ENTERPRISE SALES OVERVIEW

PragyanNxt

ASSESSMENT · PROCTORING · CERTIFICATION

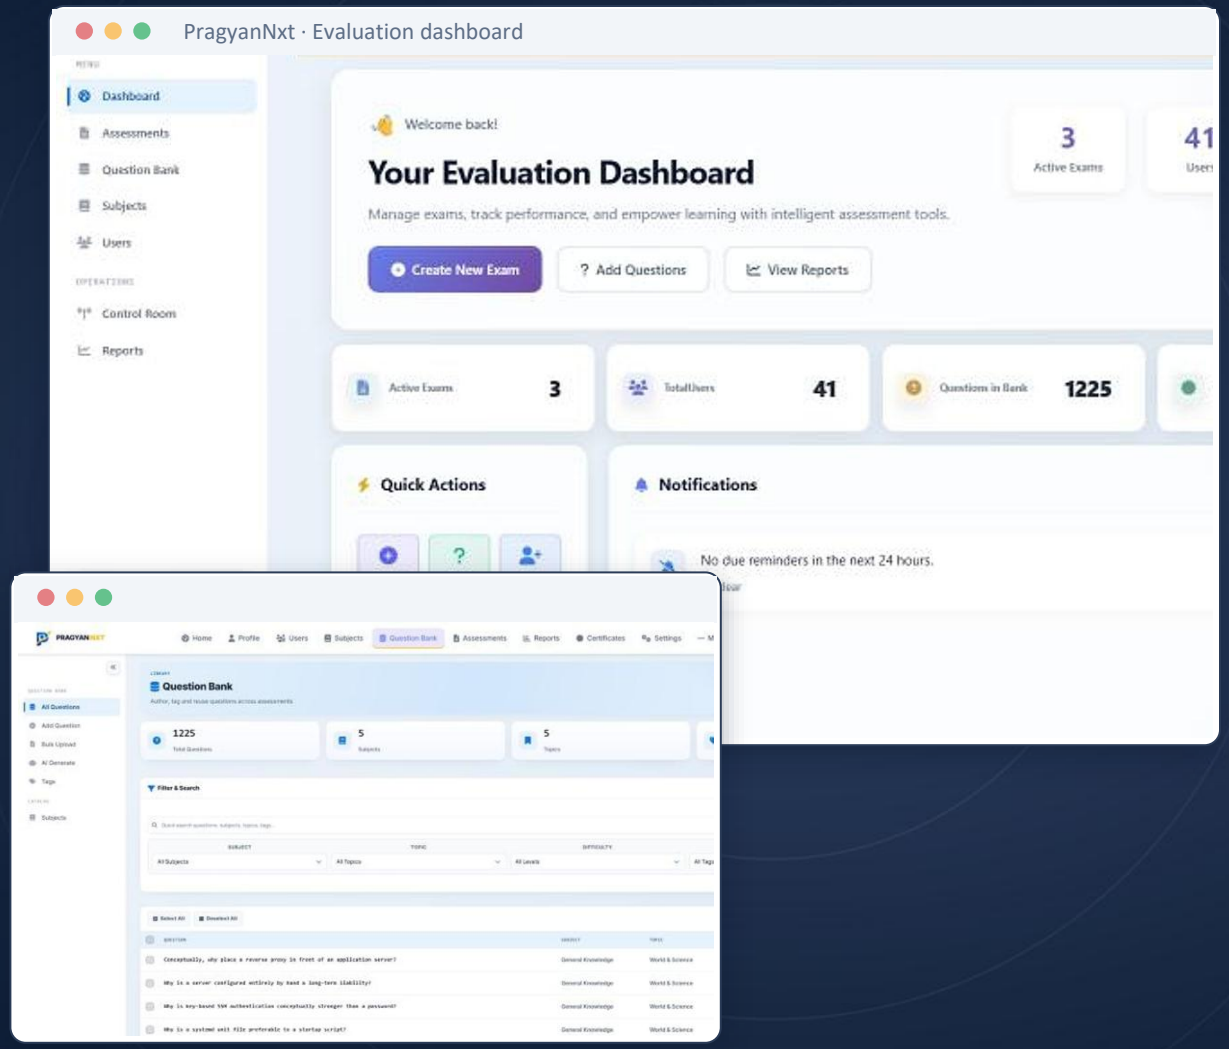

Results you can defend. Credentials anyone can verify.

One platform for corporates and academic institutions to author, deliver, proctor, score and certify, with an integrity score on every attempt.

Author to certificate

Integrity scoring

Isolated tenants

THE PROBLEM

Online testing scaled, but trust didn't

For hiring teams

Gamed screening tests push the wrong candidates forward, while strong talent walks away from a process it doesn't trust.

For academic institutions

Unmonitored exams devalue the certificate, invite disputes and grade appeals, and put accreditation and reputation at risk.

WHAT AN ASSESSMENT YOU CAN'T DEFEND COSTS

The wrong hire

Every bad hire that cleared a gamed test costs months of ramp-up and re-hiring.

The disputed result

Contested scores trigger appeals, manual re-grading and reputational damage.

The leaked exam

Once a question bank leaks, the assessment has to be rebuilt from scratch.

PROBLEMS WE SOLVE

Six real problems, each answered by a specific capability

THE CHALLENGE	HOW PRAGYANNXT SOLVES IT
Candidates cheat in unsupervised remote exams	✓ **AI proctoring plus an integrity score on every attempt**
Scores get disputed and appealed	✓ **A defensible evidence trail with a formal appeals process**
Certificates are easy to forge	✓ **Cryptographically signed credentials anyone can verify**
Authoring quality assessments takes days	✓ **Bulk import and AI generation from your own content**
Point tools don't talk to each other	✓ **One platform from authoring to verifiable credential**
Mixing organisations' data is a security risk	✓ **A separate, isolated database for every organisation**

THE SOLUTION

One platform for the entire assessment lifecycle

Unified lifecycle

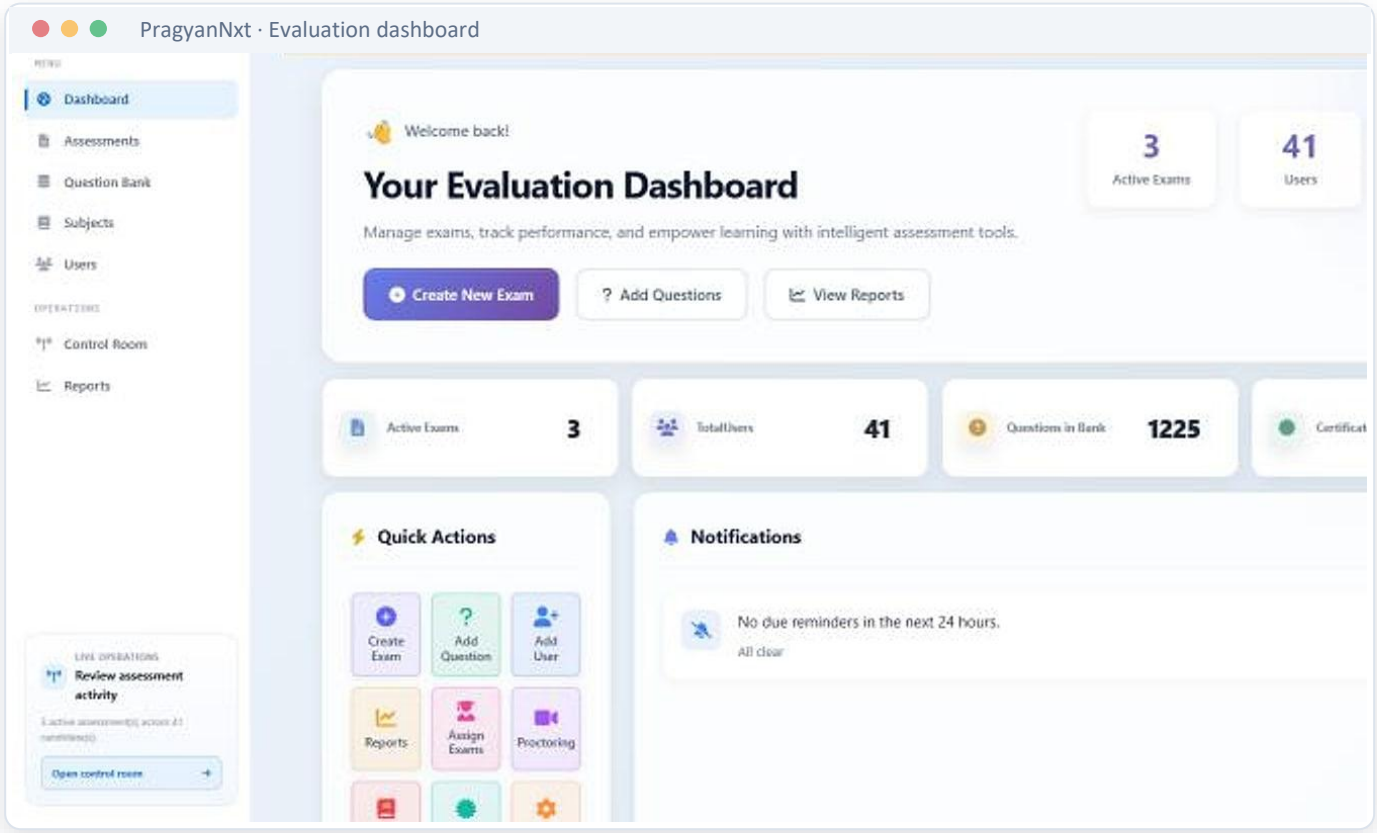

Authoring, delivery, proctoring, integrity scoring, analytics and certification in one system.

Integrity on every attempt

AI proctoring and behavioural signals produce a defensible score, even without a camera.

Verifiable credentials

Signed certificates that anyone can check, and that carry the evidence behind them.

Evaluation dashboard: active exams, users, a 1,225-question bank and quick actions (demo data).

WHO USES PRAGYANNXT

Every role in the assessment chain, in one system

Platform manager

Provisions organisations into isolated databases and sets their plan.

Organisation admin

Runs the organisation: users, subjects, exams, reports and certificates.

Author

Builds the question bank by hand, in bulk or with AI.

Proctor

Monitors live sessions and reviews flagged evidence.

Candidate

Takes the exam by invitation, assignment or public link.

Verifier / employer

Confirms that a credential is genuine.

HOW IT WORKS

Five stages, one closed loop of trust

01

Author

Tagged question banks, bulk import and AI generation.

02

Deliver

Scheduled, assigned or invite-link exams, randomised per candidate.

03

Proctor

Live monitoring, recording and AI visual integrity analysis.

04

Score

Auto-scoring, manual grading, integrity scores and reports.

05

Certify

Signed, verifiable certificates the world can trust.

Each stage feeds the next, so the certificate at the end carries the integrity evidence from every step before it. Most tools stop at the score.

PRODUCT MAP

Eight modules, one integrated system

Authoring

Email invites

AUTHOR

A question bank built for scale

Question bank: 1,225 questions across 5 subjects, with filters by subject, topic, difficulty and tag (demo data).

Organised library

Reusable questions by subject and topic, searchable in seconds.

Difficulty and Bloom's

Tag every item for balanced, targeted papers.

Bulk import

Upload from CSV and Excel: thousands of items at once.

AI generation

Draft questions from a prompt, a job description or documents.

AI-NATIVE

AI that does the heavy lifting, with metered cost

Generate questions

Draft on-topic questions from a prompt, a job description or your own documents, then review and keep what fits.

Build whole exams

Turn a role or a syllabus into a complete, balanced assessment in minutes.

Summarise results

Performance summaries turn raw scores into readable strengths and gaps for each candidate.

HOW GENERATION STAYS UNDER CONTROL

1 Your prompt, JD or document → 2 AI drafts questions → 3 Author reviews → 4 Saved to the bank

Model usage is metered against AI credits, so AI stays an advantage rather than a runaway bill. A human always reviews generated content.

DELIVER

Flexible delivery, locked-down experience

Three delivery modes

Public campaigns, assigned candidates or single-use invite links.

A unique paper each

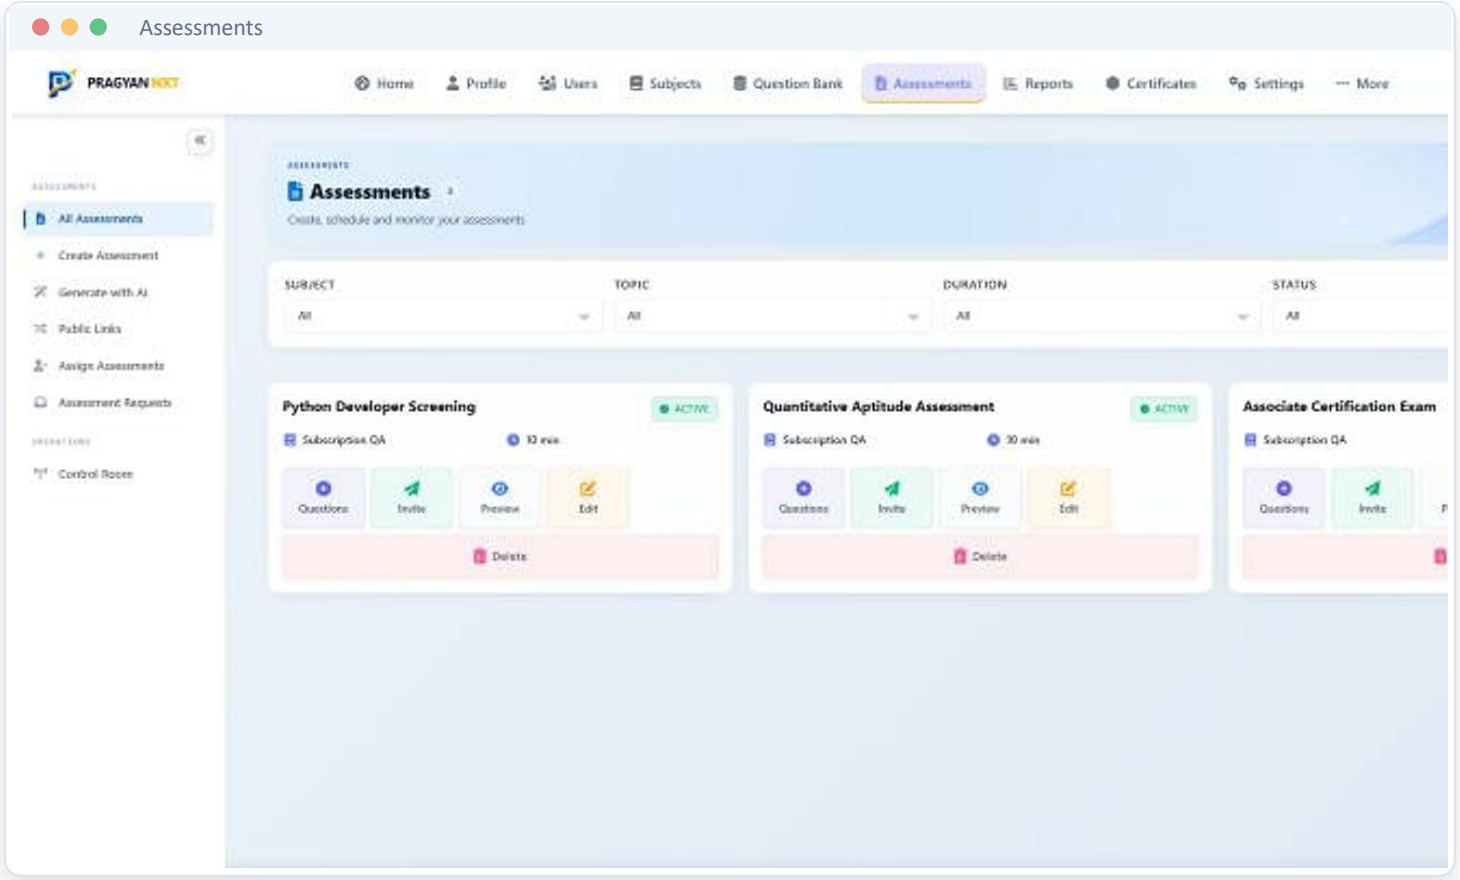

Randomised by section and difficulty for every candidate.

Server-enforced timers

Auto-submit and protection for draft answers.

Reconnect and resume

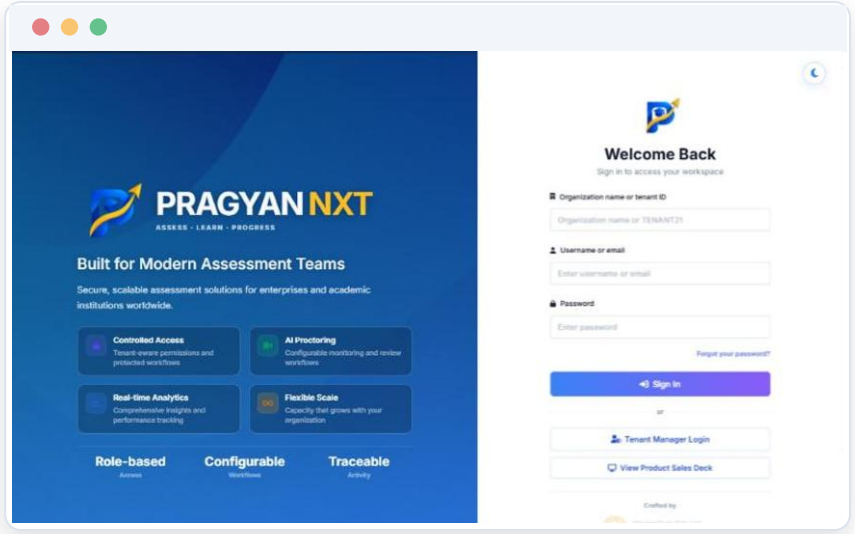

A dropped connection never loses an answer.

Assessments workspace: active exams with questions, invite, preview and edit actions (demo data).

THE CANDIDATE JOURNEY

From invitation to verified credential

Organisation-scoped sign-in (organisation name or tenant ID).

1 Invitation

Public link, assignment or a single-use invite, even without an account.

2 Sign in

Into the organisation's own workspace.

3 Take the exam

Randomised, timed, with live or recorded supervision.

4 Result + integrity

Score and integrity report attached.

5 Certificate

Signed credential the candidate can share and anyone can verify.

PROCTOR

See every session, catch every anomaly

Live monitoring

A real-time control room for every active session.

Recording

Screen and webcam recording that survives restarts.

AI visual analysis

Flags no face, multiple faces, a second person or a phone.

Supervision your way

From full live proctoring to lightweight recorded supervision.

AI FLAGS

- No face detected
- Multiple faces
- Second person
- Phone in view

Recordings and flags are stored as evidence in the media library and attached to the candidate's integrity report.

INTEGRITY ENGINE

Integrity you can put a number on

INTEGRITY SCORE

92 / 100

Every attempt starts at 100. Weighted risk signals subtract points, giving a score and a risk level.

Low | Medium | High | Critical

Illustrative score

WEIGHTED BEHAVIOURAL SIGNALS (POINTS DEDUCTED)

Works without a camera

Focus, tab and clipboard telemetry score non-proctored exams too.

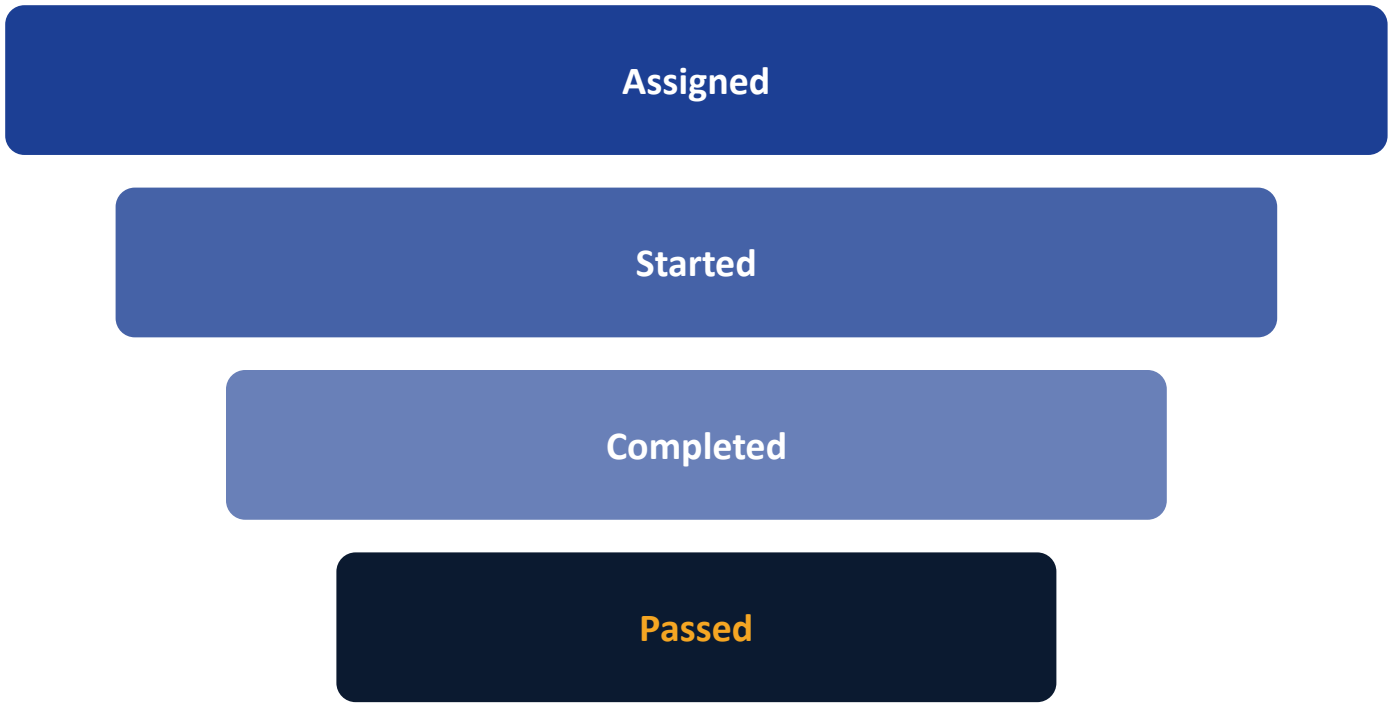

Answer similarity

Surfaces collusion and AI-written responses across candidates.

SCORE & ANALYSE

From raw answers to decisions

COMPLETION FUNNEL FOR EVERY ASSESSMENT (ILLUSTRATIVE)

Auto and manual grading

Objective items scored instantly; subjective answers graded by reviewers.

Report PDFs and CSV

Downloadable per assessment and per candidate.

Integrity attached

Every result carries its integrity report, proctored or not.

AI summaries

Strengths and gaps in plain language.

CERTIFY · THE DIFFERENTIATOR

Not just a PDF: a credential the world can verify

Cryptographically signed

Ed25519-signed credentials that can't be forged or altered.

Public verification

Anyone can confirm a certificate is genuine, instantly.

Portable credentials

Open Badges and verifiable-credential exports that travel anywhere.

Plugs into your LMS

LTI 1.3 writes results back to Canvas, Moodle and more.

Employer verification

Hiring teams verify a credential before the interview.

Appeals & due process

A 14-day appeal window with independent case review.

HOW VERIFICATION WORKS

A trail of trust from result to verified credential

Candidate passes
Score and integrity report recorded

→

Credential signed
Ed25519 signature applied

→

Candidate shares
Open Badge or verifiable credential

→

Anyone verifies
Public verification, instantly

ALSO PART OF THE TRAIL

LMS write-back
LTI 1.3 returns results to Canvas, Moodle and other LMSs

Appeals & review
14-day appeal window with independent case review

Because the integrity evidence travels with the credential, employers and institutions verify the result, not just the paper.

ARCHITECTURE

Built like enterprise software

CONTROL PLANE

Tenant Manager
Provisions each organisation

Plans & entitlements
Plan version, access type, expiry

PER-ORGANISATION DATA

Organisation A · own database

Organisation B · own database

One database per organisation

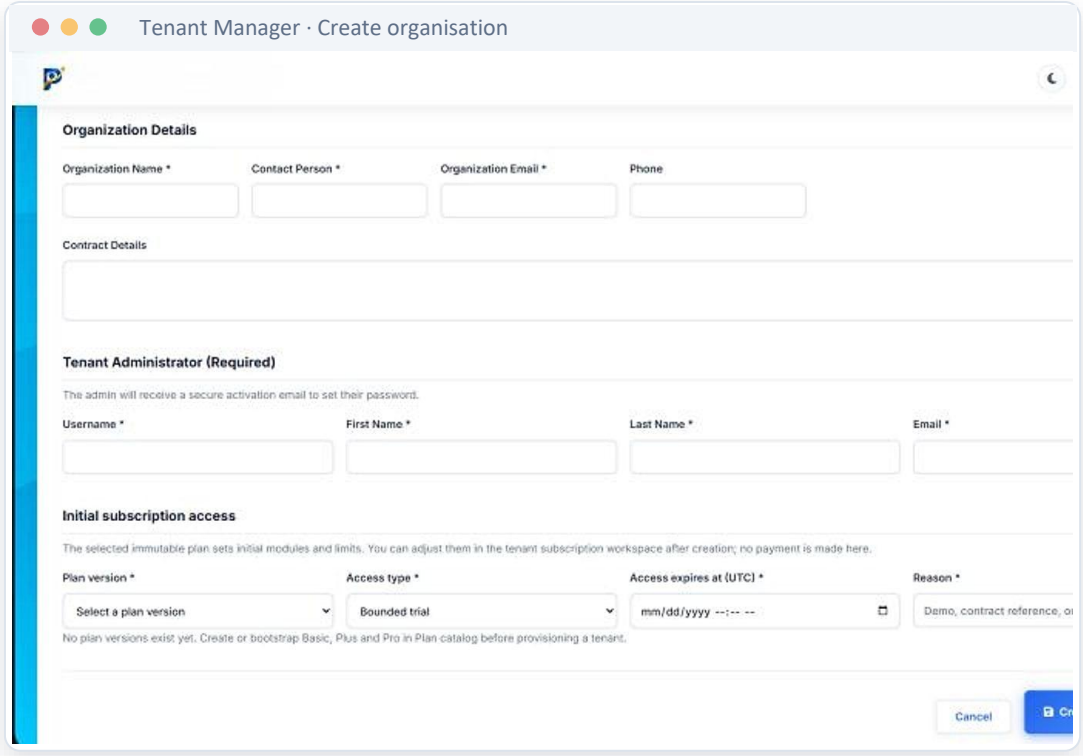

BUILT-IN CONTROLS

Role-based access

Activity logging

Signed, expiring media URLs

Durable background processing

Creating an organisation: details, tenant administrator and initial subscription access.

Reports and recordings survive restarts; one organisation's data never touches another's.

BUILT FOR BOTH BUYERS

Hire on evidence; run exams you can stand behind

For corporates

Screen faster, at any volume

Run large applicant pools through one fair, automated funnel.

Defensible decisions

Every score carries a proctoring and integrity trail.

Verify skills before you interview

Confirm a candidate's credential is genuine in one click.

For academic institutions

Remote exams at cohort scale

Deliver and proctor whole batches without a physical hall.

Academic integrity, documented

An integrity report on every attempt protects the degree.

Verify and plug into your LMS

Signed credentials and LTI write-back to your platform.

WHY PRAGYANNXT

One platform where others give you three

Author, proctor and certify together

No stitching point tools together or leaking data between them. One system, one trail of trust.

Integrity built in, not bolted on

A defensible integrity score on every exam, including those with no camera.

Real multi-tenant isolation

A separate database per organisation: a hard security boundary, not a shared table.

AI-native and cost-aware

Generation and summaries that speed up work, with metered spend you control.

PACKAGING

Pay for the platform, scale with usage

Basic

500

assessments / month

For teams getting started with secure online assessment.

- ✓ Authoring, delivery and scoring
- ✓ Integrity scoring included

Plus

POPULAR

5,000

assessments / month

For growing programmes that certify and report.

- ✓ Reports and certificates
- ✓ Recorded proctoring capacity

Pro

25,000

assessments / month

For enterprises and institutions at full scale.

- ✓ Full proctoring and control room
- ✓ Priority support and onboarding

Start with a 14-day trial with real assessments, AI credits and a bounded proctoring demo. AI credits and recorded-proctoring capacity are added as needed; pricing is scoped to your volume, with INR and annual options.

DEPLOYMENT & INTEGRATIONS

Runs where you need it; connects to what you already use

DEPLOYMENT OPTIONS

Cloud SaaS

Multi-tenant, with a database per organisation.

Private cloud

A dedicated environment for your organisation.

On-premise

For enterprises that need it on their own infrastructure.

INTEGRATIONS & STANDARDS

LTI 1.3

Canvas, Moodle and other LMSs

Open Badges

Portable credentials

Verifiable credentials

Signed exports

Email invitations

Invite candidates directly

Deployment options as listed on maviontech.com; private cloud and on-premise are offered for enterprise customers.
