ENTERPRISE SALES OVERVIEW

Agastya

CLOUD SCHOOL ERP

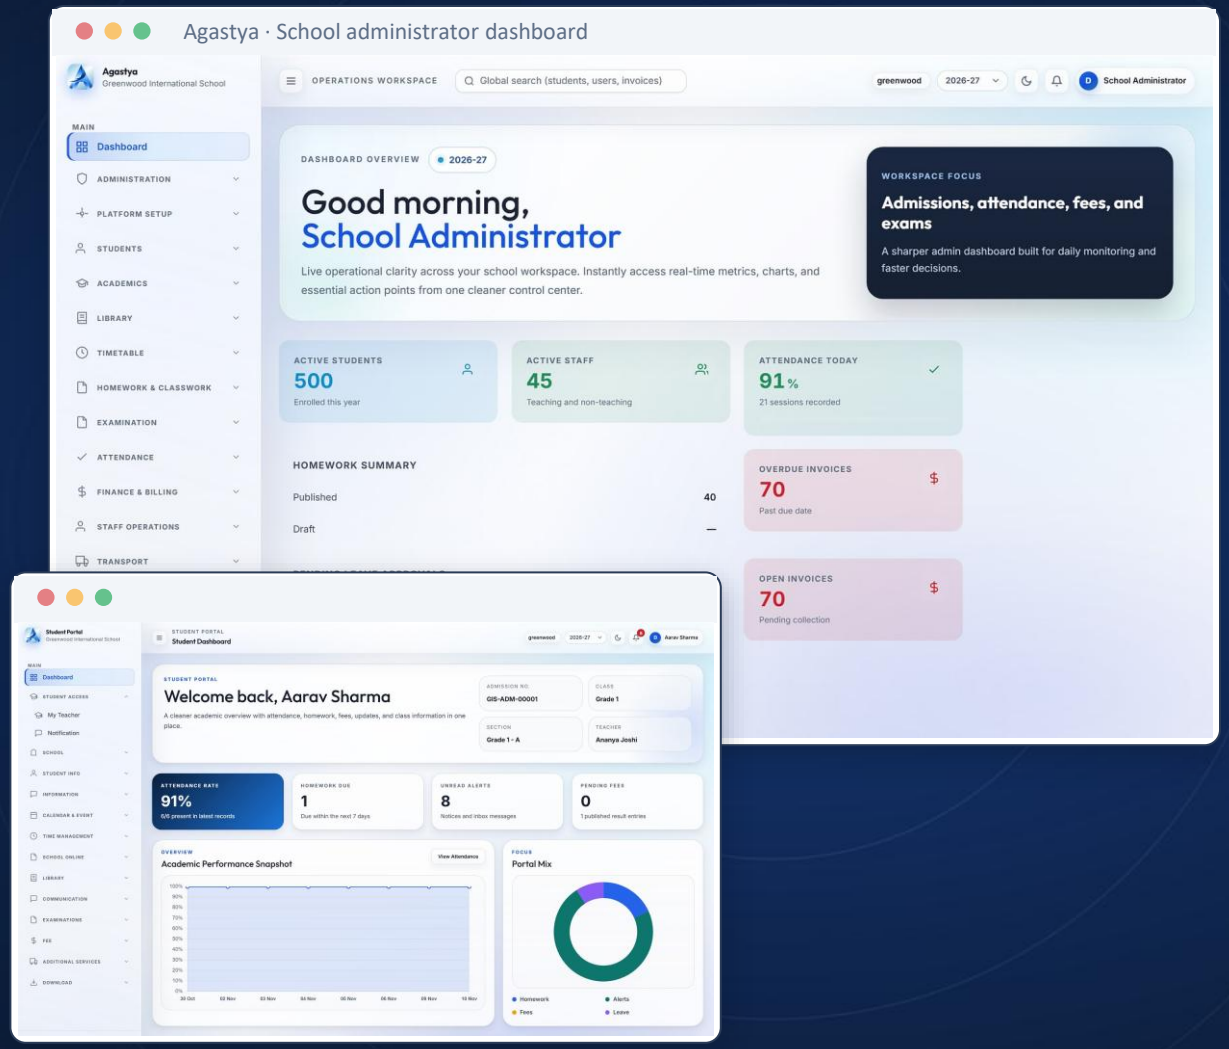

One operating system for every school in your group

From admission to report card, fee to fleet: every department, persona and campus on one governed platform, with each school's data in its own database.

19 integrated modules

8 role cockpits

Database per school

THE CHALLENGE

School groups still run on registers, spreadsheets and WhatsApp

Fragmented tools

Admissions in one tool, fees in another, attendance on paper. Nothing reconciles, and every report is a manual export.

Leadership flies blind

Principals and group heads wait days for numbers that should be live: attendance, collections, marks and leave.

Data risk across campuses

Student records sit in shared spreadsheets and personal phones, with no access control and no audit trail.

Parents out of the loop

Updates are scattered across personal WhatsApp groups, paper circulars and calls to the front office.

THE PLATFORM

Meet Agastya: one platform for every school operation

Run every operation

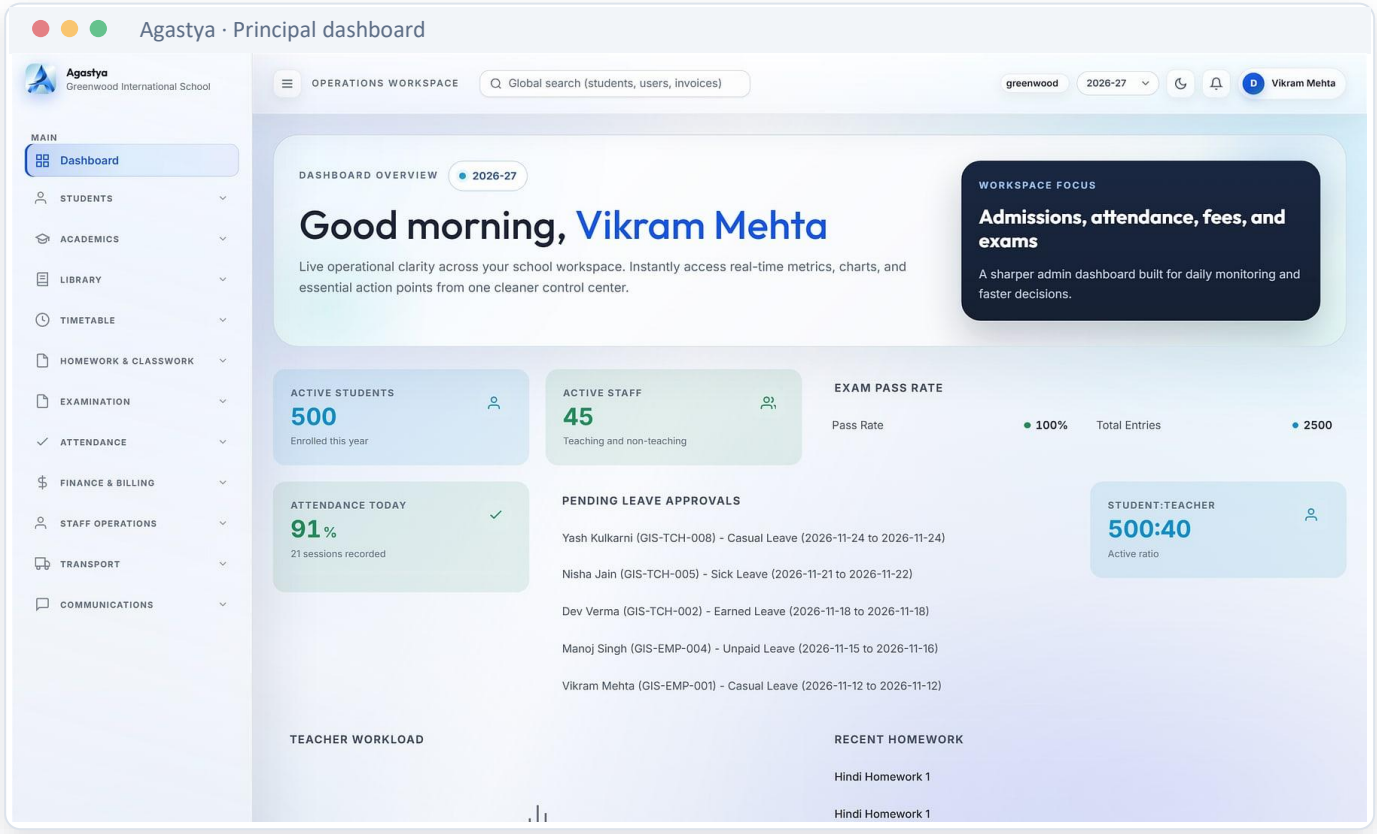

Admissions, academics, attendance, exams, fees, HR, transport, library, hostel, inventory and front office on one data model.

See every school

Live, role-specific cockpits for group heads, principals, teachers, accountants, parents and students.

Govern every record

A dedicated database per school, 96 permission codes and a before/after audit trail.

Principal cockpit: school-wide KPIs, exam pass rate, pending leave approvals and teacher workload (demo data).

AT A GLANCE

Enterprise depth you can verify in the codebase

19
integrated application modules

128
data models

456
web routes and screens

96
granular permission codes

36
pluggable dashboard widgets

8 + custom
system roles plus unlimited custom roles

257
automated tests, incl. E2E and accessibility

~115K
lines of product code

Source: review of the Agastya source tree, November 2026 (19 Django apps; 242 unit/integration tests + 15 Playwright end-to-end journeys with axe-core accessibility checks).

PRODUCT MAP

19 modules across six pillars, on one data model

Command & governance
3 modules

- Role dashboards & builder
- Administration & RBAC
- Platform setup & branding

Academics
6 modules

- Admissions & student lifecycle
- Academics & syllabus
- Timetable & substitution
- Attendance
- Homework & classwork
- Exams & report cards

Operations & finance
5 modules

- Fees & billing
- Staff operations & HR
- Transport
- Inventory & procurement
- Service desk & front office

Campus life
2 modules

- Library
- Hostel, health & discipline

Engagement
2 modules

- Communications & WhatsApp inbox
- Student & parent portals, student app

Platform
1 module

- Multi-tenant SaaS console, plans & billing

One data model. Attendance feeds report cards, fee plans feed invoices, routes feed manifests, and every role sees the same live record.

BUILT FOR EVERY PERSONA

Each role gets exactly the screens it needs

Group / platform admin

Provision schools, plans and subscriptions from one console.

School admin

Configure roles, modules, branding, numbering and master data.

Principal

School-wide KPIs, approvals, pass rates and results.

Teacher

Timetable, attendance, marks and homework for own sections.

Accountant

Invoicing, collections, dues, receipts and the ledger.

Operations staff

Front office, library, hostel, transport and store.

Parent

Children, homework feed, results and school notices.

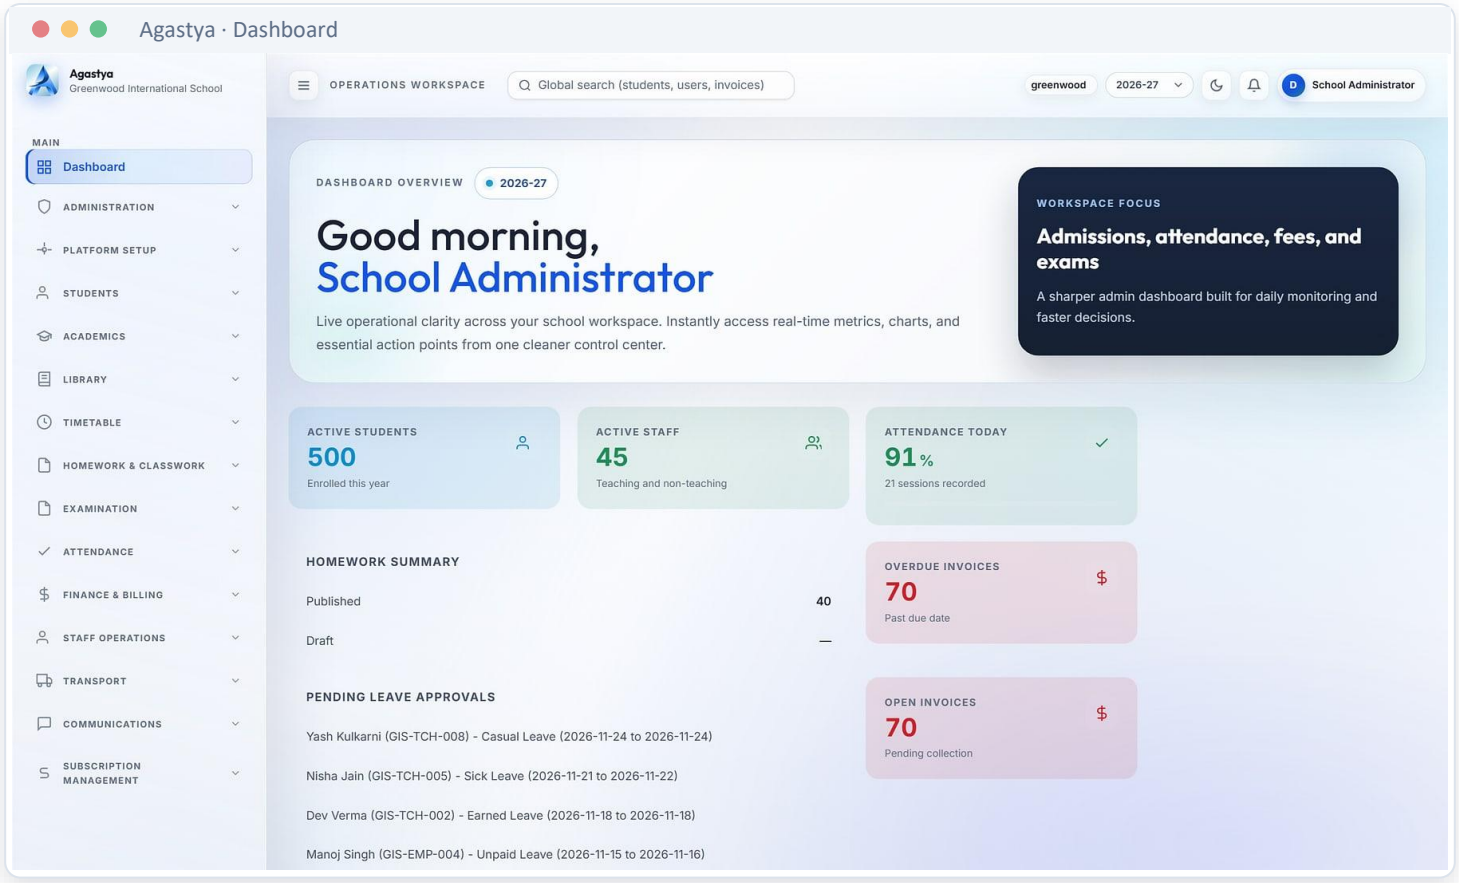

Student

Web portal and mobile app for the whole school day.

Eight system roles ship out of the box; schools can add unlimited custom roles with scoped assignments.

COMMAND CENTRE

A live command centre for every school

School administrator dashboard: 500 students, 45 staff, 91% attendance today, 70 overdue invoices (demo data).

Live KPIs

Active students, attendance today, overdue invoices and student-teacher ratio.

Action queues

Pending leave approvals, open invoices and homework status in one view.

Scope and search

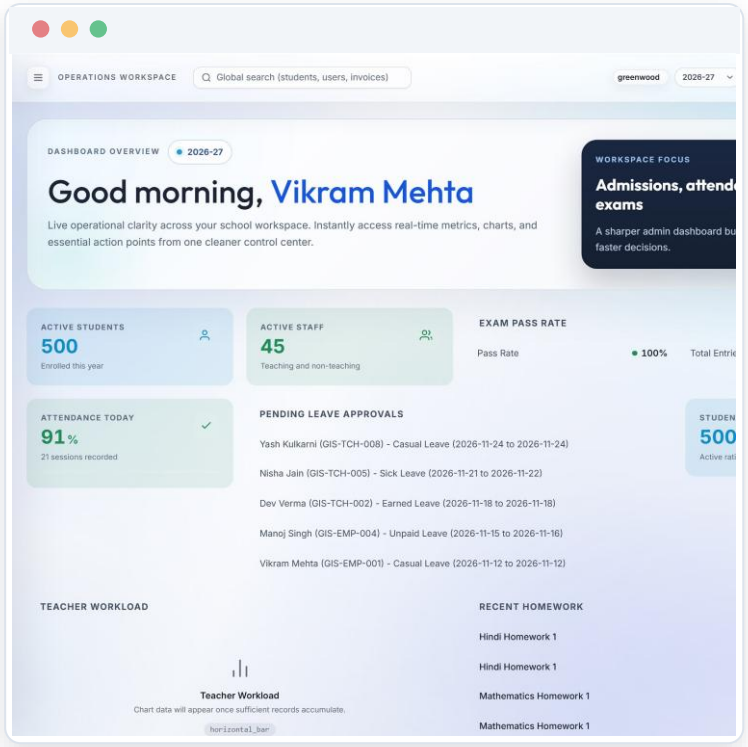

Switch campus and academic year; search students, users and invoices globally.

Always current

Widgets load asynchronously and refresh without reloading the page.

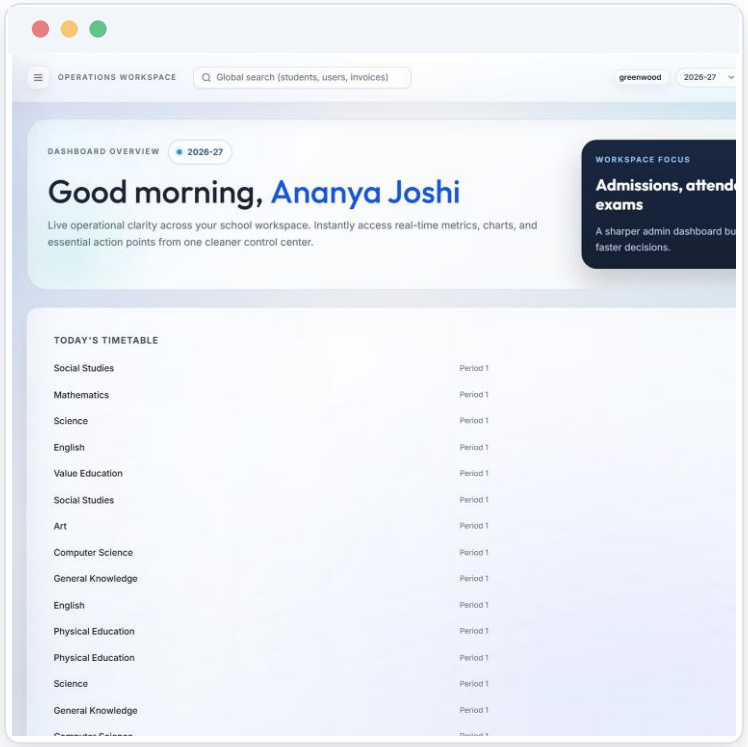

ROLE-BASED EXPERIENCE

One login, a different cockpit for every role

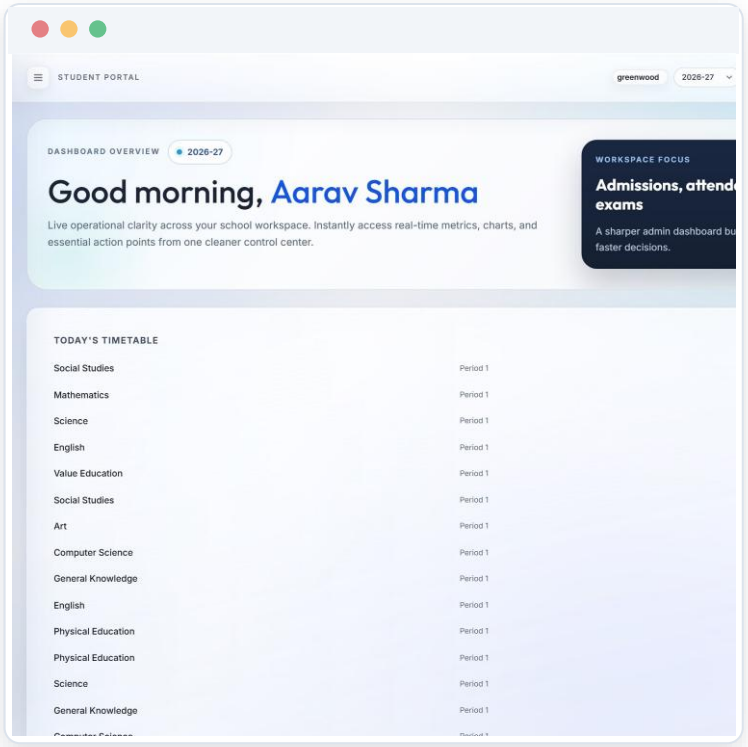

Principal

School-wide KPIs, exam pass rate, leave approvals and teacher workload.

Teacher

Today's timetable across classes and rooms, with the day's teaching load.

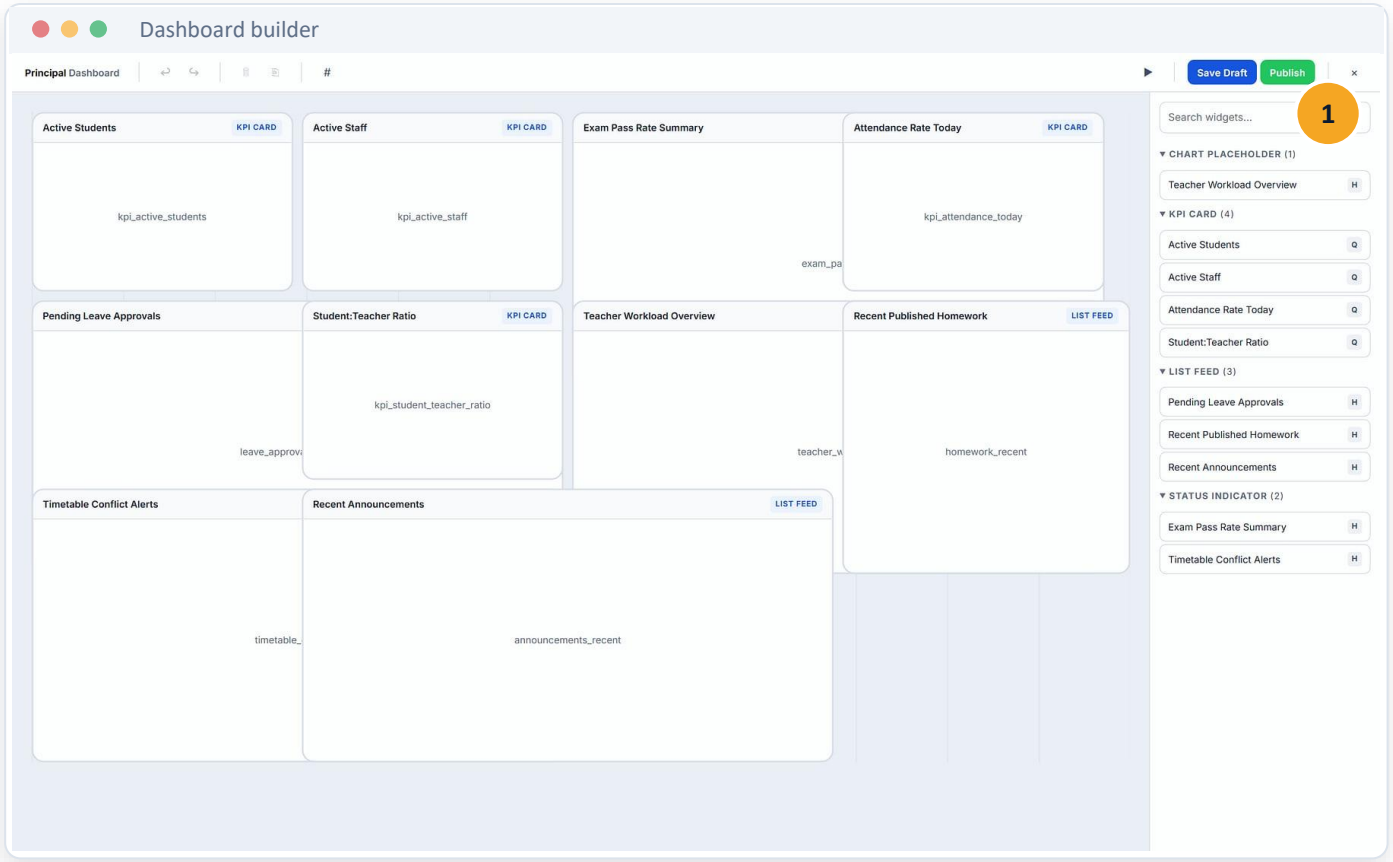

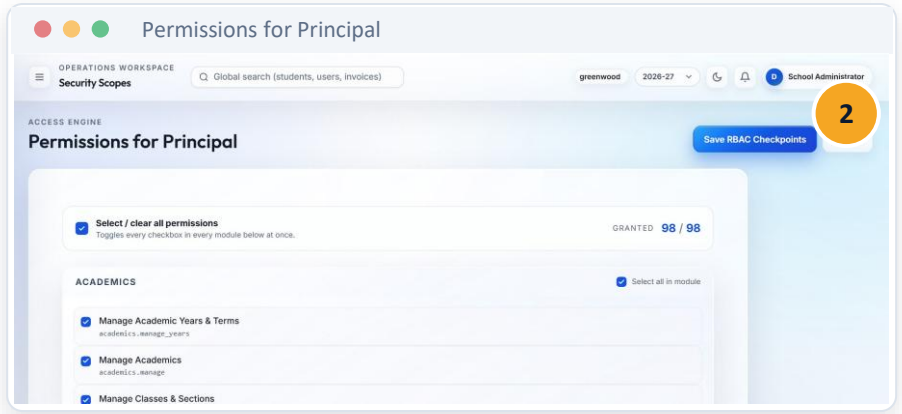

Student

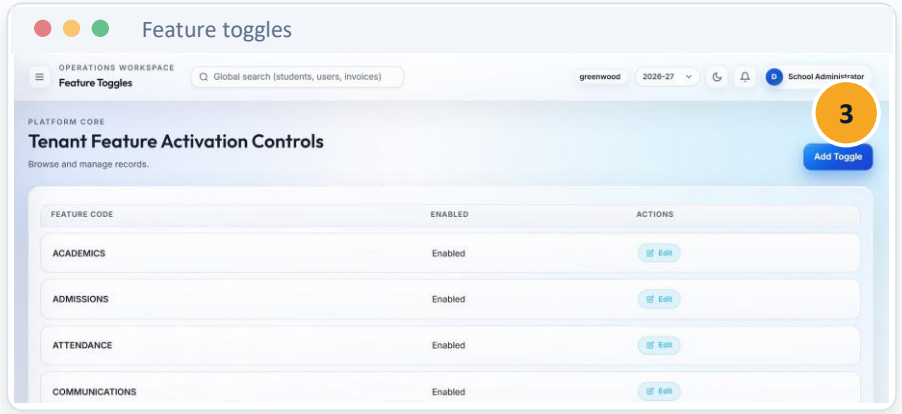

Today's periods and the student's own day at a glance.

CONFIGURABLE BY DESIGN

Leaders reconfigure the platform without developers

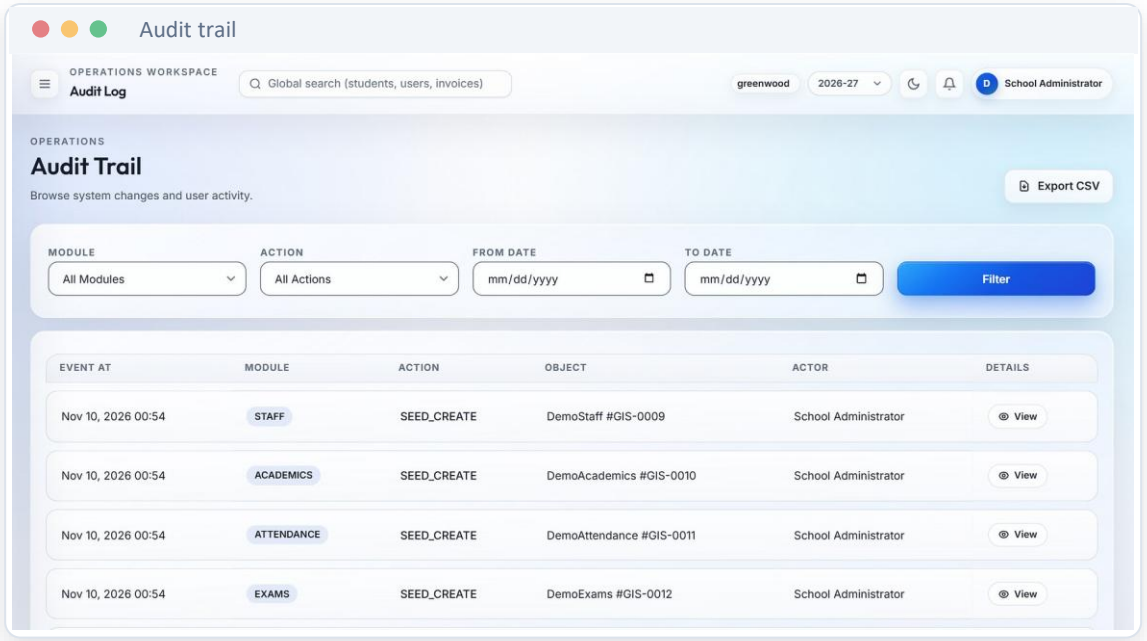

1 Dashboard builder: 36 widgets; draft, publish, revert

2 Permission matrix: 96 codes across 15 module groups

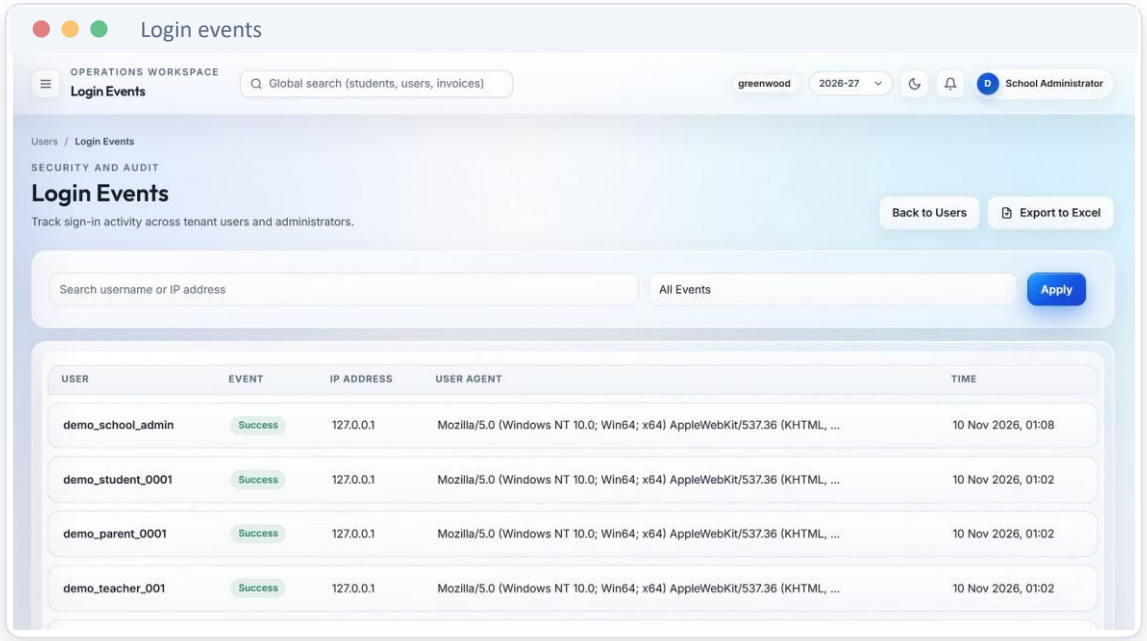

3 Feature toggles switch modules on per school

GOVERNANCE & SECURITY

Every action traceable, every account protected

Audit log: filter by module, action and date; CSV export.

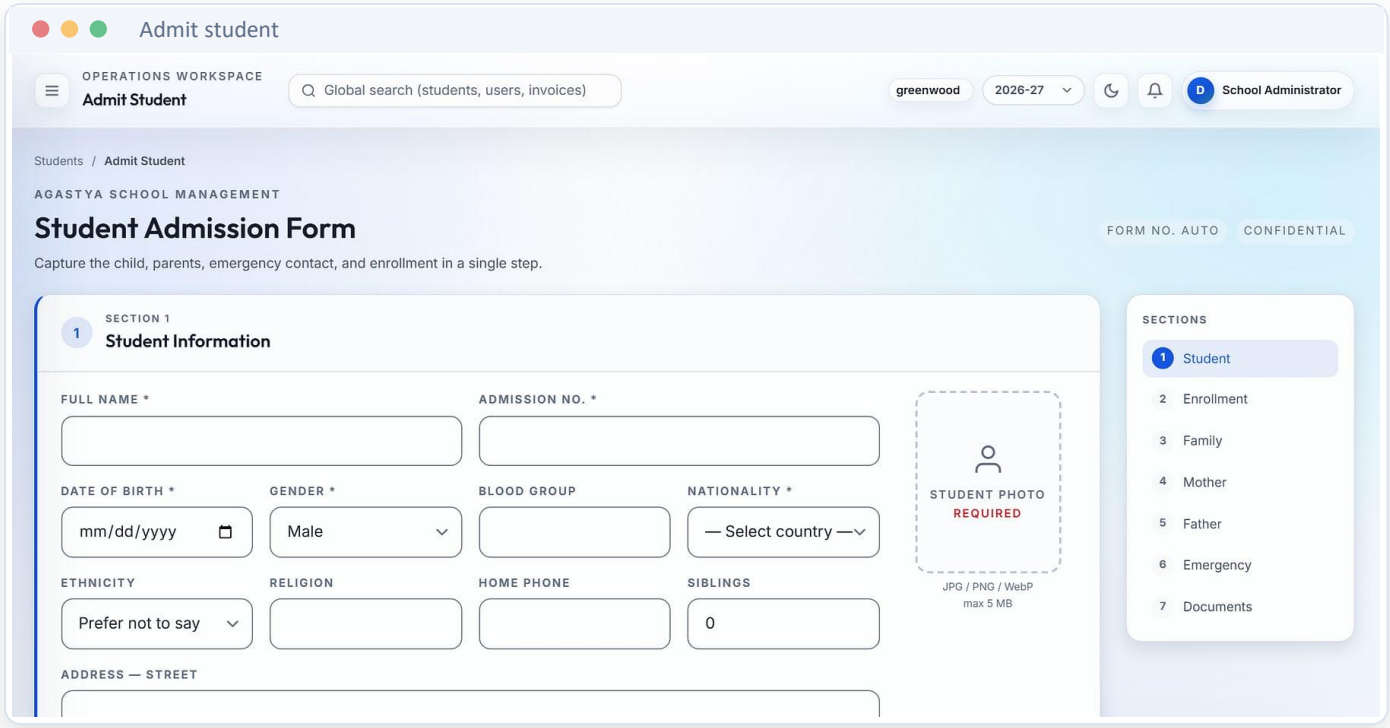

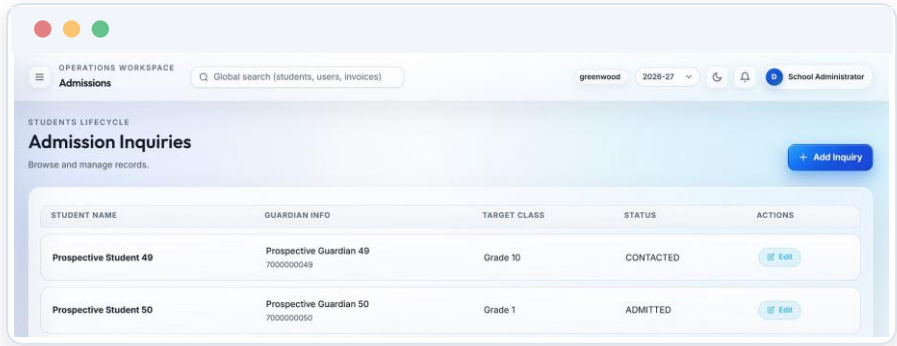

Login events: success and failure with IP address and device.

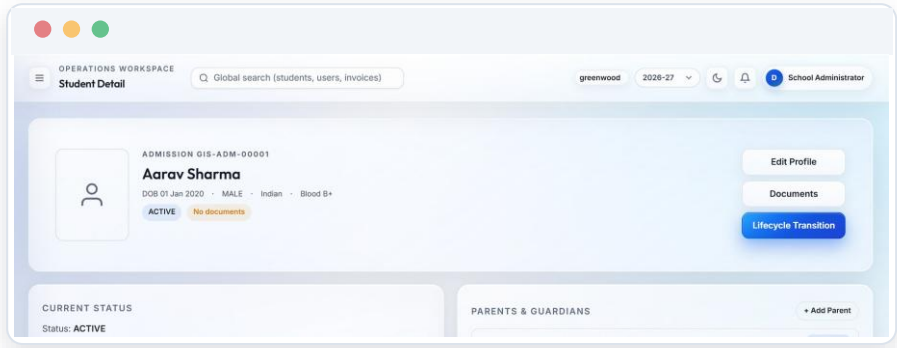

- ✓ Before/after audit values
- ✓ Lockout after 3 failed logins
- ✓ One active session per user
- ✓ 4-hour sliding HttpOnly sessions
- ✓ 96 permission codes, scoped roles
- ✓ Signed webhooks, expiring links

STUDENT LIFECYCLE

Admit a student in one screen, keep one record for life

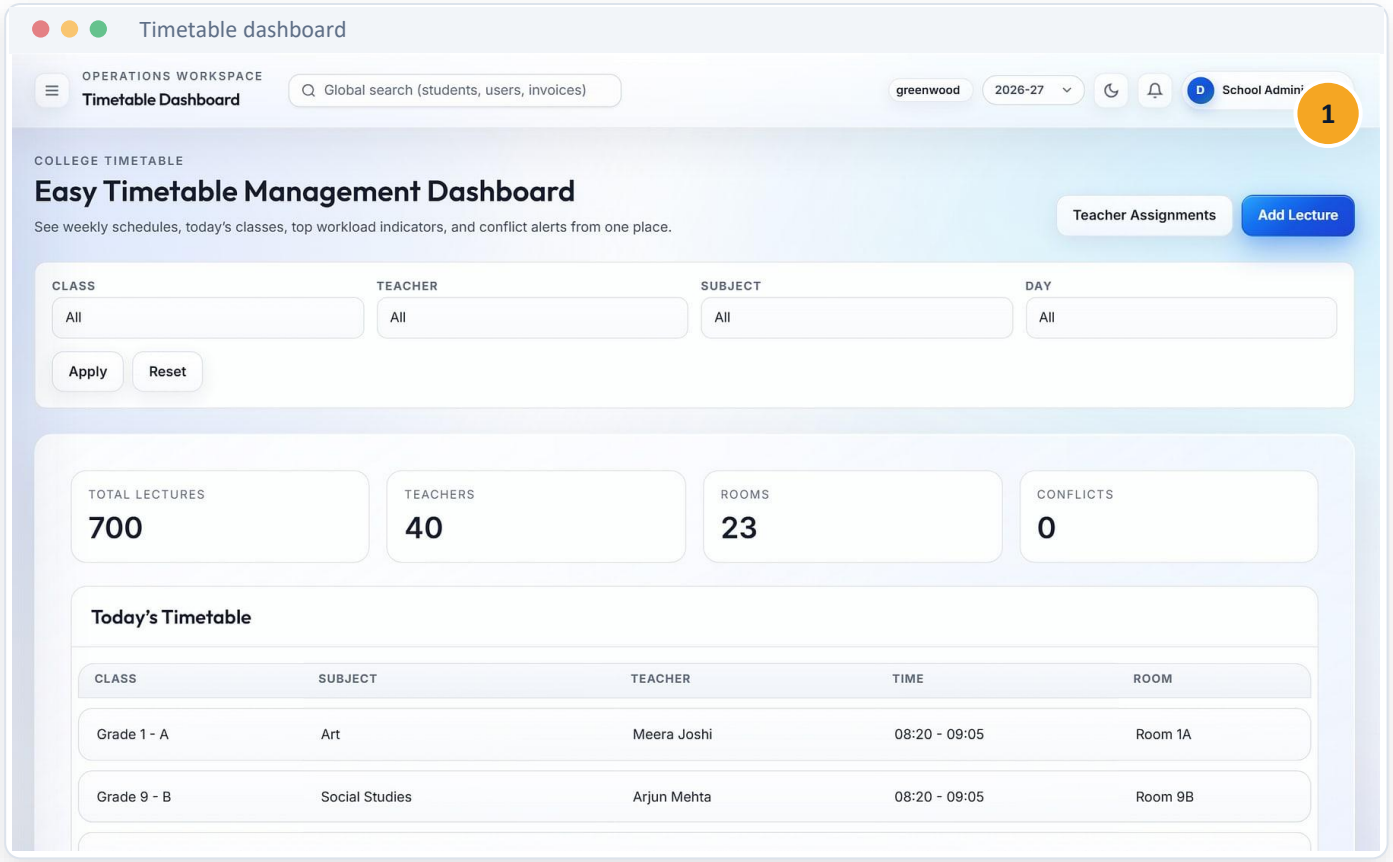

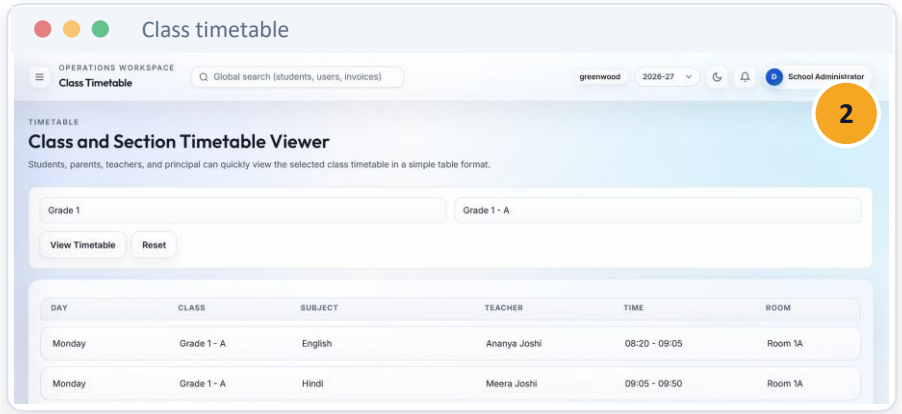

1 Inquiry → **2 Admit & enrol** → 3 Guardian documents → 4 Student 360 → 5 Promote · transfer · exit

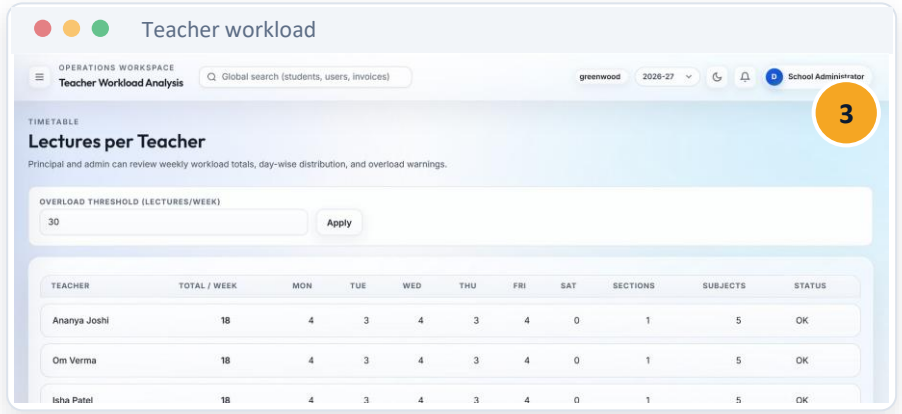

Single-screen admission captures student, enrolment, guardians and emergency contact in one step. Guardians upload documents through a link sent by SMS, email or WhatsApp, valid for 7 days, with no login needed.

TIMETABLE & SUBSTITUTION

Clash-free timetables, and every absence covered by 9 AM

1 Timetable dashboard: 700 weekly lectures, 40 teachers, 23 rooms, zero conflicts (demo data)

2 Class and section timetable viewer

3 Teacher workload with overload thresholds; substitutions suggest free teachers

ATTENDANCE

Attendance in seconds per class, records that stand up to audit

Quick capture

Card or list mode: everyone starts present; tap to mark absent or late.

Synced to the timetable

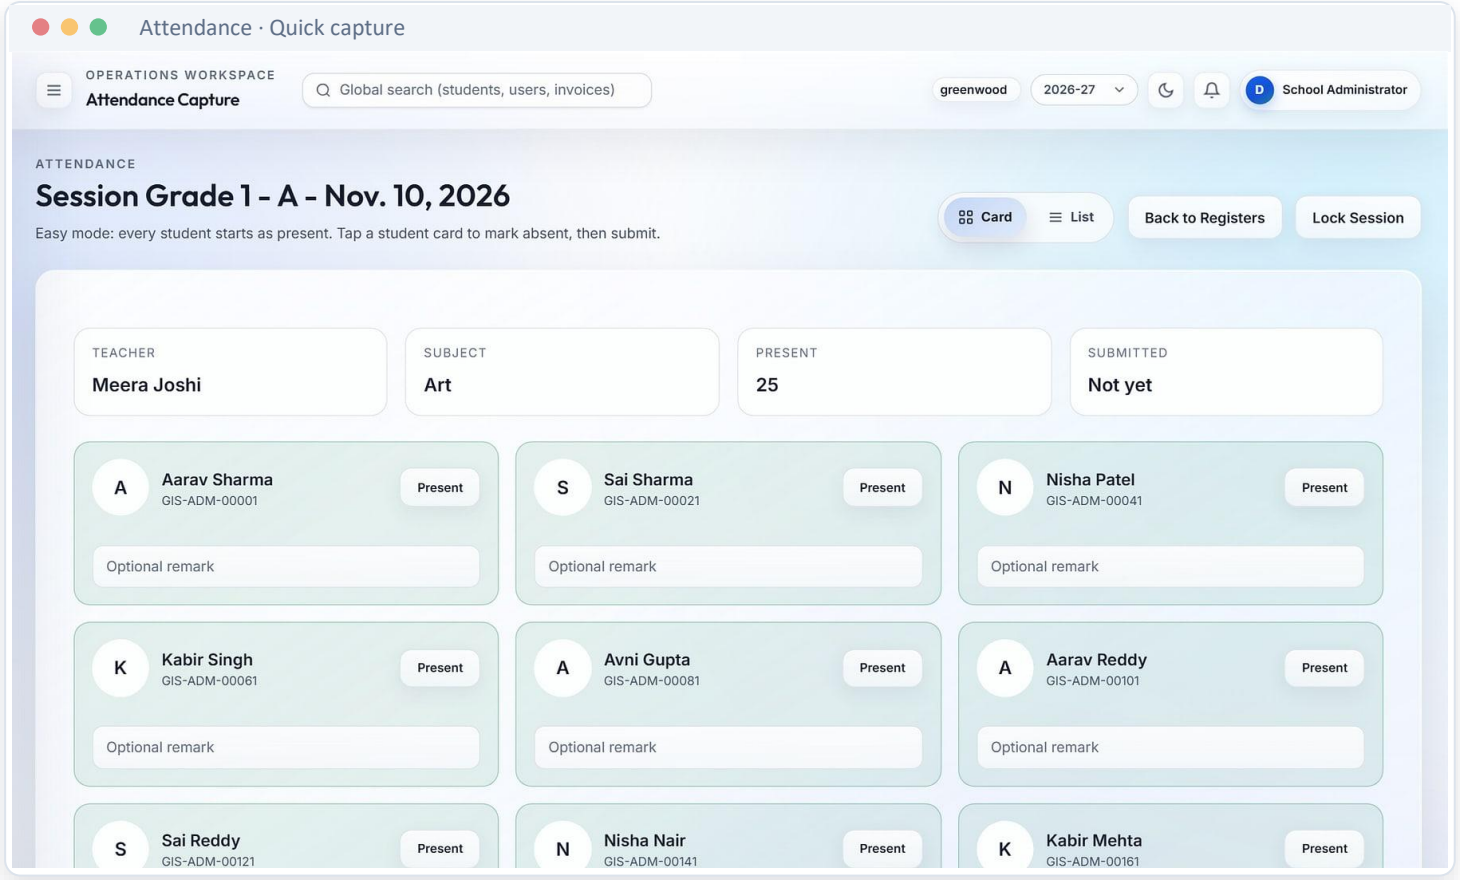

Sessions follow the timetable; teachers see only their sections.

Lock and correct

Sessions lock; corrections go through an audited workflow.

Leave and reports

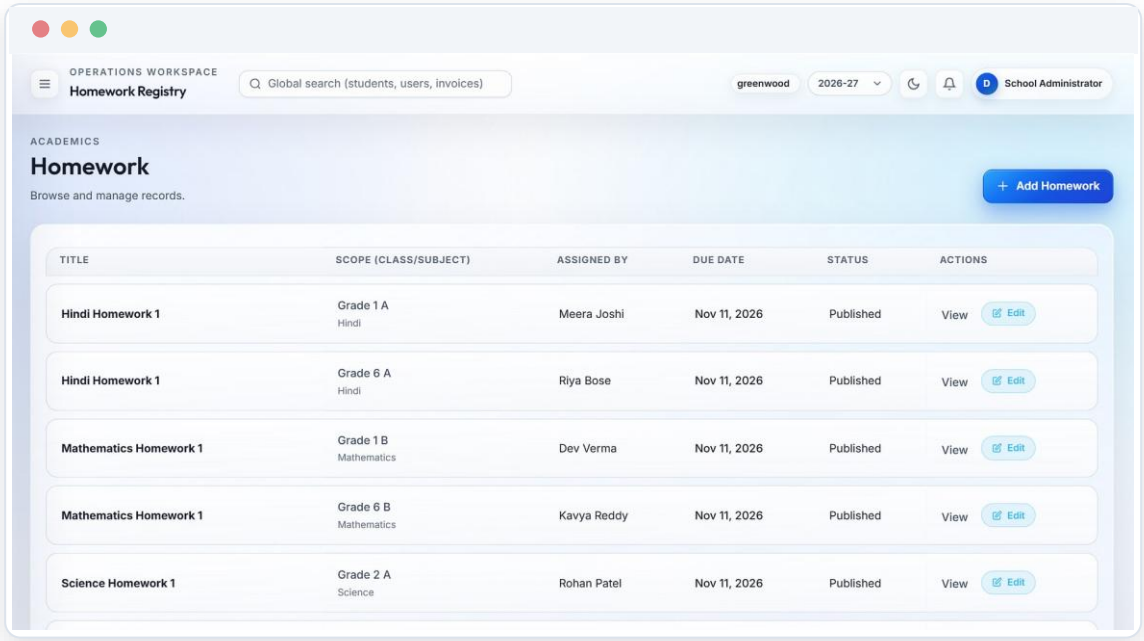

Student leave approvals, daily registers, section summaries and Excel export.

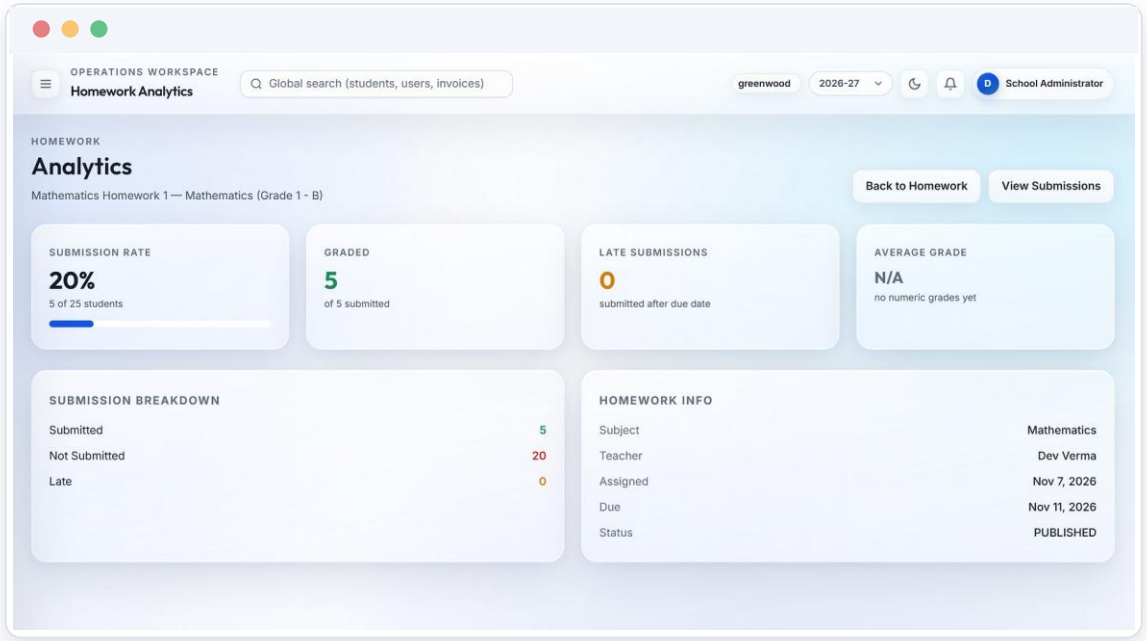

Quick capture for Grade 1-A: tap exceptions, then submit and lock the session.

HOMEWORK & CLASSWORK

Learning continues at home, with data teachers can act on

Homework registry by class, subject and teacher.

Per-assignment analytics: submission rate, graded and late work.

Targeted audiences

Whole section or selected students.

Read receipts

See who opened each assignment.

Bulk grading

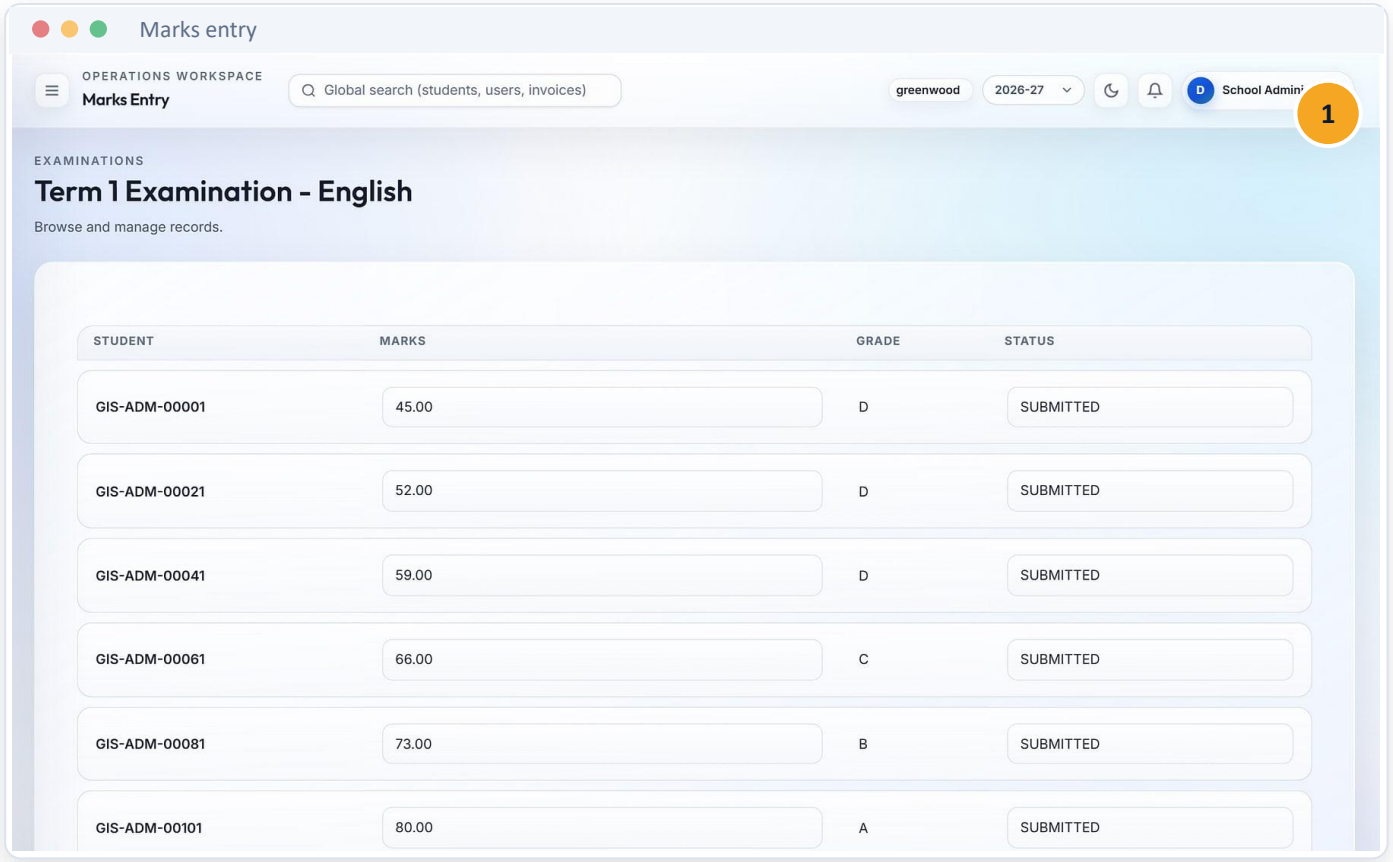

Grade a whole class in one grid.

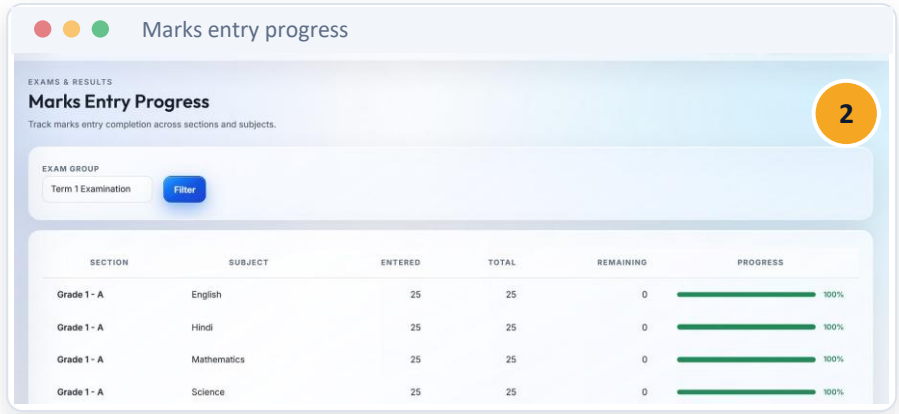

Parent feed

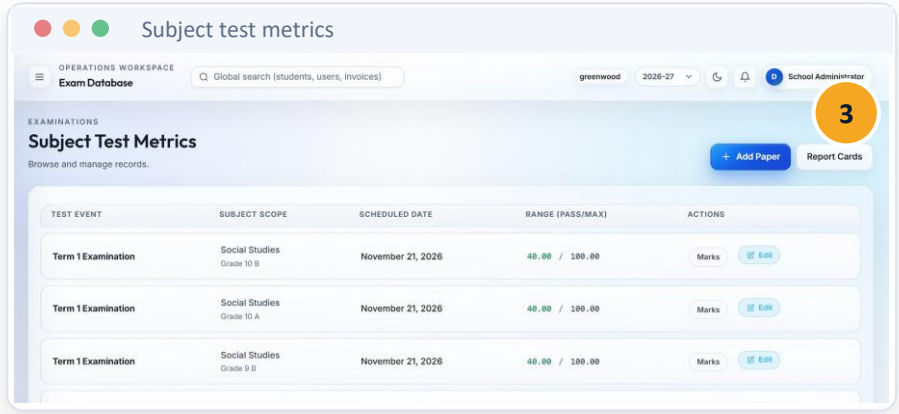

Parents follow every assignment.

EXAMS & ASSESSMENT

Results day in hours, not weeks

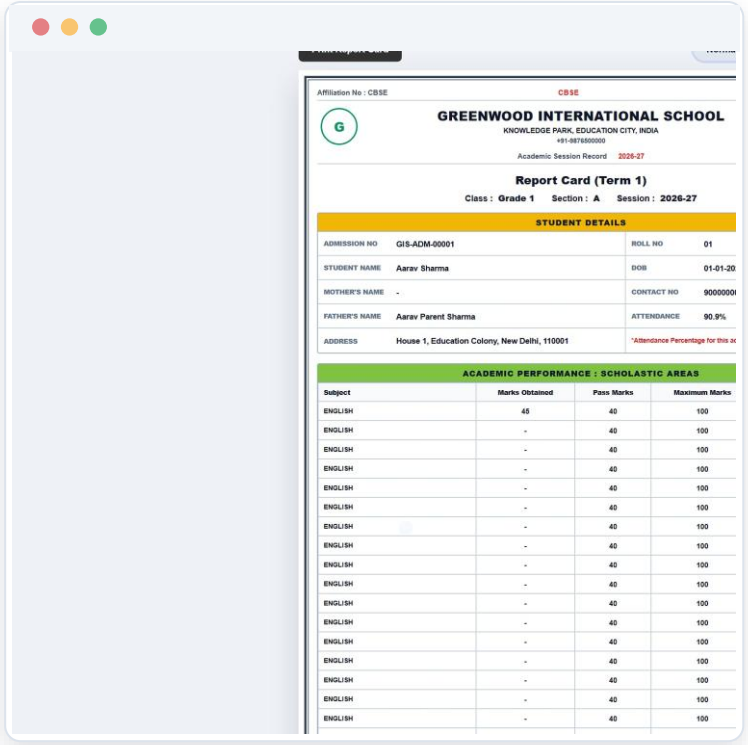

1. Grid marks entry, restricted to the teacher's own sections, with automatic grading
2. Completion tracker shows who still has marks to enter
3. Exam events, subject papers, grading scales and admit cards are configurable

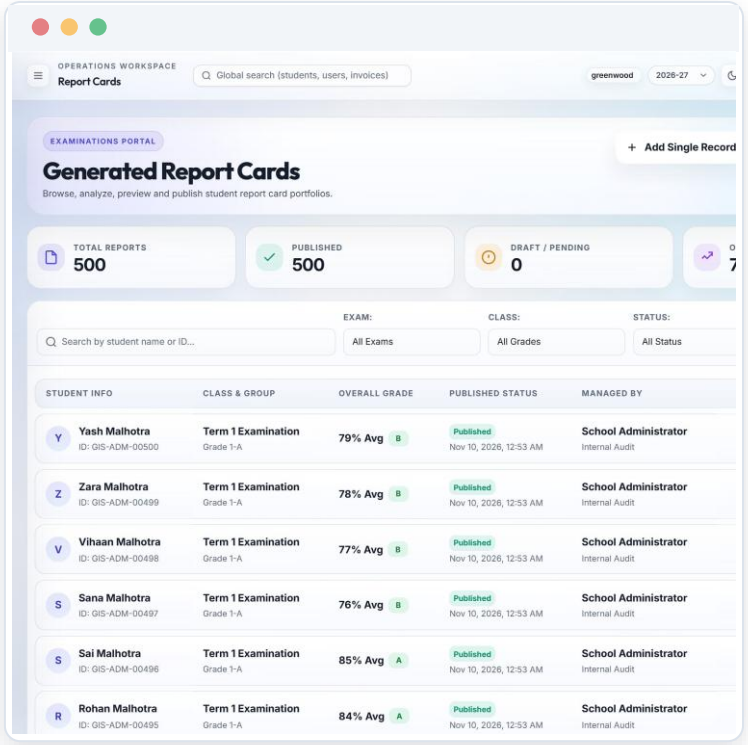

REPORT CARDS & ANALYSIS

Branded report cards, published in one click

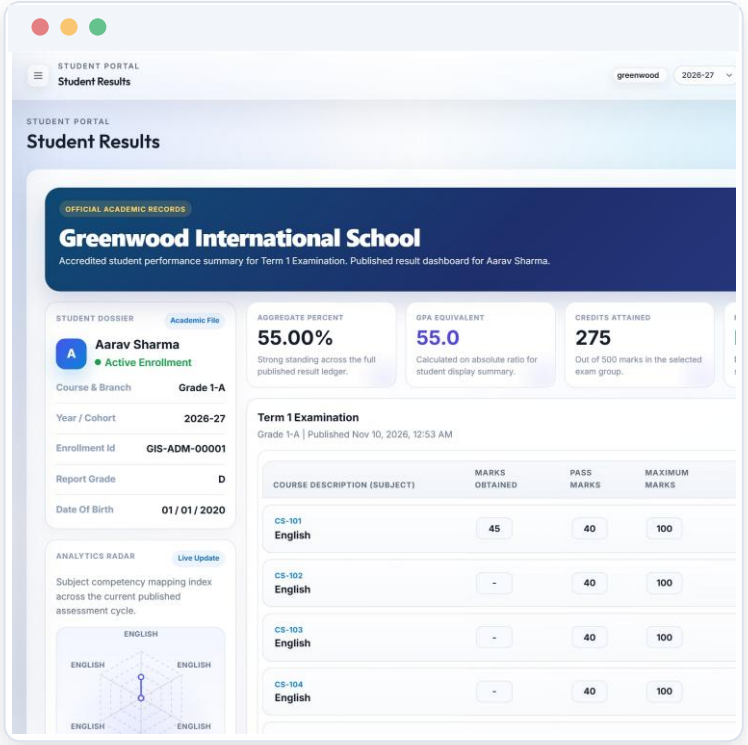

Printable report card

School identity, student details, marks, attendance %, remarks and official signatures.

Publish control

Generate in batch, then publish individually or all at once.

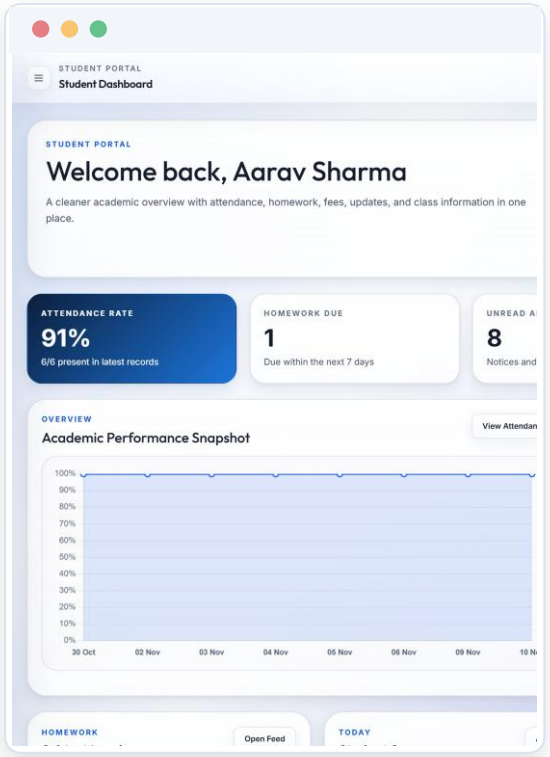

Families see results

Students and parents view results with a performance radar and PDF download.

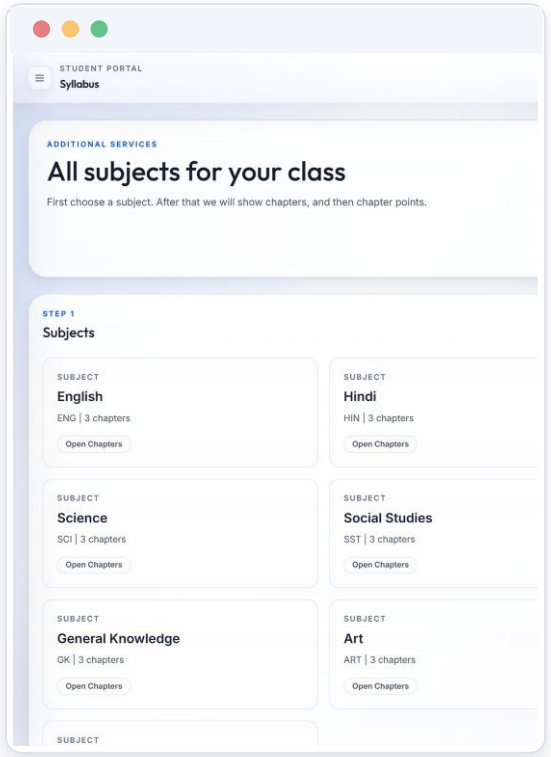

STUDENT & PARENT PORTALS

The school in every family's pocket

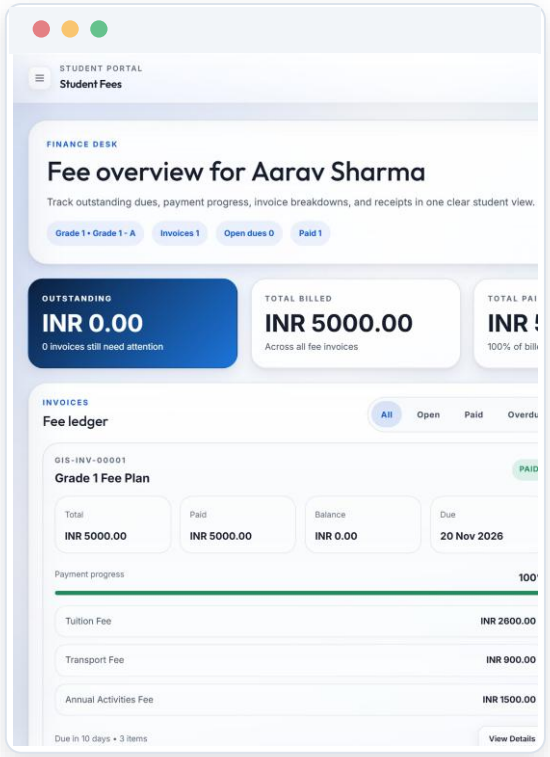

Student portal

Attendance rate, homework due, alerts and a performance snapshot.

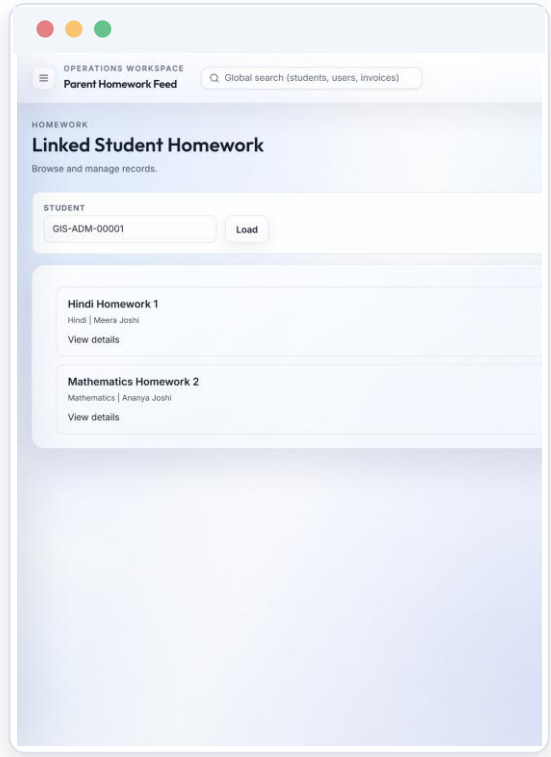

Syllabus

Every subject's chapters and coverage points.

Fee ledger

Balances, invoices and payment history.

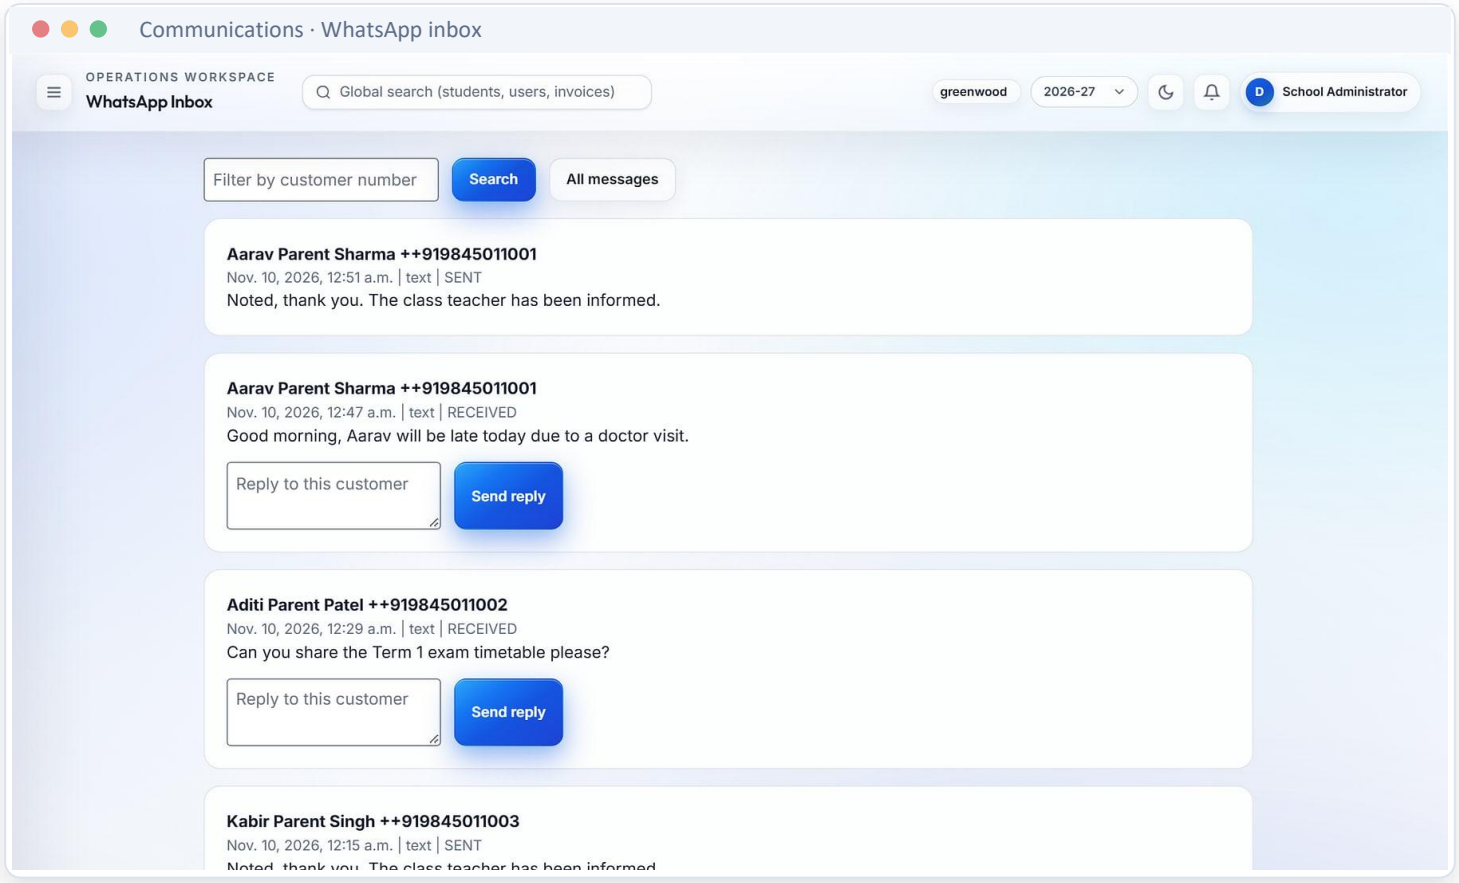

Parent feed

Each child's homework and status, in one place.

COMMUNICATIONS

One school-owned channel to every parent

WhatsApp Business inbox: parent messages with in-line replies (demo data).

Two-way WhatsApp inbox

Inbound parent messages via the Meta Cloud API; staff reply from the web.

Targeted broadcasts

School-wide, or by role, class or section.

Real-time notifications

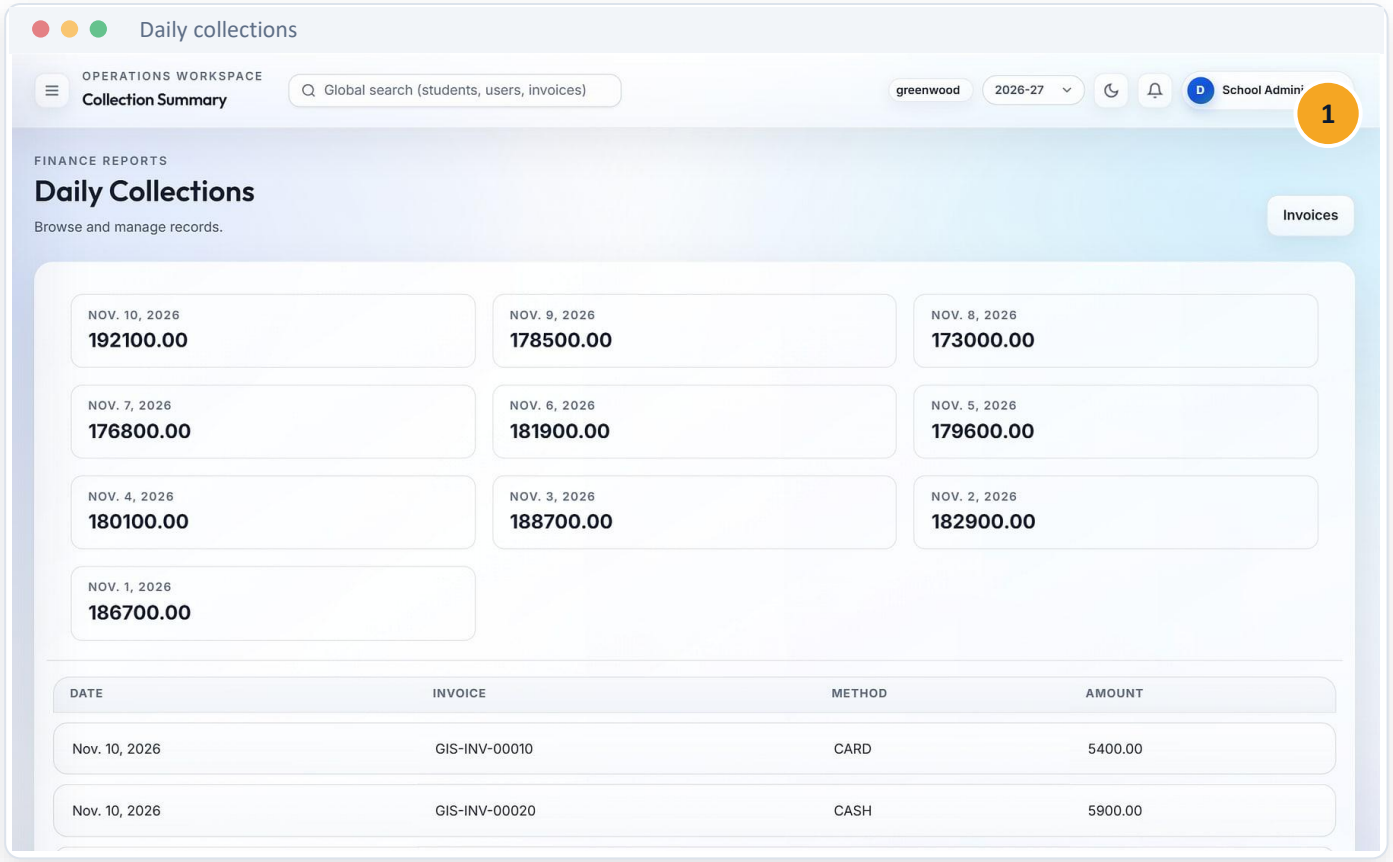

Live unread counts pushed over WebSockets.

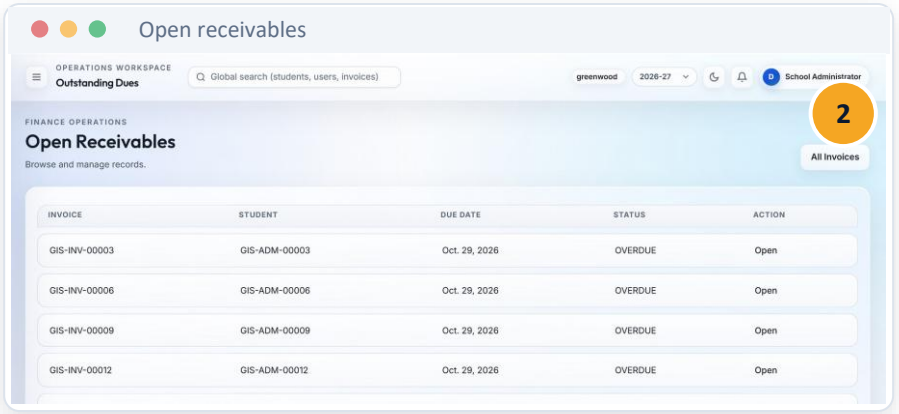

SMS, OTP and email

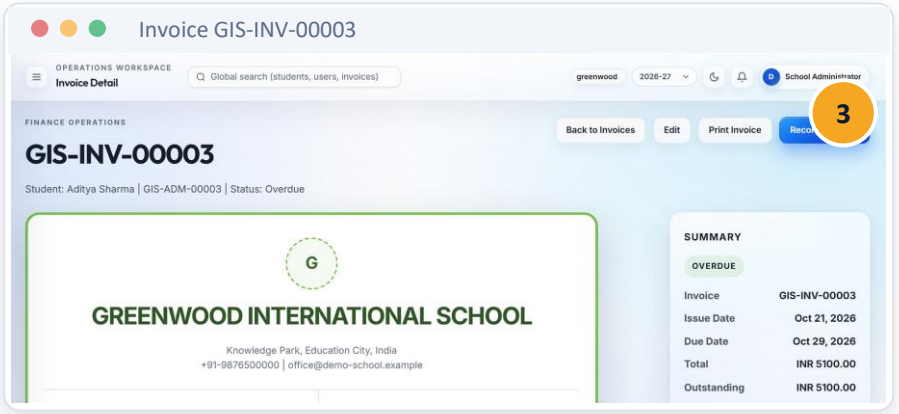

Twilio SMS and Verify, SMTP email; configured per school with test-send.

FEES & BILLING

Faster collections and real-time visibility of every rupee

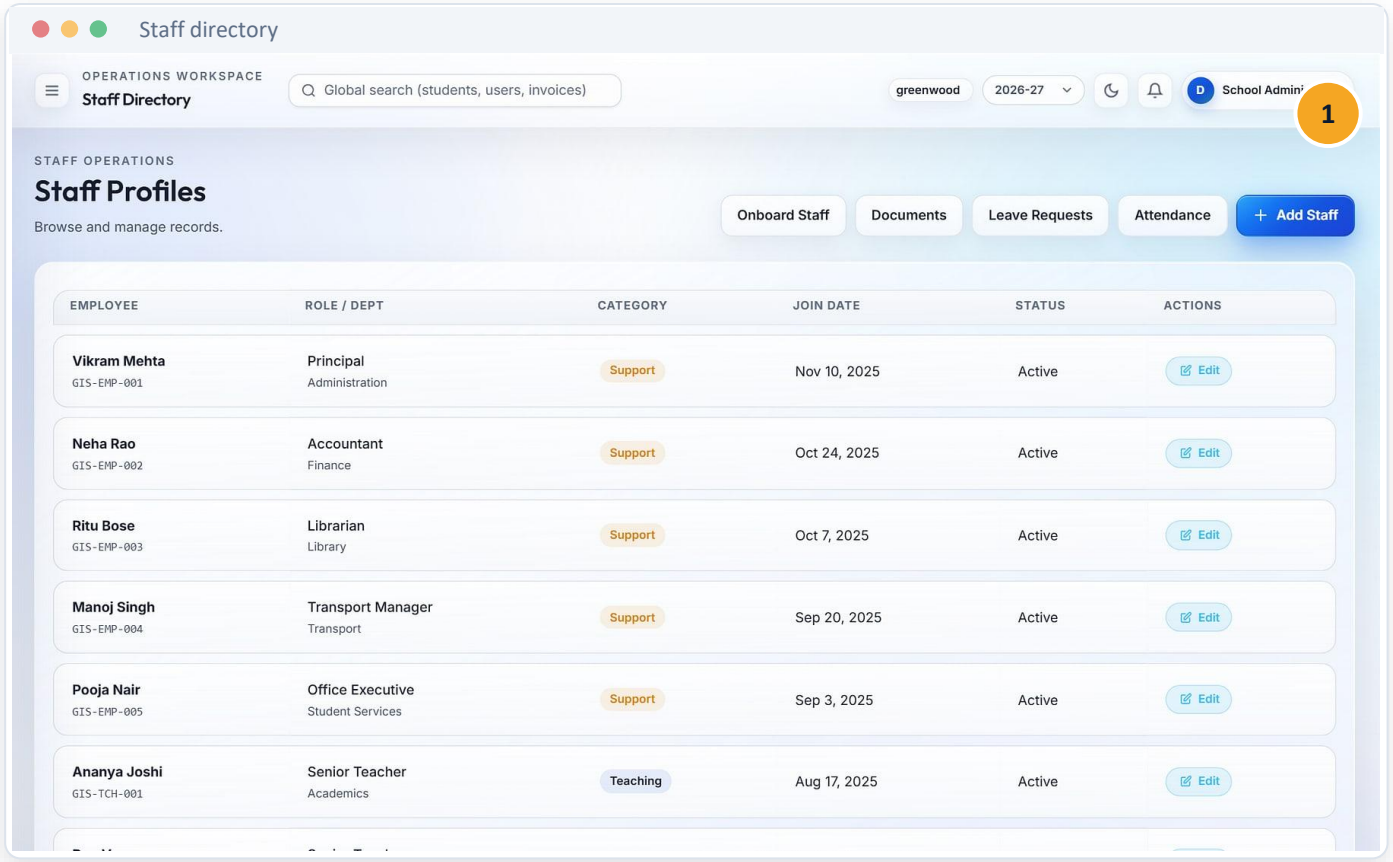

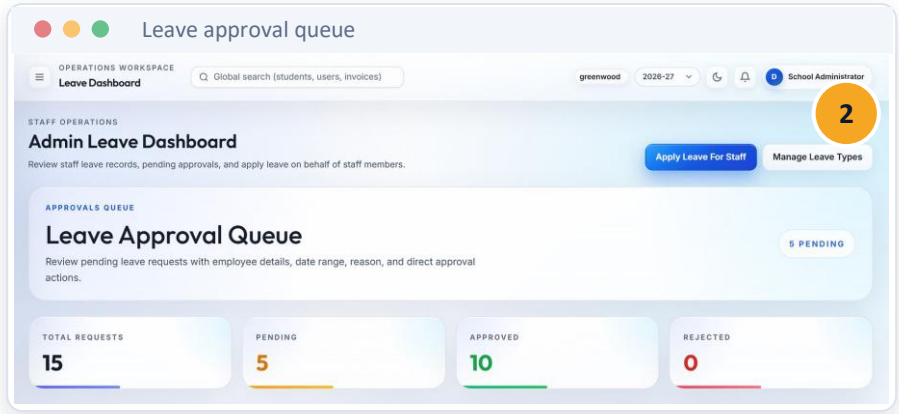

1 Daily collection summary with payment-method breakdown

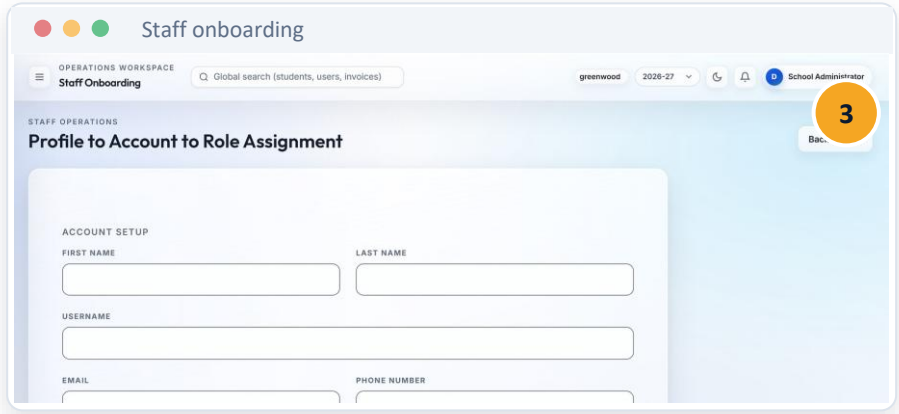

2 Outstanding dues and overdue invoices

3 Branded invoice with balance and payment history

Attendance and leave discipline without paper registers

1. Staff directory with departments, designations and categories
2. Leave approval queue with pending, approved and rejected counts
3. Guided onboarding: profile, user account and role in one flow

TRANSPORT

A safer, compliant fleet and fewer 'where is my bus' calls

Fleet and compliance

Vehicles and documents with 7-day expiry alerts.

Routes, stops, crew

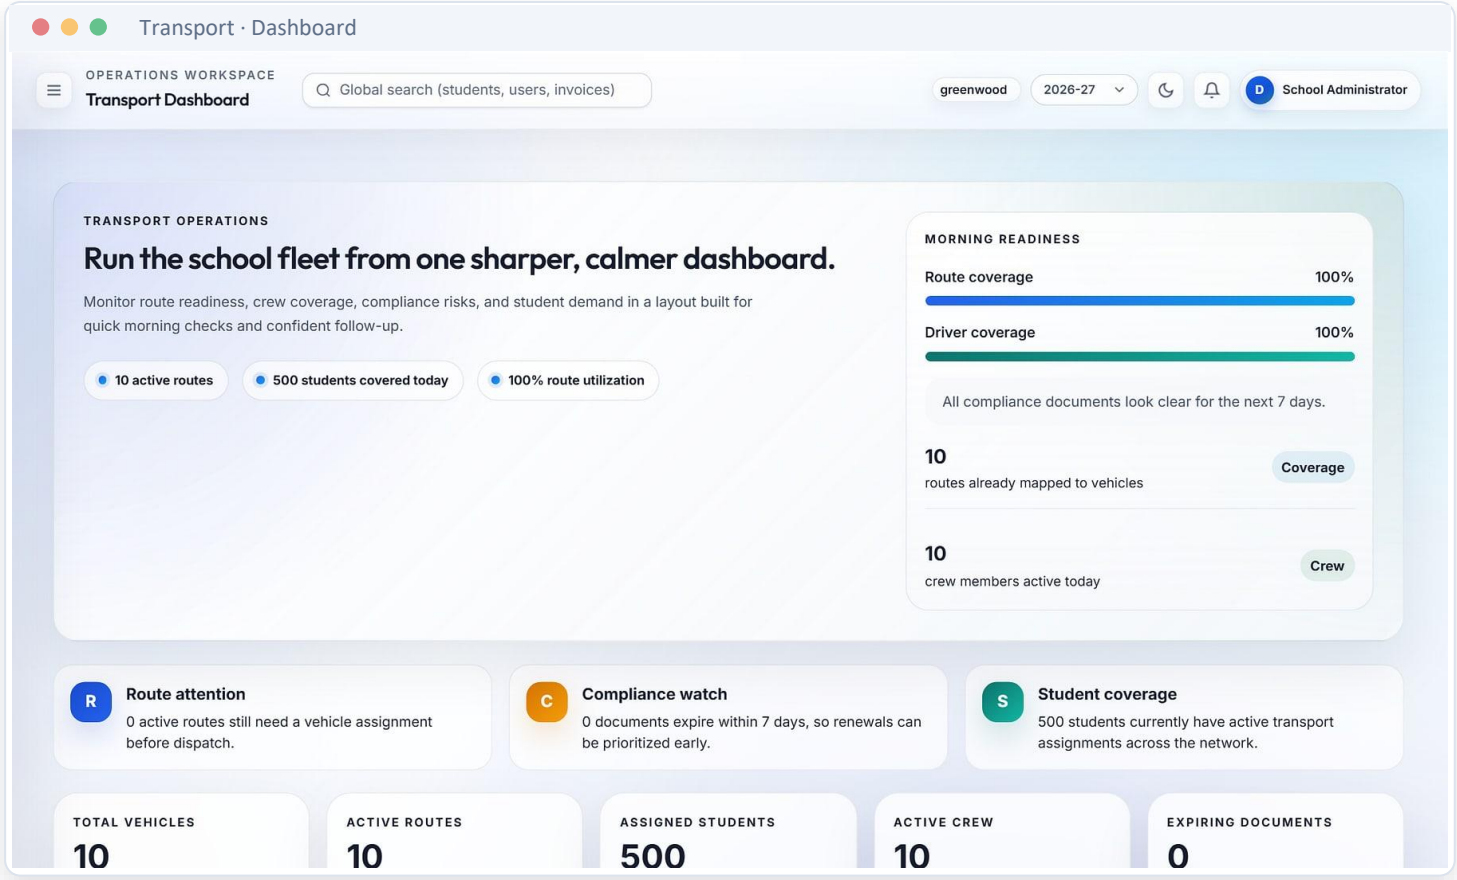

Route-vehicle and driver/attendant assignments.

Daily manifests

Stop-by-stop rider list for any route and date.

Automatic alerts

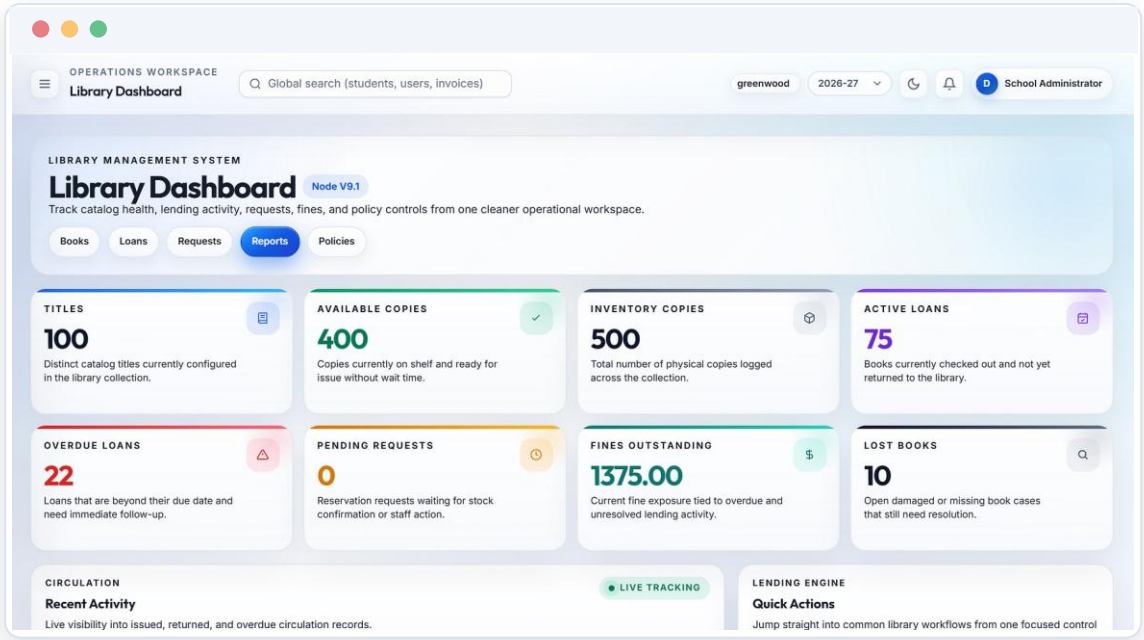

Parents notified when a route or stop changes.

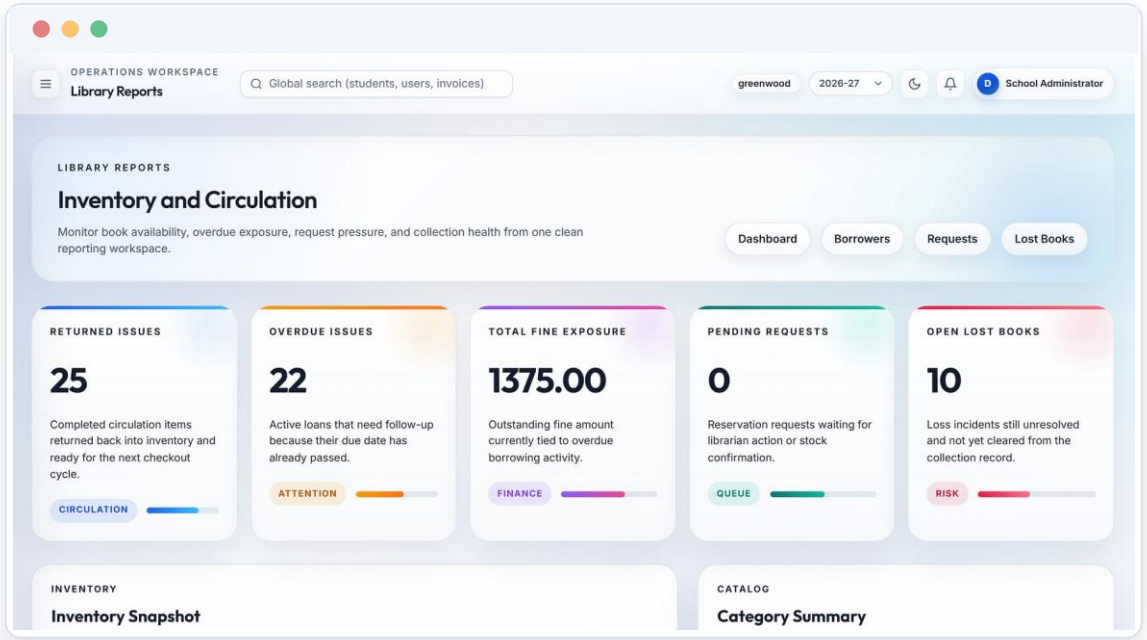

Transport dashboard: 10 vehicles, 10 routes, 500 students assigned, crew coverage and compliance watch (demo data).

LIBRARY

A traceable library with fines enforced automatically

Library dashboard: titles, copies, active loans, overdue items and fines.

Library reports: circulation, fine exposure, requests and lost books.

Catalogue

Categories, authors and copies.

Issue and return

Loan rules set per school.

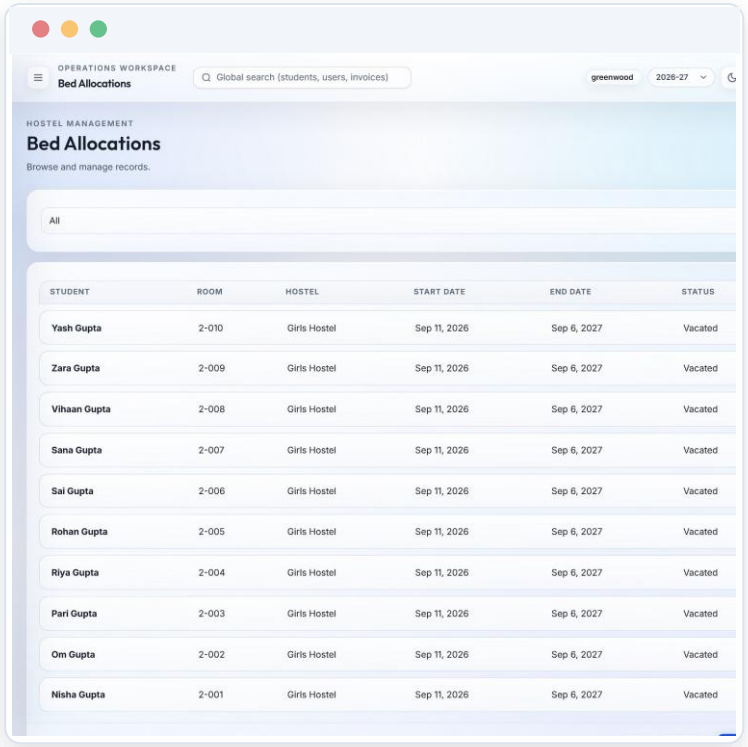

Automatic fines

Calculated daily on overdue loans.

Reservations

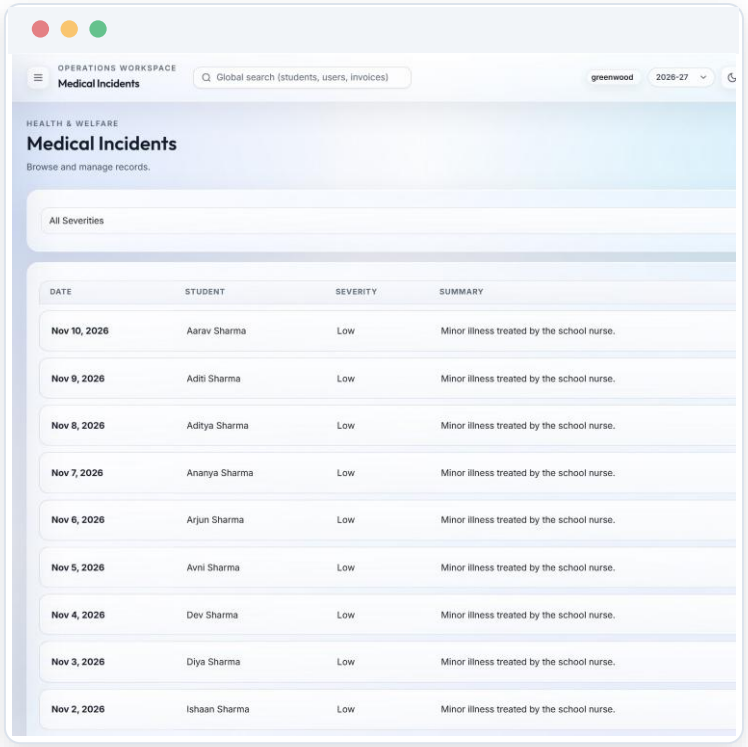

Student self-borrow requests.

Duty-of-care records for boarding and day schools

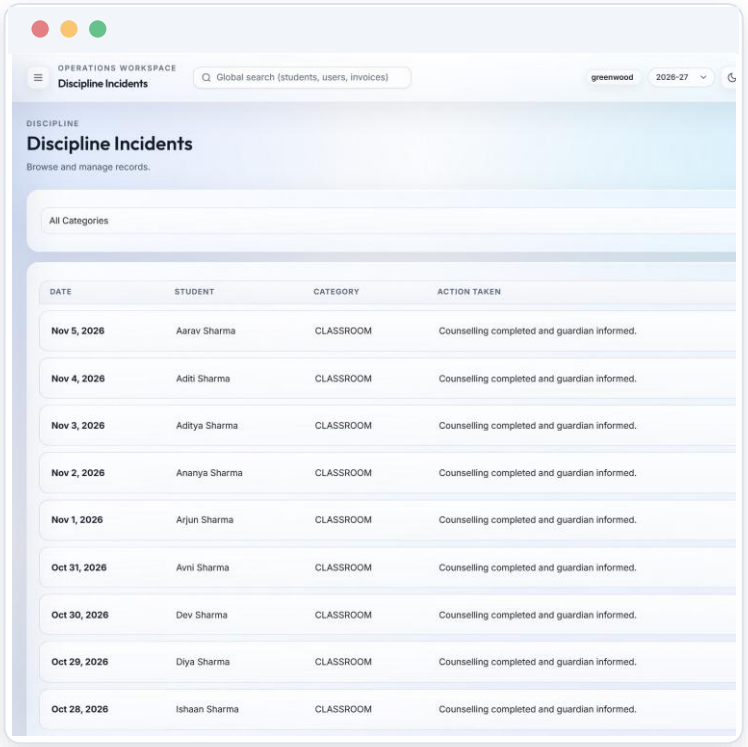

Hostel

Hostels, rooms and bed allocations with start and end dates.

Health register

Medical incidents with severity and treatment notes.

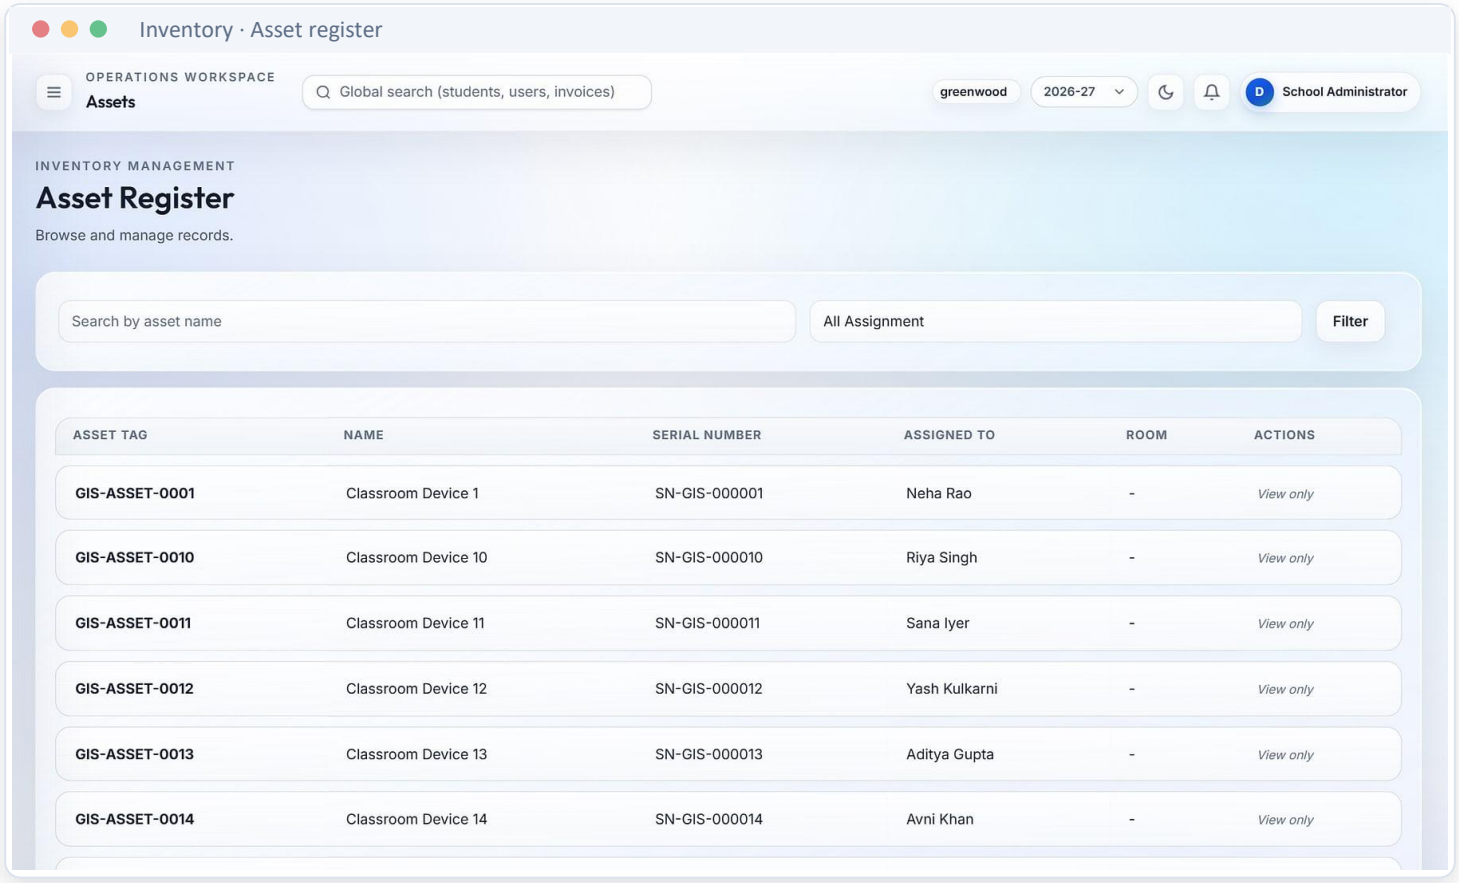

Discipline register

Incidents, category and action taken, with guardian follow-up.

INVENTORY & PROCUREMENT

Controlled spend and an asset trail across campuses

Fixed asset register with tags, serial numbers and assignment (demo data).

Items and stock

Inventory items, locations and a stock ledger.

Purchase flow

Purchase requests become purchase orders.

Vendors

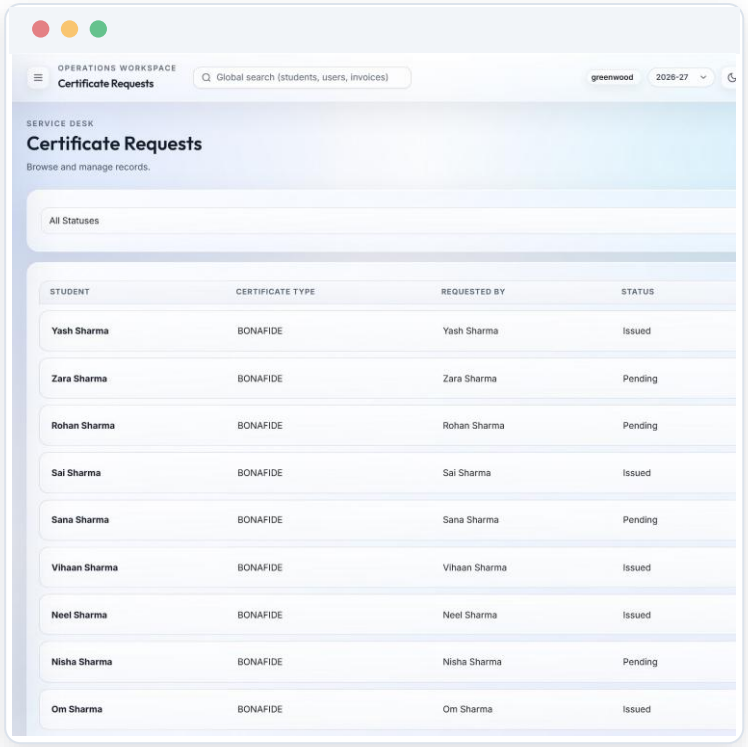

Vendor master with contacts and order history.

Asset register

Tagged assets with serial numbers and assignees.

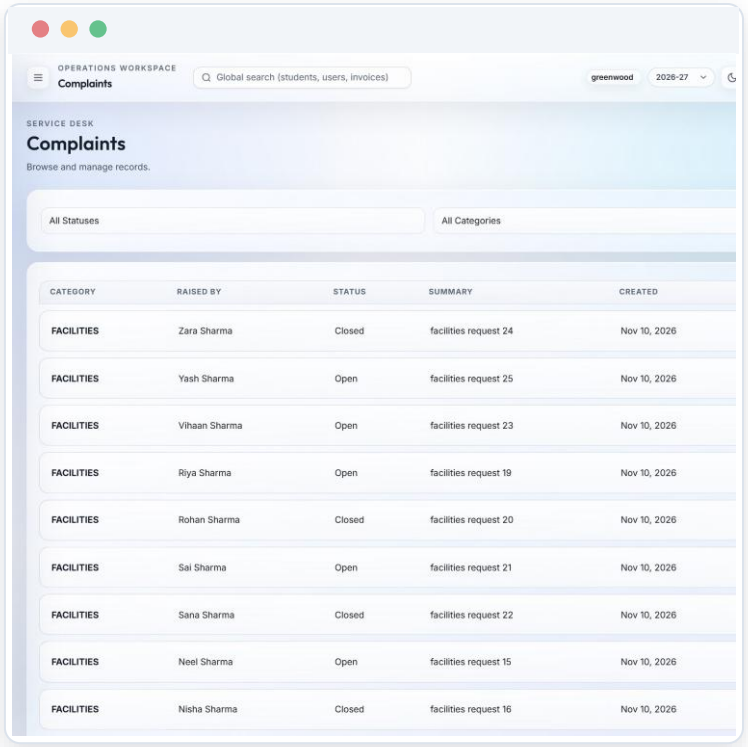

SERVICE DESK & FRONT OFFICE

A professional front office: certificates, grievances, visitors

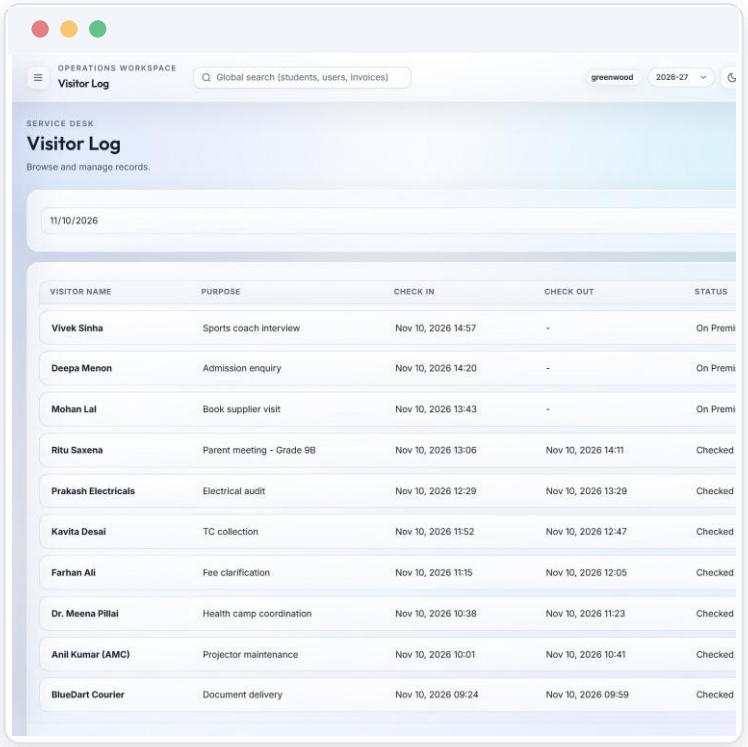

Certificates

Bonafide, transfer and other certificates, requested and issued with numbers.

Complaints & requests

Grievances and service requests tracked to closure.

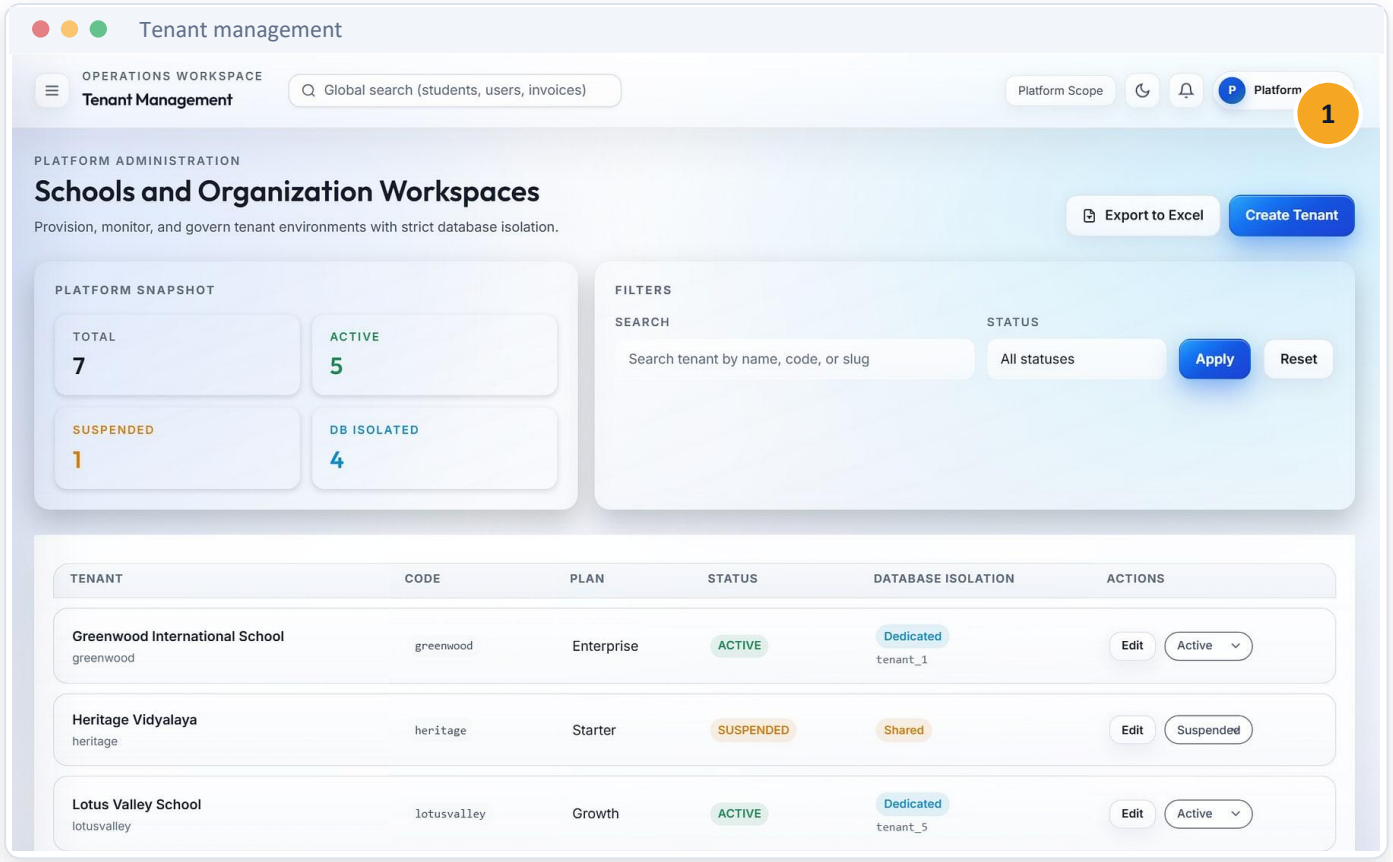

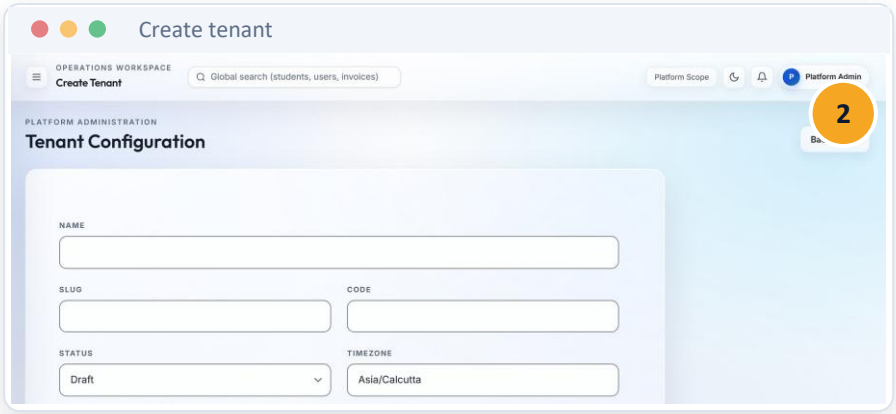

Visitor log

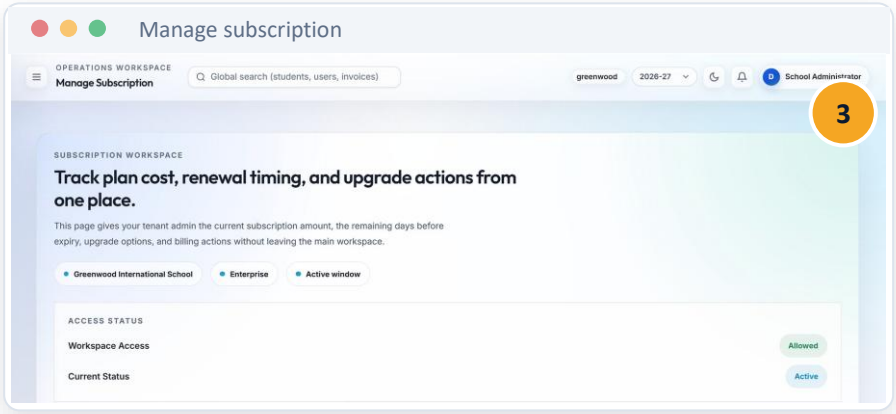

Every visitor checked in and out, with purpose.

MULTI-TENANT SAAS

Onboard a new school in minutes, with isolated data from day one

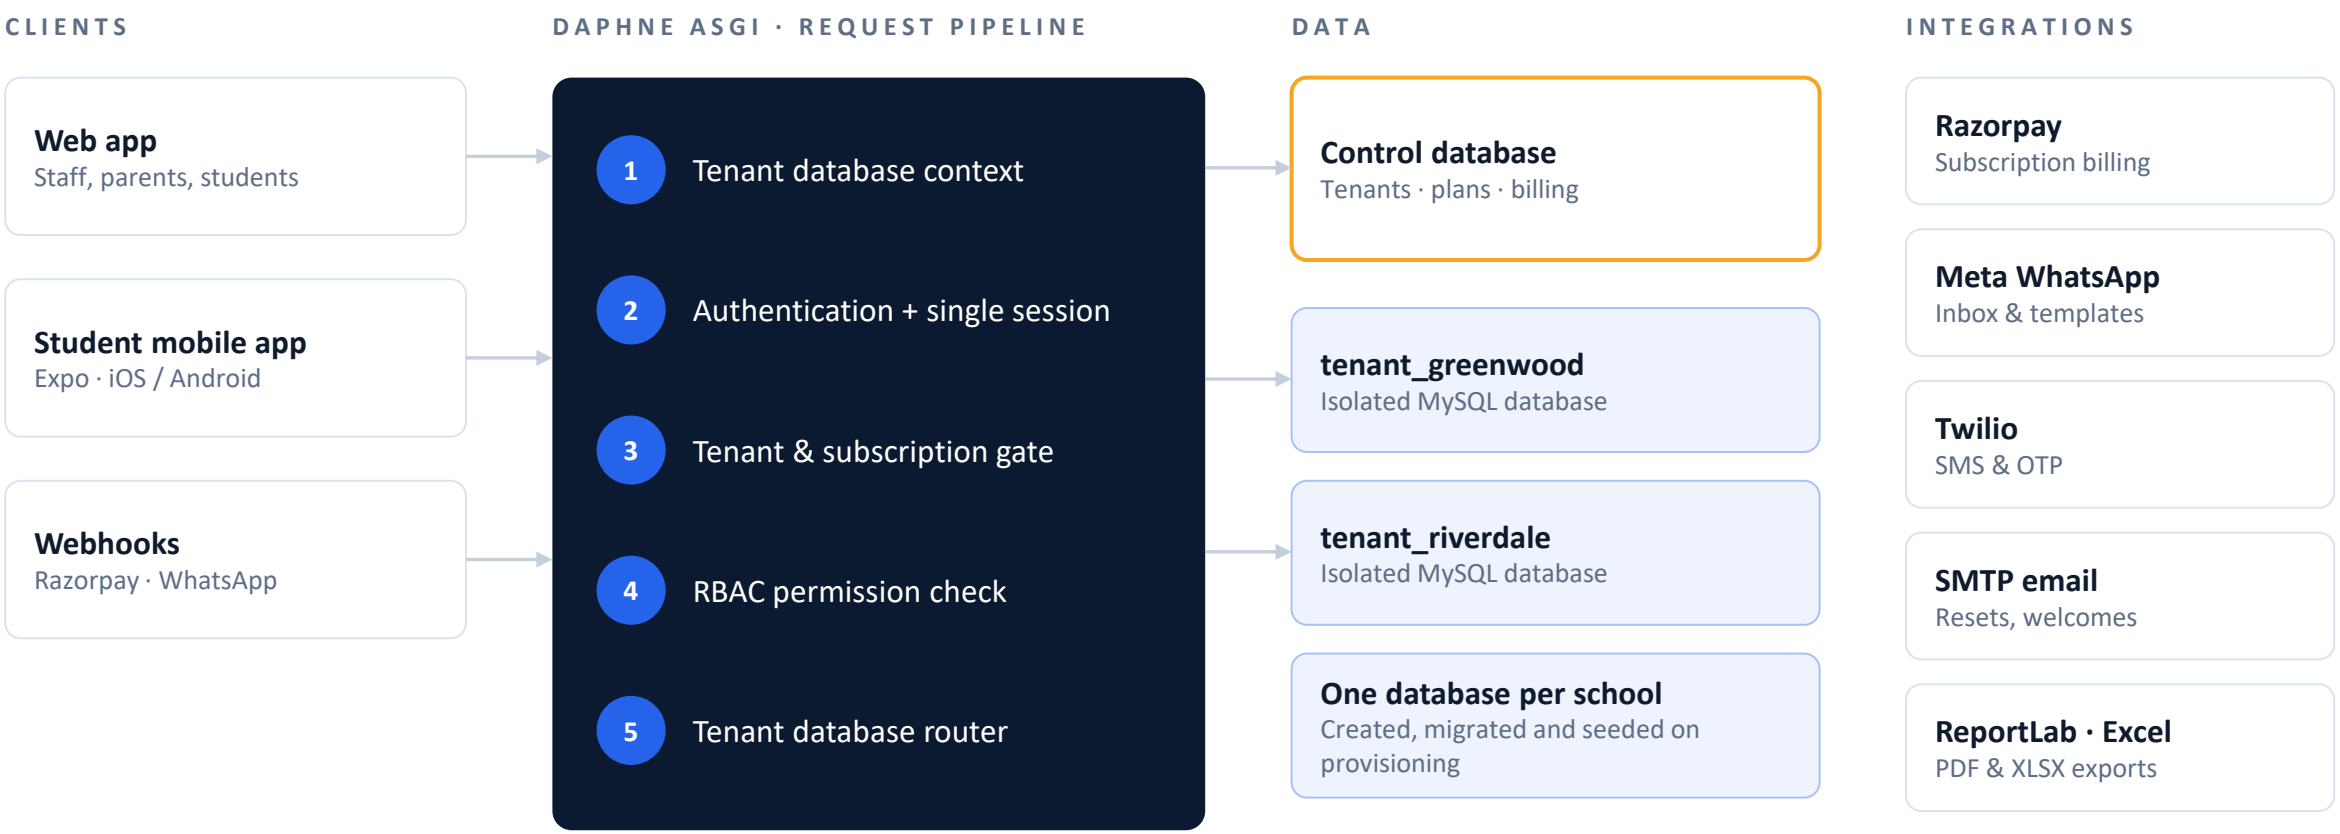

1 Platform console: schools, plans, status and dedicated databases

2 Create a school: code, timezone, currency, locale and plan

3 School-side plan, renewal and billing view

ARCHITECTURE

Database-per-school isolation, enforced on every request

Two layers of isolation. Middleware selects each school's dedicated database on every request, and every business model also carries a tenant key.

TECHNOLOGY

A modern, maintainable stack your IT team will recognise

Backend

Django 5.1 on Python: 19 modular apps, 128 data models, 86 migrations.

Data

MySQL (utf8mb4): one database per school, plus a control database.

Real-time

Daphne ASGI and Django Channels, with a Redis-ready channel layer.

Design system

Tailwind CSS with design tokens; light and dark themes.

Mobile

Expo SDK, React Native and expo-router for iOS, Android and web.

Quality

242 unit and integration tests, 15 Playwright end-to-end journeys with axe-core.

Open, mainstream technology with no proprietary runtime.

WHY AGASTYA

What changes when a school group moves to Agastya

	TODAY	WITH AGASTYA
Data	Spreadsheets, registers and phones	✓ One data model, a dedicated database per school
Visibility	Reports compiled by hand, days late	✓ Live role cockpits for every leader
Control	Shared logins, no record of changes	✓ 96 permissions, single sessions, full audit trail
Parents	Personal WhatsApp groups, paper circulars	✓ Portals, student app, school-owned WhatsApp inbox
Growth	Every new campus repeats the setup	✓ New school provisioned from the console

Isolation by design

Each school gets its own database, created and migrated automatically.

Configurable without developers

Dashboard builder, RBAC matrix, feature toggles and branding.

A school-owned parent channel

Two-way WhatsApp inbox through the Meta Cloud API.

Audit-grade governance

Before/after audit, login events, lockout and single sessions.

GETTING STARTED

An indicative rollout: first campus live in about six weeks

WEEK 1

Provision

Create the school workspace, branding, roles, academic year and fee heads.

WEEKS 2–3

Migrate

Import students, guardians, staff, classes, subjects and fee plans; build the timetable.

WEEKS 4–6

Pilot go-live

Attendance, homework, fees and announcements live at the pilot campus; staff trained.

WEEK 7+

Scale out

Exams and report cards, transport and library; next campuses provisioned from the console.

Timelines are indicative and depend on data readiness and the modules in scope; they are confirmed with delivery during scoping.

ROADMAP

What's next on the Agastya roadmap

Specified in the product plans, not yet built. Shown so buyers can plan; not available today.

PLANNED

Online fee payment

Parents pay fees through a gateway, with refunds and late-fee rules.

PLANNED

Payroll

Salary structures and payroll processing on top of staff records.

PLANNED

Multi-channel broadcast

Send announcements over SMS, WhatsApp and email at once.

PLANNED

Saved and scheduled reports

Self-service report builder with scheduled delivery.

PLANNED

Live bus tracking

GPS tracking and boarding logs for every trip.

PLANNED

Teacher and parent apps

Dedicated mobile experiences with push notifications.
