ENTERPRISE SALES OVERVIEW

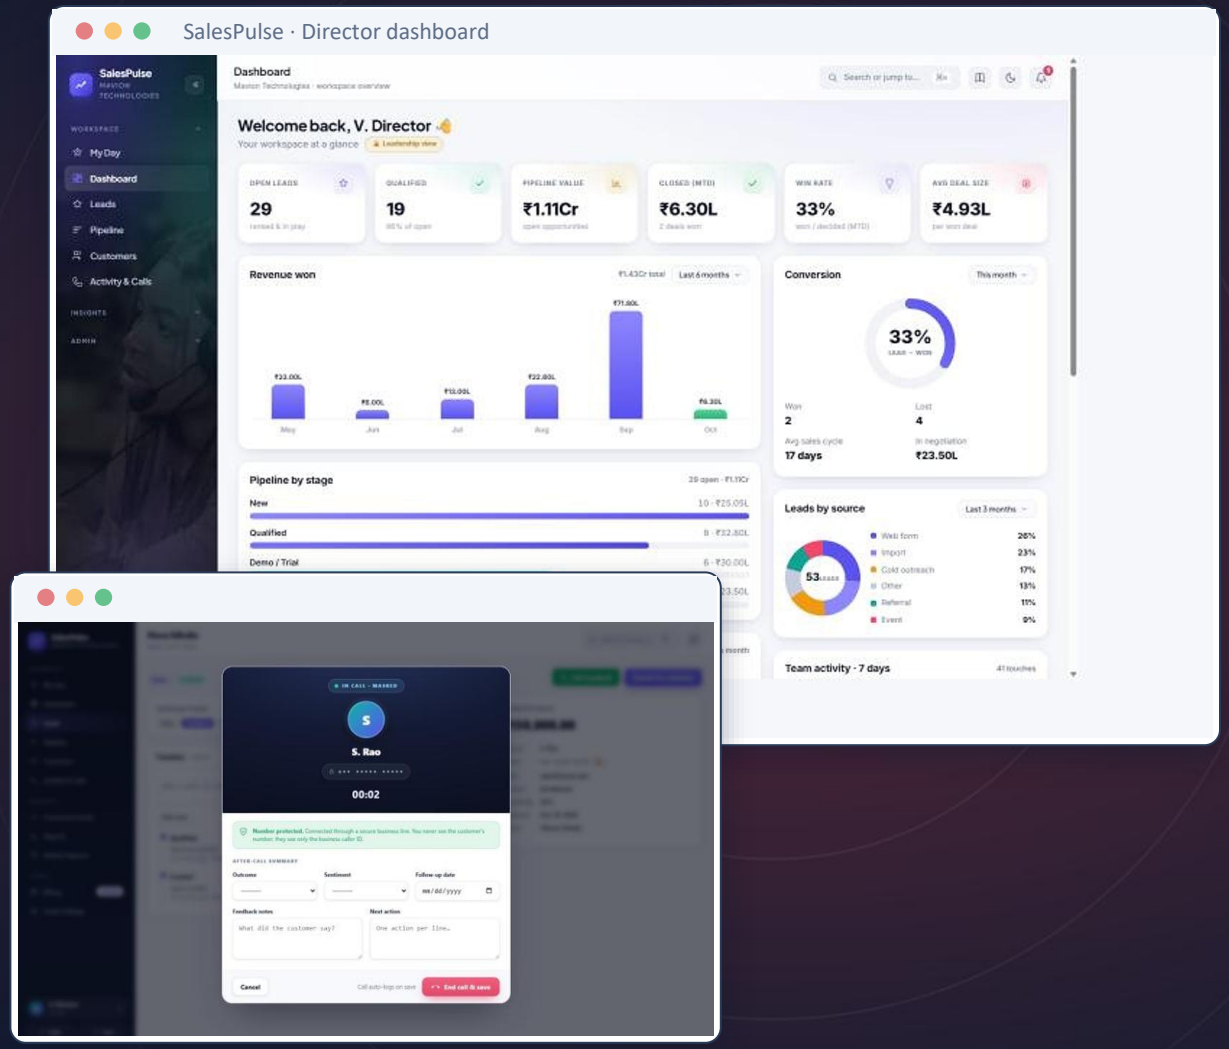

SalesPulse CRM

INDIA-FIRST SALES CRM

Your reps sell. Your customers' numbers stay yours.

A multi-tenant sales CRM with privacy-masked calling, a live pipeline and reports that build themselves, made for how Indian sales teams work.

Masked calling | Self-building reports | GST-ready billing

THE PROBLEM

Where CRMs let Indian sales teams down

Customer data leaks

Reps hold raw phone numbers, and contacts walk out with them.

Spreadsheet busywork

Weekly numbers are re-typed by hand, and the data ends up inconsistent.

No real-time visibility

Leaders can't see the pipeline or rep performance when it matters.

Fragmented customer view

Accounts, calls and history scattered across disconnected tools.

Billing and GST chaos

Manual invoicing that global tools weren't built for.

Not built for India

Global CRMs are heavy, costly and a poor fit for Indian teams.

THE SOLUTION

One command center, built the way India sells

Capture

Leads captured, qualified and deduplicated in moments.

Protect

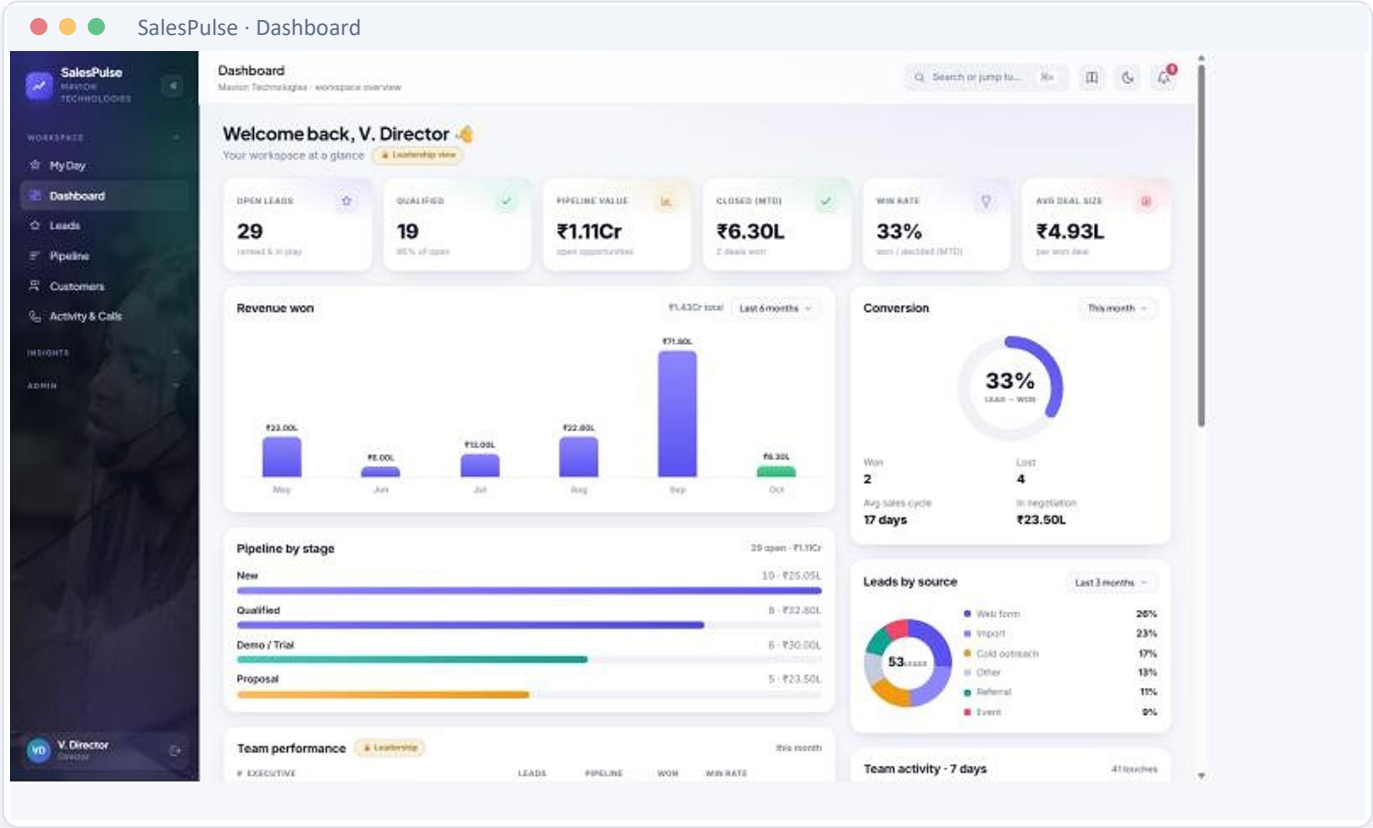

Masked calling, email and WhatsApp: reps never see raw contact details.

Run

A weighted pipeline and a daily queue that tells every rep who to call.

Report

Command center, report builder and weekly reports that fill themselves.

Director dashboard: open pipeline, closed value, conversion and leads by source (demo data).

WHO USES SALESPULSE

Four roles, each seeing exactly what it should

BDE (sales rep)

Works the daily queue, calls through masked lines, logs outcomes. Sees only their own leads and customers.

Manager

Coaches the team with talk-time, outcomes and RAG ratings; reviews weekly reports.

Director

Runs the command center: org KPIs, closed-business trend and the leaderboard.

Admin

Manages users, roles, billing and settings; the only role with bulk exports.

Row-level access is enforced on the server, not just hidden on screen: every rep sees only their own leads and customers. Lead-list and report downloads are leadership-only.

A REP'S DAY, END TO END

From the morning queue to the weekly report, with no re-typing

1

My Day queue

Highest-value, most-overdue actions first

2

Masked call

One click; the number is never shown

3

Outcome logged

Disposition, sentiment, next action

4

Follow-up

Email or WhatsApp from the lead, masked

5

Weekly report

Assembles itself from logged activity

Every call, email and WhatsApp message lands on the customer timeline automatically, so the activity journal, command center and weekly reports always reflect real work.

PRODUCT MAP

Fourteen modules in one sales command center

Sell

4 modules

- My Day
- Leads
- Pipeline
- Customers & 360

Engage

3 modules

- Privacy-masked calling
- Email & WhatsApp
- Activity log & call journal

Lead

3 modules

- Command center
- Report builder
- Weekly reports

Protect & run

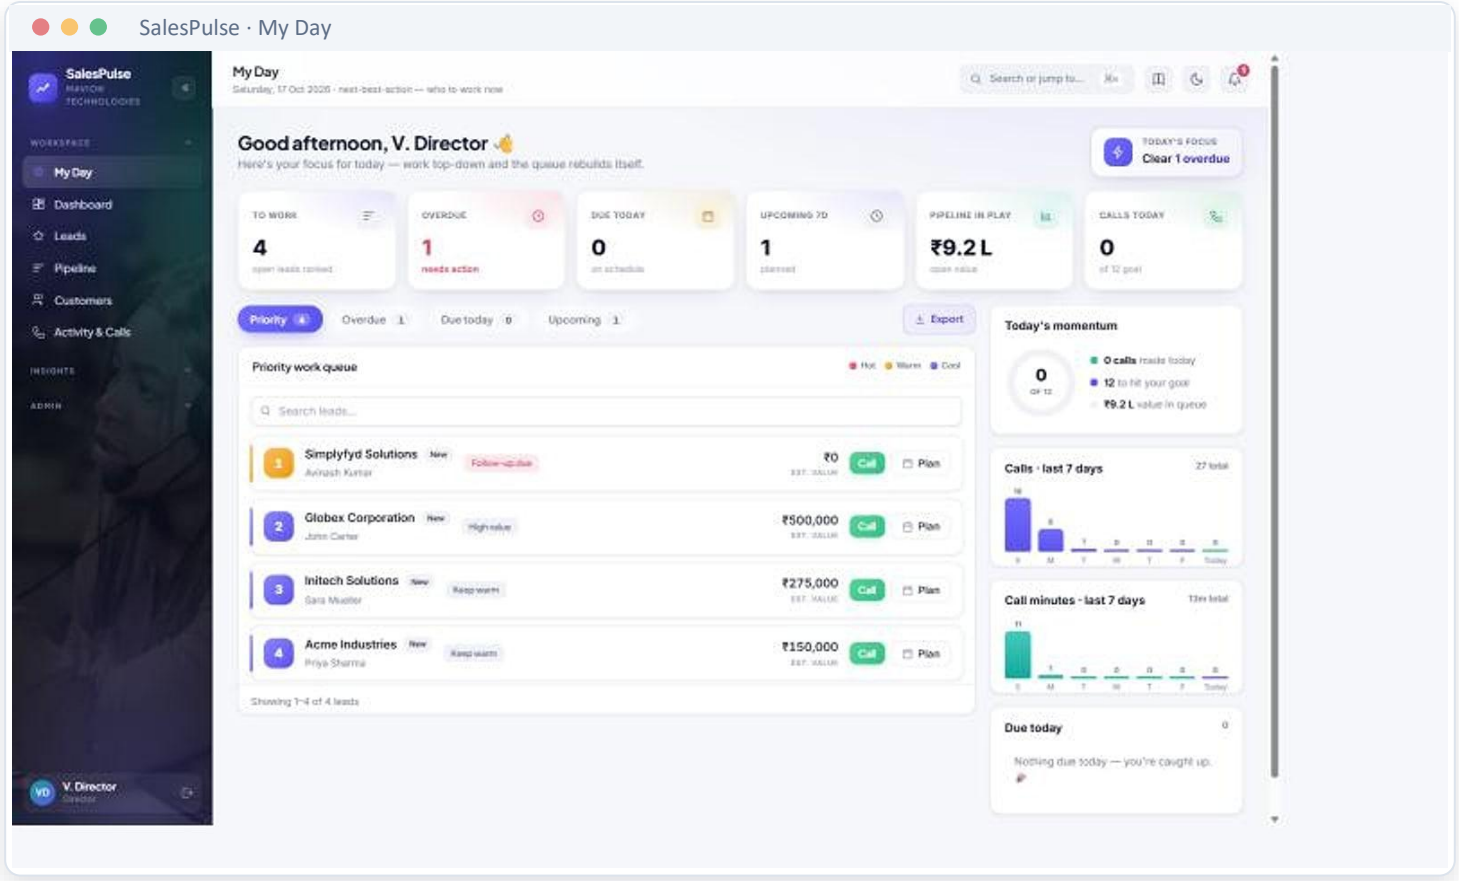

4 modules

- Data protection controls
- Subscriptions & GST billing
- Native Android app
- Platform & multi-tenancy

Each company's data lives in its own database, and masking rules are enforced on the server for web, mobile and exports alike.

MY DAY

Every rep starts the day knowing exactly who to call

My Day: KPI strip, priority work queue with one-click calling, and today's momentum (demo data).

Prioritised work queue

Highest-value, most-overdue actions surface first.

Follow-ups due today

Every promised call-back is front and centre.

Today's momentum

Calls, talk-time and pipeline at a glance.

More selling, less admin

Act on the queue instead of digging through lists.

LEAD MANAGEMENT

Capture and qualify leads at speed

Fast capture & qualification

Owner, stage and status at a glance.

CSV import with dedupe

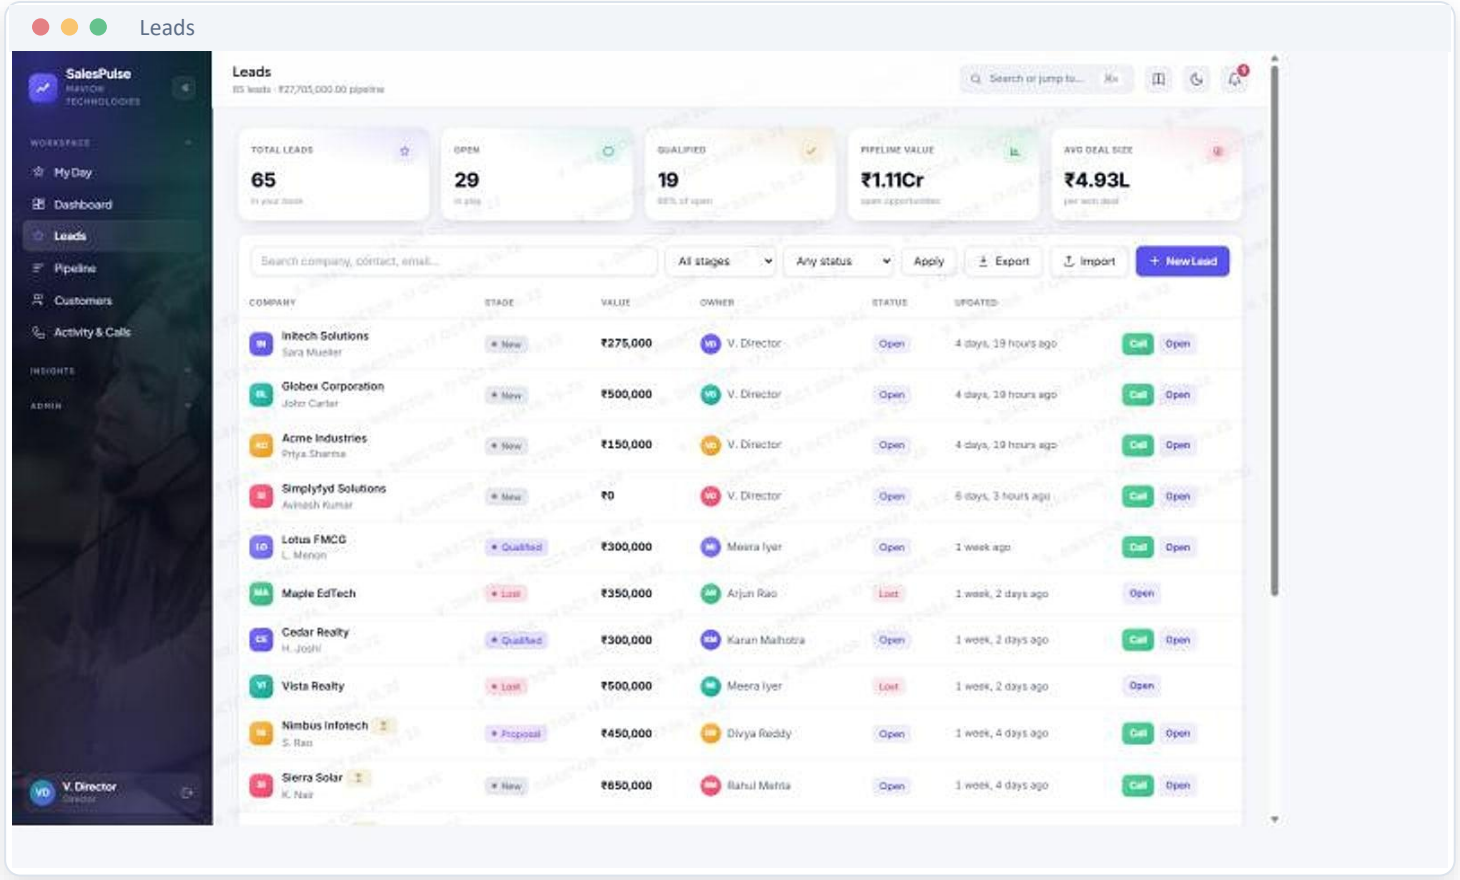

Bulk-import lists; duplicates caught on the way in.

Pipeline value in view

Total and per-stage value the moment a lead lands.

Call from the list

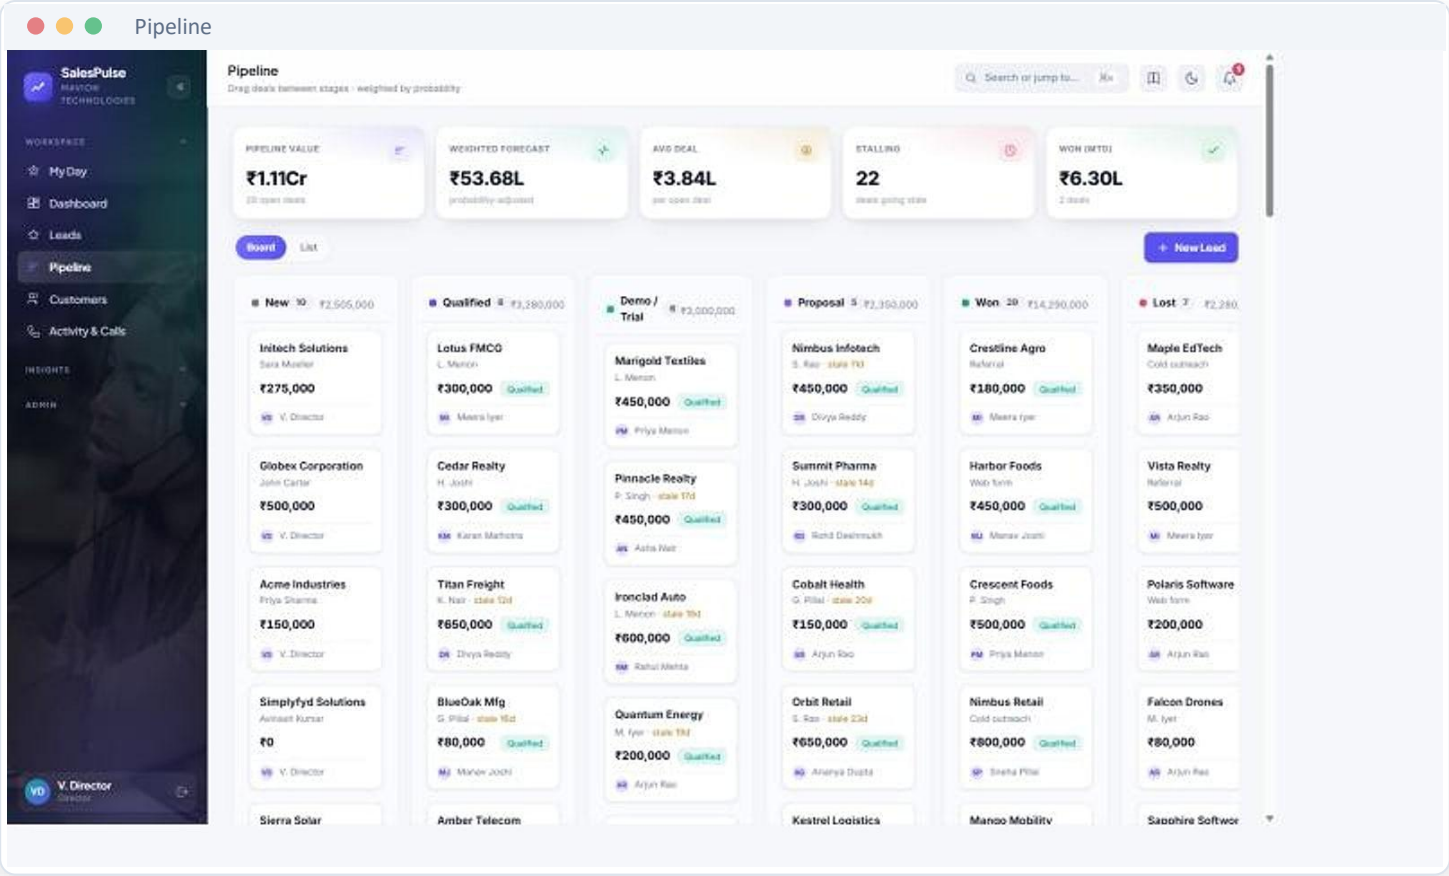

Masked calling straight from each lead.

Leads: pipeline totals, stage, owner and one-click call per lead (demo data).

PIPELINE

A weighted pipeline you can actually steer

Pipeline: weighted Kanban across stages with totals per column (demo data).

Drag-and-drop stages

Five weighted stages that reflect real close probability.

Stage aging

Spot deals going cold before they stall.

Weighted forecast

Values roll up into a number leadership can trust.

CUSTOMER 360

The whole relationship on one screen

Accounts & contacts

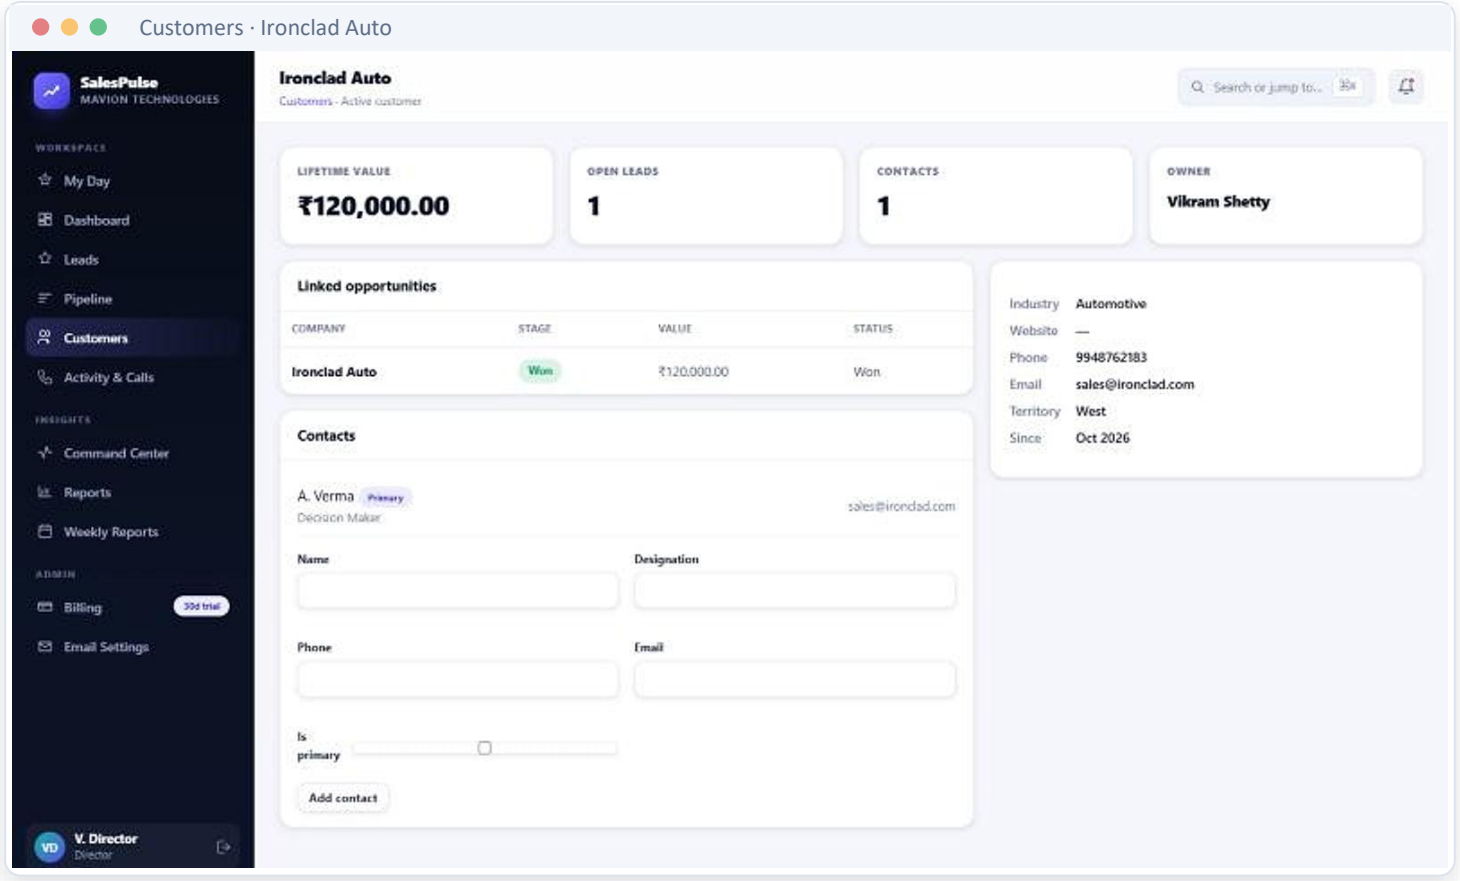

Every person and opportunity tied to the account.

Interaction timeline

Calls, emails, demos and follow-ups in order.

Lifetime value

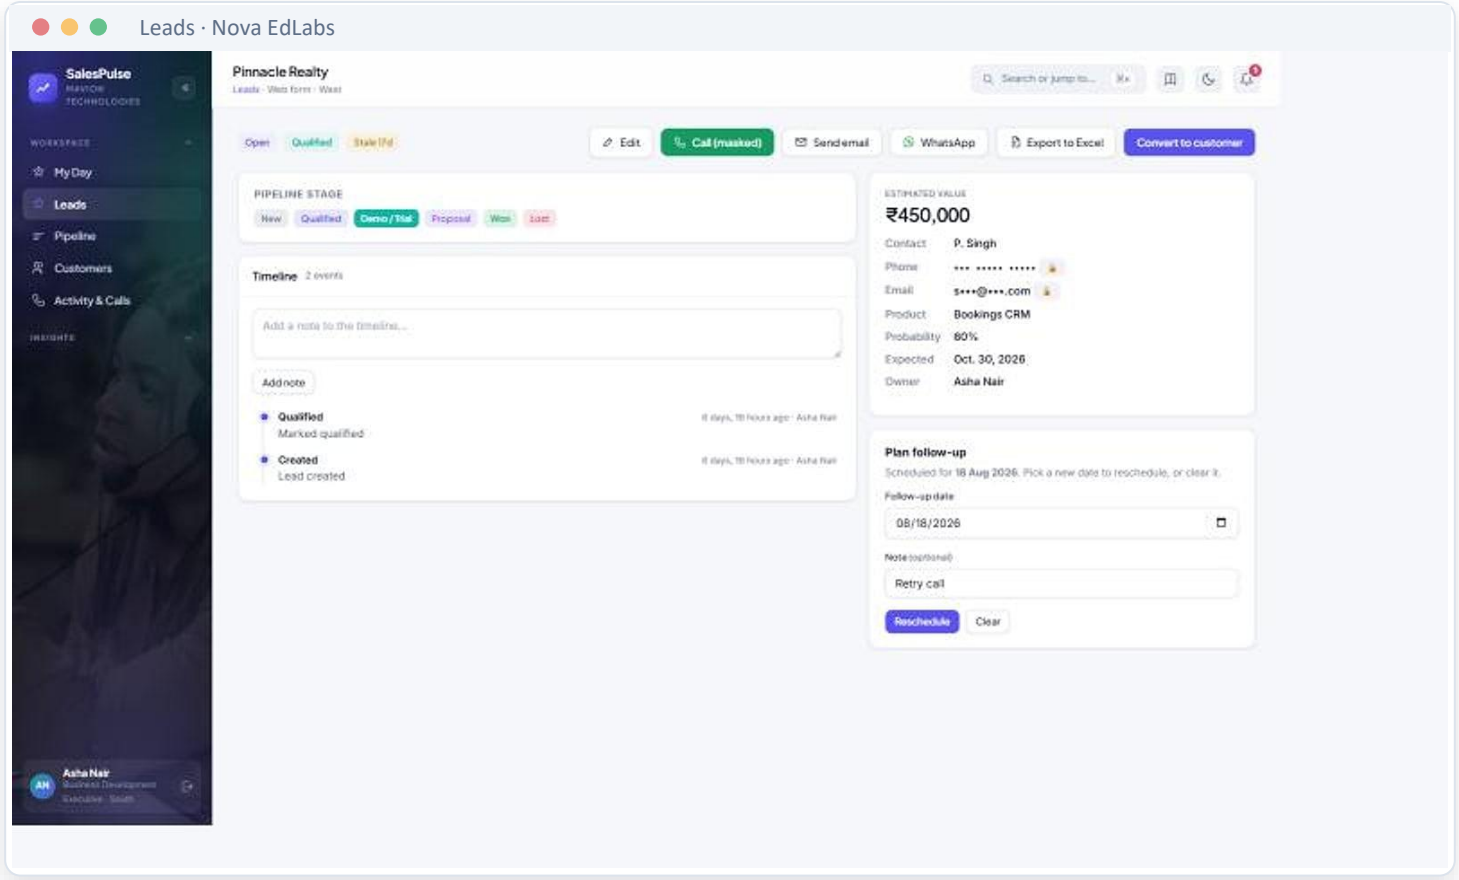

What each customer is worth and where to invest time.

Customer 360 (leadership view): lifetime value, linked opportunities and contacts (demo data).

FLAGSHIP · PRIVACY-MASKED CALLING

Your reps make the call. They never see the number

Lead record: masked phone and one-click 'Call (masked)' (demo data).

Numbers never exposed

Masked in the interface and on screen: nothing to copy or screenshot.

Masked both ways

Customers who call your business number reach their own rep, still masked.

No poaching, no leakage

Reps sell without ever owning the customer's contact details.

HOW MASKING WORKS

One business line, both directions, no personal numbers

OUTBOUND: REP CALLS CUSTOMER

Rep clicks Call
From the lead, queue or app

→

SalesPulse business line
Real number resolved server-side only

→

Customer
Sees only your business caller ID

INBOUND: CUSTOMER CALLS BACK

Customer calls
Your business number

→

Routed to the owning rep
Still masked, in both directions

→

Rep answers
Without seeing the number

Pay-as-you-go calling

₹0.50 per leg-minute, 30-second pulse.

Bring your own telephony

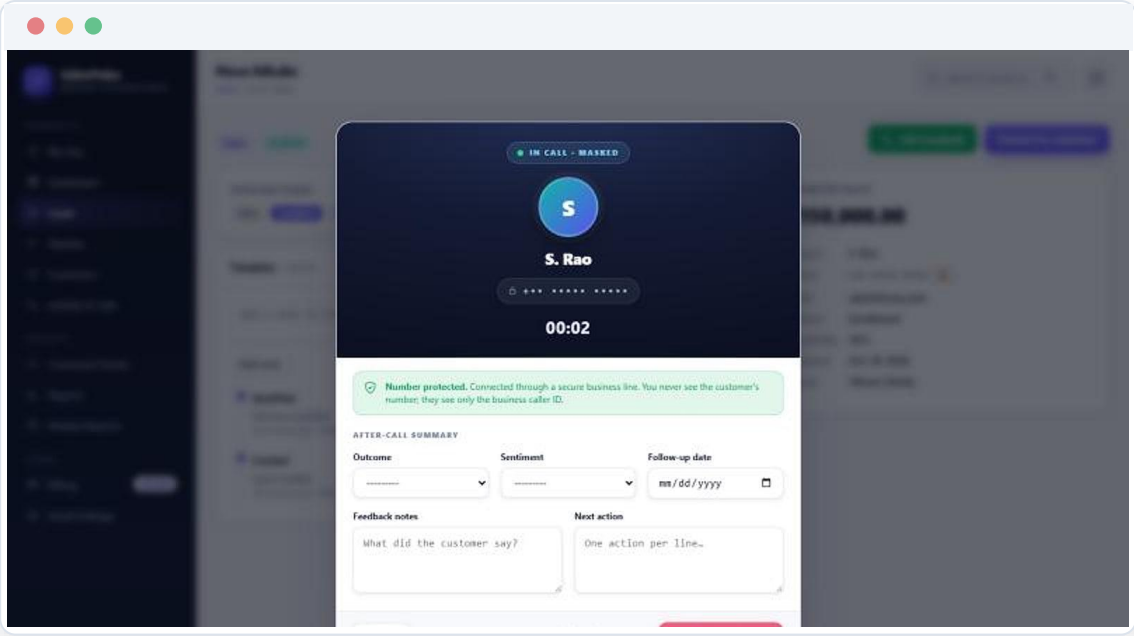

Use SalesPulse calling or your existing provider.

Same rule everywhere

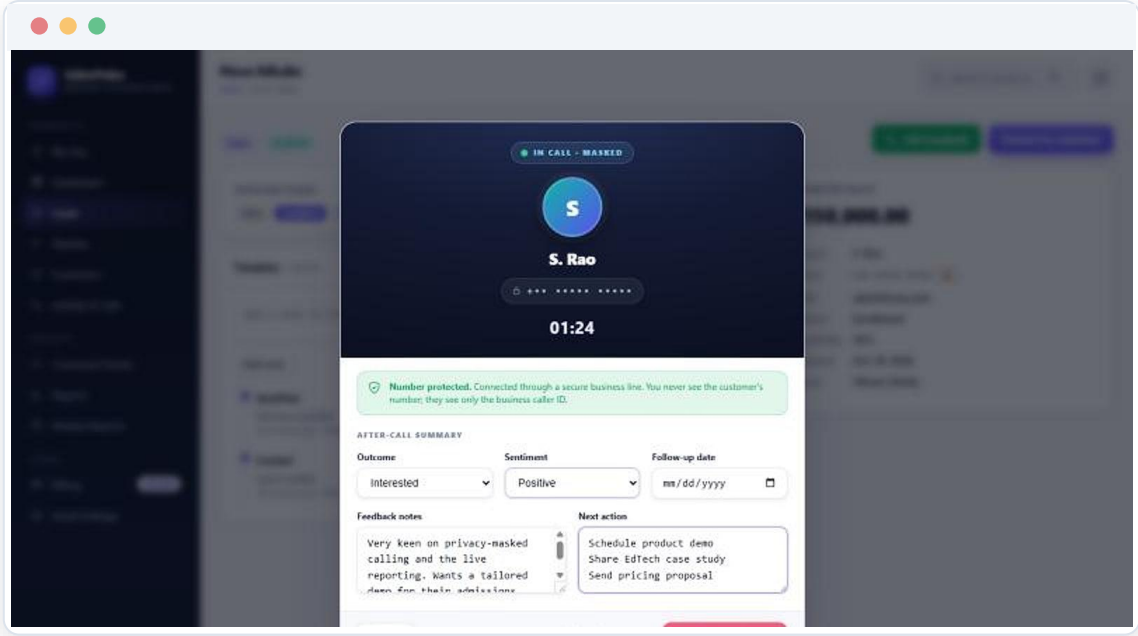

Masked on web, mobile and exports, enforced on the server.

IN THE CALL AND AFTER IT

A dialer that protects the customer, and logs every call itself

In call: the number stays masked the whole time (demo data).

After the call: outcome, sentiment, feedback and next action.

One-click connect

Dial straight from the lead.

Outcome & sentiment

Recorded in seconds, in the dialer.

Next action

Saved to the timeline instantly.

Talk-time builds itself

No separate data entry.

EMAIL & WHATSAPP

Every channel from the lead, masked and logged

Send as yourself

Each rep sends from their own verified address, so mail lands in the inbox, with fallback to the company sender.

Cc your team

Cc a teammate in a click, but never a way to expose the masked address.

Designed signatures

Full HTML signatures with logos and brand colours, preserved exactly.

WhatsApp Business

Approved templates with product images, PDFs and brochures.

Masked, like calling

Reps write to a masked address; the real one is resolved server-side.

Logged automatically

Every email and WhatsApp lands on the timeline and feeds reports.

ACTIVITY LOG & CALL JOURNAL

Every interaction, captured without the busywork

One running record

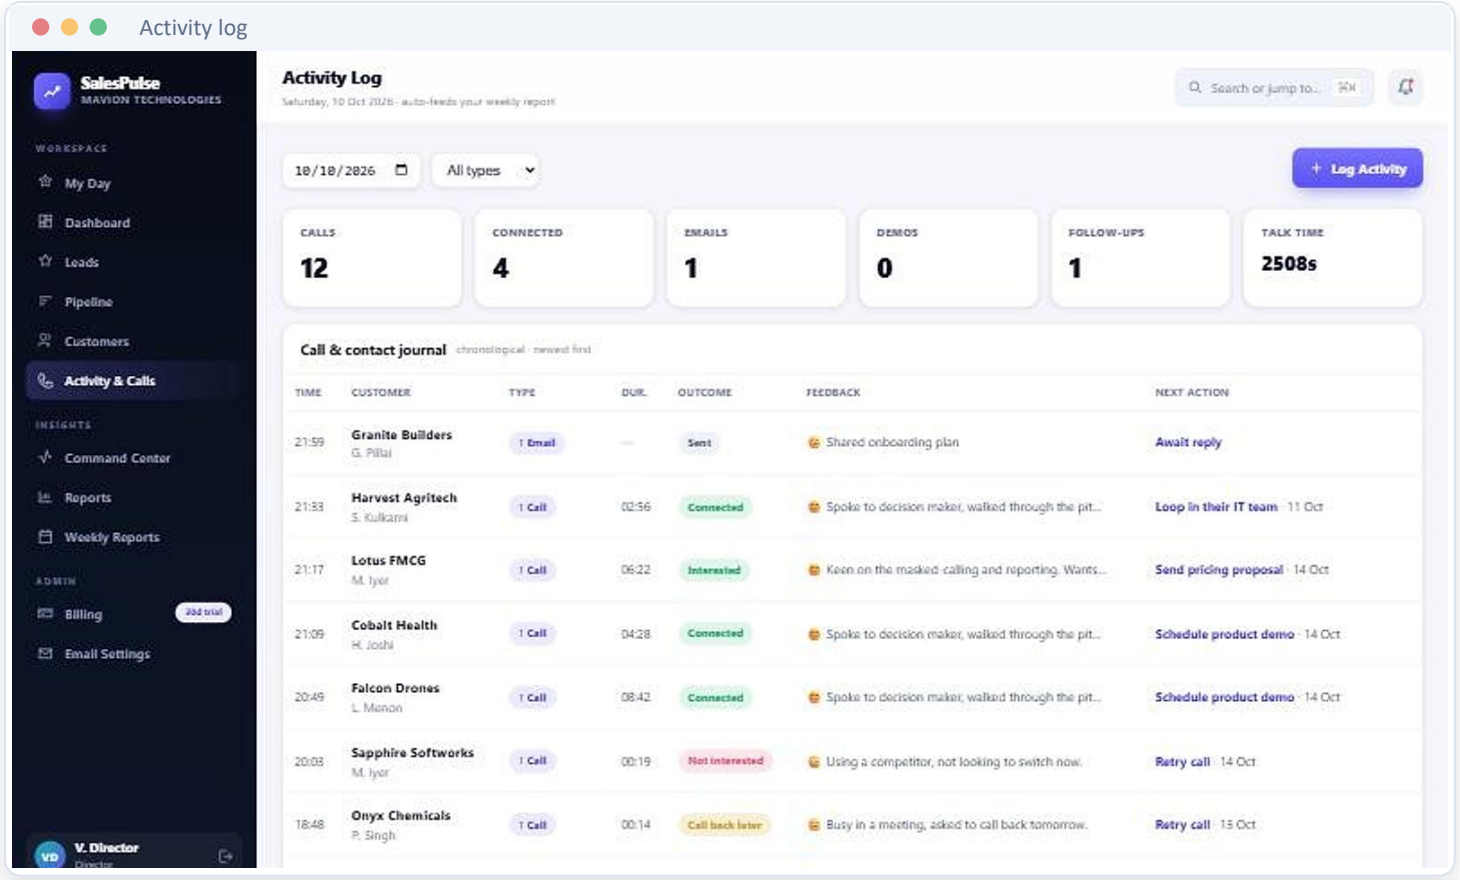

Calls, emails, demos and follow-ups.

Outcomes and sentiment

Structured fields, not just a list of events.

Talk-time totals

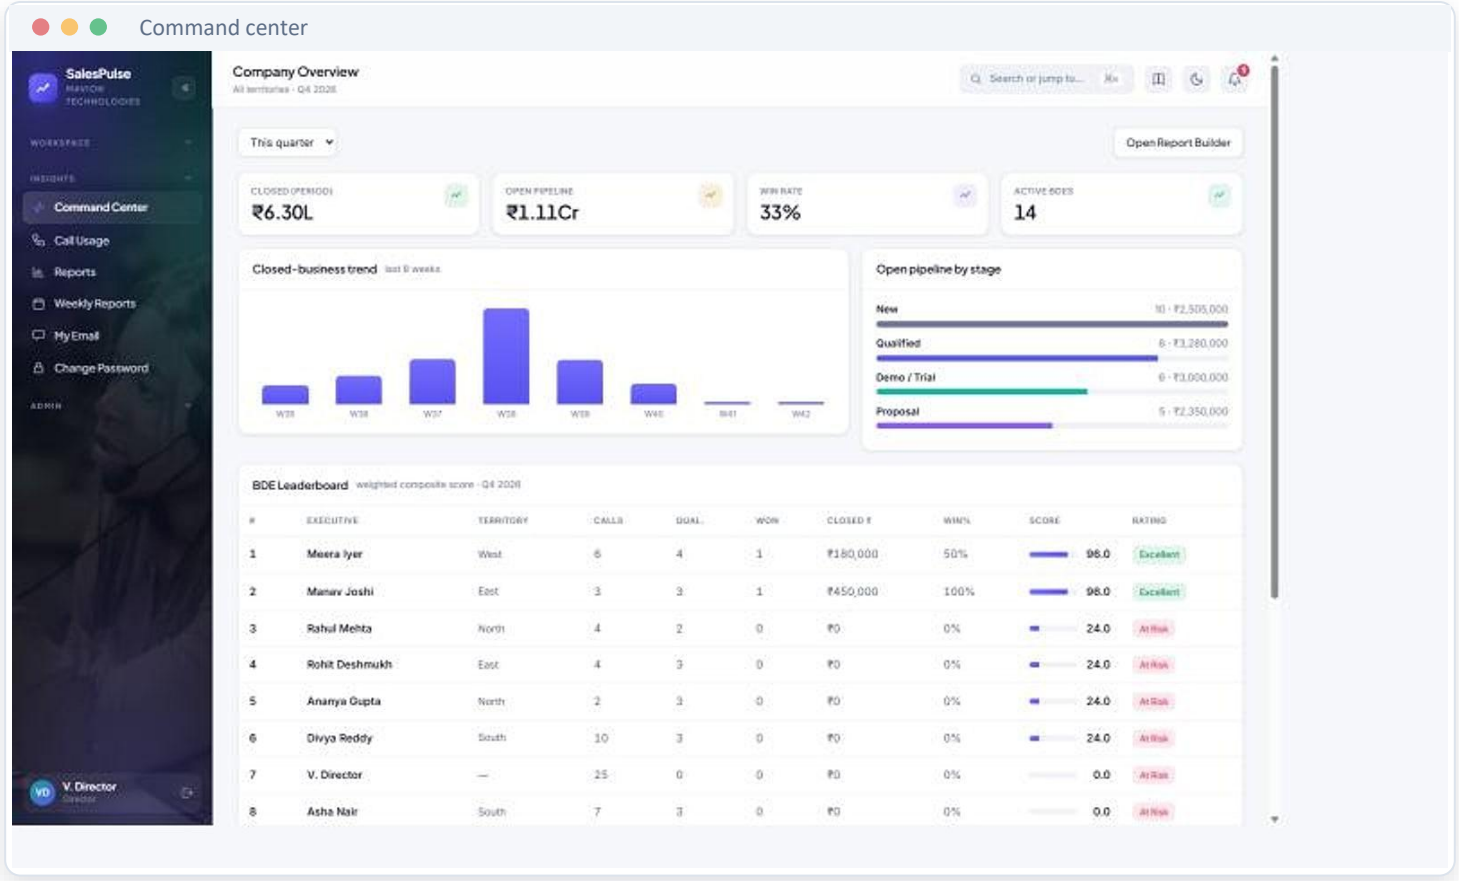

Effort is measurable, which makes coaching fair.

Activity log: calls, connected, demos, follow-ups and talk-time per day (demo data).

LEADERSHIP COMMAND CENTER

Real-time visibility into pipeline and people

Company overview: KPIs, closed-business trend, pipeline by stage and BDE leaderboard (demo data).

Org KPIs

Closed business, open pipeline and win rate.

8-week trend

Closed business over time.

Live BDE leaderboard

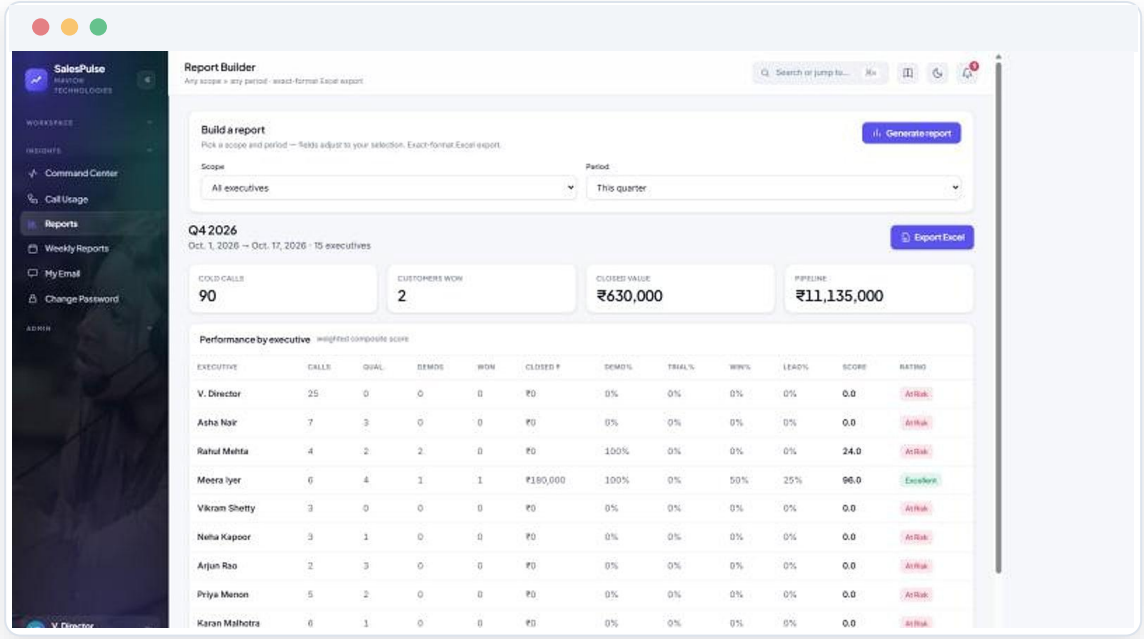

Composite scoring ranks reps on what matters.

RAG ratings

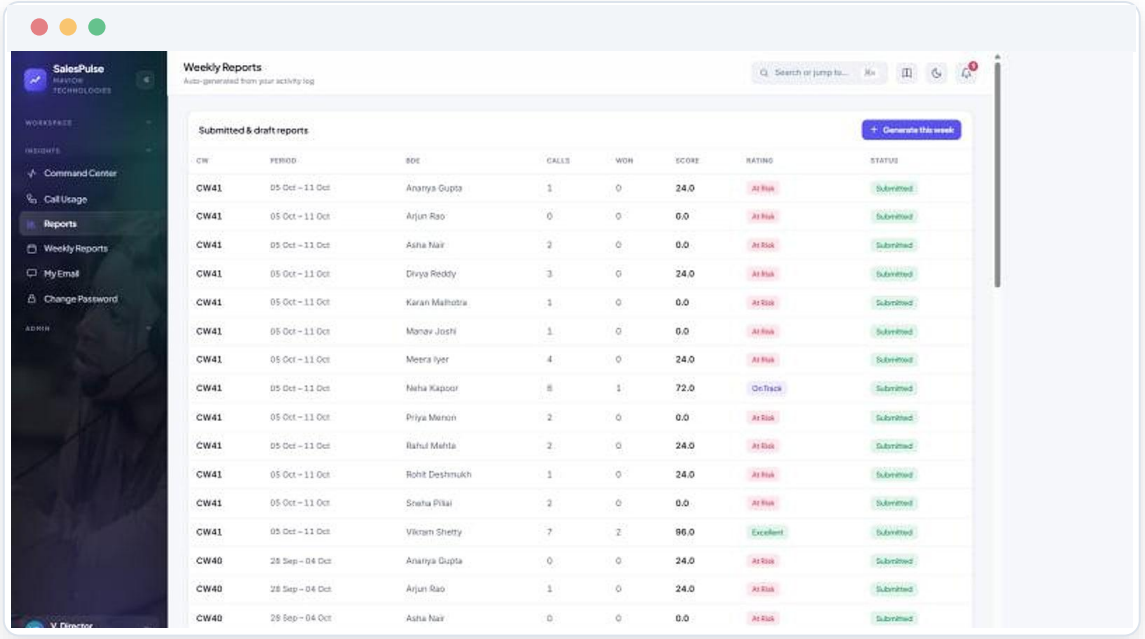

Red, amber and green make coaching clear and fair.

REPORTS THAT BUILD THEMSELVES

No more re-typing numbers into spreadsheets

Report builder: any scope and period, per-executive scores and ratings.

Weekly reports: generated from activity, scored and submitted.

Any scope, any period

All execs, chosen execs or a territory.

Multi-sheet Excel

Summary plus monthly, weekly and daily sheets.

Scored and rated

KPIs colour-coded by threshold.

Submit to leadership

One consistent report up the chain.

DATA PROTECTION & INTEGRITY

Your customer data can't walk out the door

Phone and email masked

On web, mobile and exports; real values used server-side only.

No bulk export for reps

Lead-list and report downloads are leadership-only.

Row-level access

Each rep sees only their own leads, enforced on the server.

Access log + anomaly alerts

Every view and export audited; abnormal volume flagged to admins.

Traceability watermark

Every screen stamped with viewer and time, so any leak is attributable.

Isolation & rate limits

Database per company and API rate limits stop bulk extraction.

NATIVE ANDROID APP

The full command center in your rep's pocket

My Day on mobile

The same ranked queue, follow-ups and pipeline, rebuilt for the phone.

Masked calling on the go

Protected calls and outcome logging from the field.

Real-time notifications

Push alerts for follow-ups due and call outcomes.

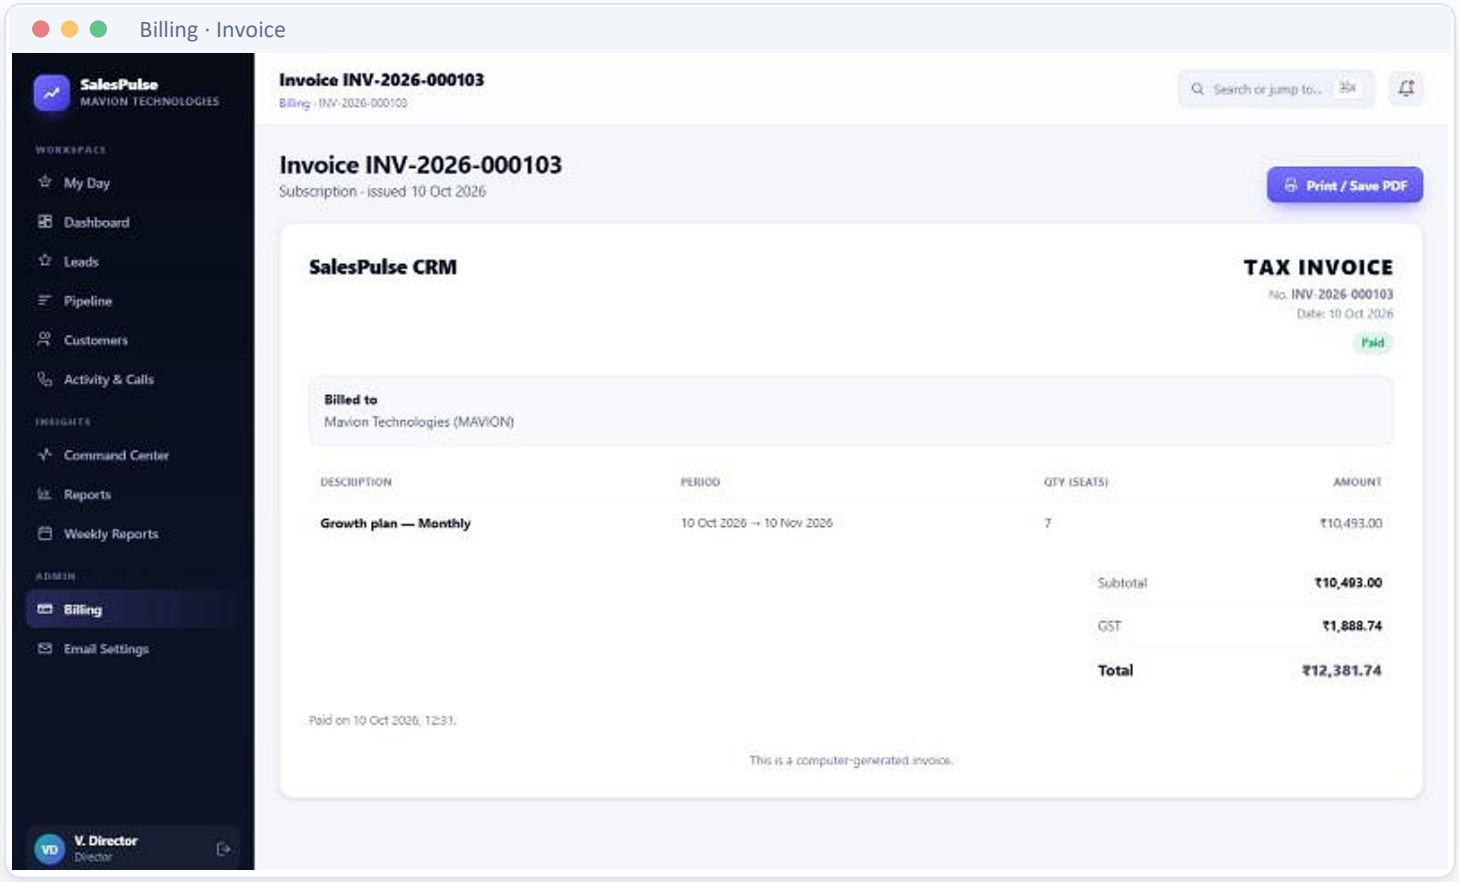

Same privacy everywhere

Phone and email masked exactly as on the web, enforced server-side.

Field reps keep the same ranked queue, pipeline and masked calling between visits, with one governed login across web and mobile.

SUBSCRIPTIONS & BILLING

Automated, India-first billing with nothing to reconcile

Tax invoice generated automatically for a subscription period (demo data).

Razorpay payment links

Customers pay online; subscriptions activate automatically.

Automatic GST invoices

Tax invoices generated for every period.

Trials, renewals and grace

30-day trial, renewals and a 10-day grace period.

Seat and quota limits

Seats and lead quotas enforced automatically.

ARCHITECTURE

Multi-tenant by design, isolated by default

SIGN-IN & ROLES

Company-code login
Single host, per-company workspace

RBAC
BDE · Manager · Director · Admin

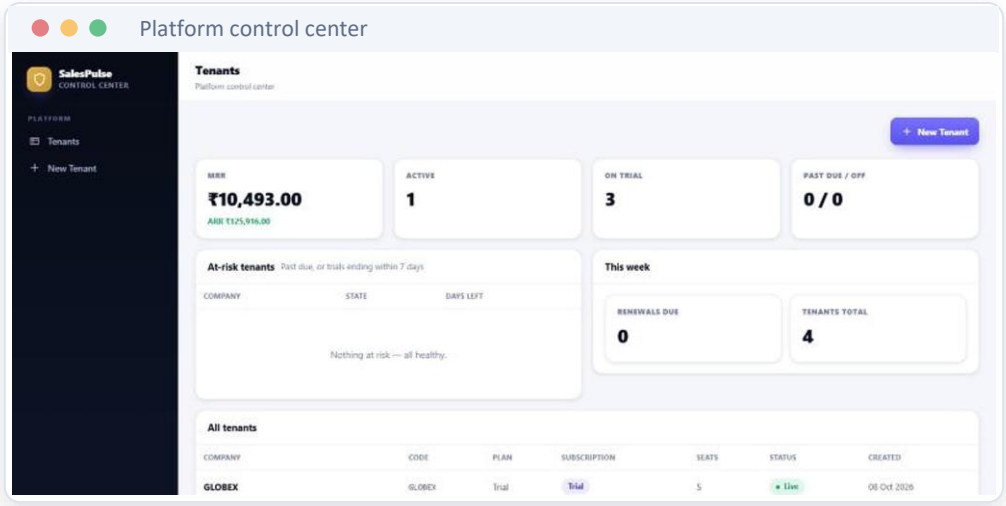

Web + Android
Same masking rules, server-side

PER-COMPANY DATA

Company A · own database

Company B · own database

One database per company

Platform control center: MRR, ARR and tenants.

Isolation is physical, not a filter: one company's data can never touch another's. API rate limiting and an audited access log sit on top.

WHY SALESPULSE

What sets SalesPulse apart from generic CRMs

	GENERIC CRM	WITH SALESPULSE
Customer data	Reps hold raw numbers	✓ Masked calling, email and WhatsApp
Reporting	Re-typed into spreadsheets	✓ Reports and weekly submissions build themselves
Billing	Manual invoices, no GST	✓ INR, GST invoices and Razorpay built in
Visibility	Stale, after the fact	✓ Live command center and leaderboard
Isolation	Shared tables	✓ A database per company

Privacy built in

Masking is the default, not an add-on.

India-first

INR, GST, Razorpay and Asia/Kolkata out of the box.

Automation that removes work

Reports feed themselves from real activity.

Purpose-built for selling

Every screen earns its place in a rep's day.

HOW PRICING WORKS

Software per seat; calling billed on actual usage

Software

Per user per month

Plans scale by seats and lead quota, from small teams to large organisations. GST 18% extra.

Calling

Pay as you go

₹0.50 per leg-minute, outbound and inbound, 30-second pulse, billed on actual usage, or bring your own telephony.

Free trial

30 days, no card

All features, up to 5 seats and 2,000 leads and contacts, to prove value first.

Per-seat prices for each plan are confirmed in your proposal, based on seats and lead volume.

GETTING STARTED

Live in days, not quarters

STEP 1

Sign up

We provision your isolated workspace and company code.

STEP 2

Import leads

Bring your lists by CSV; duplicates removed on the way in.

STEP 3

Invite your team

Add reps, managers and directors with role-based access.

STEP 4

Start selling

Place masked calls and watch the reports build themselves.

Start with the 30-day free trial: no card required, all features, up to 5 seats and 2,000 leads.
