ENTERPRISE SALES OVERVIEW

HeeLIKS

INVENTORY, POS & DISTRIBUTION

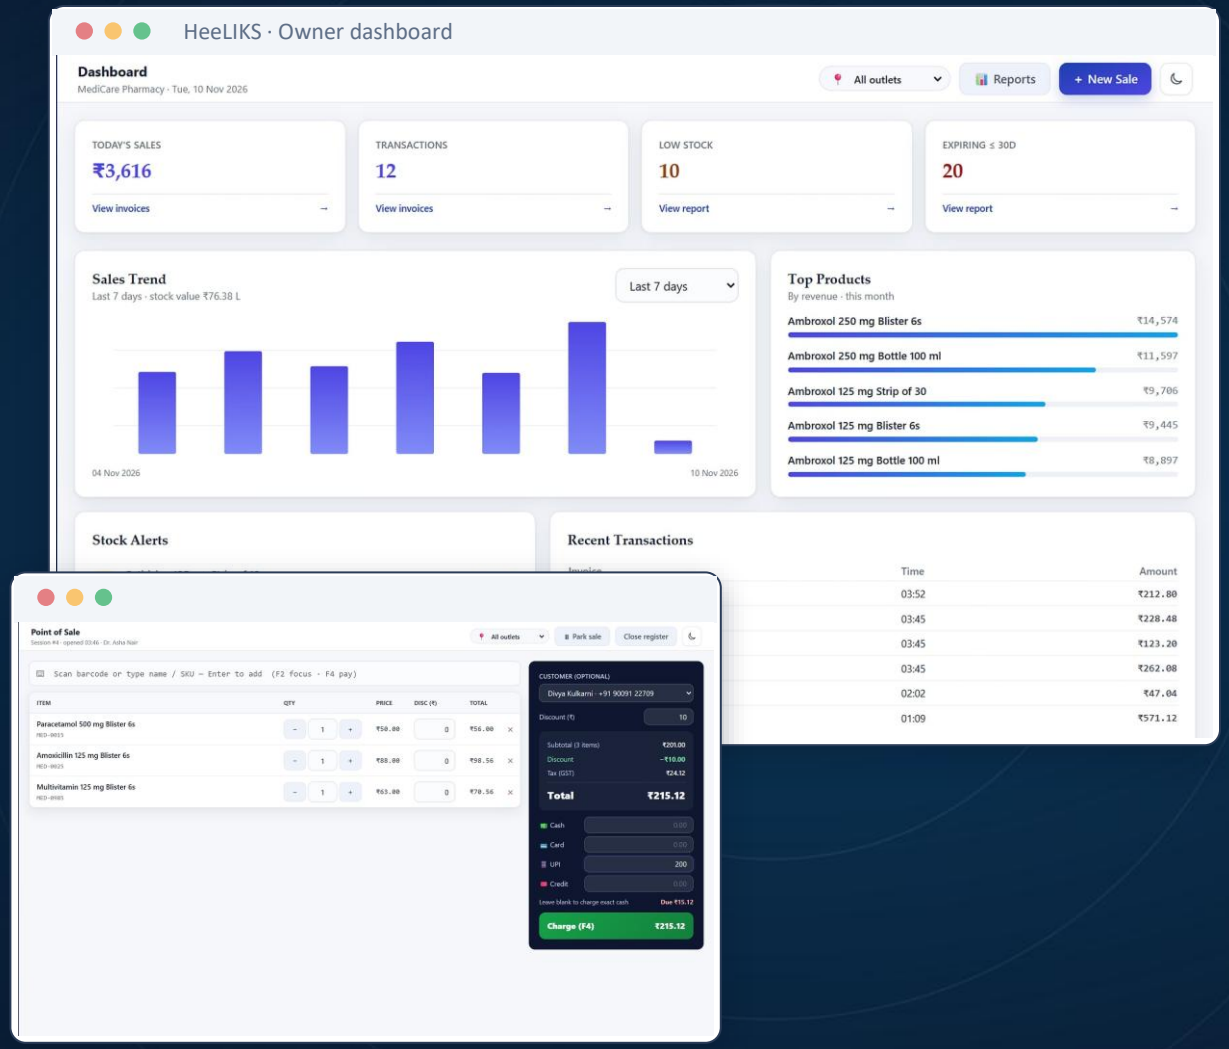

Run your entire store on one platform.

Inventory, point of sale, purchasing, B2B order-to-cash and GST reporting on one stock ledger, with each customer in its own isolated database.

Ledger-true stock

GST-ready

Database per customer

THE PROBLEM

Stock, till and books that never agree

Stock lives in a spreadsheet

Billing runs on a separate till, so on-hand is a guess and stock-outs are found by customers.

Expiry found too late

Batches and expiry dates sit on cartons, not in the system; write-offs surface at audit time.

GST is a monthly scramble

Accountants rebuild tax summaries, credit notes and GSTR-1 from bill books by hand.

No control, no trail

Shared logins, unlimited discounts and no record of who changed a price or a quantity.

Distribution on paper

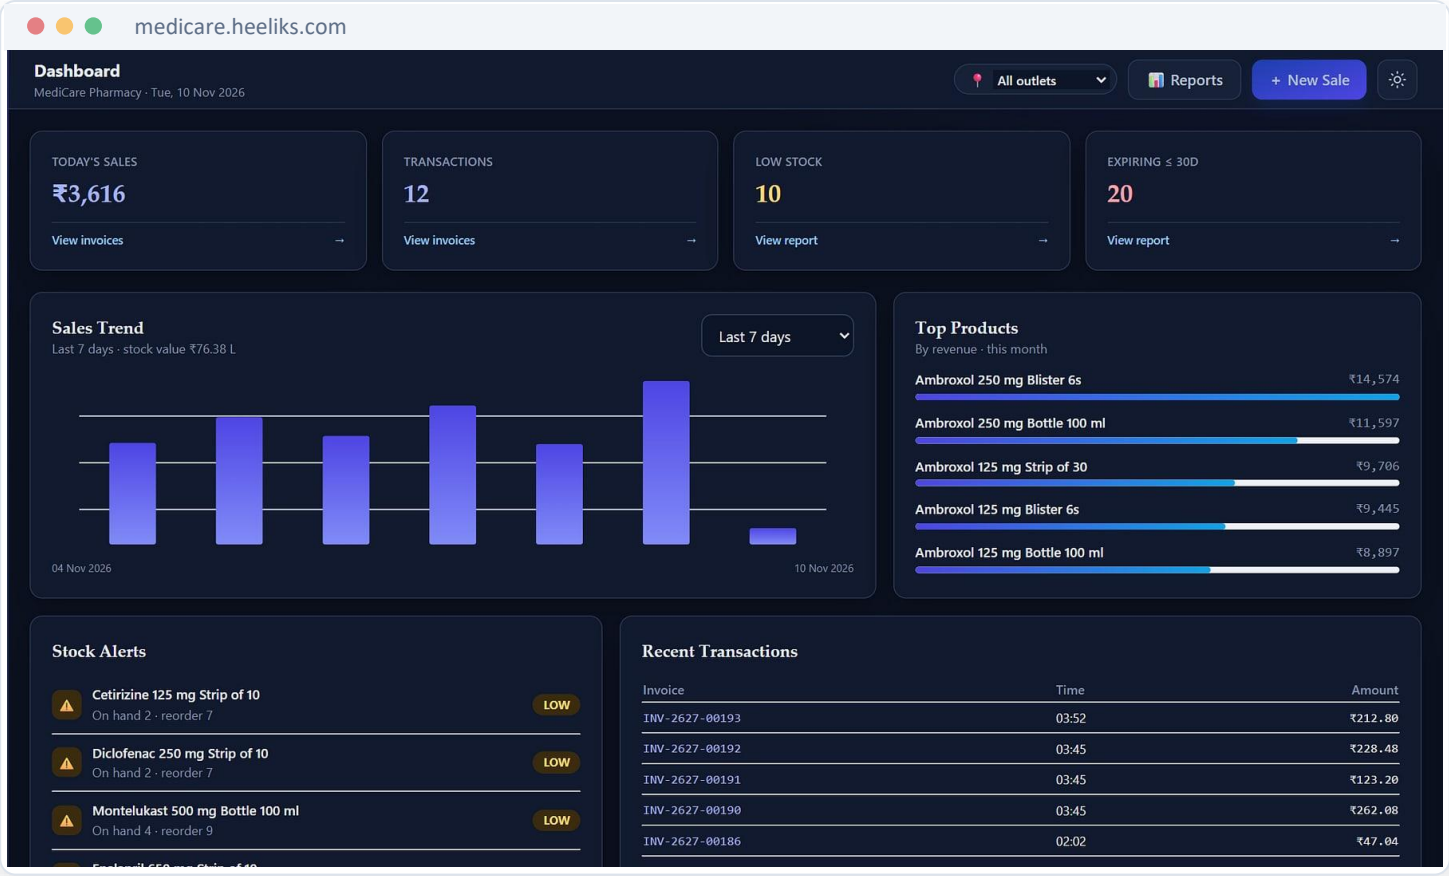

Orders, challans and receipts tracked in registers; nobody knows who owes what.

Tools that don't talk

Separate POS, inventory and accounting tools: every number entered twice.

MEET HEELIKS

One platform from purchase order to paid invoice

Owner dashboard in dark mode: sales, stock alerts, expiry and top products (demo data).

Sell

A keyboard-first, GST-correct POS that cannot oversell.

Stock & buy

Catalog, batches, purchasing and counts on one ledger.

Distribute

Orders, challans, delivery proof, receipts and ledgers.

Comply & govern

21 reports, GSTR-1, two-factor sign-in, roles and audit.

AT A GLANCE

A complete platform, counted from the code

16
domain modules

70
data models

169
routes and screens

21
exportable reports

5 · 10
roles · permission codes

348
automated tests

5
verticals configured at signup

1
database per customer

Source: code review of the HeeLIKS repository (commit 3b66227, 10 Nov 2026): app configs, models, URL resolver, rbac seeding and test functions.

WHO IT SERVES

Built for every role in the business

Owner / Admin

The economic buyer. Full access: dashboard, reports, users, subscription and billing.

Manager

Catalog, stock and purchasing with approval, returns and reports. Discount cap 20%.

Cashier

POS and returns only, on a focused menu. Discount cap 5%; opens and closes the register.

Store staff

Receives goods, adjusts and counts stock. No pricing or sales access.

Auditor / CA

Read-only reports, catalog and stock. Every attempt beyond that is denied and logged.

HeeLIKS operator

Runs the platform console: provisioning, plans and payments, with tenant metadata only.

PRODUCT MAP

Five pillars, one stock ledger behind every module

Sell

- Point of sale
- Registers & Z-report
- Sales invoices
- Returns & notes

Stock & Buy

- Catalog & masters
- Inventory ledger
- Batches & expiry
- Procurement & GRN
- Partners

Distribute

- Sales orders
- Challans & POD
- Receipts & ledger
- AR aging & collections

Insight & Comply

- Owner dashboard
- 21 reports
- GST & GSTR-1
- Alerts

Govern & Scale

- Onboarding & import
- Security & 2FA
- Roles & audit
- Subscription
- Platform console
- REST API

One append-only stock ledger sits behind every module: a sale, a goods receipt, a challan and a stock count all move the same numbers, in the same transaction.

WHY HEELIKS

Eight differentiators, each verified in the product

Database per customer

Each workspace gets its own database; unknown subdomains are refused.

Ledger-true stock

Row-locked, append-only ledger: two registers cannot sell the last unit.

FEFO and expiry control

Earliest-expiry batch picked first; expired stock blocked at the counter.

GST compliance pack

CGST/SGST/IGST split, HSN, GSTR-1 export, gapless series, s.34 notes.

Security by construction

Enforced two-factor, one session per user, lockout and encrypted secrets.

Roles with guard-rails

Discount caps per role; every denied attempt is audited.

Full B2B order-to-cash

Order, invoice, challan, POD, receipt and ledger on the same stock.

Go-live with undo

Excel and Tally XML import with dry-run, reconciliation and exact undo.

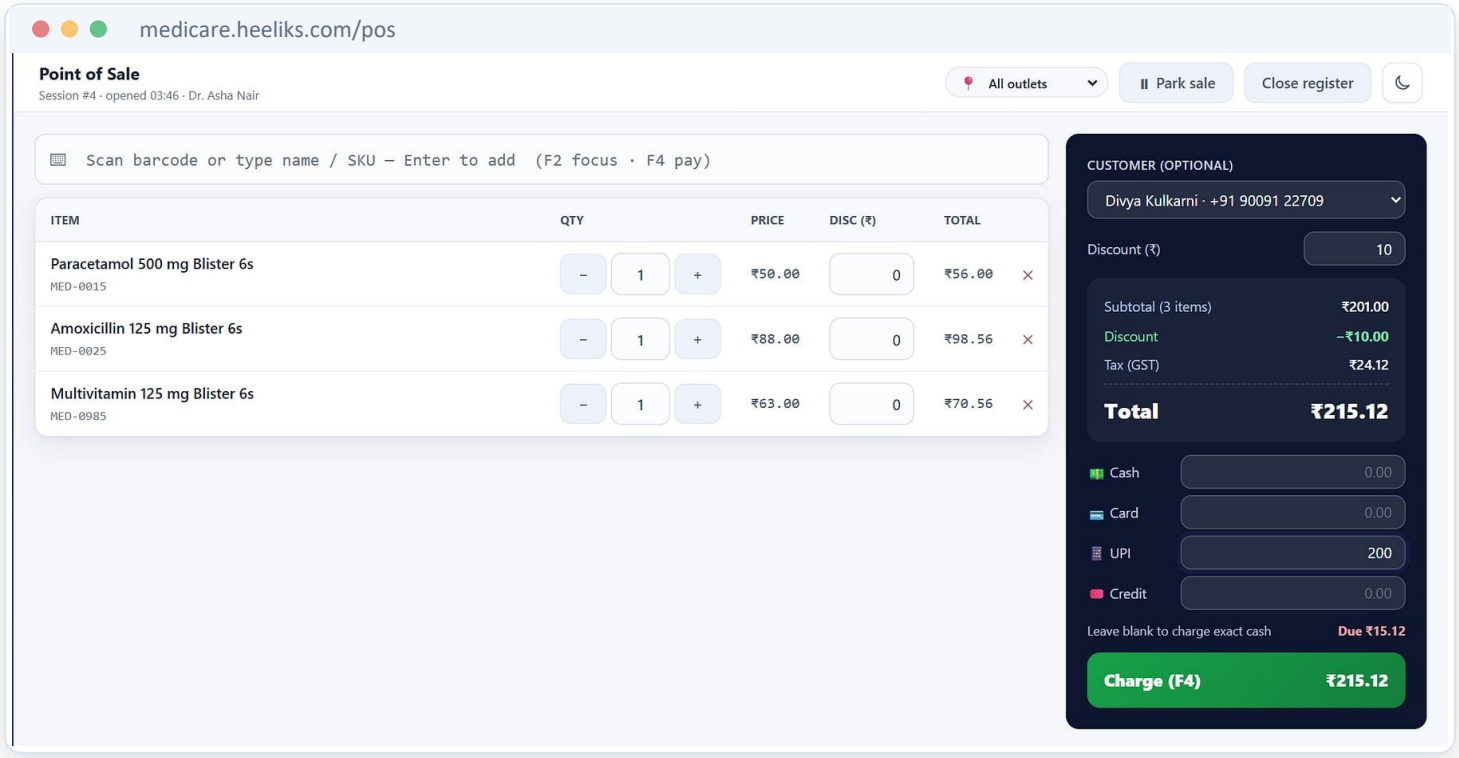

PILLAR 1 · SELL

Checkout that never oversells

Point of sale, registers, invoices and returns: every sale posts stock, tax and cash in one transaction.

POINT OF SALE

Checkout in seconds, GST-correct every time

POS: three-line cart with bill discount and a UPI + cash split (demo data).

Scan or type ahead

HID barcode scanners, SKU or name search, with exact matches straight to the cart.

Split tender

Cash, card, UPI and store credit on one bill; change computed live.

Role-capped discounts

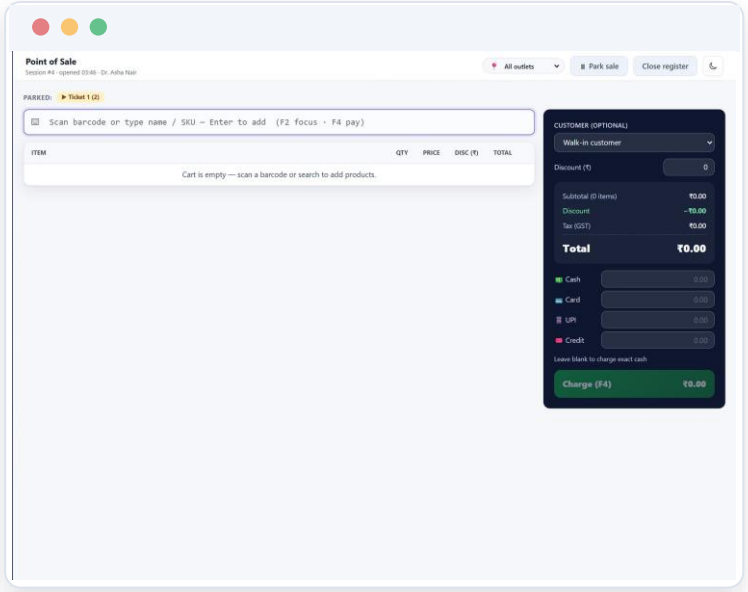

Line or bill discount, capped per role; overrides are blocked and logged.

Atomic and gapless

Sale, stock-out, cost snapshot and fiscal-year invoice number in one transaction.

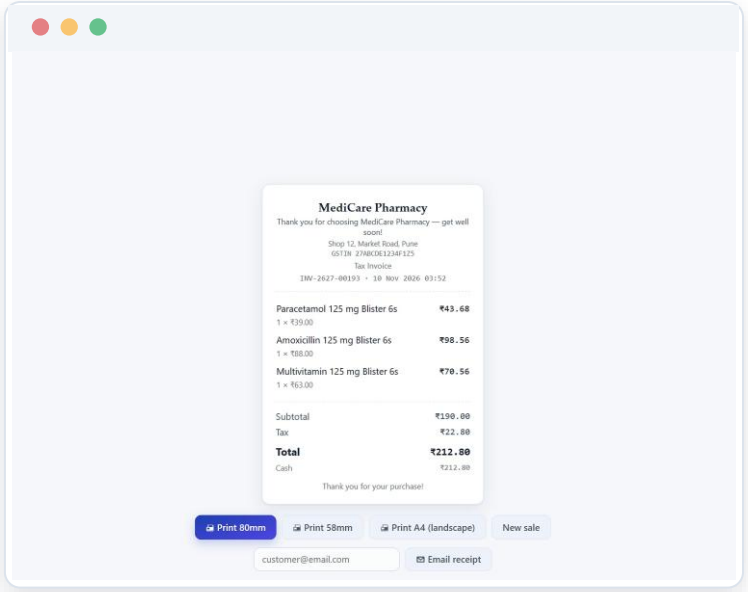

AT THE COUNTER

Built for the busiest counter in town

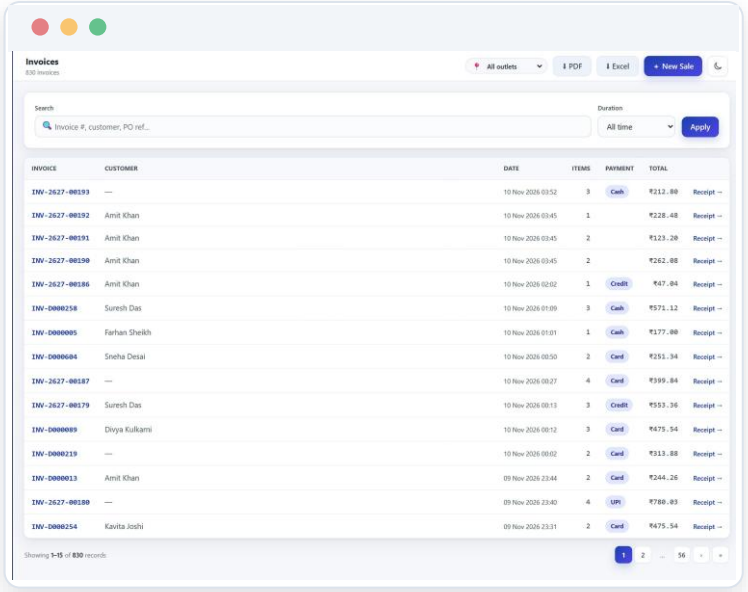

Park and resume

Hold a cart while the customer fetches one more item; resume it with F7. F2 search and F4 charge keep hands on the keyboard.

Print or email

80 mm or 58 mm thermal, A4 PDF, or email; branded with the outlet profile.

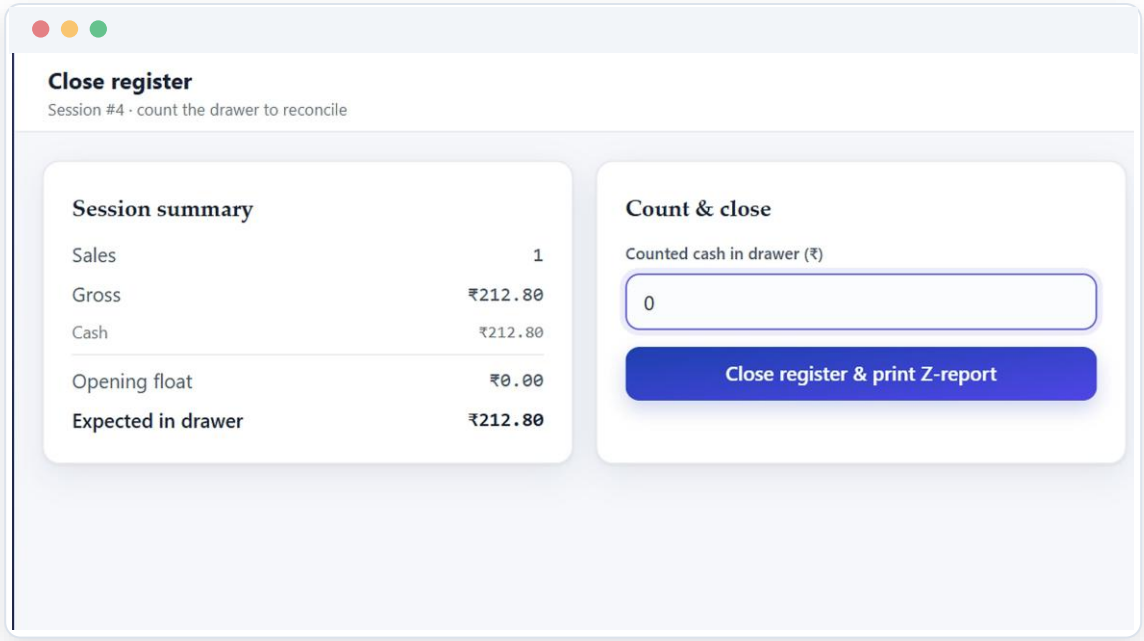

Invoice register

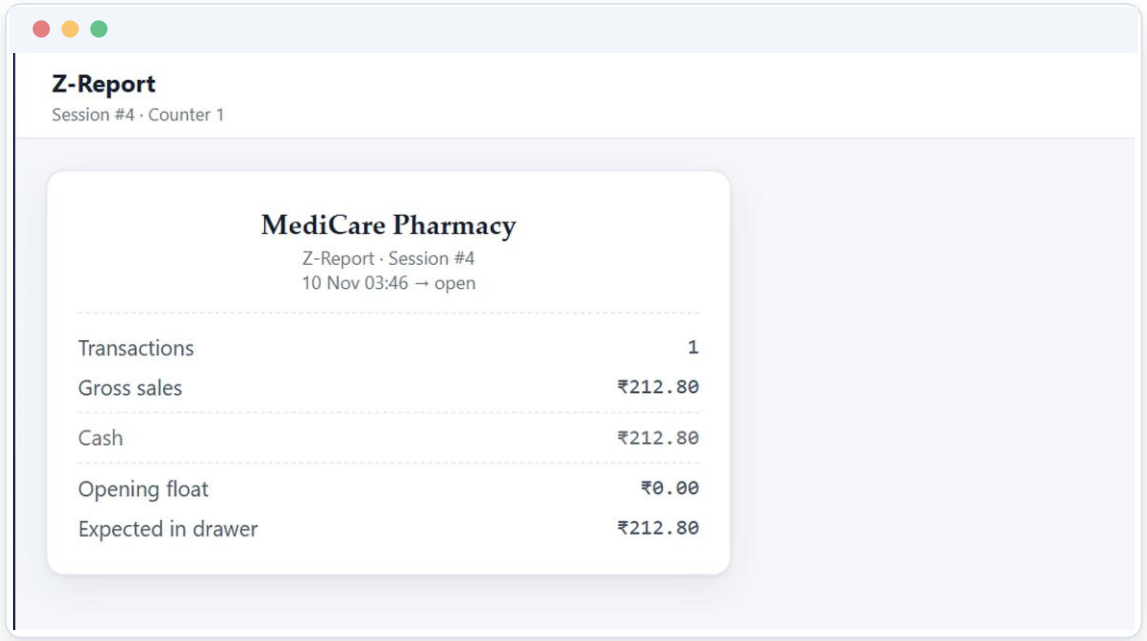

Every bill with tender and customer; search, filter and reprint, with gapless numbering.

REGISTERS AND Z-REPORT

Every rupee in the drawer, accounted for

Close register: count the drawer; the variance is computed (demo data).

Z-report for a session, printable at day end.

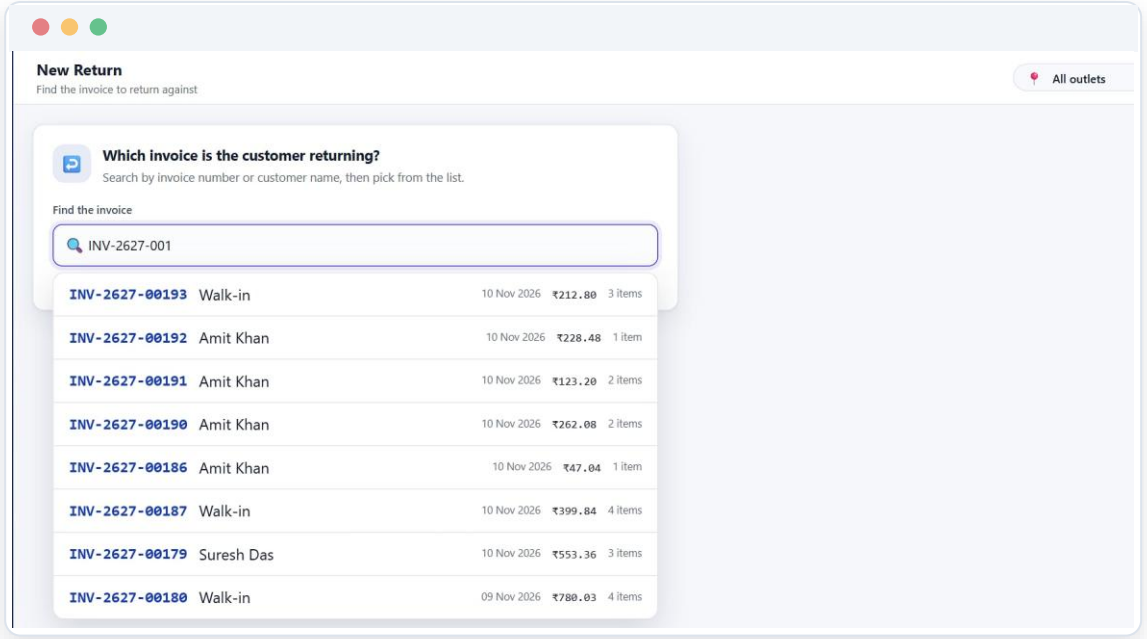

Opening float
Every shift starts counted.

Session per cashier
One open session each.

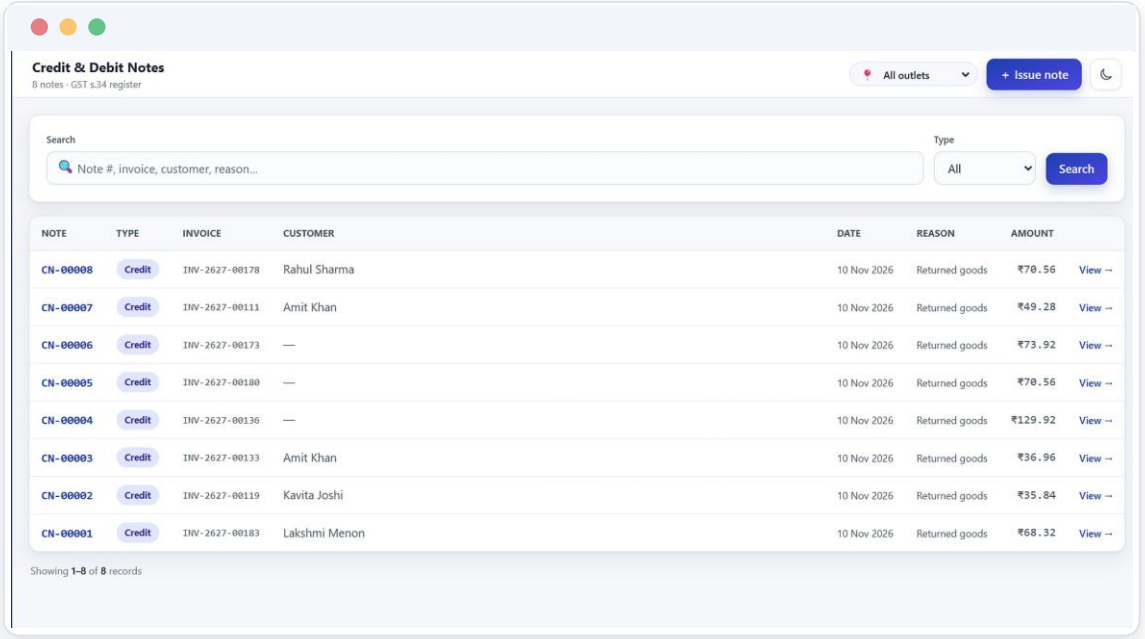

Computed variance
Float + net cash vs counted.

Z-report
Printable end-of-day summary.

Refunds in a minute, with a compliant credit note

Returns start from the real sale: lookup by invoice number or customer.

Credit and debit notes, including standalone notes with s.34 reasons.

Find the sale

Invoice number or customer.

Restock or write off

Per line: shelf or damaged stock.

Numbered credit note

Tax reversed in proportion.

Return window

Configurable; older invoices refused.

PILLAR 2 · STOCK & BUY

Stock you can trust

Catalog, inventory ledger, batches and expiry, purchasing and partners: one append-only ledger behind every number.

CATALOG AND MASTERS

Clean master data at thousand-SKU scale

Rich product records

SKU, HSN, MRP, cost, reorder level and batch tracking.

Barcodes and labels

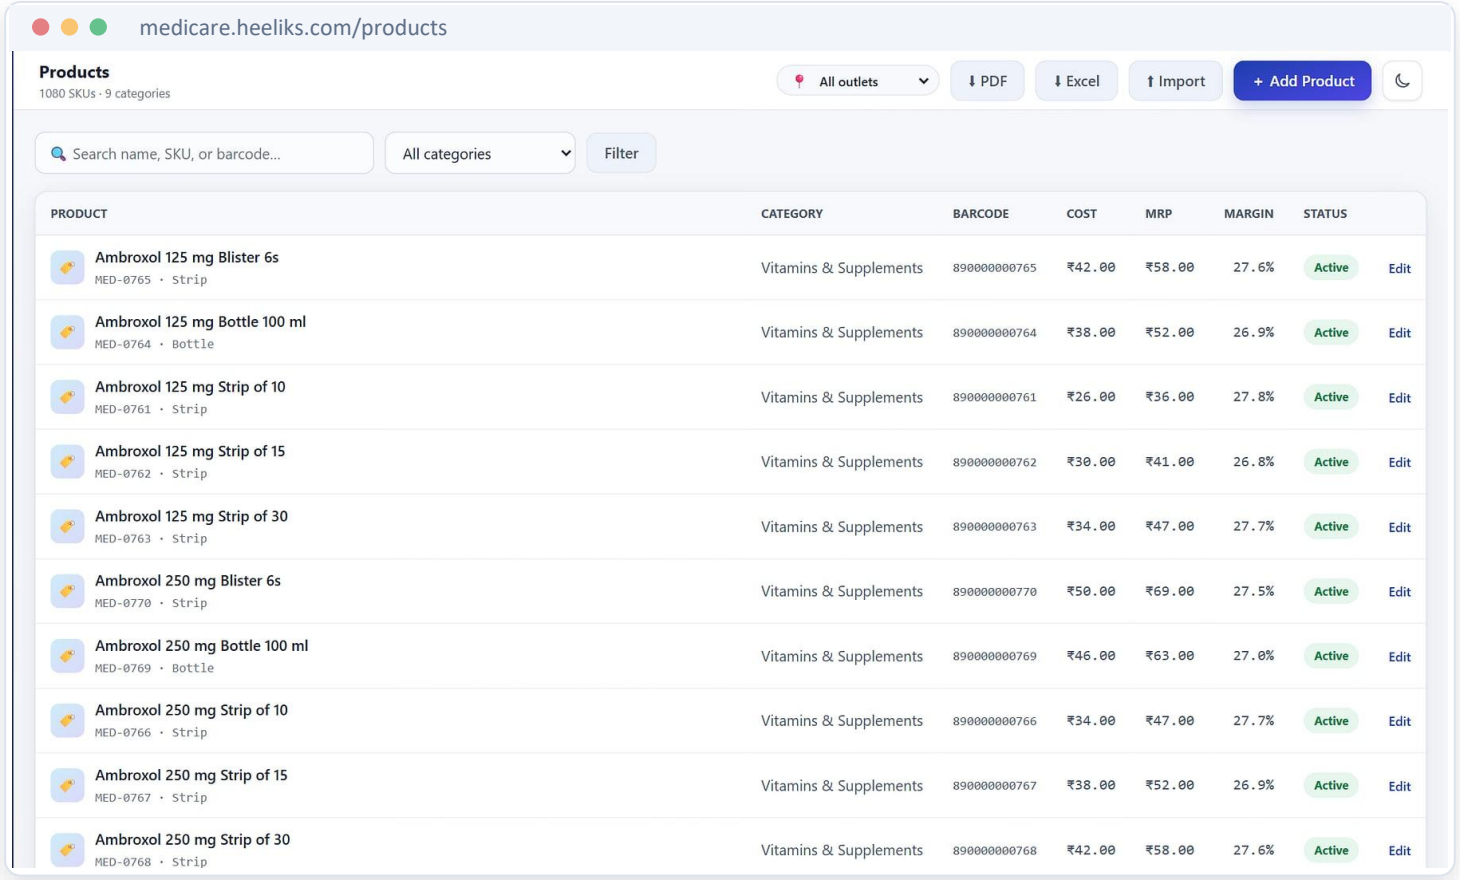

Multiple barcodes per item; Code128 labels ready to print.

Units and tax classes

Strip, box or bottle with conversions; GST slabs mapped per product.

Bulk import

CSV or Excel with a template and validation.

Product list: SKU, barcode, cost, MRP, margin and status (demo data).

INVENTORY LEDGER

On-hand is a ledger, not a guess

EVERY MOVEMENT

Goods receipt
+ batch, expiry, cost

Sale / return
- or + at the counter

Transfer
location to location

Count / adjustment
with a reason code

Append-only stock ledger
Signed entries only: never edited or deleted. Row-locked with an availability re-check, so nothing oversells.

ALWAYS DERIVED

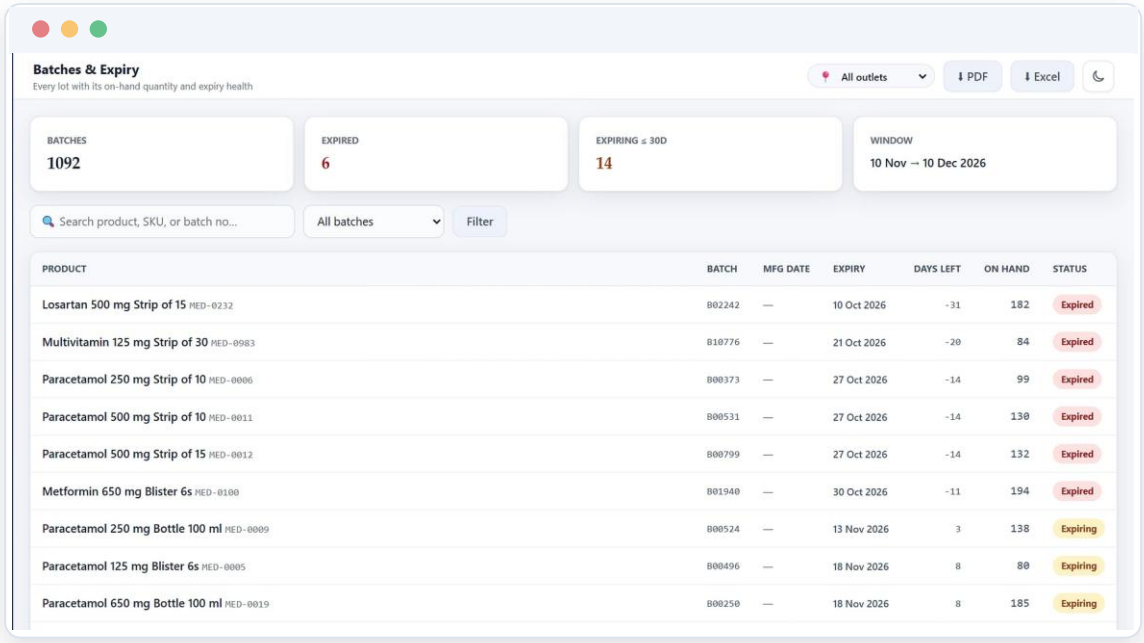

On hand · reserved · available
per product, batch and location

Stock value
moving-average cost

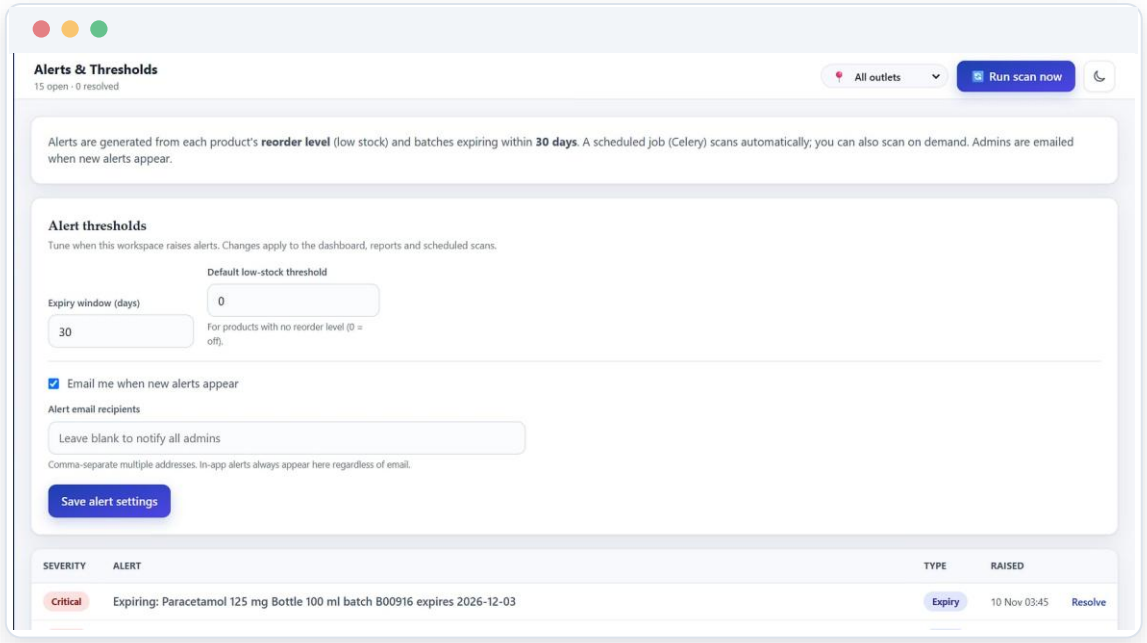

Reports and alerts
valuation, movement, low stock

Because stock levels are a projection of the ledger, every discrepancy has a paper trail: who moved what, when and why.

Catch expiry before it becomes a write-off

Batches and expiry: days left with expired and expiring flags (demo data).

Alerts: low-stock and expiry thresholds with an email channel.

FEFO allocation

Earliest expiry sells first.

Expired blocked

Cannot be sold at the counter.

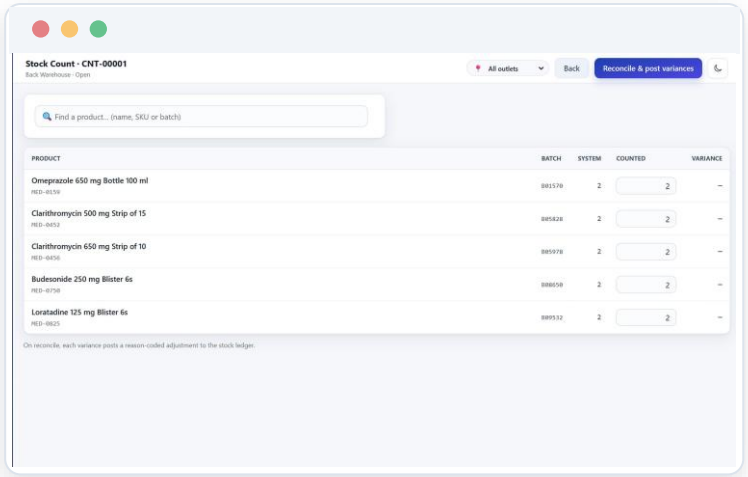

Stock alerts

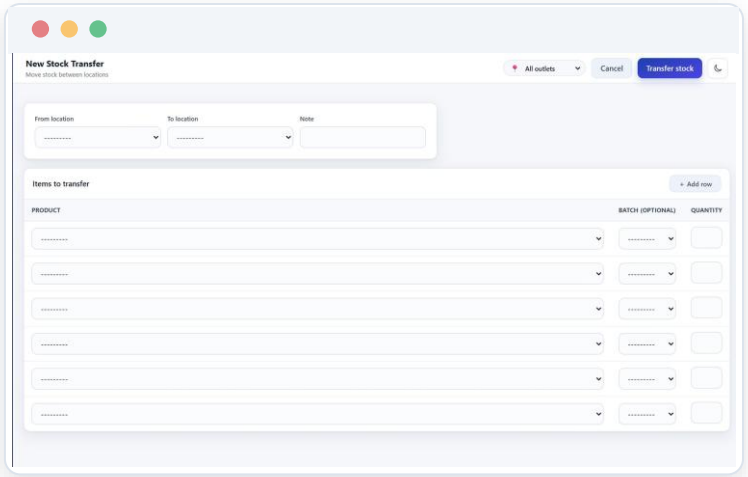

Hourly scan, de-duplicated.

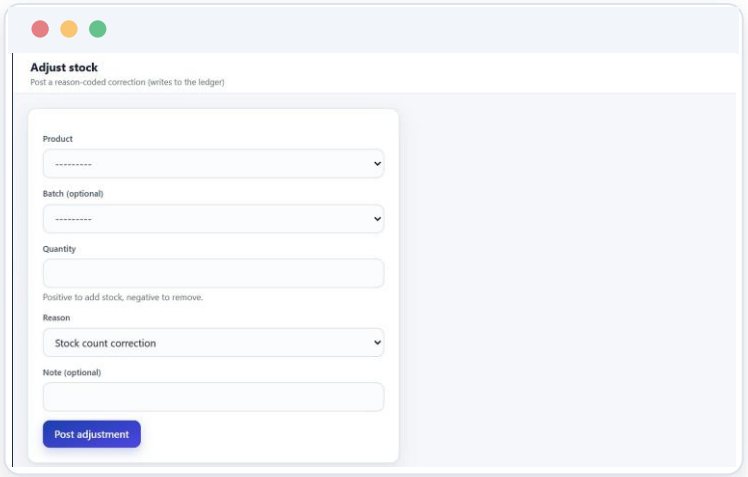

Email delivery

Digests to chosen people.

Every stock movement lands on the ledger

Physical counts

System vs counted quantity; only the difference posts, as a variance.

Inter-location transfers

Out of one location and into another, as two ledger entries.

Reasoned adjustments

Damage, shrinkage or correction, with a reason code every time.

Stock is held per location: stores and warehouses each keep their own on-hand, users are bound to outlets, and the outlet switcher shows one store or all.

PROCURE TO STOCK

Purchase with control, receive with proof

1

Reorder

The reorder report lists items below level; one click turns it into a draft PO.

2

Draft PO

Lines, unit costs and expected date, raised against a vendor.

3

Approve

A separate permission: the buyer cannot self-approve.

4

Receive (GRN)

Batch, expiry and cost captured per line against the supplier invoice.

5

Post to ledger

Stock and moving-average cost update; partial receipts tracked.

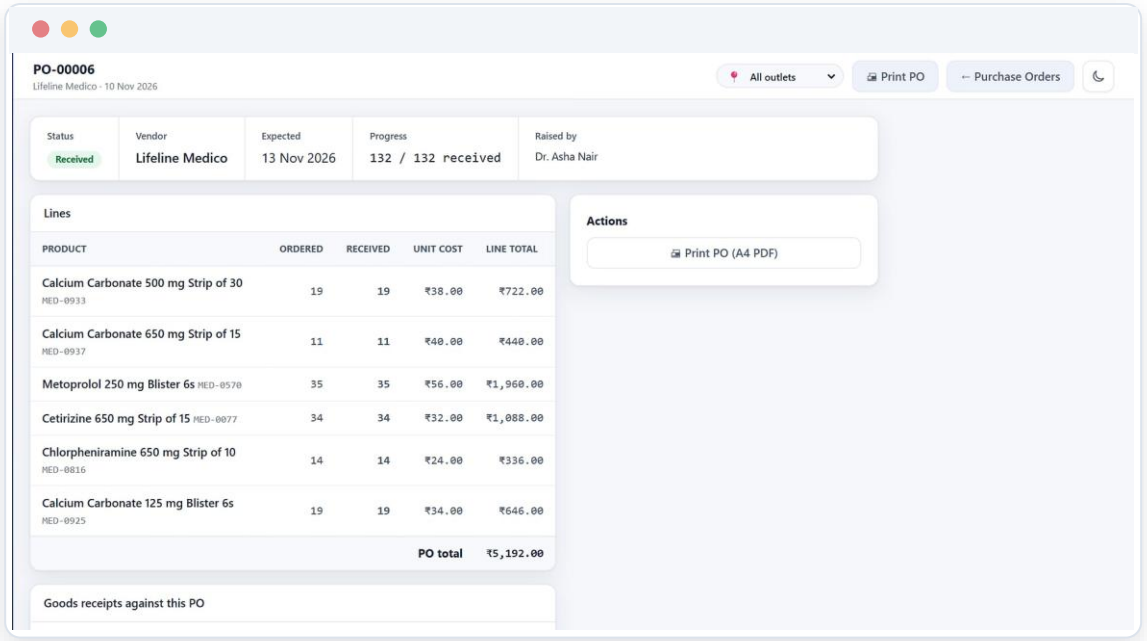

6

Supplier return

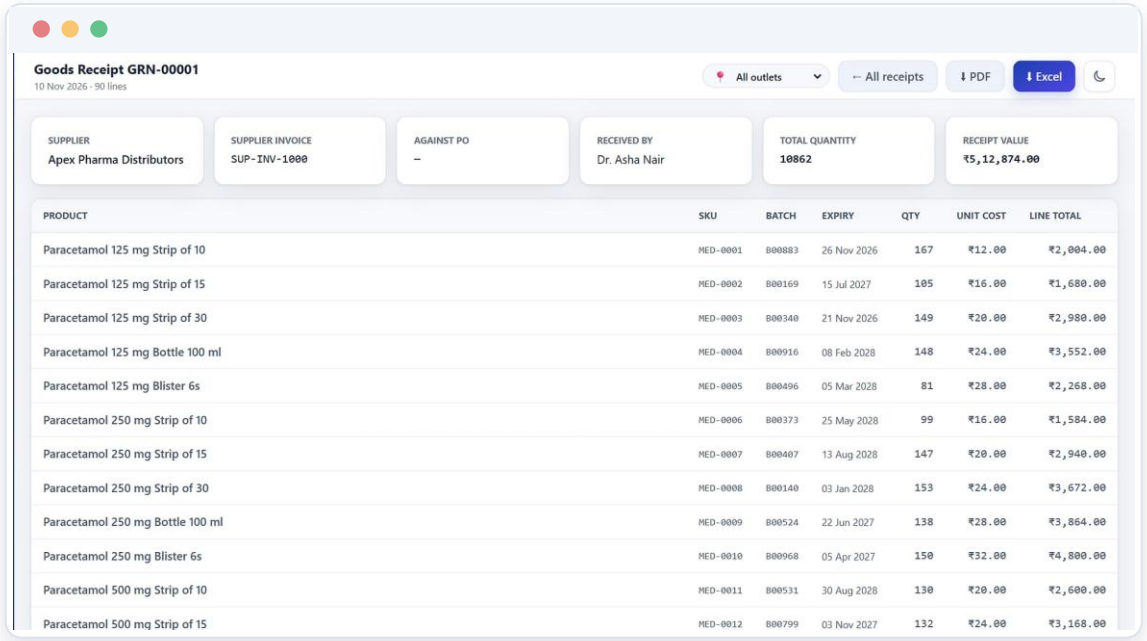

Return-out posts stock and raises a debit note.

Statuses run draft, approved, partially received, received and cancelled. POs print as branded A4 PDFs for the vendor.

Ordered against received, line by line

Purchase order: ordered vs received, with its goods receipts (demo data).

Goods receipt: supplier invoice, batch, expiry, quantity and cost.

Separation of duties

Approval is its own permission.

GRN posts stock

Batch and cost captured per line.

PO as A4 PDF

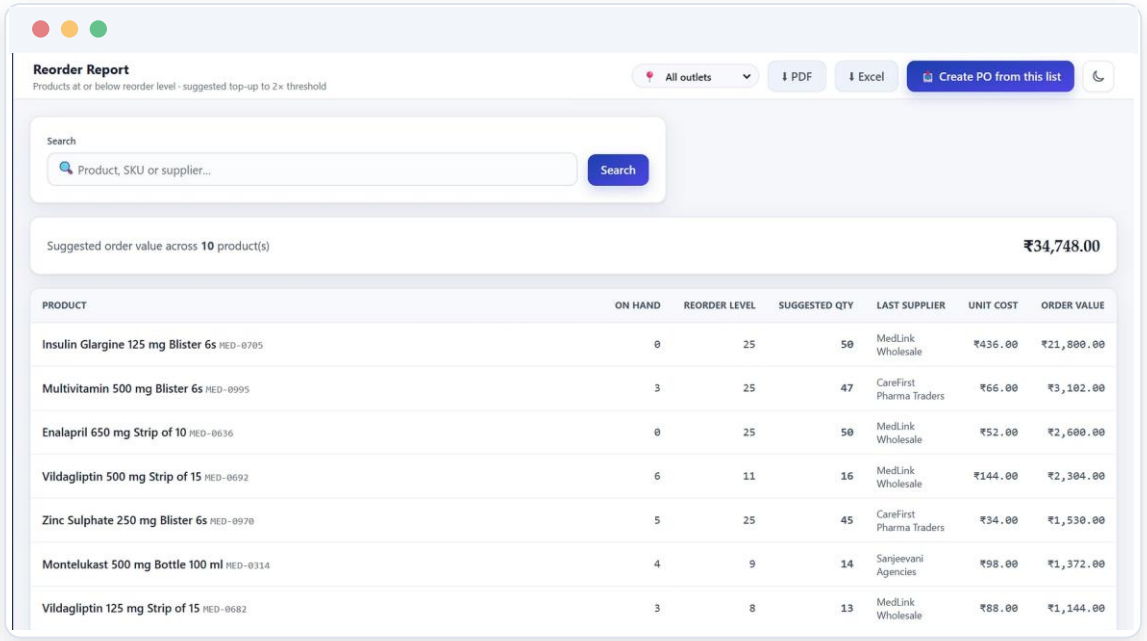

Send a branded order to the vendor.

Invoice matched

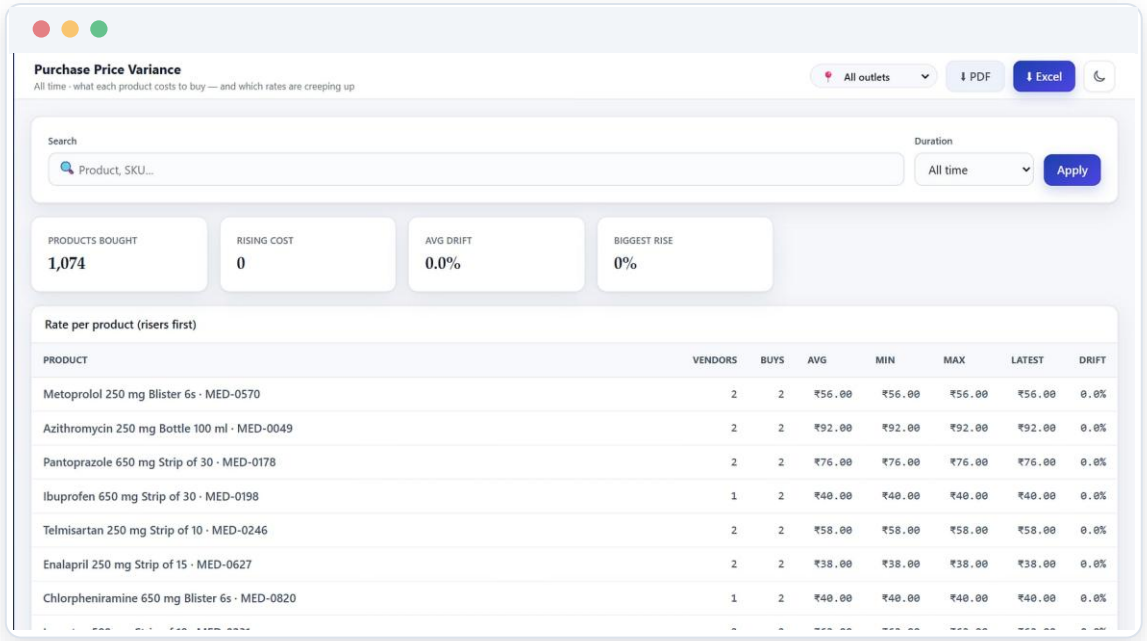

GRN records the supplier invoice no.

REORDER AND PRICE CONTROL

Never run out, never overpay

Reorder report: items below level, ready to become a purchase order.

Purchase price variance: rate history per product (demo data).

Suggested reorder

Below-level items with quantities.

One-click PO

Turn the list into a draft order.

Return to vendor

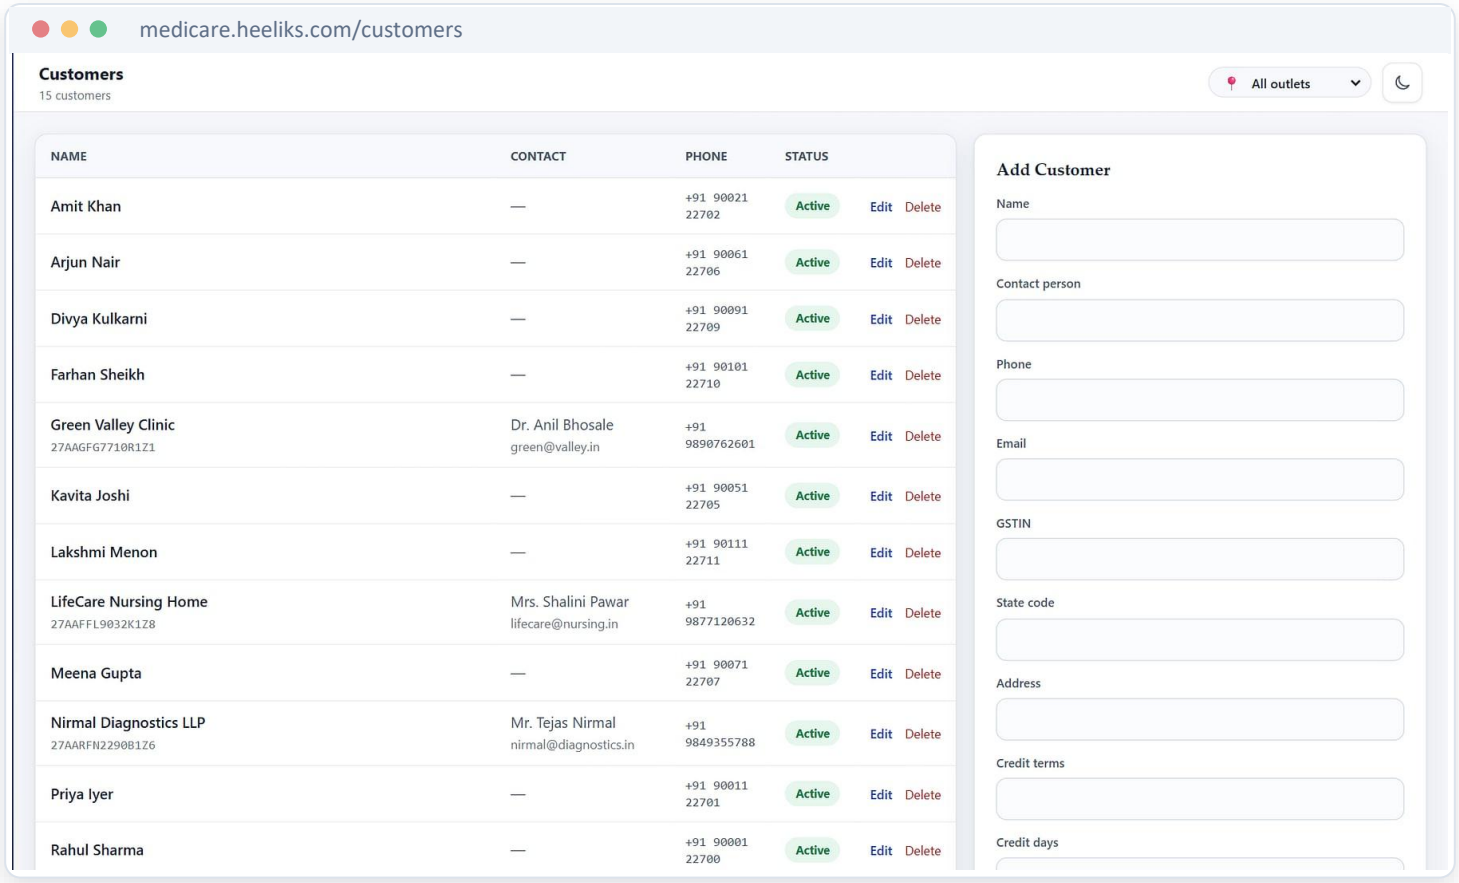

Stock out with a debit note.

Price variance

Rate history per product.

PARTNERS

One party master for everyone you buy from and sell to

Customers with GSTIN, credit terms and limits, including B2B accounts (demo data).

One party, many roles

Vendor, supplier, manufacturer and customer flags on one record.

GSTIN and state

Drives CGST/SGST vs IGST and place of supply.

Credit terms

Credit days and limit, checked when orders are confirmed.

Opening balances

Bring receivables across at go-live.

PILLAR 3 · DISTRIBUTE

Order to cash

Sales orders, invoices, delivery challans, proof of delivery and receipts: distributor-grade order-to-cash on the same stock truth.

ORDER-TO-CASH WORKFLOW

From confirmed order to reconciled ledger, on one timeline

1

Confirm order

Confirmation reserves stock and checks the customer's credit position.

2

Invoice

Invoice the order in full or in part; GST computed per line.

3

Dispatch

One invoice, many challans: transport, LR and e-way bill reference.

4

Proof of delivery

Receiver and time recorded on the challan.

5

Receipt

Bank, UPI or cheque, allocated to invoices; bounces reverse.

6

Ledger and aging

Append-only customer ledger, AR aging and collections.

Available-to-promise is computed from orders and stock, never typed in, so it cannot drift. Every step is stamped on the order's timeline.

SALES ORDERS

Every order's story on one timeline

Draft to confirmed

Confirmation reserves stock; advance terms recorded.

Invoice from order

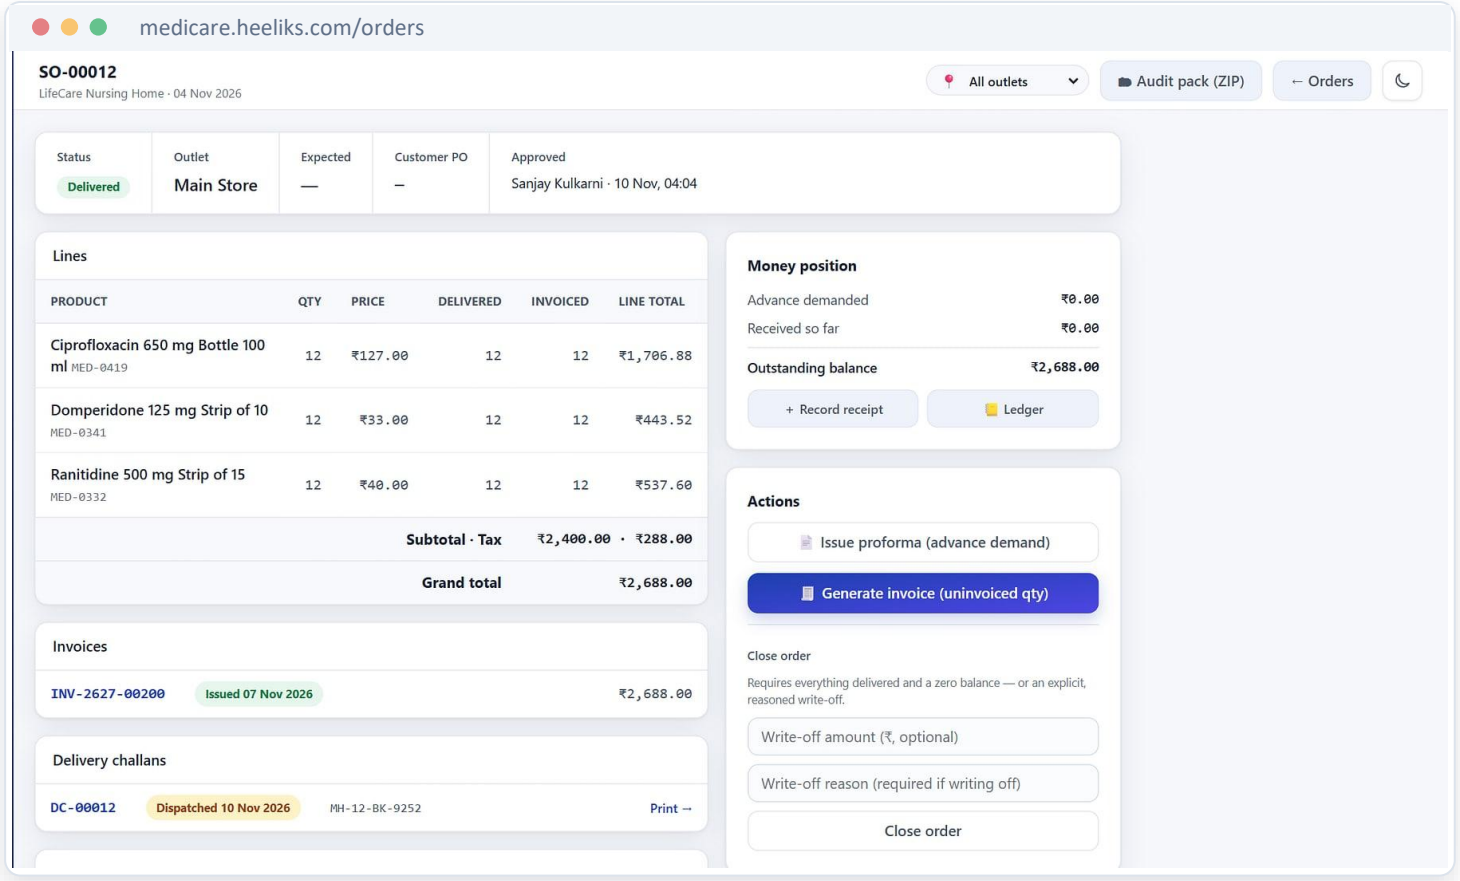

Part or full, against the order.

Full timeline

Every action, user and time; audit pack export.

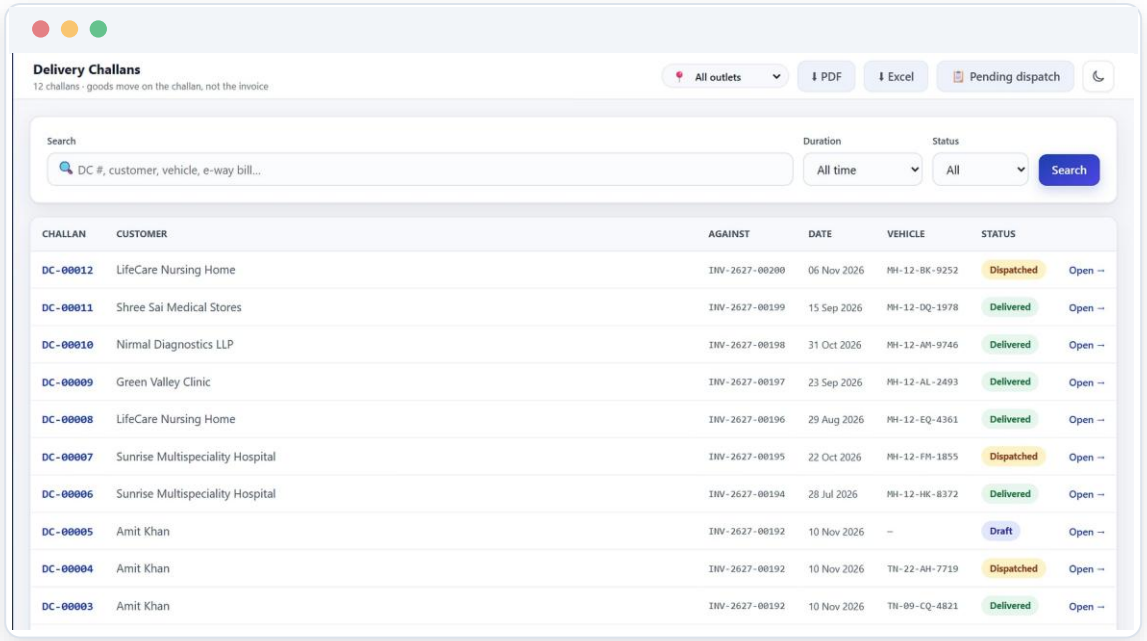

Money position

Advance, received and outstanding at a glance.

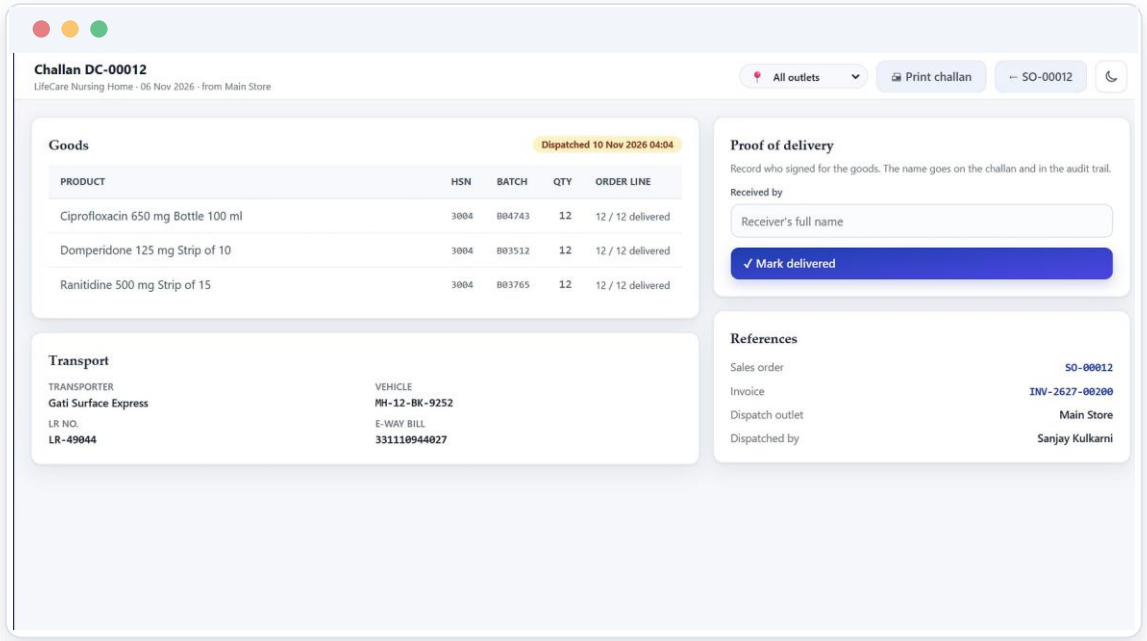

Order detail: lines, invoices, challans, money position and timeline (demo data).

Ship in parts, invoice once, prove delivery

Delivery challans by status across confirmed orders (demo data).

Challan: transport details, e-way bill reference and proof of delivery.

Dispatch moves stock

Reservation consumed on dispatch.

Many challans

Part-shipments, one invoice.

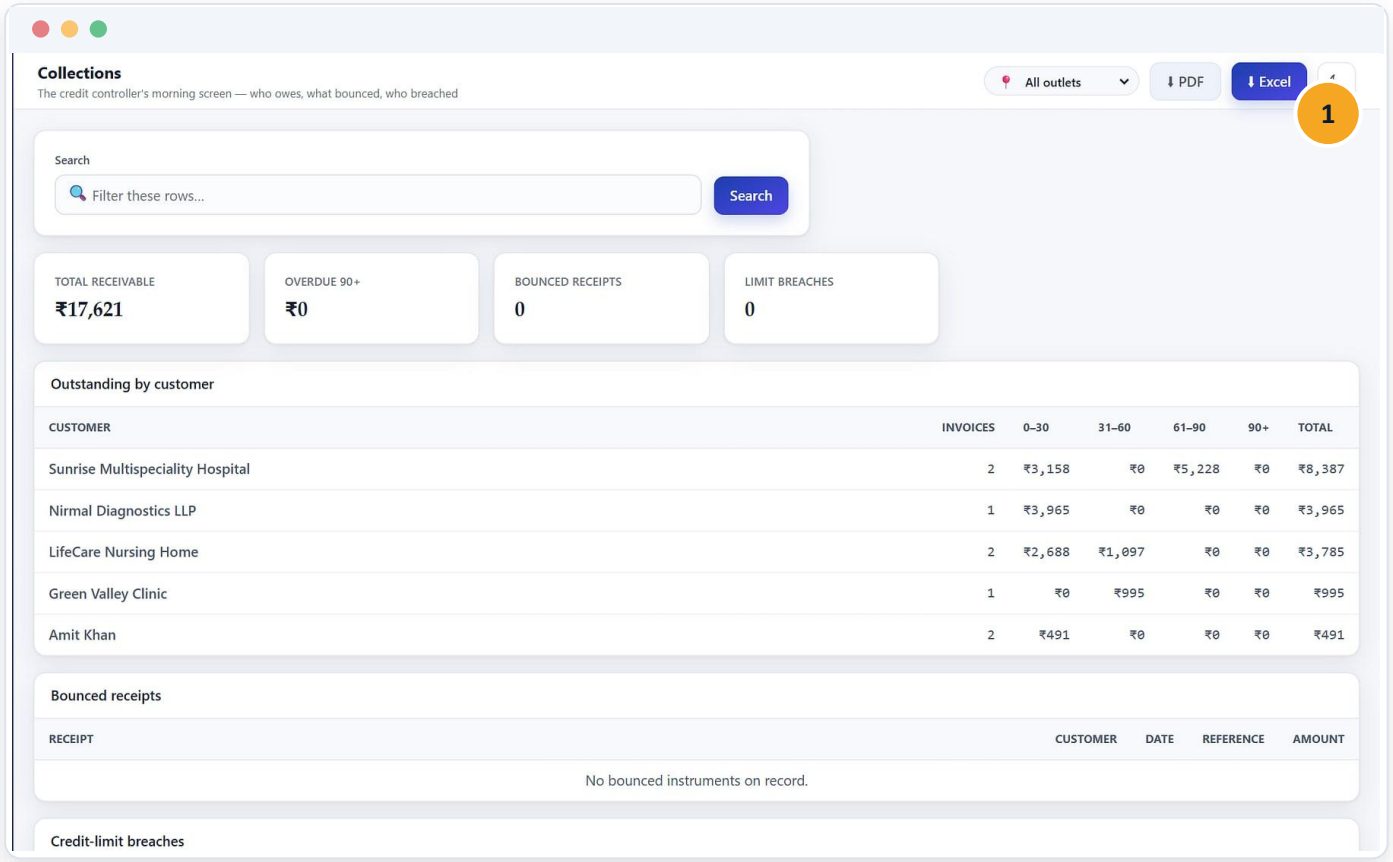

Transport details

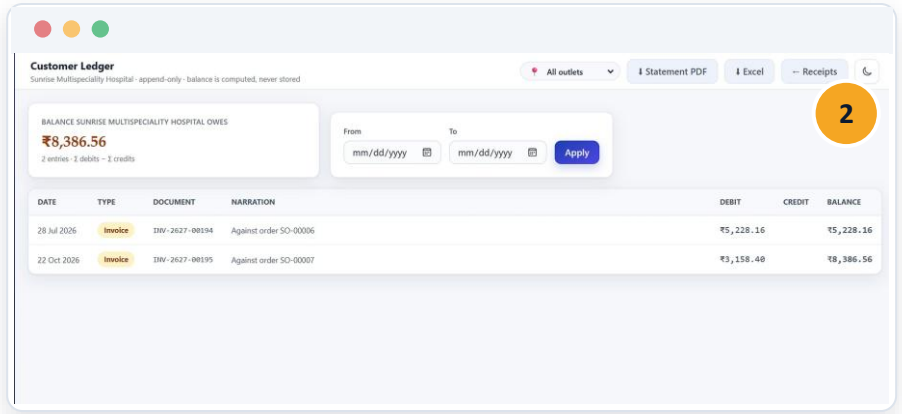

Vehicle, LR, e-way bill no.

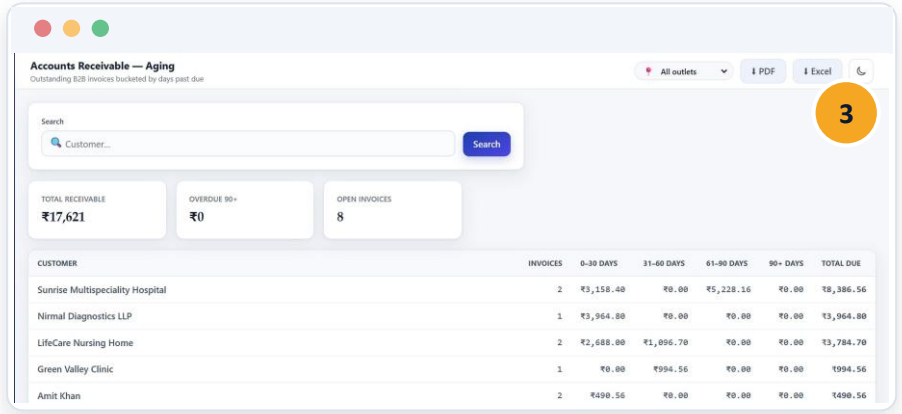

Proof of delivery

Receiver and time recorded.

Know who owes what, and since when

1. Collections: receivables, bounced instruments and credit limits (demo data)
2. Customer ledger with a running balance
3. AR aging by bucket, per customer

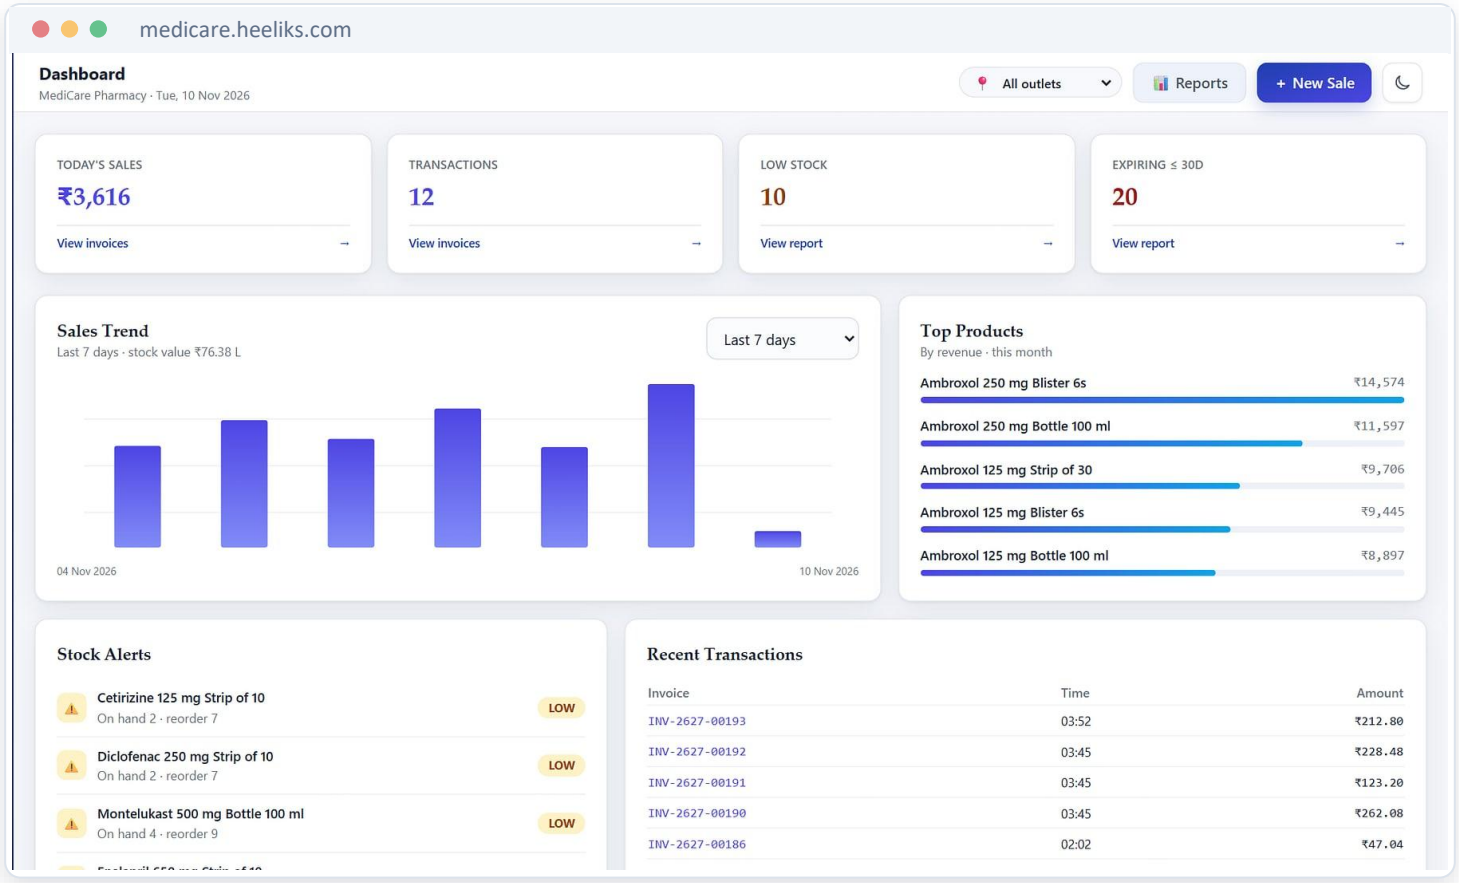

PILLAR 4 · INSIGHT & COMPLY

Answers in one click

The owner dashboard, 21 reports, GST packs and branded Excel and PDF exports.

OWNER DASHBOARD

The whole business before the first coffee

MediCare Pharmacy dashboard (demo data).

Live KPIs

Today's sales, bills, low stock and items expiring within 30 days.

Trend and top sellers

7- or 14-day sales trend; top products by revenue.

Actionable alerts

Low-stock and expiring items one click away.

Outlet switcher

All outlets, or one store at a time.

REPORTS

Twenty-one reports, each one click from Excel

Sales & daily · 4

- Sales, profit & margin
- Discounts by cashier
- Customer analytics
- Day book

Inventory · 6

- Valuation
- Stock movement
- Expiry & batch
- Reorder
- Slow-moving stock
- Shrinkage

Purchasing · 5

- Purchases
- Vendor scorecard
- Spend
- Price variance
- Committed spend

Compliance · 3

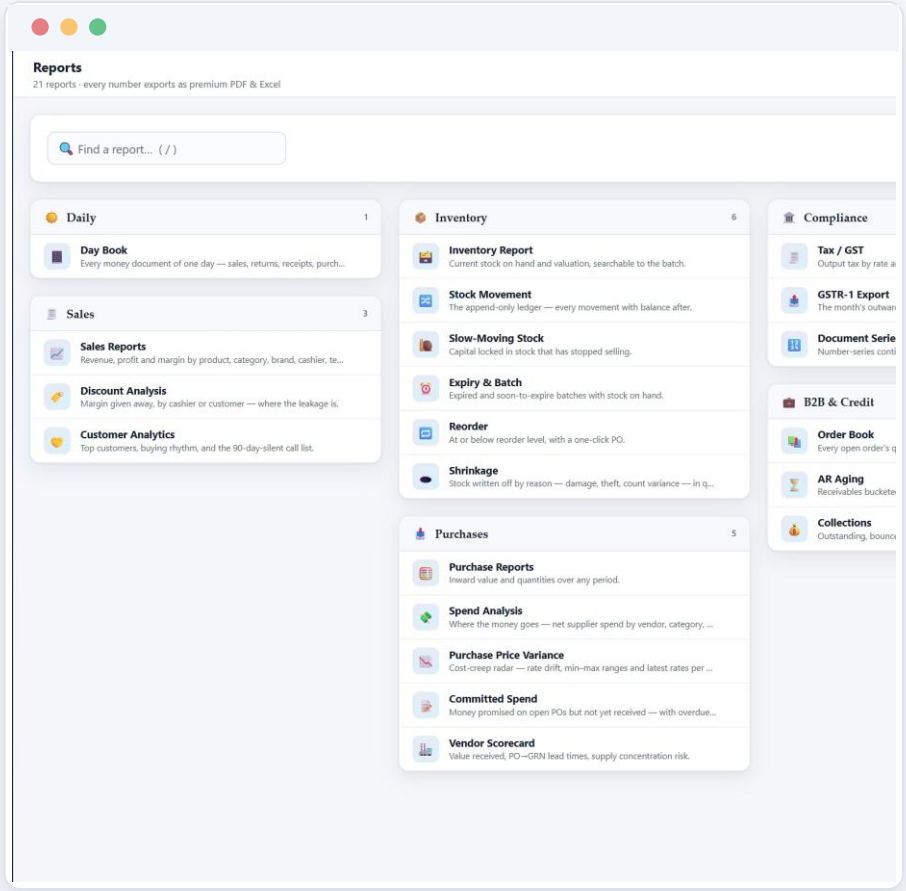

- Tax / GST
- GSTR-1 export
- Document series

B2B · 3

- Order book
- Collections
- AR aging

Every report

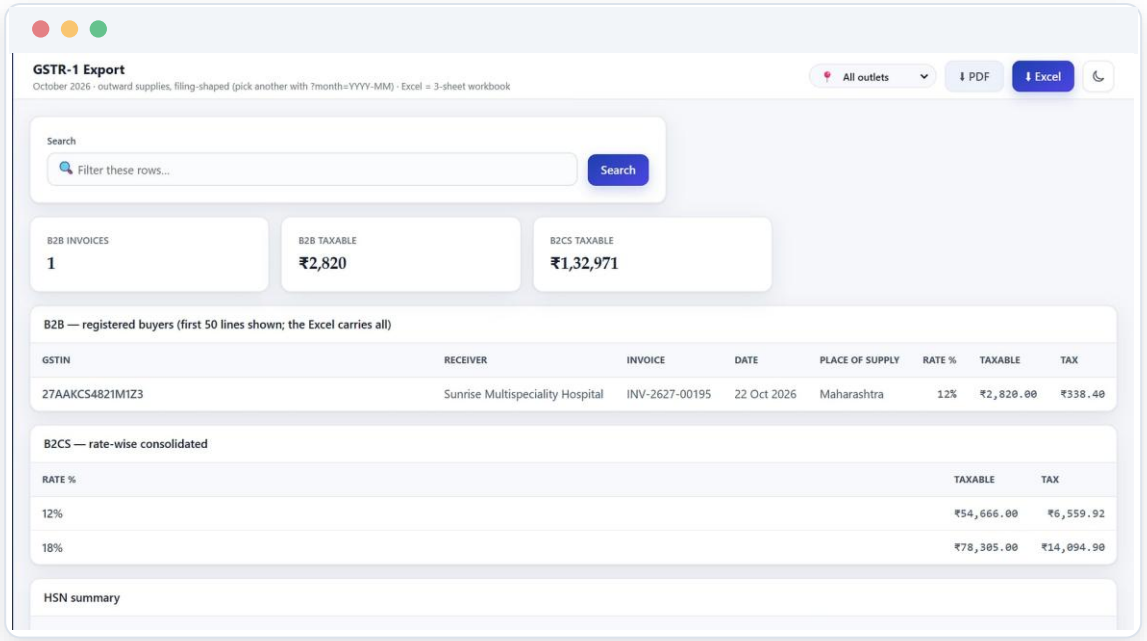

Filter and group by period, outlet, product or tender. Export to branded Excel (frozen headers, totals), PDF or CSV.

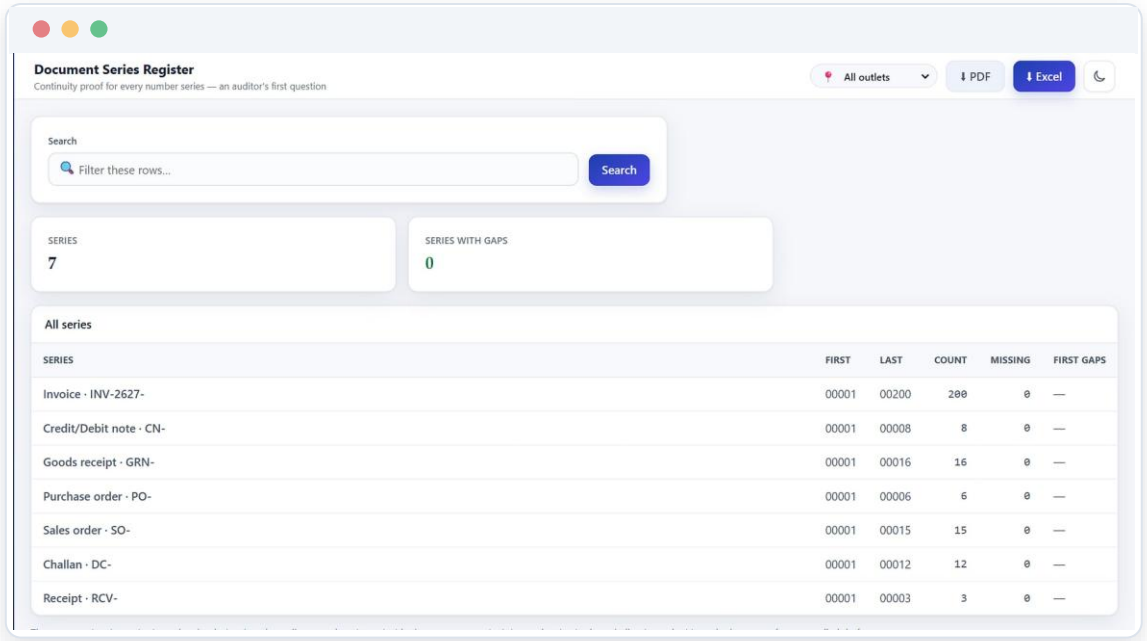

Report hub: daily, sales, inventory, purchasing, compliance, B2B.

GST COMPLIANCE

GST-ready from the very first bill

GSTR-1 export: B2B, B2CS and HSN summary (demo data).

Document-series register: gap check across invoice and note series.

CGST / SGST / IGST

Split by place of supply on every line.

GSTR-1 ready

B2B, B2CS and HSN sections, Excel export.

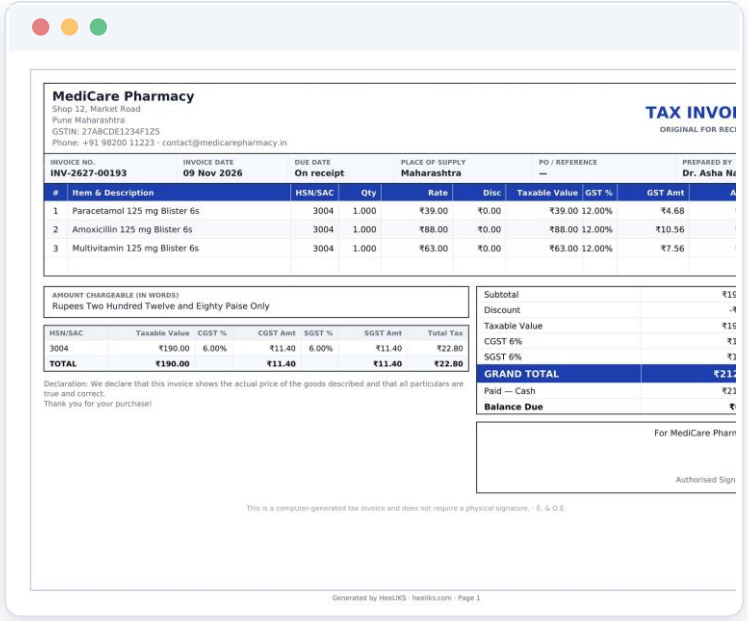

s.34 credit / debit notes

Standalone notes without fake stock moves.

Gapless series

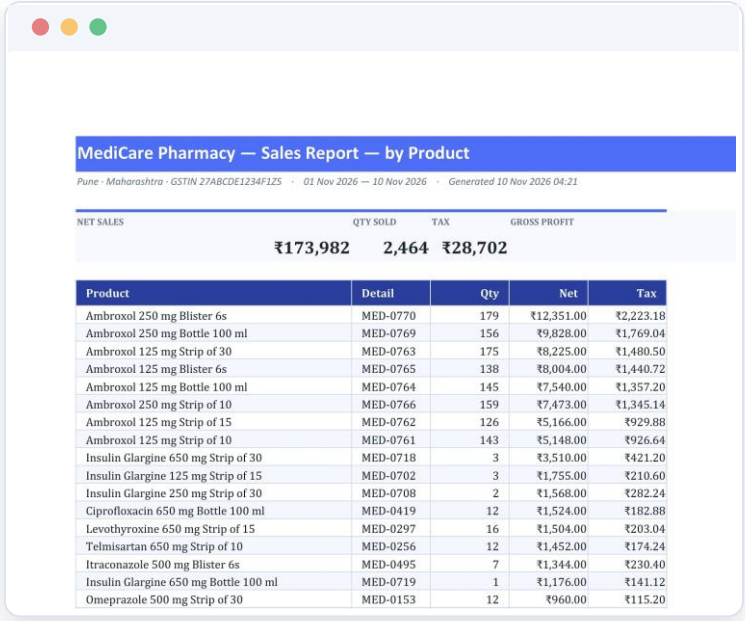

Fiscal-year numbering, audited for gaps.

Documents your accountant will actually use

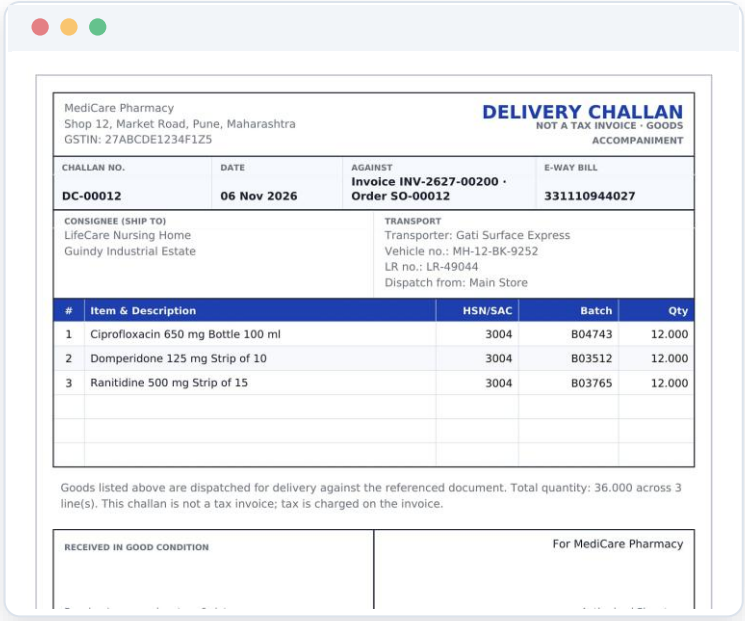

Tax invoice, A4 PDF

Branded with the outlet profile; thermal layouts too.

Branded Excel

Frozen headers and totals, ready for the CA.

Delivery challan

Transport details, printed without prices.

PILLAR 5 · GOVERN & SCALE

Secure, and live in days

Onboarding and import, two-factor security, roles and audit, subscriptions and the platform console.

Import safely: stage, dry-run, commit, reconcile, undo

Stage

Workbook, Tally Masters XML or per-entity CSV/Excel.

Dry-run

Every row validated with zero writes.

Commit

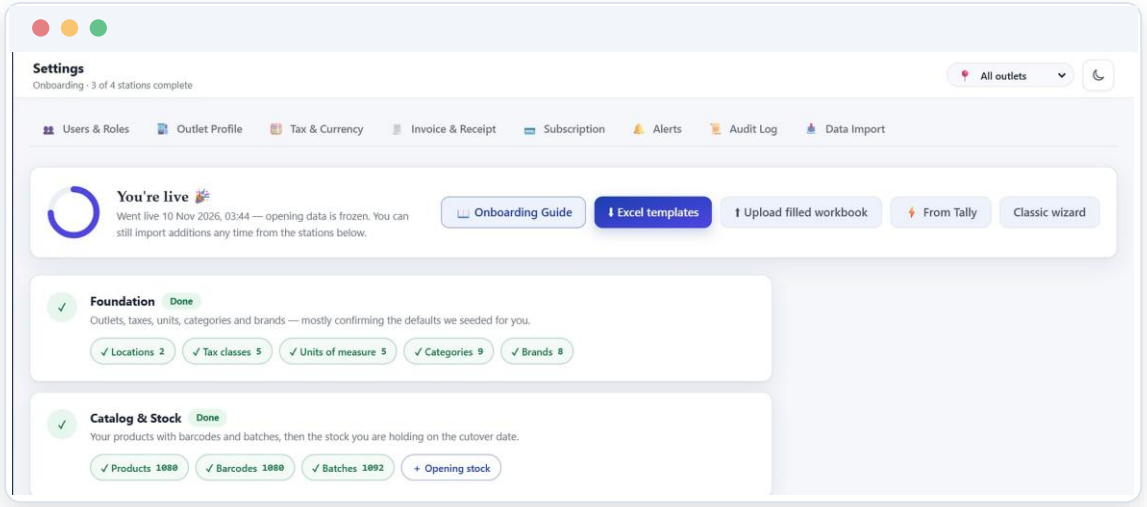

Atomic: all rows or none.

Reconcile

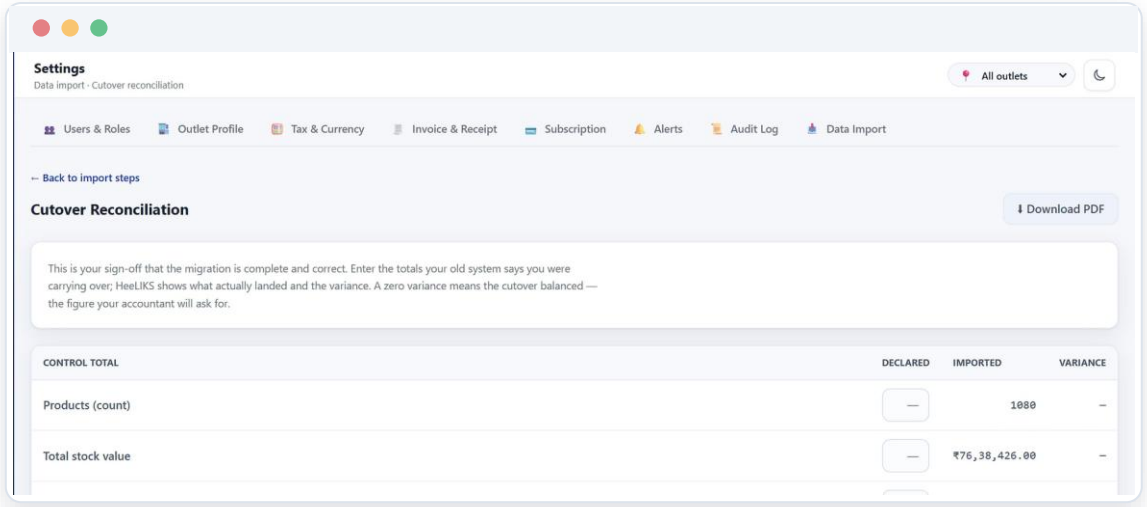

Declared vs imported totals must hit zero variance.

Undo

Roll back a committed batch exactly.

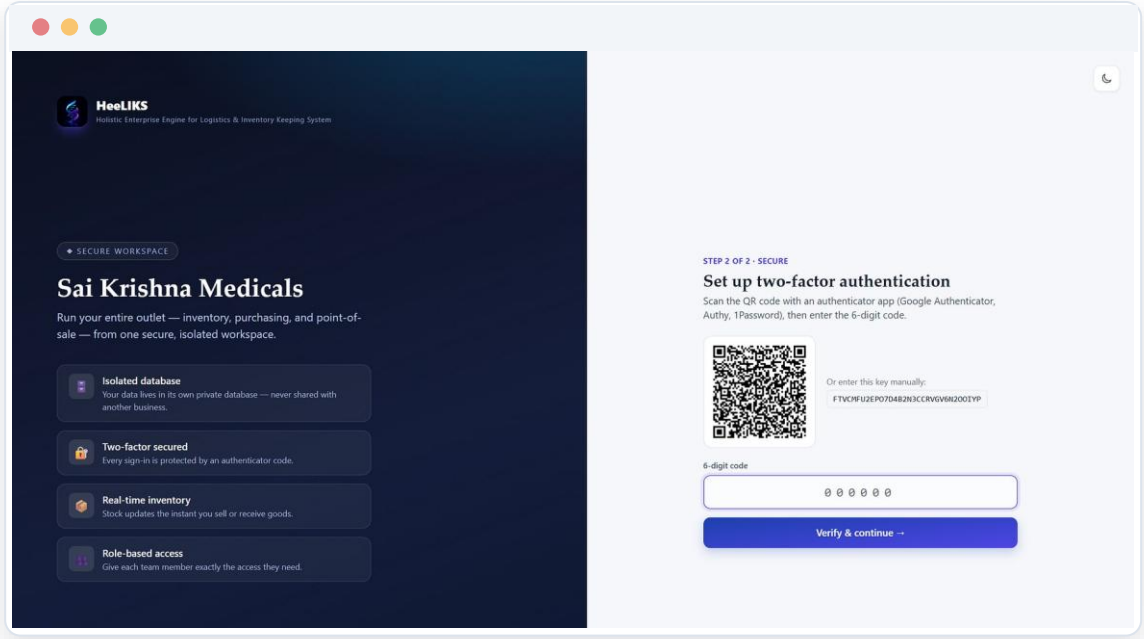

Guided go-live checklist (demo data).

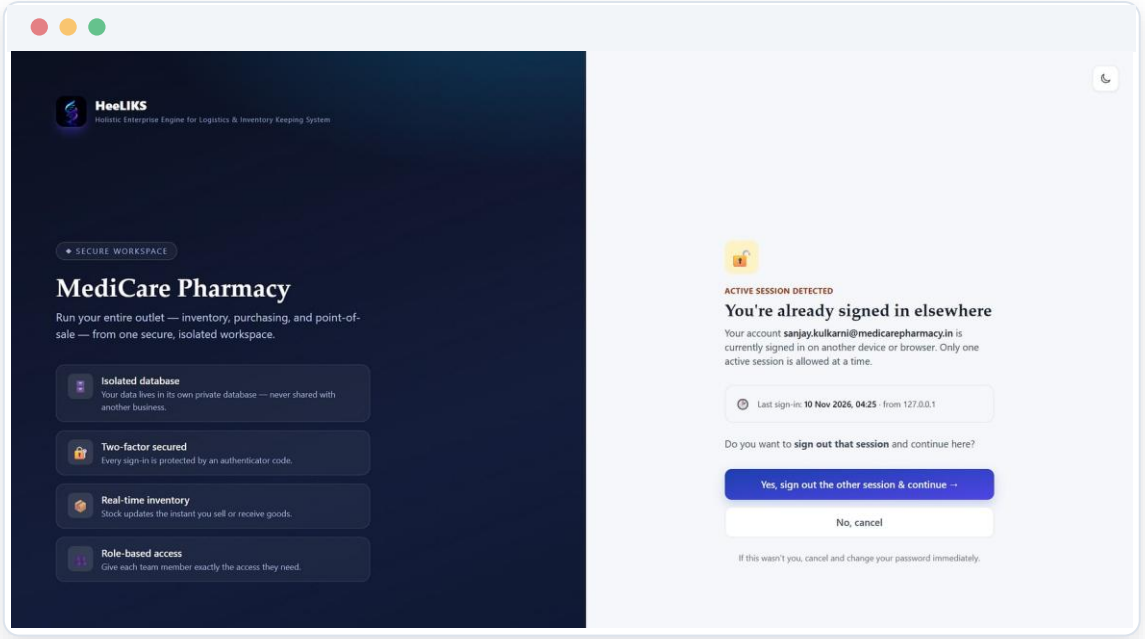

Import reconciliation: control totals checked to zero variance.

Two-factor for every user, no exceptions

Forced two-factor enrolment by QR code at first sign-in.

One session per user: a new sign-in replaces the old one.

Argon2 + TOTP

Backup codes and email OTP fallback.

Lockout and limits

5 strikes; rate-limited endpoints.

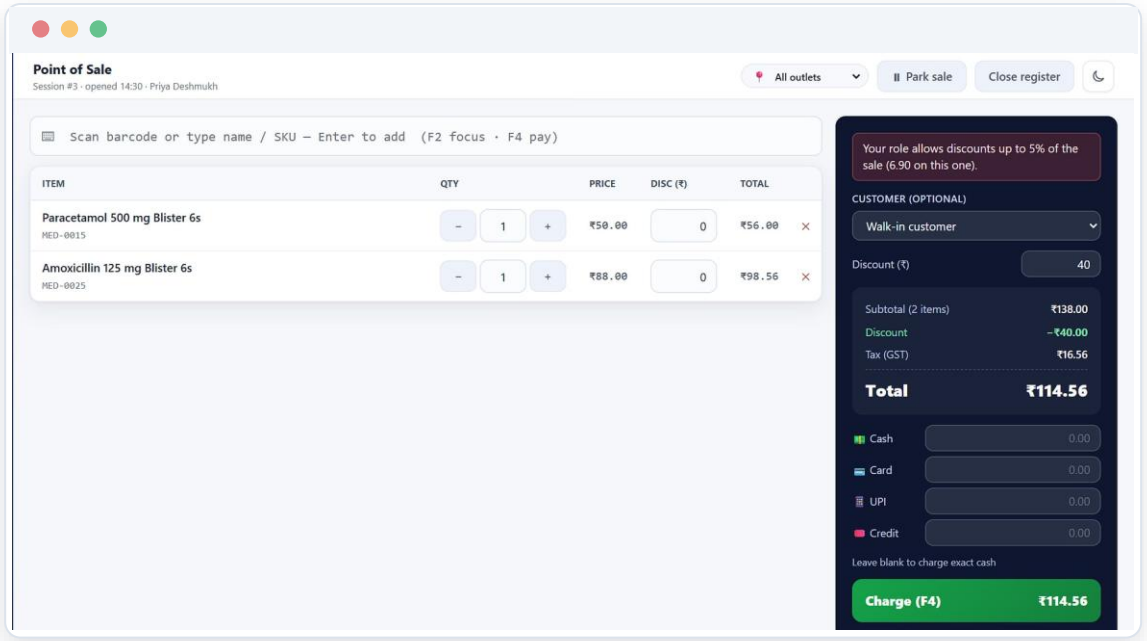

Idle expiry

8-hour sliding inactivity timeout.

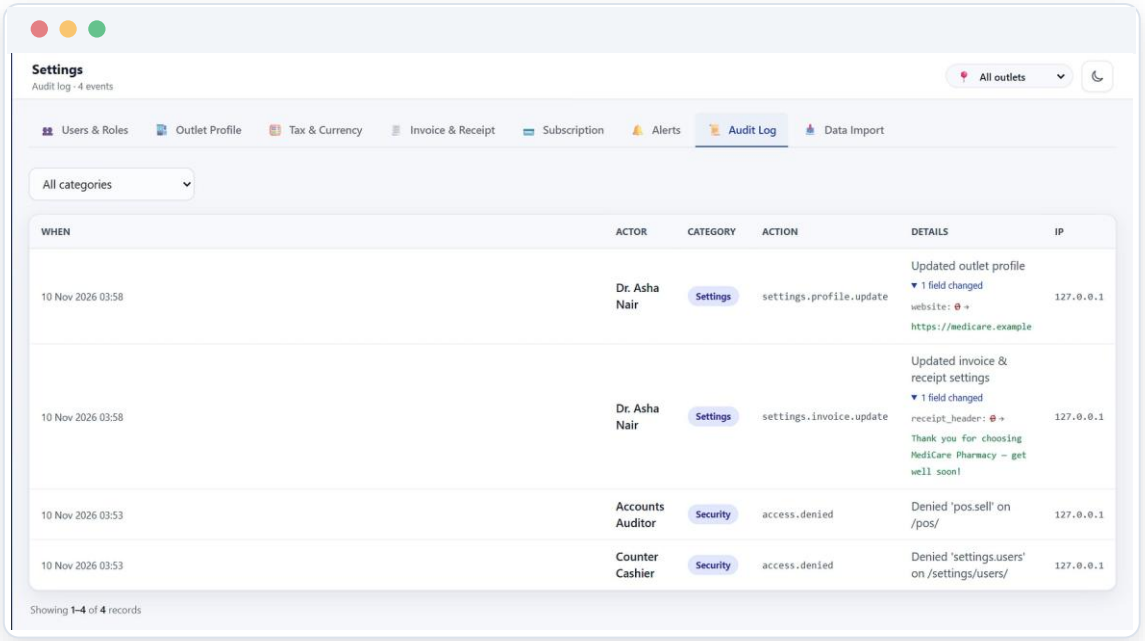

Encrypted secrets

TOTP secrets encrypted at rest.

Exactly the right access, and every change on record

A cashier's 40% discount blocked by the 5% role cap.

Audit log: field-level before and after values, and denied-access events.

10 permissions, 5 roles

Plus custom roles.

Discount caps

Cashier 5%, Manager 20%.

Outlet binding

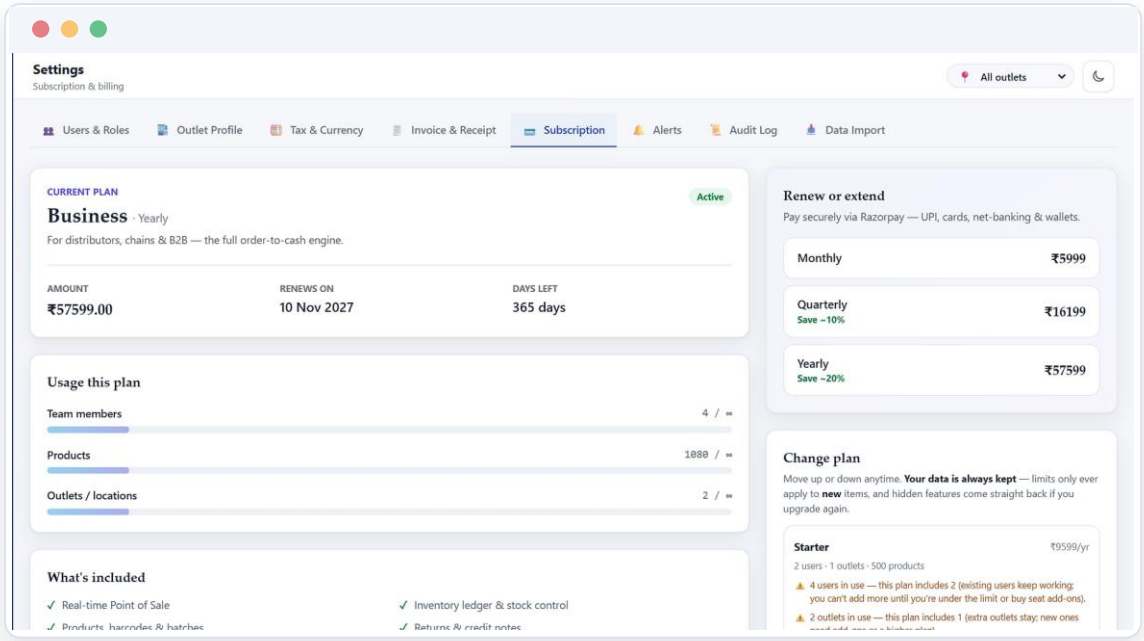

Users restricted to their stores.

Append-only audit

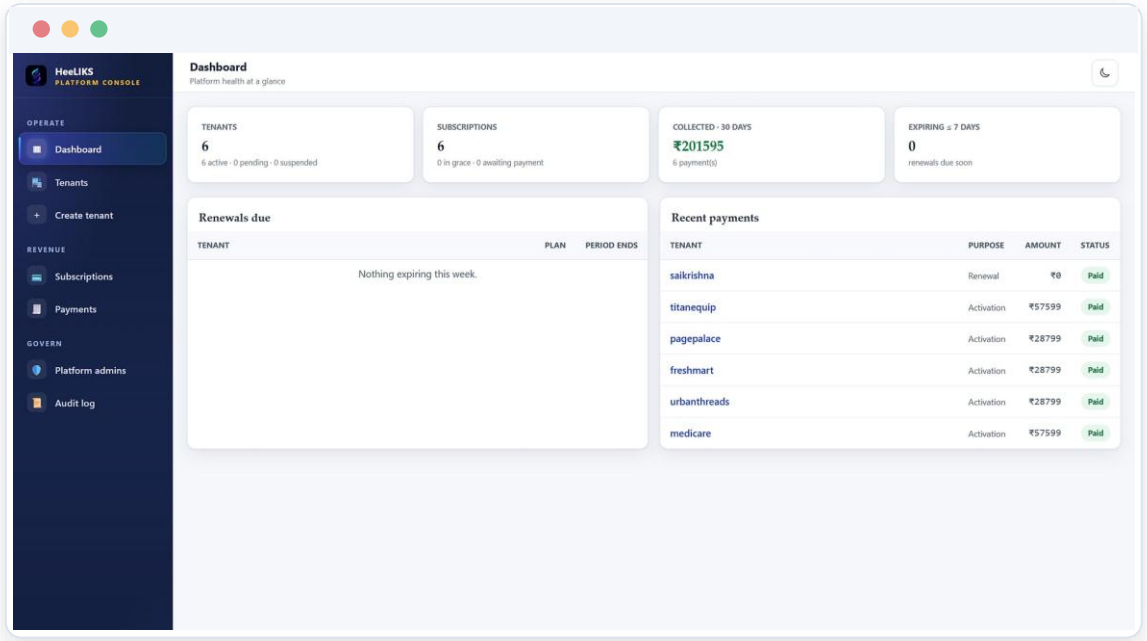

Entries cannot be edited or deleted.

SUBSCRIPTION AND PLATFORM CONSOLE

Self-serve for customers, one console for the operator

Subscription: plan, renewal, usage meters and add-ons (demo data).

Platform console: tenants, subscriptions, collections and renewals.

Razorpay checkout

HMAC-verified payment activates the workspace.

Usage meters

Seats, outlets and products per plan.

Trial and grace

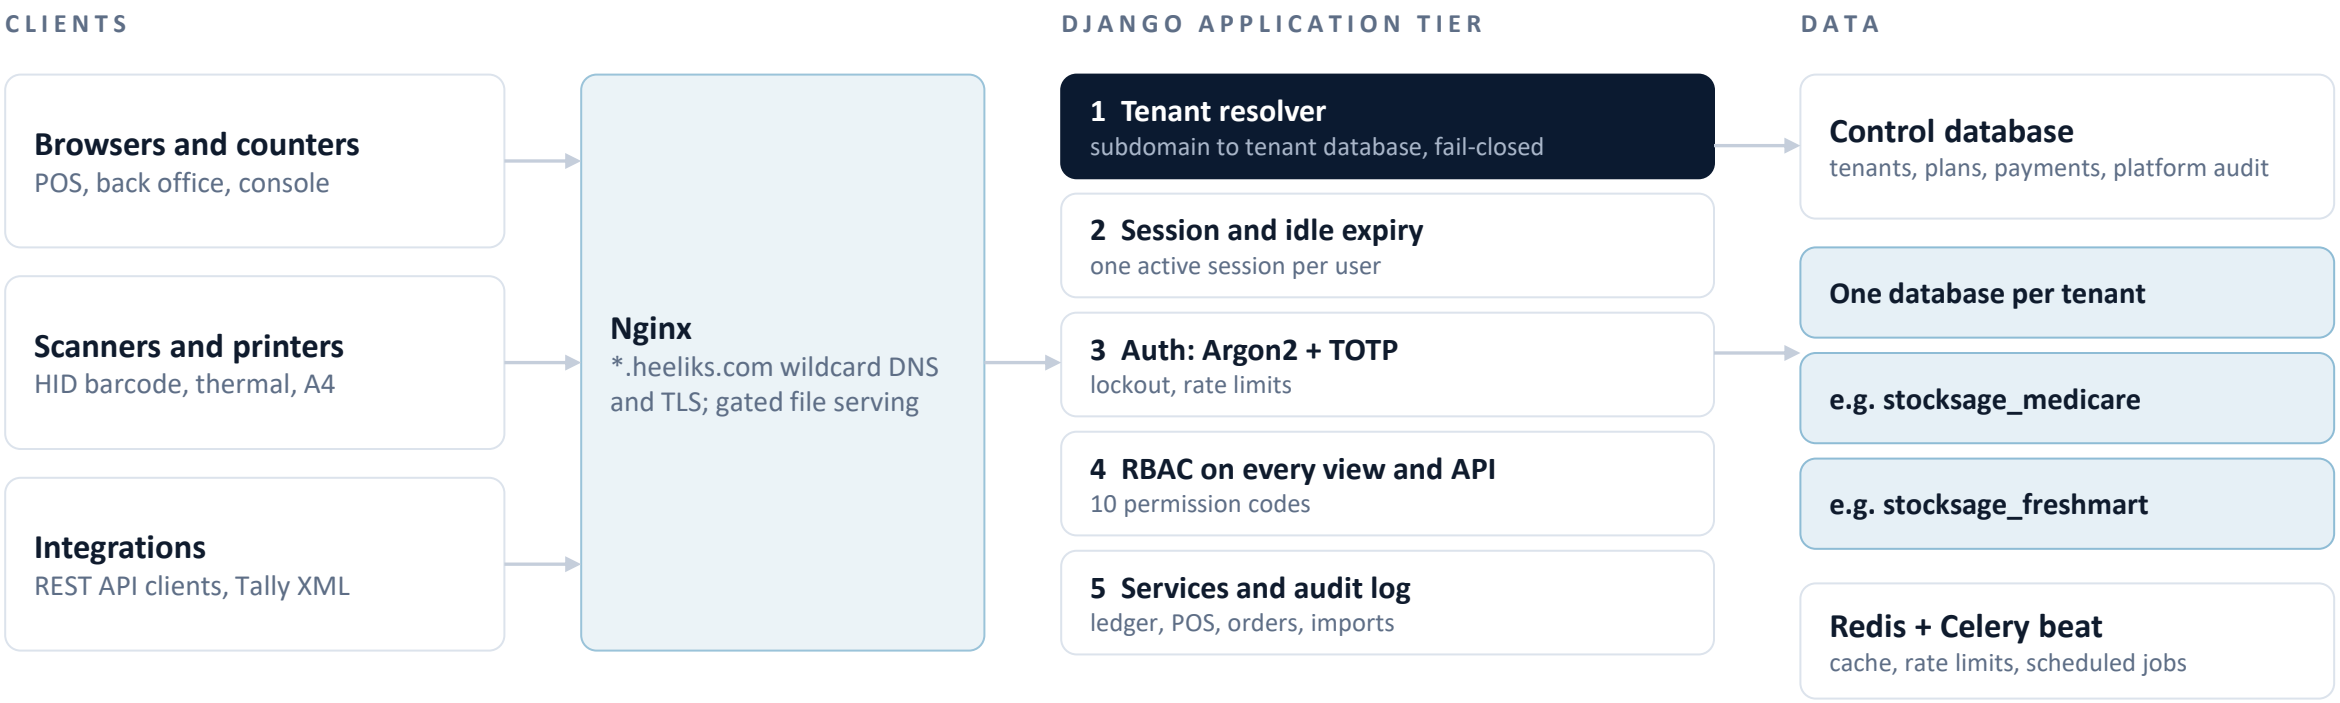

14-day trial; 15-day grace, then suspension.

Operator console

Provision, suspend, extend; metadata only.

ARCHITECTURE

Isolation-first and multi-tenant by design

Each tenant's data lives only in its own database; the control database holds commercial metadata. Provisioning runs create database, migrate, then seed roles and defaults.

INTEGRATIONS AND TECHNOLOGY

Connects to the tools you already run, on a proven stack

Razorpay

Checkout with HMAC-verified webhooks.

Office 365 / SMTP

Receipts, alerts, password resets, OTP.

Tally

Masters XML import with opening stock.

Excel and CSV

Import templates and every export.

REST API

Tenant-scoped, RBAC-checked: products, stock, sales.

Scanners and printers

HID barcode, Code128 labels, thermal and A4.

TECHNOLOGY STACK

Python 3.12 · Django 5 · DRF
application and API

MySQL 8
one control DB plus one DB per tenant

Redis 7 · Celery 5.4 beat
cache, rate limits, scheduled jobs

Tailwind UI · server-rendered
responsive web, dark mode

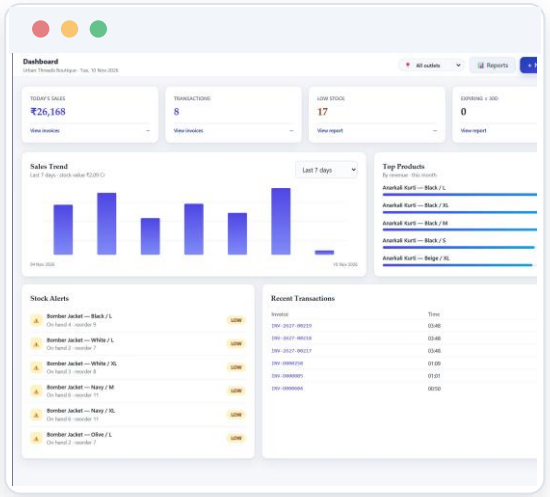

ReportLab · openpyxl
PDF documents and Excel exports

Gunicorn · Nginx · Docker
wildcard TLS, systemd, Compose

Web only: HeeLIKS runs in any modern browser on desktop or tablet. There is no native mobile app.

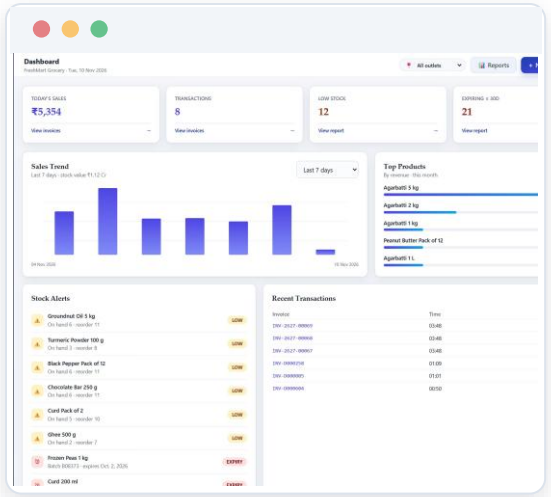

INDUSTRY FIT

One platform, configured for five verticals at signup

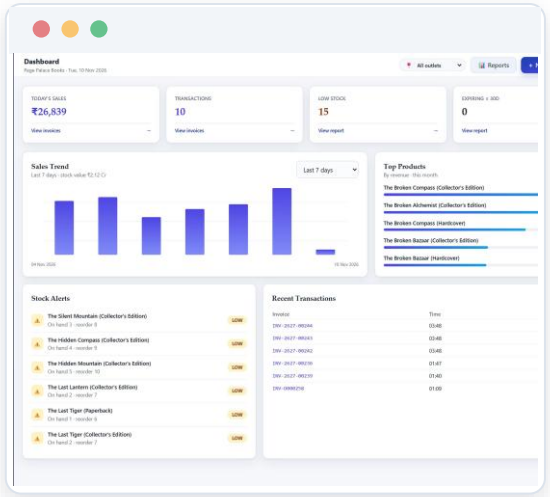

Retail and fashion

Size and colour variants as SKUs on shared masters (Urban Threads, demo).

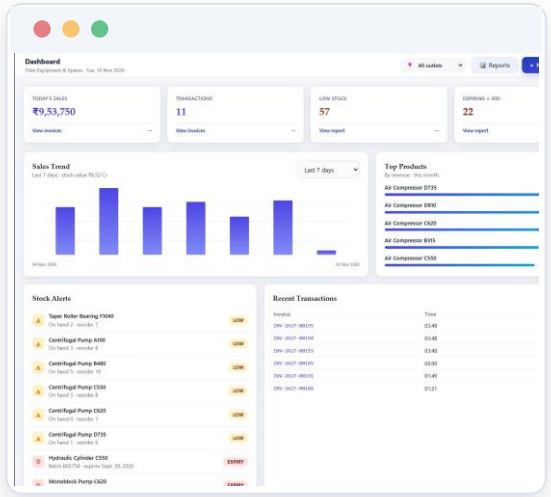

Grocery and kirana

Perishables, loose and packed units, fast billing (FreshMart, demo).

Bookstores

Large title catalogues by title and edition (Page Palace, demo).

Industrial spares

High-value B2B lines, credit limits and AR (demo distributor).

Pharmacy and medical, with batch, expiry and FEFO, is the MediCare demo used throughout this deck. Every vertical runs the same product; the outlet type chosen at signup sets the defaults.

WHY SWITCH

Today versus with HeeLIKS

	TODAY	WITH HEELIKS
Stock	Spreadsheet, updated at day end	✓ Ledger updated with every sale
Expiry	Found at audit, written off	✓ FEFO selling and 30-day alerts
GST	Rebuilt from bill books	✓ GSTR-1 export in one click
Access	Shared logins, any discount	✓ Personal 2FA logins, role caps
B2B	Paper challans and khata	✓ Order to ledger, on one timeline

Your own database

Isolation by design, not a filter.

One stock truth

Every module moves the same ledger.

Built for Indian GST

From the first bill to GSTR-1.

Live in days

Import with dry-run and undo.

PLANS AND DEPLOYMENT

Cloud subscription or a perpetual on-premise licence

STARTER

₹999

/ month

1 user + admin · 1 outlet · 500 products. POS, inventory, returns, dashboard and reports.

GROWTH

₹2,999

/ month

5 users + admin · 2 outlets · unlimited products. Adds purchasing, POs and goods receipts.

BUSINESS

₹5,999

/ month

Unlimited users, outlets and products. Adds B2B order-to-cash for distributors and chains.

PERPETUAL

₹7.5 L

one-time

The complete product on your own servers; optional AMC at 5% a year from year two.

Prices exclude GST. Quarterly saves about 10% and yearly about 20%. 14-day free trial. Extra users ₹599 and extra outlets ₹699 a month on Starter and Growth.

INDICATIVE ROLLOUT

From kick-off to every outlet live in about a month

1

Discover · week 0

Outlets, roles, plan and data sources agreed.

2

Provision · week 1

Workspace with its own database; profile, tax and users.

3

Import · weeks 1–2

Workbook or Tally import, dry-run and reconcile.

4

Pilot · weeks 2–3

Train by role; run one outlet live.

5

Go live · weeks 3–4

Lock go-live; roll out the remaining outlets.

Indicative only. Timing depends on the number of outlets, data quality and training availability, and is confirmed per engagement.

ROADMAP

What's next on the HeeLIKS roadmap

PLANNED

e-Invoice (IRN)

Generate the IRN and signed QR through the GST portal.

PLANNED

e-Way bill generation

Today the number is recorded; next, generate it.

PLANNED

Tally export

Push vouchers back to Tally for accounting.

PLANNED

Quotations

Quote to order conversion for B2B sales.

PLANNED

Customer portal

B2B customers view orders, invoices and statements.

PLANNED

Payables workflow

Vendor invoices and supplier payments.

Planned items from the product roadmap (docs/Roadmap.md, Phase D). Not in the current release; timelines to be confirmed.

MavionTech
