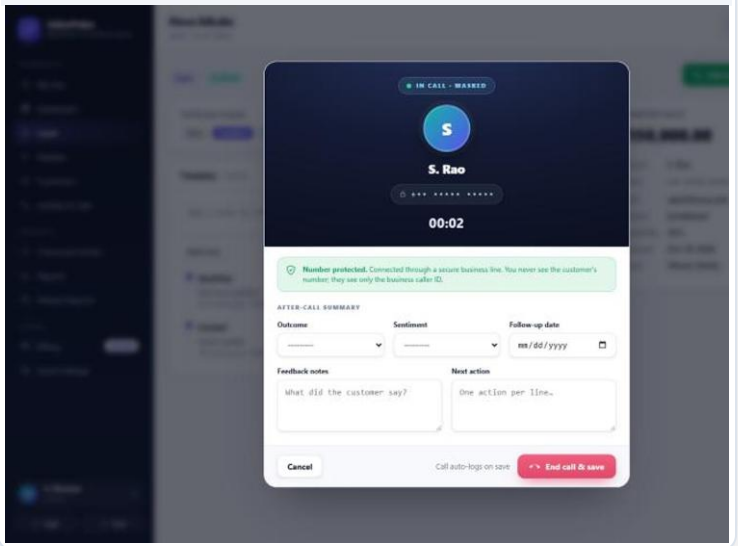

My Day

Start the day knowing who to call

My Day: KPI strip and prioritised work queue (demo data).

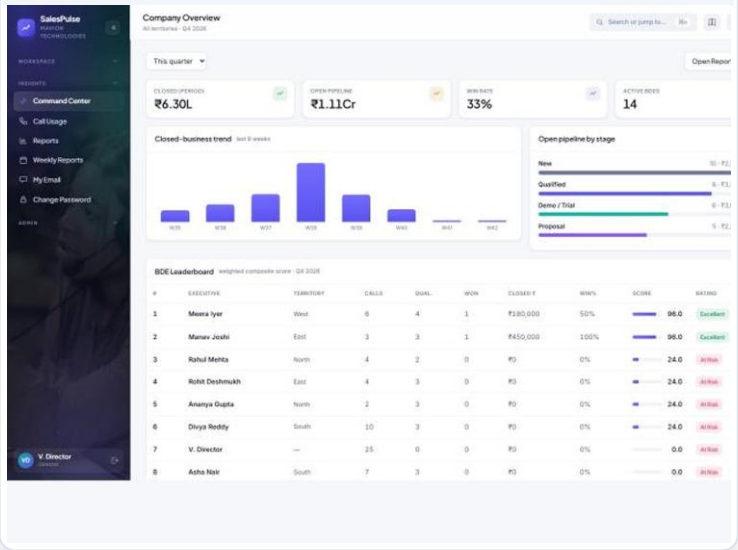

Dialer

The number stays masked

In call: one-click connect; the real number is resolved server-side (demo data).

Command center

Leaders see it live

Command center: org KPIs, trend and leaderboard (demo data).

Privacy built in, visibility built up

KEY DIFFERENTIATORS

Privacy-masked by default

Phone and email masked on web, mobile and exports.

No bulk export for reps

Lead-list and report downloads are leadership-only.

Reports that build themselves

Activity feeds the journal, command center and weekly reports.

India-first billing

INR, GST invoices and Razorpay built in.

BUSINESS VALUE

- Customer contacts stay with the company when reps leave
- Leaders see pipeline and people in real time
- No re-typing of numbers into spreadsheets
- Calling billed on actual usage, or bring your own telephony

BEST FIT

Indian sales teams whose customer relationships are their most valuable asset.

Multi-tenant SaaS | **Native Android app** | **Razorpay** | **WhatsApp Business** | **30-day free trial**

Security and governance

Deployment, scale and customisation

Implementation and support

ARCHITECTURE AND STACK

One reference architecture, shared by every product

EXPERIENCE	Web apps for every role · mobile apps · portals for parents, candidates and vendors · devices and gates
REQUEST PIPELINE	Authentication and session policy · tenant resolution · role and permission checks · audit logging · rate limits
APPLICATION	Product modules · no-code configuration · workflow and approvals · real-time updates · background jobs
DATA	A control database for tenants, plans and billing, and one dedicated database per customer

The pattern is common to all six products; implementation details differ by product.

VERIFIED TECHNOLOGY BY PRODUCT

Agastya

Django 5.1 on Python · MySQL · Daphne ASGI and Channels · Redis · Expo / React Native

PragyanNxt

Ed25519 signing · LTI 1.3 · AI visual proctoring · durable background jobs

Vortex HRMS

Django + Python · MySQL · InsightFace · Tailwind UI · REST APIs

ProtonNxt

Isolated MySQL per tenant · WebSockets · OpenAI / Gemini · HMAC-signed links

MavionLearn

Isolated MySQL per tenant · Cloudflare R2 / S3 signed media · versioned API

SalesPulse CRM

Own database per company · server-side masking · native Android

INTEGRATION CAPABILITIES

Connects to the services your teams already use

Payments & billing

SECURITY AND GOVERNANCE

Controls you can see in the product, not promises on a page

Isolation

A dedicated database per customer in all six products; no shared business tables.

Access control

Role-based access everywhere; 96 permission codes in Agastya; row-level access in SalesPulse.

Audit

Before/after audit trails, login events and append-only logs across sensitive workflows.

Sessions

Lockout after failed logins, single active sessions, sliding HttpOnly sessions, IP policies.

Data protection

Server-side masking of phones and emails; no bulk export for non-leaders; traceability watermarks.

Signed artefacts

Ed25519-signed credentials, HMAC-signed share links, signed media URLs and webhooks.

Certifications, uptime commitments and support hours are confirmed in each proposal and are not claimed in this catalogue.

DEPLOYMENT, SCALABILITY AND CUSTOMISATION

Run it where you need it, grow it without re-platforming

Deployment

- Cloud SaaS, multi-tenant, for every product
- Private cloud and on-premise for enterprise customers (MavionLearn, PragyanNxt)
- Managed hosting, with backup and disaster recovery
- Web plus native mobile apps where field work needs them

Scalability

- New customers provisioned from platform consoles in minutes
- A database per customer, so tenants scale independently
- Real-time layers and background jobs for heavy work
- Rate limits and quotas protect shared capacity

Customisation

- Dashboard builders, custom fields and candidate schemas
- No-code workflows, approvals and escalations
- Feature toggles and module switches per customer
- White-label branding on apps, exports and certificates

IMPLEMENTATION AND SUPPORT

A predictable path from first demo to go-live, and beyond

ENGAGEMENT PATH

1 Demo

See the product on scenarios that match yours.

2 Pilot

Prove value on your own data with one team or campus.

3 Proposal

Scope, plan and commercials confirmed in writing.

IMPLEMENTATION METHOD

Discover

Requirements, process mapping, design and kickoff

Configure

Setup, configuration, integrations and data migration

Validate

User acceptance, performance testing and security review

Go live

Training, launch support, documentation and handover

Support and maintenance

One channel for sales and support: communications@maviontech.com · +91 91580 08002. Managed hosting with backup and disaster recovery, continuous product updates, and support hours and service levels agreed in each contract.

Indicative method from the MavionTech company profile; timelines are confirmed during scoping.

05

Business and investment

Our portfolio strategy and the opportunities ahead, with achievements and ambitions kept clearly apart.

IN THIS SECTION

Portfolio strategy

Achievements and ambitions

Product-market opportunities

Commercial models

Partnerships, growth and direction

PORTFOLIO STRATEGY

Vertical depth on a shared foundation

Vertical depth

Each product is a complete system for one buyer, not a module of a generic suite: schools, HR, recruitment, learning, assessment and sales.

Shared foundation

Isolation, access control, audit, configuration and billing patterns are reused across products, so each new product starts further ahead.

India-first fit

Statutory payroll, GST, INR pricing and local payment and messaging rails are built in rather than added later.

Multi-product accounts

Natural pairings let one customer grow across products: assessment in hiring, certification in learning, learning beyond HR.

Endorsed-brand model: every product keeps its own name and accent, and every product carries the same MavionTech standard.

What exists today, and what we are working towards

ACHIEVED · EVIDENCED

- Launched as an independent product company in 2025
- Six enterprise platforms with working product screens, shown in this catalogue
- Multi-tenant consoles that provision customers with a dedicated database
- Mobile apps in four products: Agastya, Vortex, ProtonNxt, SalesPulse
- Agastya codebase: 19 apps, 128 data models, 257 automated tests (Nov 2026 review)
- Published Vortex list prices and live trials for four products

AMBITION · NOT YET ACHIEVED

- Roadmap features: online fee payment, payroll and live bus tracking in Agastya; engagement surveys, benefits and BI in Vortex
- Evidence for uptime, support-hour and certification statements
- Channel, implementation and technology partnerships
- Deeper connections between products, beyond today's pairings
- A complete published catalogue covering the wider MavionTech portfolio

No revenue, customer counts, market size or valuation are stated: none is evidenced for external use.

PRODUCT-MARKET OPPORTUNITIES

Where each product meets a clear buying trigger

PRODUCT	SEGMENT	BUYING TRIGGER	OUR ANSWER
Agastya	School groups digitising operations	Registers, spreadsheets and chat groups across campuses	Replace fragmented tools with one governed system
PragyanNxt	Organisations that must defend results	Remote hiring tests and certificates that are questioned	Integrity scoring and verifiable credentials
Vortex HRMS	Employers paying people correctly	Attendance-to-payroll reconciliation and statutory change	One record from attendance to payslip
ProtonNxt	Firms that recruit for many clients	Hiring spread over inboxes, sheets and agencies	A structured, AI-assisted pipeline with client insight
MavionLearn	Enterprises that must prove skills	Audits and leadership asking for evidence of capability	Skill matrix and self-running compliance
SalesPulse CRM	Sales teams protecting customer data	Reps leaving with contacts; numbers re-typed by hand	Masked calling and reports that build themselves

COMMERCIAL MODELS

Recurring subscription revenue, priced the way each buyer buys

Per employee, per month, by module

Established

Published list prices: ₹45 base; modules from ₹9 to ₹55; GST extra.

Per user, per month, annual billing

Established model

INR pricing with volume discounts; tier matrix being confirmed.

Platform tiers by assessment volume

Established model

Basic 500, Plus 5,000, Pro 25,000 assessments a month; AI credits and proctoring capacity added as needed.

Per seat, plus calling by usage

Established model

Plans by seats and lead quota; calling ₹0.50 per leg-minute, or bring your own telephony.

Subscription plans per school

Model in product

Services alongside subscriptions: implementation, data migration and managed hosting.

Prices shown are those already published in approved materials; all others are confirmed in each proposal.

Where we invite partners to grow with us

PARTNERSHIP MODELS WE ARE OPEN TO

Channel partners

Resell and refer MavionTech products in your region or vertical.

Implementation partners

Deliver configuration, migration and training for customers.

Technology partners

Integrate your service with our platforms through APIs and webhooks.

No partnerships are announced in this catalogue. Integrations listed earlier are technical, not commercial.

FUTURE PRODUCT DIRECTION

From labelled product roadmaps: planned, not yet available

Agastya

Online fee payment, payroll, multi-channel broadcast, scheduled reports, live bus tracking, teacher and parent apps

Vortex HRMS

Engagement surveys, benefits administration, advanced BI, native manager app; later predictive analytics and an app marketplace

MavionLearn

Mobile learning experience, building on today's versioned API

WHY MAVIONTECH

Six reasons to build on MavionTech

01

Real products, shown as they are

Every screen in this catalogue is a real product capture with demo data.

02

Your data in its own database

Isolation by design in all six products, not a filter on shared tables.

03

Governed by design

Role-based access, audit trails and session controls you can inspect.

04

Configurable without code

Administrators shape dashboards, fields, workflows and branding.

05

Built for how India does business

GST, statutory payroll, INR pricing and local messaging rails.

06

One partner, six platforms

One engineering standard and one point of contact across the portfolio.

MavionTech
Momentum with Vision

LET'S BUILD MOMENTUM TOGETHER

Momentum for your operations. Vision for what comes next.

Choose a platform, see it on your own data, and start with a pilot. Partners and investors: request a portfolio briefing.
