ENTERPRISE SALES OVERVIEW

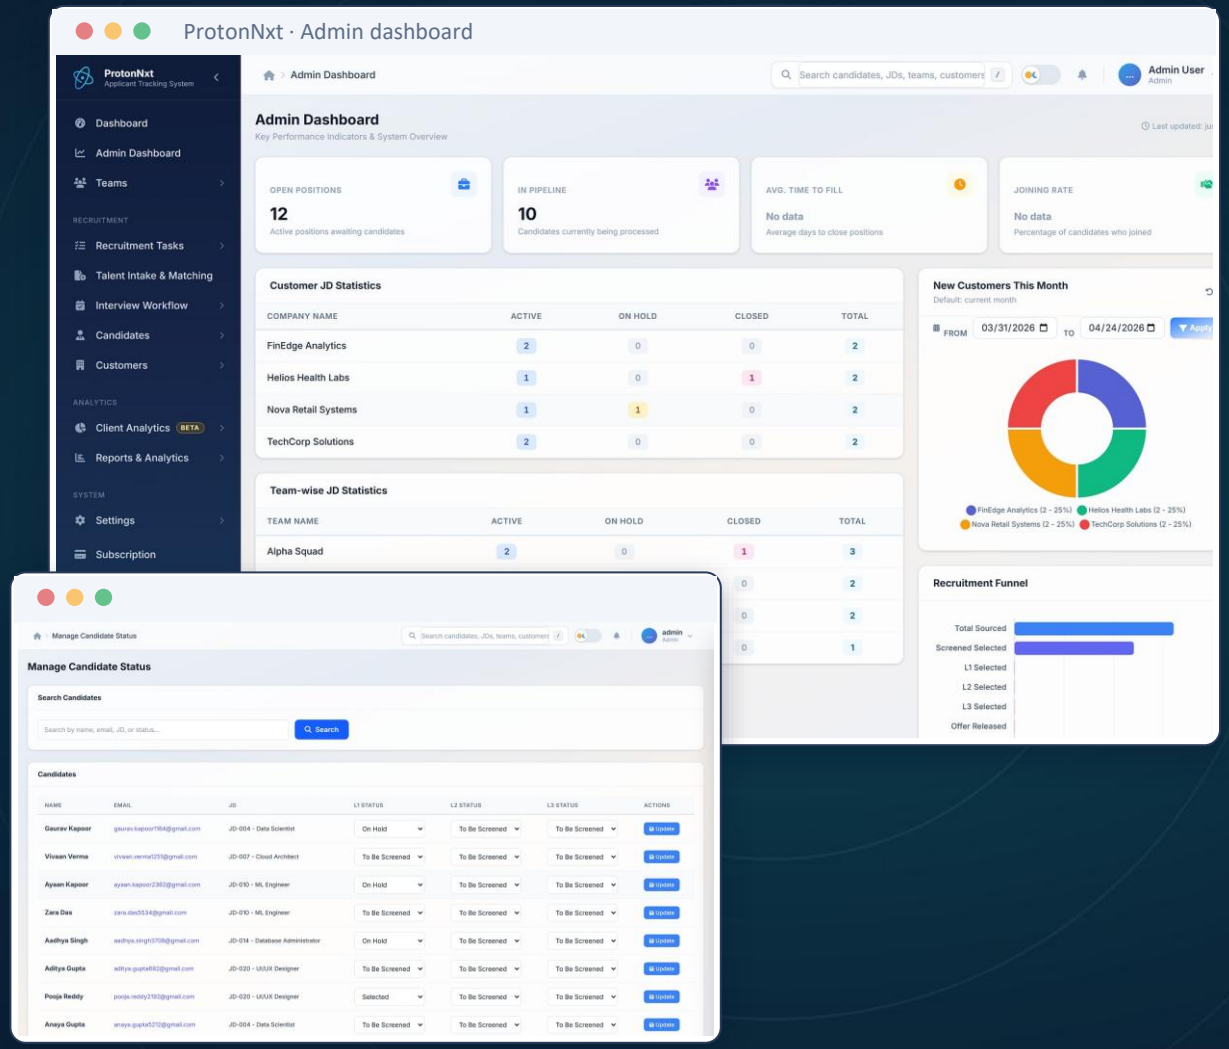

ProtonNxt

ENTERPRISE APPLICANT TRACKING

From requisition to hire, in one structured pipeline

A multi-tenant, AI-assisted ATS for recruitment firms and talent teams: sourcing, parsing, interviews, offers, client insight and a candidate portal.

15 modules | AI resume parsing | Isolated tenants

THE CHALLENGE

Where hiring breaks down

Manual screening

Recruiters read every resume by hand while volume keeps rising.

Unclear ownership

Nobody is sure who owns which requisition, so idle JDs go unnoticed.

Context lost in email

Interview feedback and offers live in inboxes and attachments.

Improvised metrics

Monday reviews start with someone rebuilding numbers in a spreadsheet.

No client insight

Recruitment firms can't see which clients are growing and which are slipping.

Ungoverned agencies

Vendor CVs arrive as forwarded email with no caps, duplicates or audit.

ONE PLATFORM, THREE EXPERIENCES

Recruiters, administrators and candidates on one system

Recruiter workspace

- Requisitions, intake and tracking
- Interviews, offers and joining
- Reports and client analytics

Tenant administration

- Users, roles and teams
- Custom candidate schema
- Subscription, sessions and notifications

Candidate & partner surfaces

- Branded careers URL
- Invite-based uploads and vendor portal
- Candidate portal across employers

Faster time-to-hire

AI parsing, single-page intake and structured interview cadence.

Enterprise multi-tenancy

Isolated tenant databases, roles and audit-ready operations.

Decision-ready analytics

Reports, executive summaries and client engagement scoring.

WHO USES PROTONNXT

Built for every role in a recruiting operation

Super user & admin

Configure the tenant: users, roles, schema, subscription.

Team lead

Owns a team, assigns requisitions and watches workload.

Recruiter

Sources, screens, schedules interviews and moves candidates.

Leadership

Reads reports, executive summaries and client analytics.

Vendor (agency) users

Submit candidates to published JDs through their own login.

Candidates

Apply, upload once and track status across employers.

THE HIRING LIFECYCLE

Every step from requisition to joining, end to end

MODULE 01

Requisition

JD with SPOC, skills, CTC and positions

MODULE 02 · 13

Source

Careers URL, invite links, vendors

MODULE 03

Intake & parse

Bulk upload, AI parsing, dedupe

MODULE 04 · 05

Track

Pipeline, owner and next action

MODULE 07 · 14

Interview

L1 / L2 / L3 with calendar and video

MODULE 08

Offer & join

CTC structure and joining lifecycle

RUNNING UNDERNEATH EVERY STEP

- Team collaboration (06)
- Reports & analytics (10)
- Client analytics (11)
- Settings & admin (12)
- Mobile app (15)

PRODUCT MAP

Fifteen modules, every one included in every tenant

Hiring pipeline

6 modules

01 Job requisitions

02 Candidate sourcing

03 Talent intake & matching

04 Applicant tracking

07 Interview workflow

08 Offer management

Operations

4 modules

05 JD assignment

06 Team collaboration

14 Calendar & video

15 Mobile recruiter app

External access

2 modules

09 Careers URL & candidate portal

13 Vendor management

Analytics

2 modules

10 Reports & analytics

11 Client engagement analytics (beta)

Governance

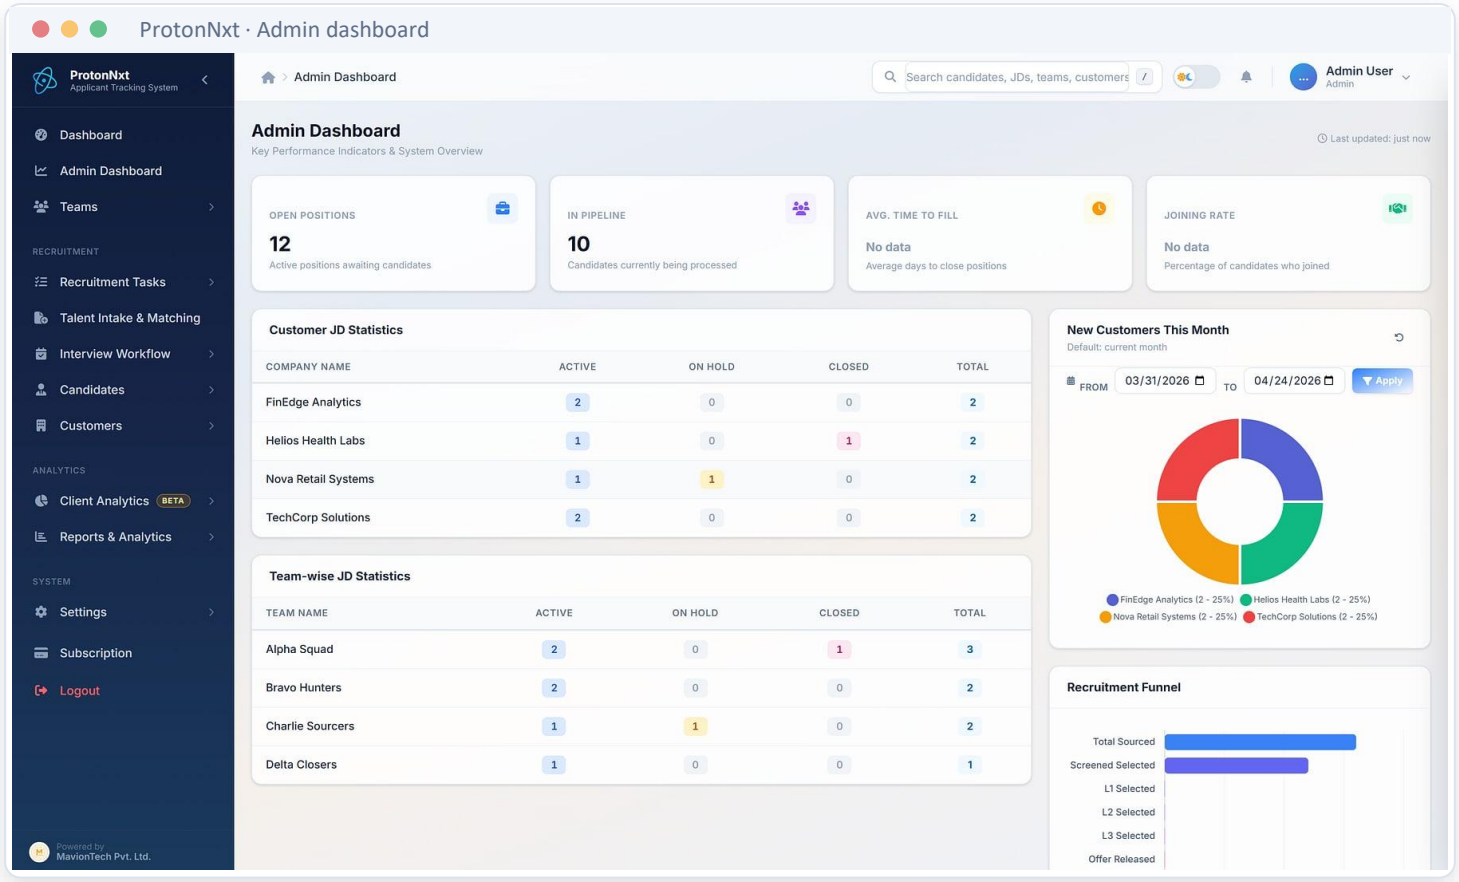

1 module

12 Settings, admin & custom schema

No add-ons: every module ships to every tenant from day one. Client engagement analytics is in beta.

ADMIN DASHBOARD

Pipeline health in one glance

Admin dashboard: KPI tiles, customer JD statistics, new customers and the recruitment funnel (demo data).

KPI tiles

Open positions, pipeline, time to fill and joining rate.

Customer JD statistics

Active, on-hold and closed requisitions per client.

Recruitment funnel

Candidates by stage across the tenant.

Idle-JD alerts

Requisitions nobody is working surface automatically.

JOB REQUISITIONS

Requisitions that act as contracts, not spreadsheet rows

Skills framing

Must-have and good-to-have skills on every JD.

Customer SPOC

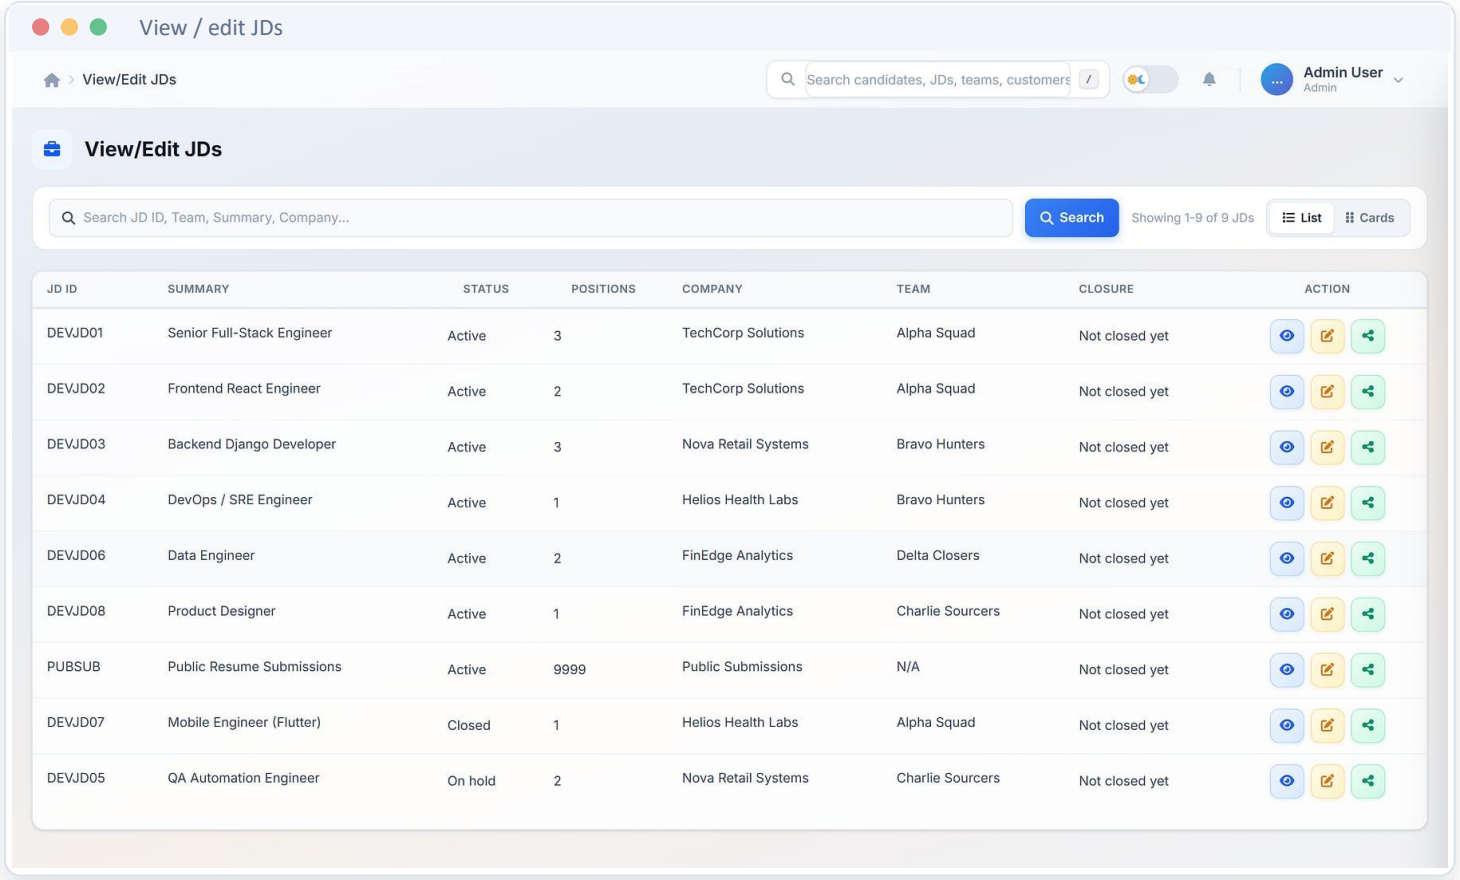

SPOC name and email for customer-side updates.

Positions and budget

Positions, budget CTC and experience bands.

Lifecycle

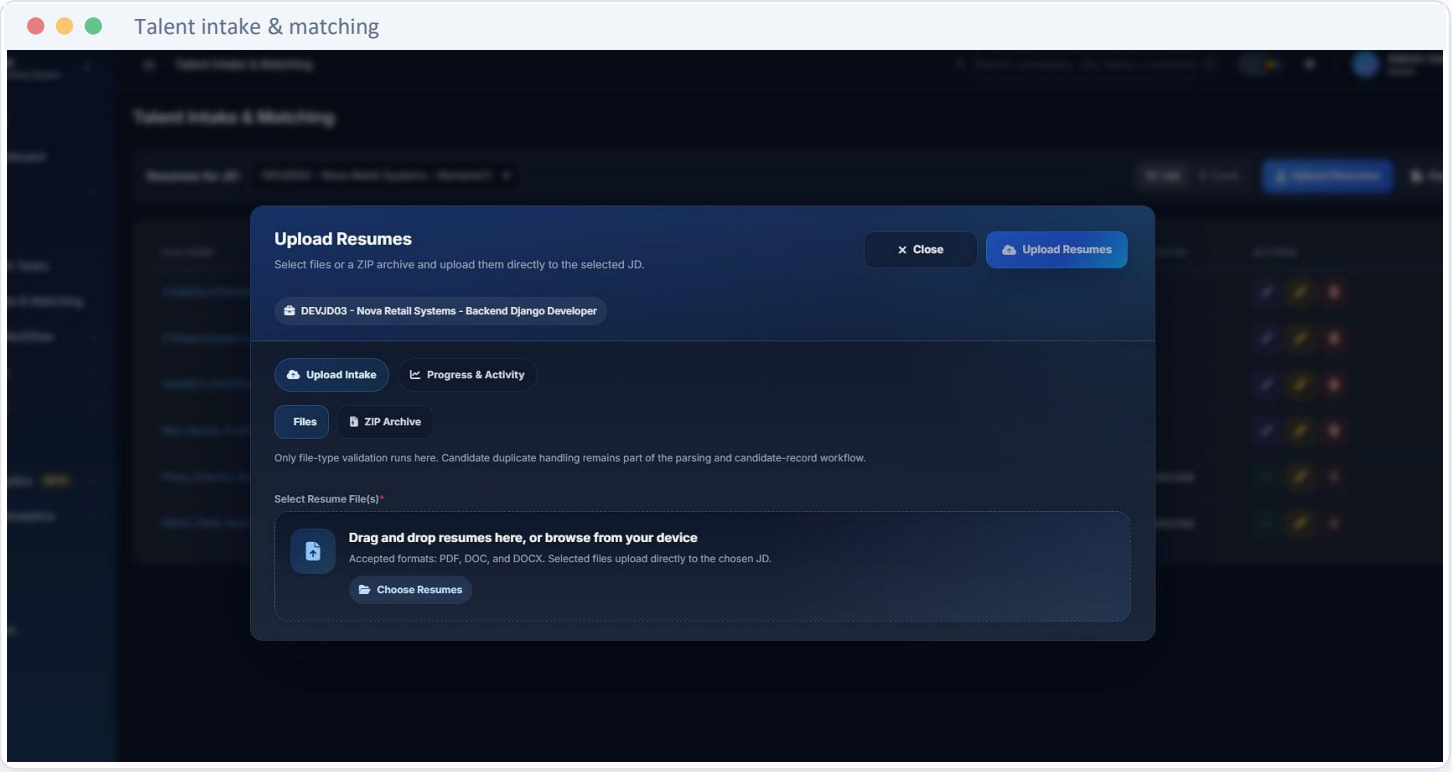

Active, on hold or closed, with team and recruiter assignment.

Job descriptions: status, positions, company and team per requisition (demo data).

SOURCING & INTAKE

Every channel into one pipeline, parsed by AI

Upload resumes: single files, multiple files or a ZIP archive, scoped to the target JD.

Branded careers URL

A tenant-scoped public submission page per tenant.

Invite-based upload

Signed per-JD links for candidates and partners.

AI parsing, your choice

OpenAI or Gemini parsing, with manual override.

Dedupe where it matters

Duplicates caught when the candidate is saved.

Public submissions are auto-assigned to active JDs by AI; unclaimed profiles route to a generic pool. Existing candidates can be attached to a new JD without re-parsing.

APPLICANT TRACKING

The pipeline always tells the truth

Every stage visible

Screening, L1 / L2 / L3 outcomes, offer and joining status.

Clear ownership

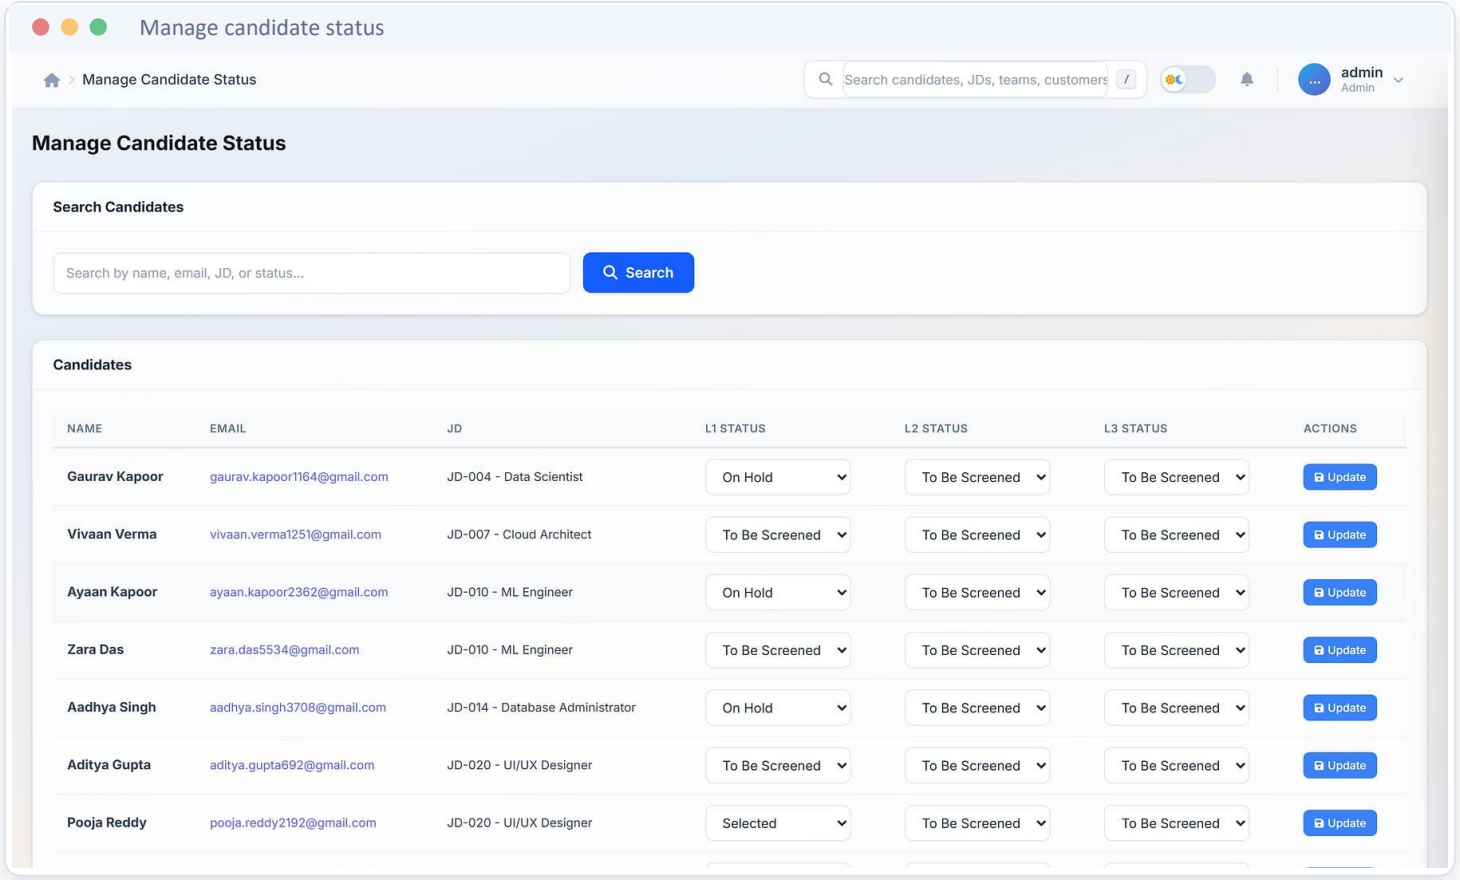

Recruiter and HR owner on every candidate.

Activity log

Notes, feedback and status moves, kept on the record.

Reports from the same data

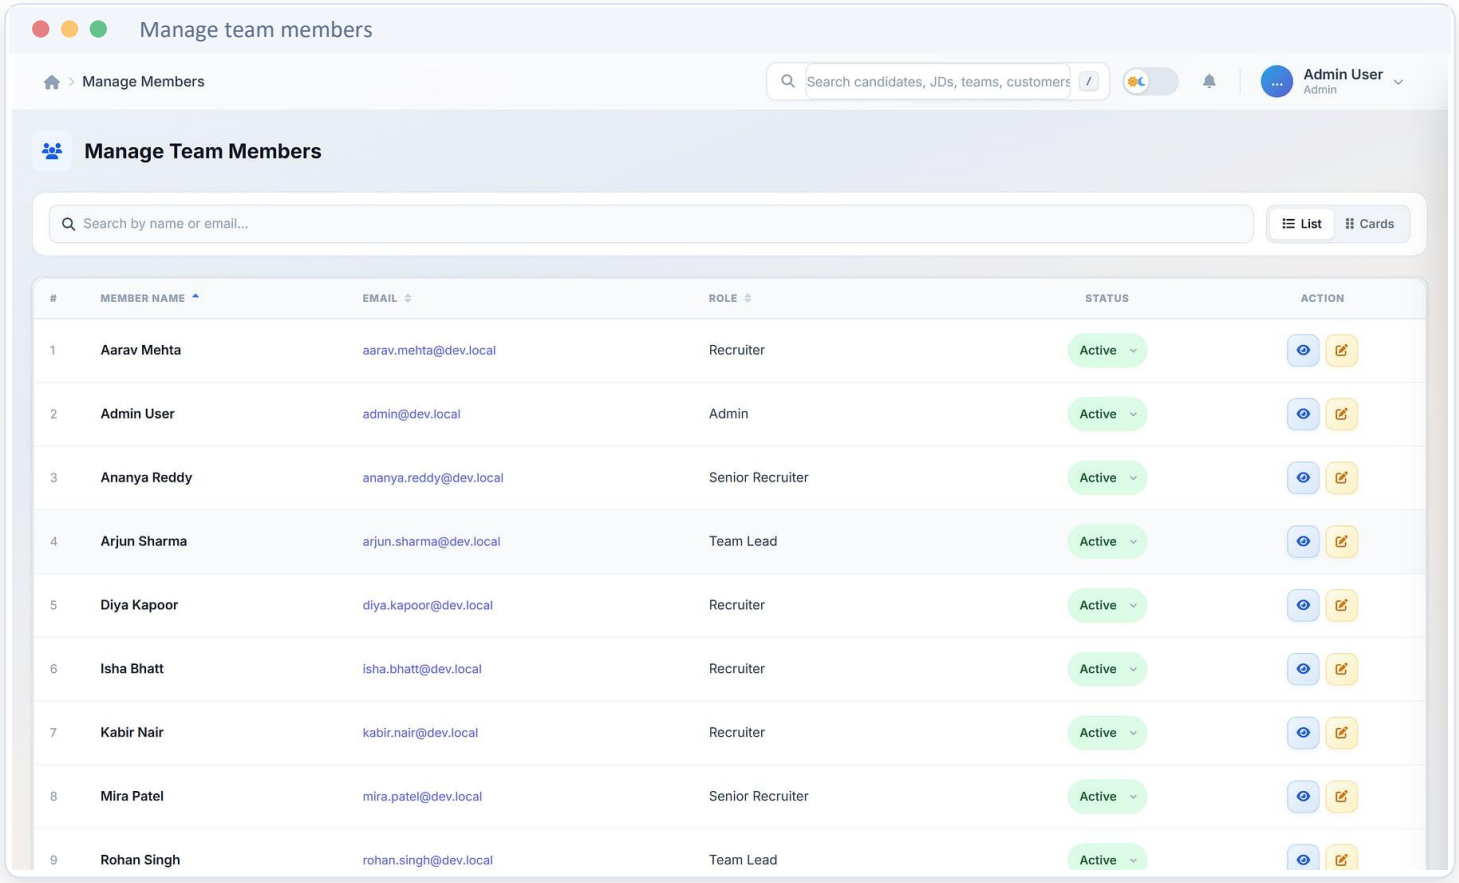

Conversion reports one click away.

Candidate status: L1, L2 and L3 status per candidate and JD (demo data).

ASSIGNMENT & COLLABORATION

Ownership made explicit, teams working in one context

Team members: roles, status and actions (demo data).

Teams and roles

Team leads, members and roles: SuperUser, Admin, Team Lead, User.

JD assignment

Assign each requisition to recruiters or teams, with multi-recruiter coverage.

Visible load

Active-JD counts per recruiter and assignment-driven reports.

Real-time notifications

Live updates pushed over WebSockets.

INTERVIEWS, CALENDAR & VIDEO

Structured interviews on a real calendar

1 Schedule L1 / L2 / L3 → **2 Create meeting** → 3 Invite & remind → 4 Interview → 5 Outcome synced

Per-recruiter calendar

Scheduling, rescheduling and progression gates between levels.

One-click video

MavionMeet meetings with auto-generated guest join links.

Invites and ICS files

Automatic candidate and panel invites, calendar files and reminders.

Outcome sync

Started, ended, recorded and minutes flow back to the record.

Every interview records interviewer, type, location, status and structured feedback, visible in the pipeline and reports instantly.

OFFER MANAGEMENT

Offers that convert to joiners

Structured CTC

Basic, HRA, special allowance, PF, gratuity, bonus and other.

Total CTC calculated

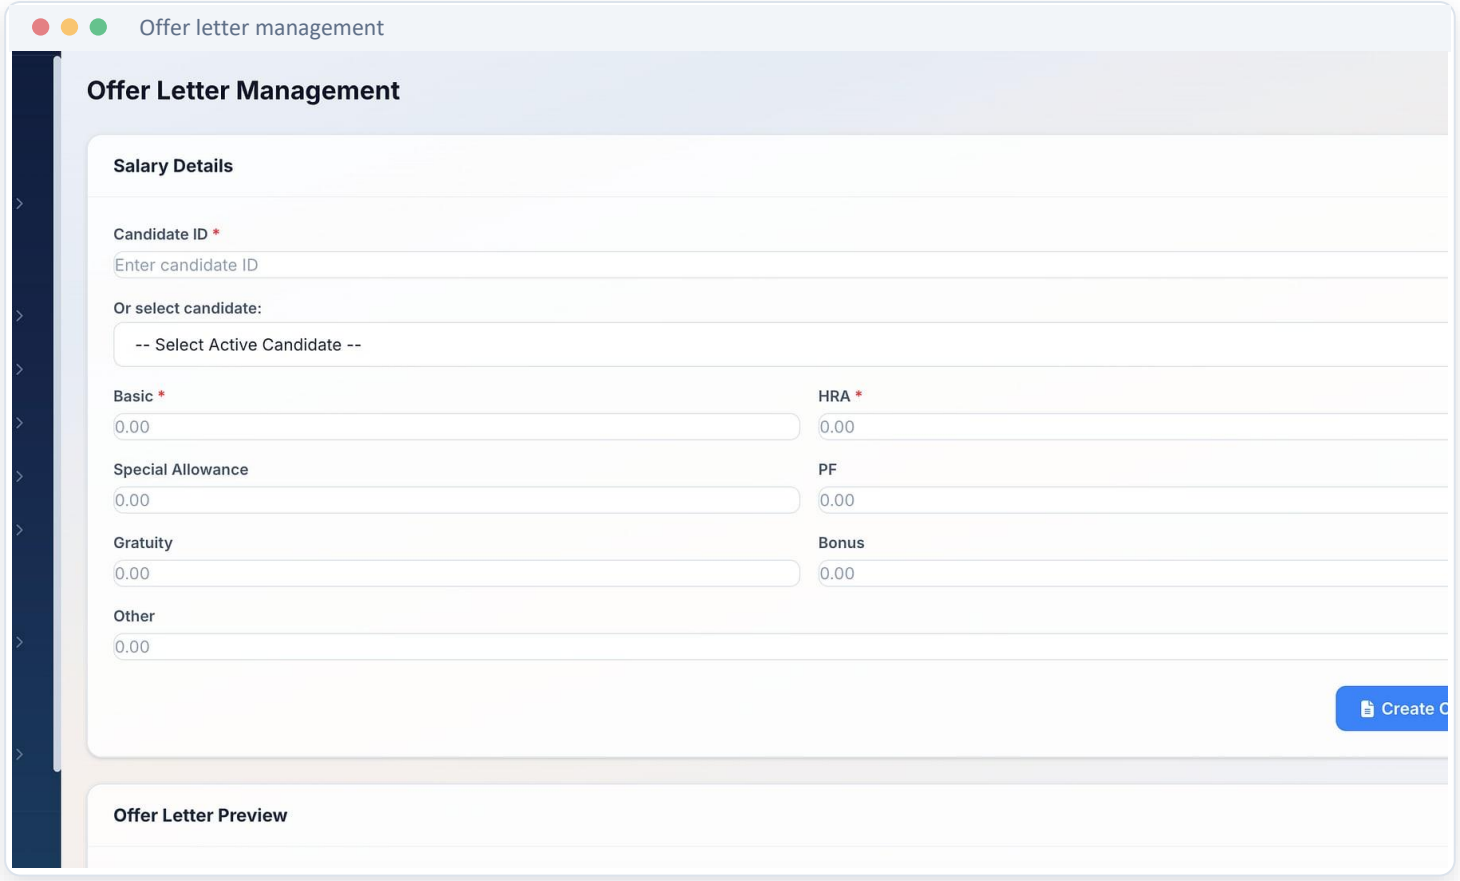

Components aggregate automatically.

Joining date

Captured at offer time.

Offer lifecycle

Accepted, declined, released and joined, visible in reports.

Offer letter management: salary details per candidate.

VENDOR MANAGEMENT

Bring staffing agencies inside the process

1 Invite agency → 2 Publish JD with caps → 3 Vendor submits → 4 Review & accept → 5 Contract & payment

Vendor users & roles

Admin, recruiter and finance roles for each agency.

Per-vendor caps

Publish specific requisitions to selected vendors, with limits.

Duplicate protection

Vendor submissions land in your pipeline, deduplicated.

Isolated by default

Separate vendor login with JWT, deny-by-default; nothing leaks across tenants.

Contracts, invoices and payments are tracked with each vendor, so the agency channel becomes measurable.

CANDIDATE PORTAL

One candidate login across every employer

One login, every employer

A single portal account works across every tenant using ProtonNxt.

All applications, one screen

Active and closed applications across every employer.

Status in near real time

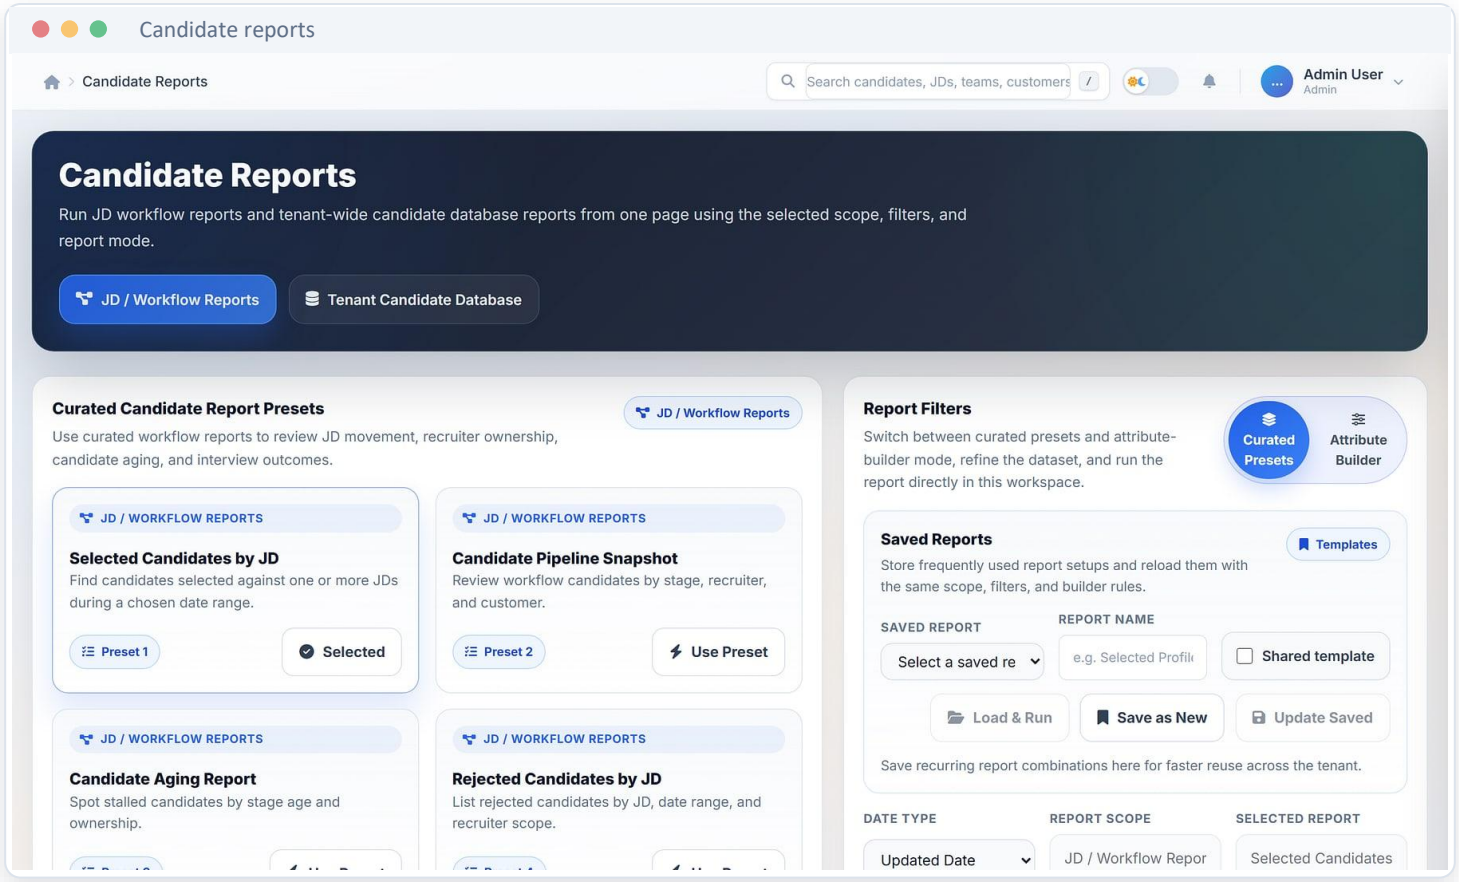

When a recruiter moves a candidate to L2, the portal updates within seconds.

Upload once, fan out

A resume uploaded once is delivered to every tenant applied to.

Reporting leadership relies on

Candidate reports: curated presets, report filters and saved reports (demo data).

Eight curated presets

Selected, pipeline, aging, rejected, interview outcome, inventory, talent pool, freshness.

Two scopes

JD / workflow reports or the tenant-wide candidate database.

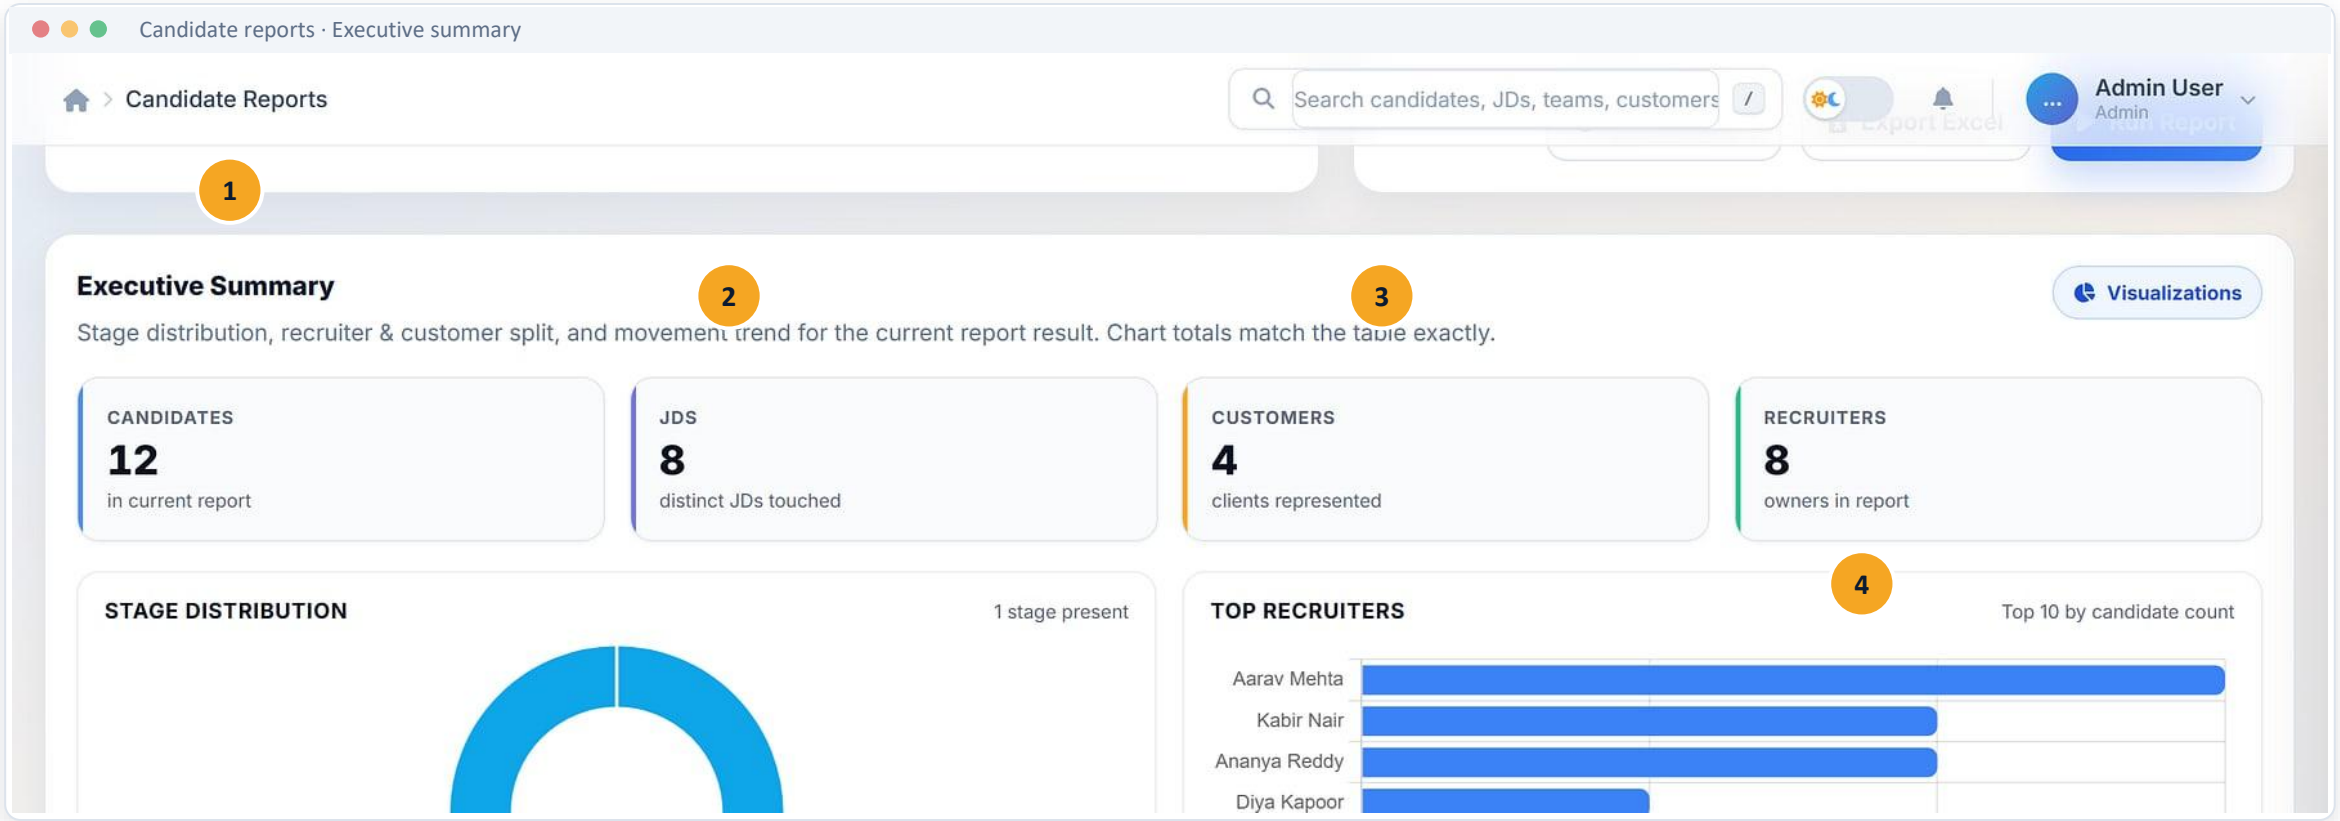

Saved templates

Personal or shared with admins.

Enterprise XLSX

Title banner, metadata, summary and applied filters in every export.

One-screen answers that always match the table

1. Tile strip: candidates, JDs, customers, recruiters
2. Stage distribution donut
3. Top recruiters and top customers (top 10)
4. Totals always equal the table's row count

SEARCH & BUILDER

Turn the talent pool into a searchable asset

Skill search

Stacked skill queries across parsed resumes and searchable custom fields.

Attribute builder

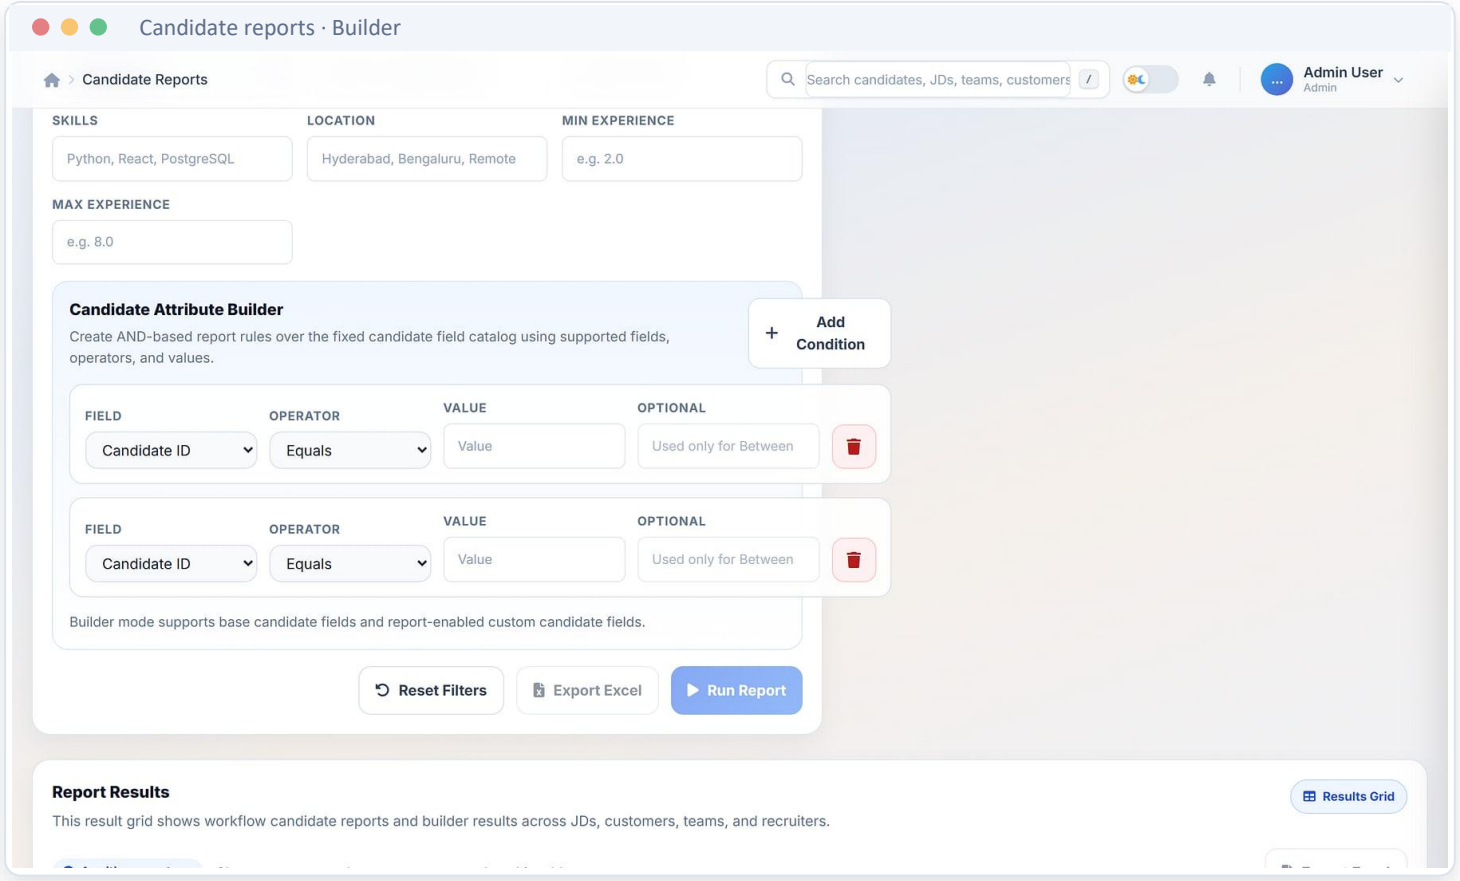

AND-logic reports on a validated field, operator and value catalog.

Reuse, don't re-parse

Attach an existing candidate to a new JD without a duplicate.

Leadership packs

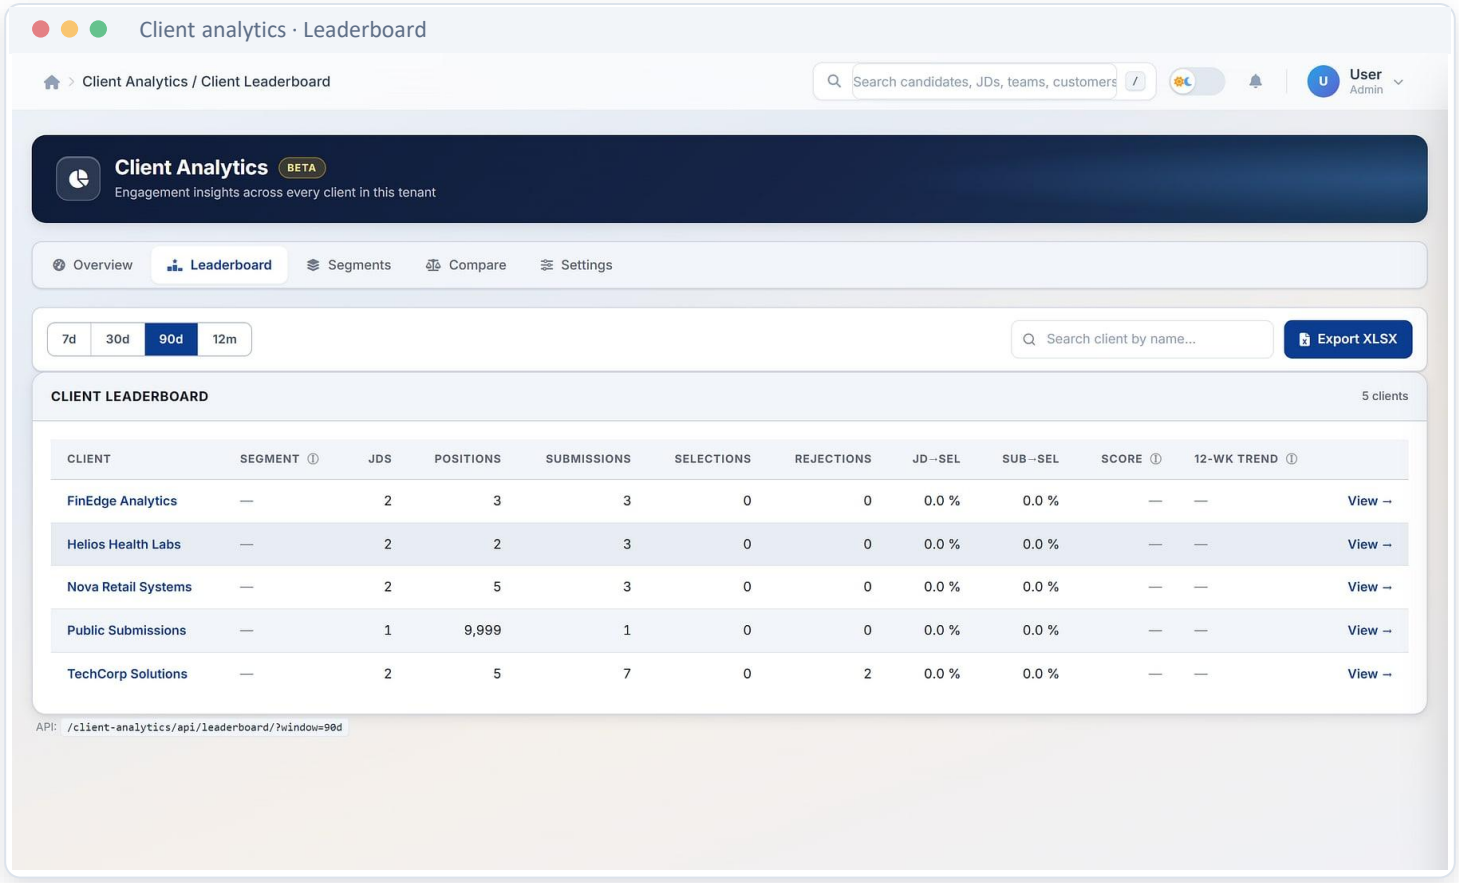

Excel with a report-context sheet for reviews.

Candidate attribute builder: fields, operators and values with safe, role-aware results.

CLIENT ENGAGEMENT ANALYTICS · BETA

Know which clients to grow and which are slipping

Client leaderboard: engagement scores and pipeline counts per client (demo data).

Engagement score

Volume + conversion + velocity + consistency, minus a rejection penalty.

Seven segments

Premium, growth, active, dormant, backbench, risky, high rejection.

Leaderboard & trends

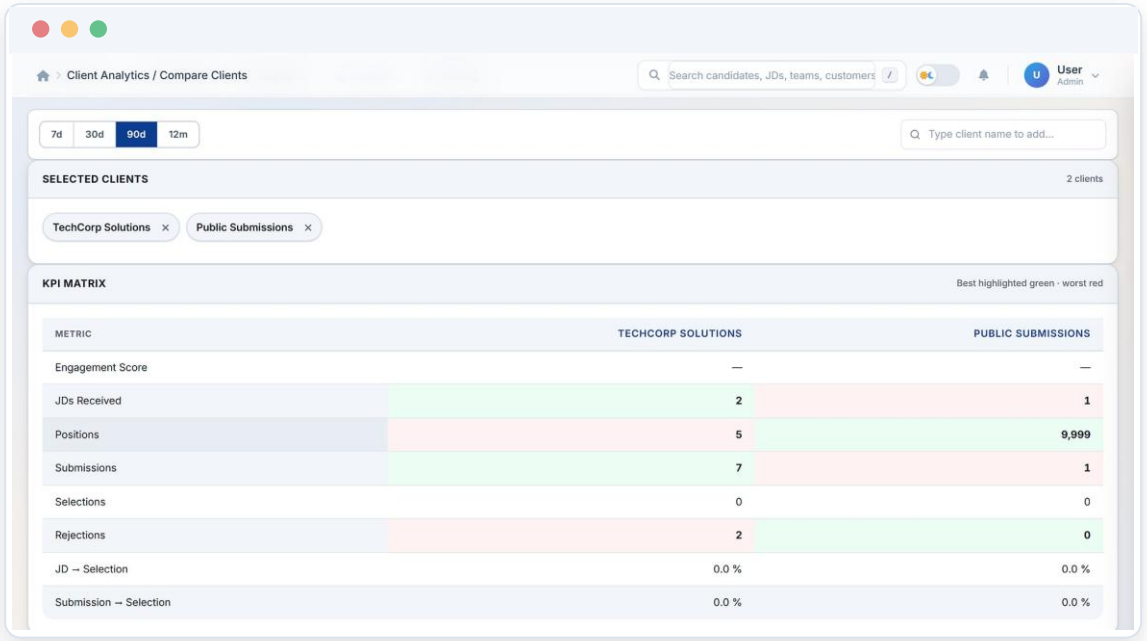

Score bars, 12-week sparklines and top movers.

Explainable

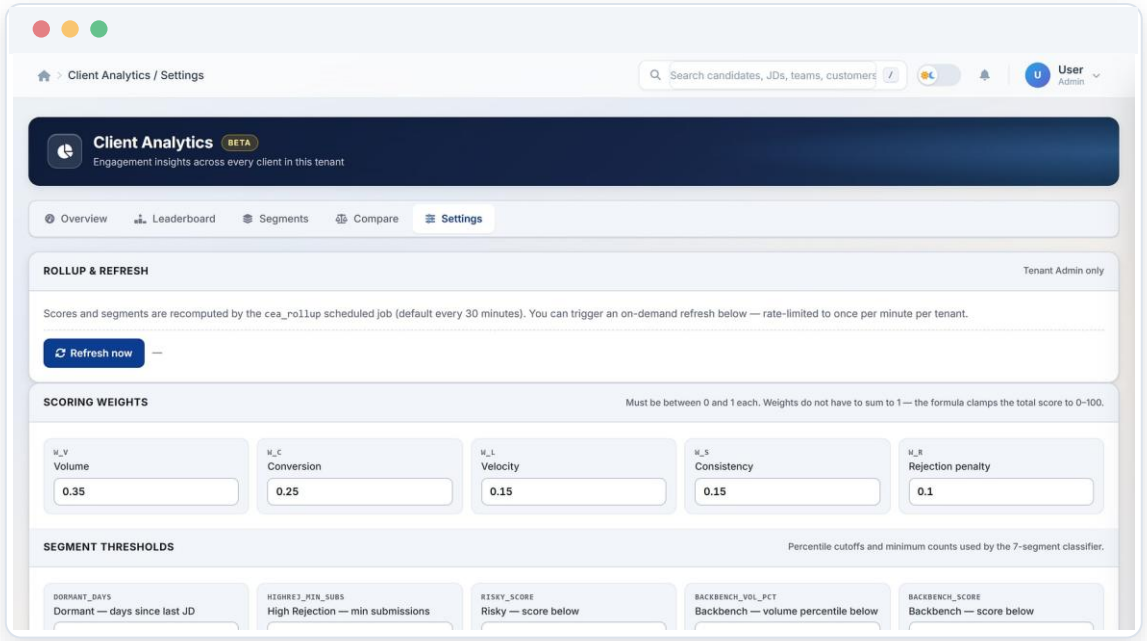

Every segment pill shows the rule that fired.

COMPARE & TUNE

Compare clients and share evidence safely

Compare up to 10 clients: KPI matrix and engagement radar (demo data).

Settings: tunable scoring weights and segment thresholds per tenant.

5-axis comparison

Volume, conversion, velocity, consistency, low rejection.

Tunable rules

Each tenant defines its own 'premium'.

Signed snapshots

Read-only links, 7-day expiry, no login.

Audited & accessible

Append-only audit; WCAG 2.1 AA.

MOBILE RECRUITER APP

Hiring keeps moving between meetings

Today dashboard

Interviews, approvals, agenda and company KPIs at a glance.

Pipeline in your pocket

Candidates, JDs, interviews and search with fast pagination.

Act on the move

Advance, hold or reject; call, WhatsApp or share a CV; record results.

Secure by design

Biometric app lock and secure token authentication.

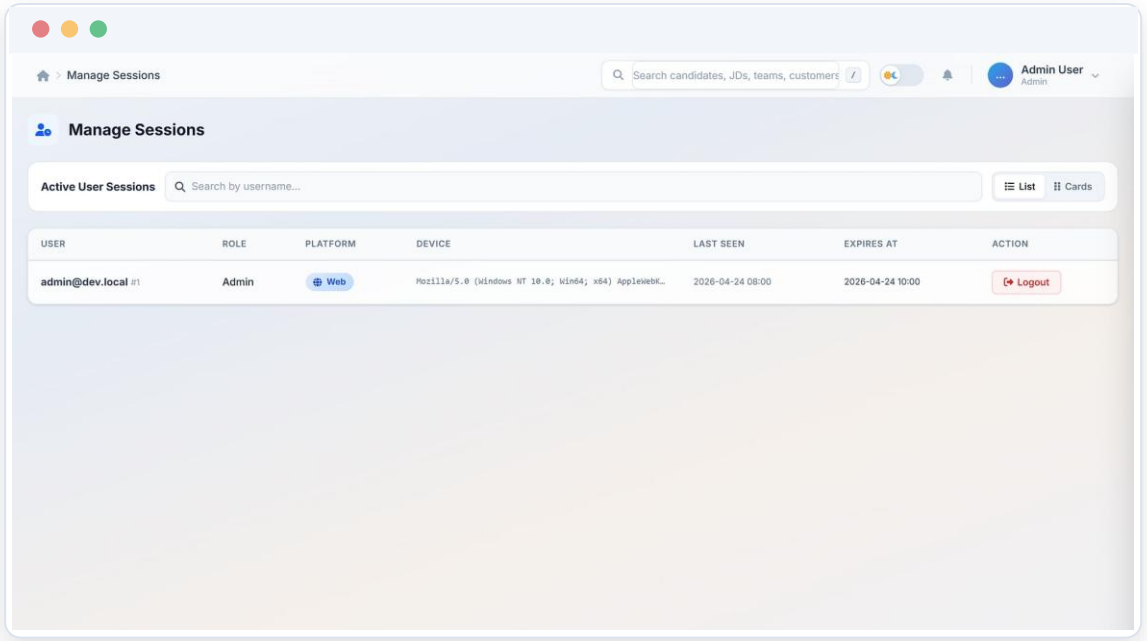

Offline-aware

Light and dark themes; works through patchy connections.

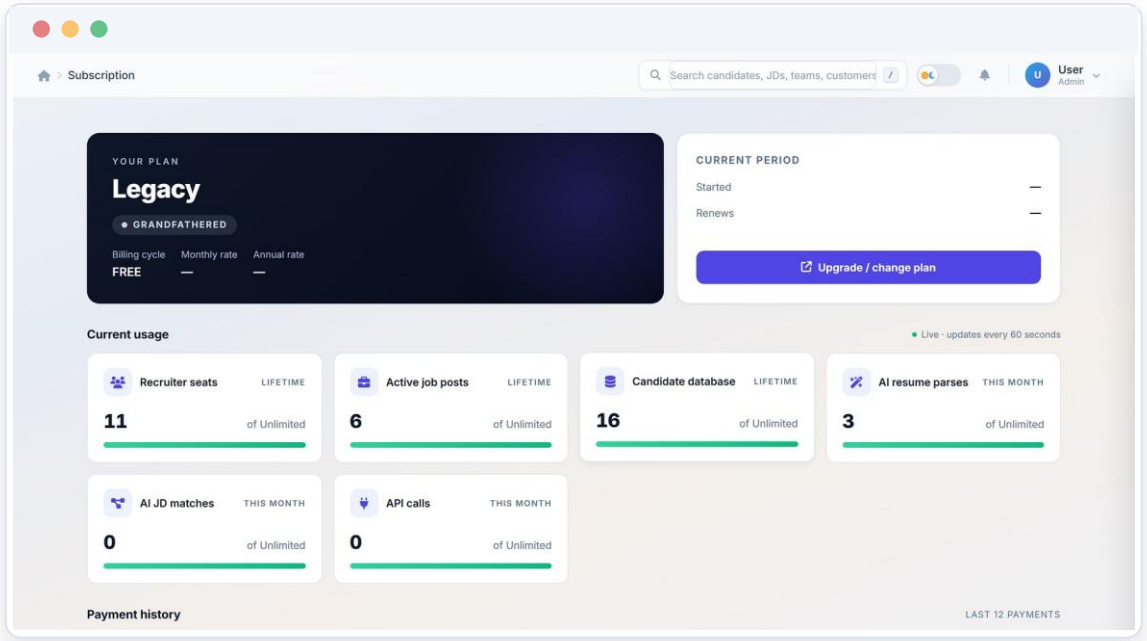

Push notifications

Real-time alerts with one governed login across web and mobile.

Administrators in control, without engineering tickets

Session management: active web and mobile sessions with forced logout.

Subscription & billing: plan, usage against limits and payment history.

Users, roles, permissions

Active and inactive status per user.

Notifications & email

Email configuration per tenant.

Razorpay billing

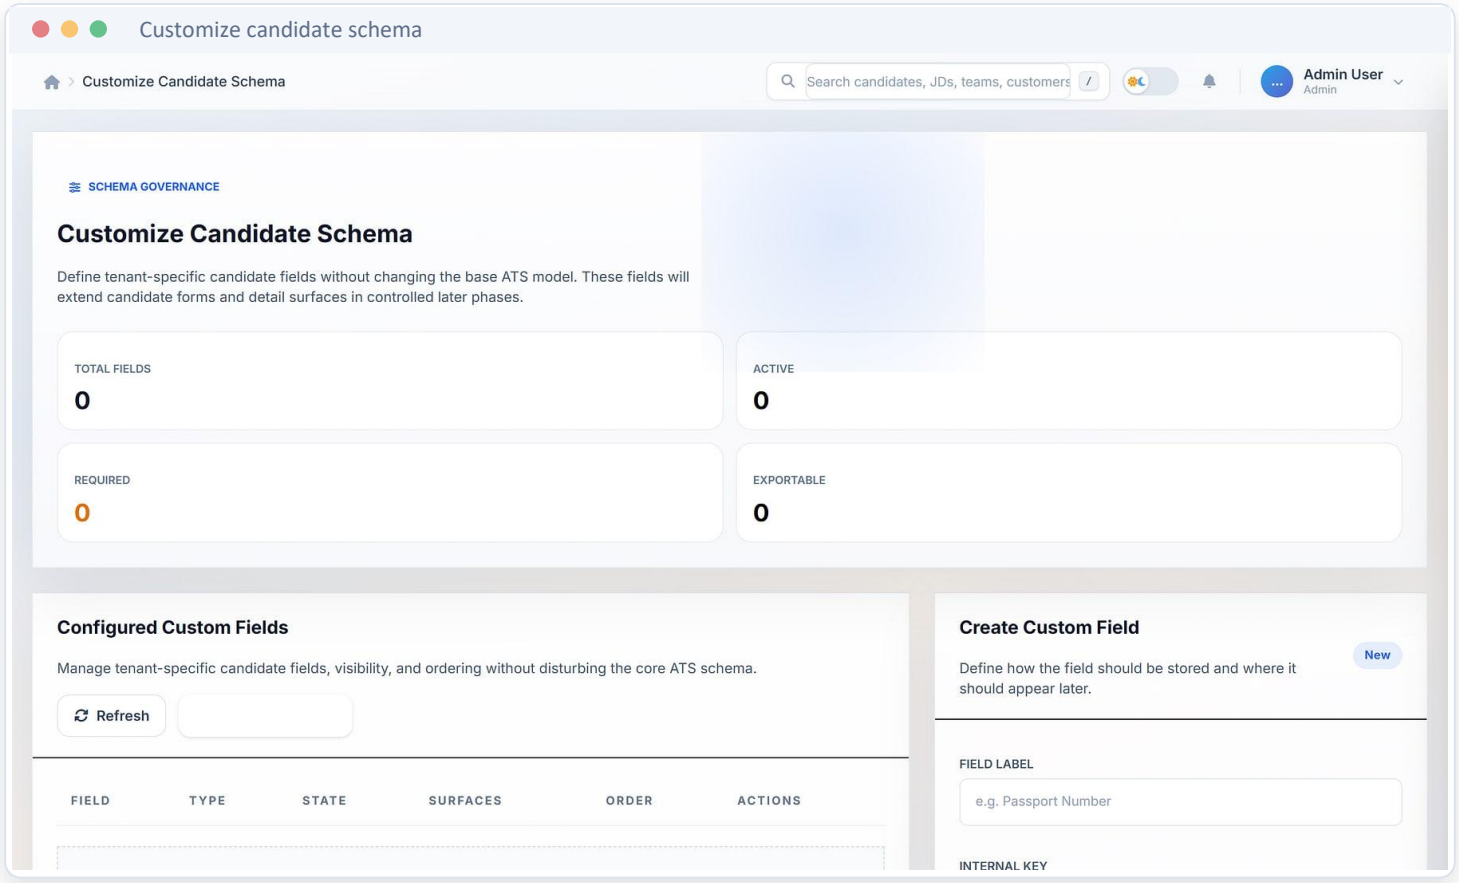

Subscription lifecycle inside the ATS.

Branding & toggles

Tenant branding and module toggles.

CUSTOM CANDIDATE SCHEMA

Your hiring model, without code

Customize candidate schema: configured fields and the create-field form.

Nine field types

Text, number, date/time, boolean, select, multi-select, email, phone, URL.

Four visibility toggles

Show in detail, exports, search and reports.

Safe changes

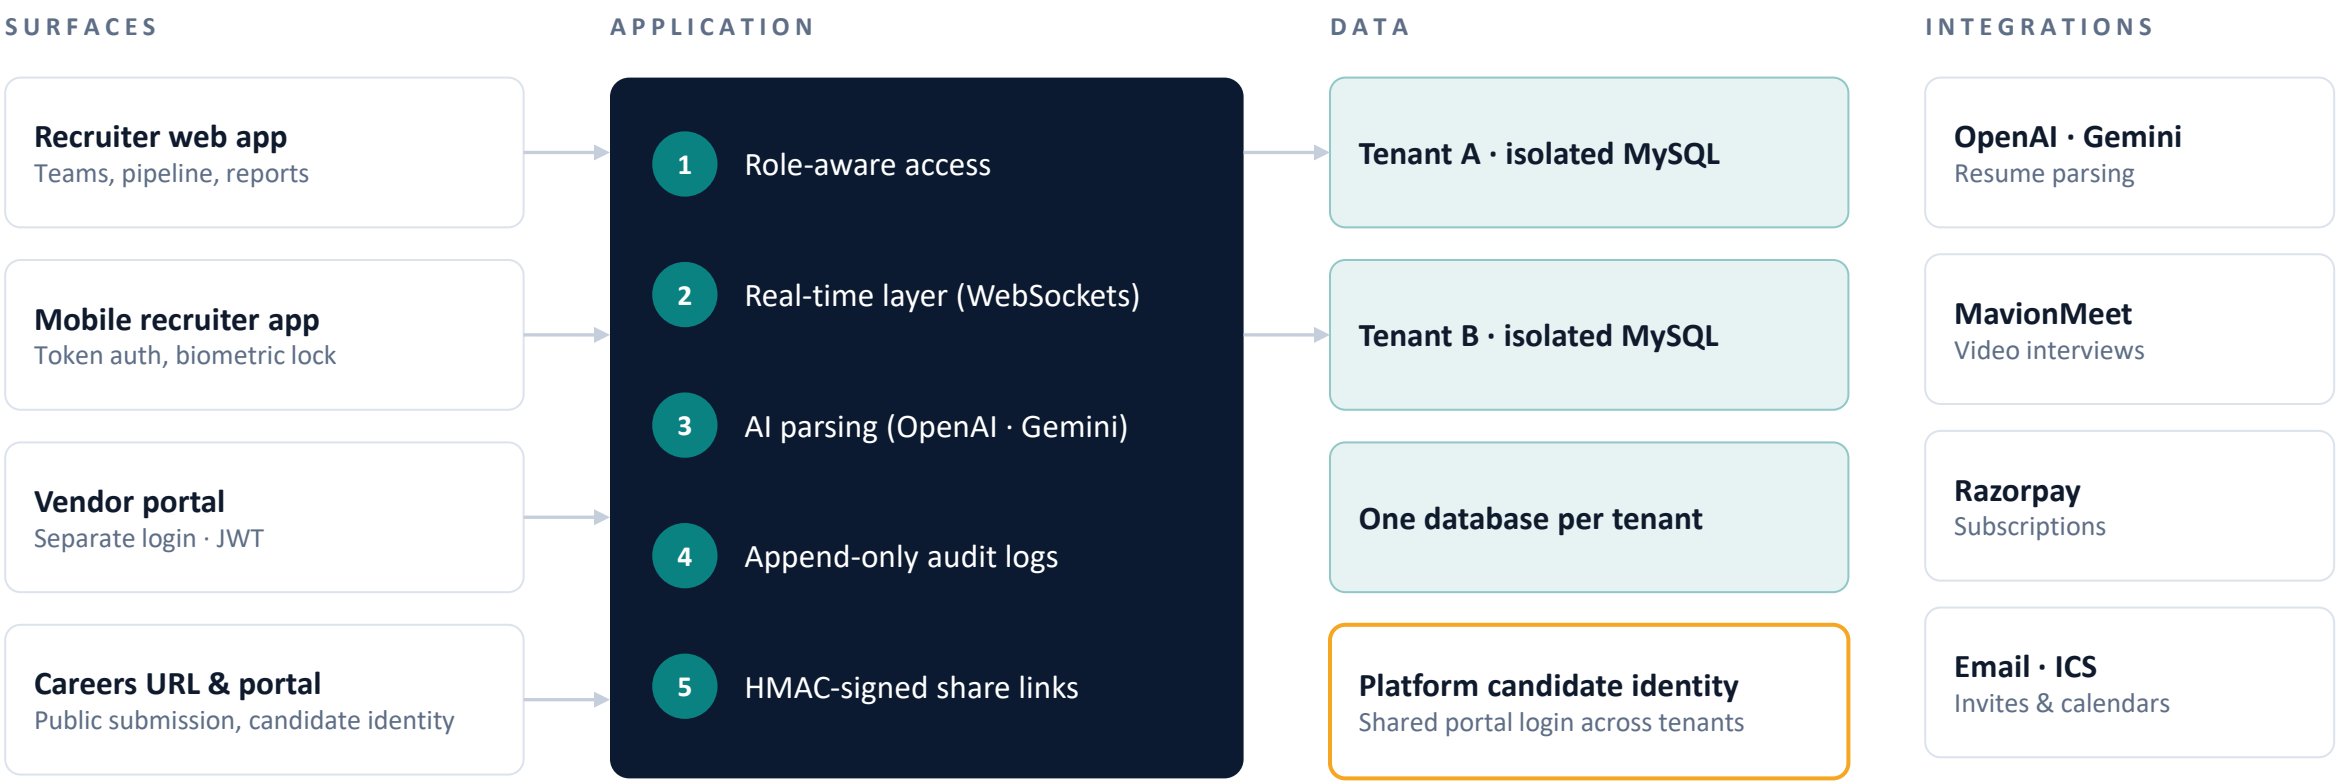

Reorder, activate or deactivate without data loss.

Tenant-scoped

Strict isolation; no cross-tenant bleed.

ARCHITECTURE

Multi-tenant by design, secure by default

No shared tables and no retrofitted multi-tenancy: each tenant runs on its own isolated database.

INTEGRATIONS

Connects to how your team already works

OpenAI

Resume parsing

Google Gemini

Alternative parsing path

MavionMeet

One-click video interviews

Razorpay

Subscription billing

Email

Per-tenant email configuration

ICS calendars

Invites for candidates and panels

Excel (XLSX)

Enterprise exports everywhere

WhatsApp & calls

Contact candidates from mobile

Parsing is pluggable, with no lock-in to a single AI provider, and a manual override is always available.

WHY PROTONNXT

Eight reasons recruitment teams choose ProtonNxt

Multi-tenant by design

Each tenant on an isolated database; no shared tables.

AI without lock-in

OpenAI and Gemini paths with manual override.

Tenant-defined schema

Extend the candidate record without forking the product.

Reporting done right

Presets, builder, templates and executive summaries.

Client analytics

Scoring and segmentation show where to invest.

Candidate portal

One login across every ProtonNxt tenant.

Enterprise exports

Styled multi-sheet XLSX, not raw CSV.

Audit-ready operations

Append-only audit, sessions and subscription governance.
