ENTERPRISE SALES OVERVIEW

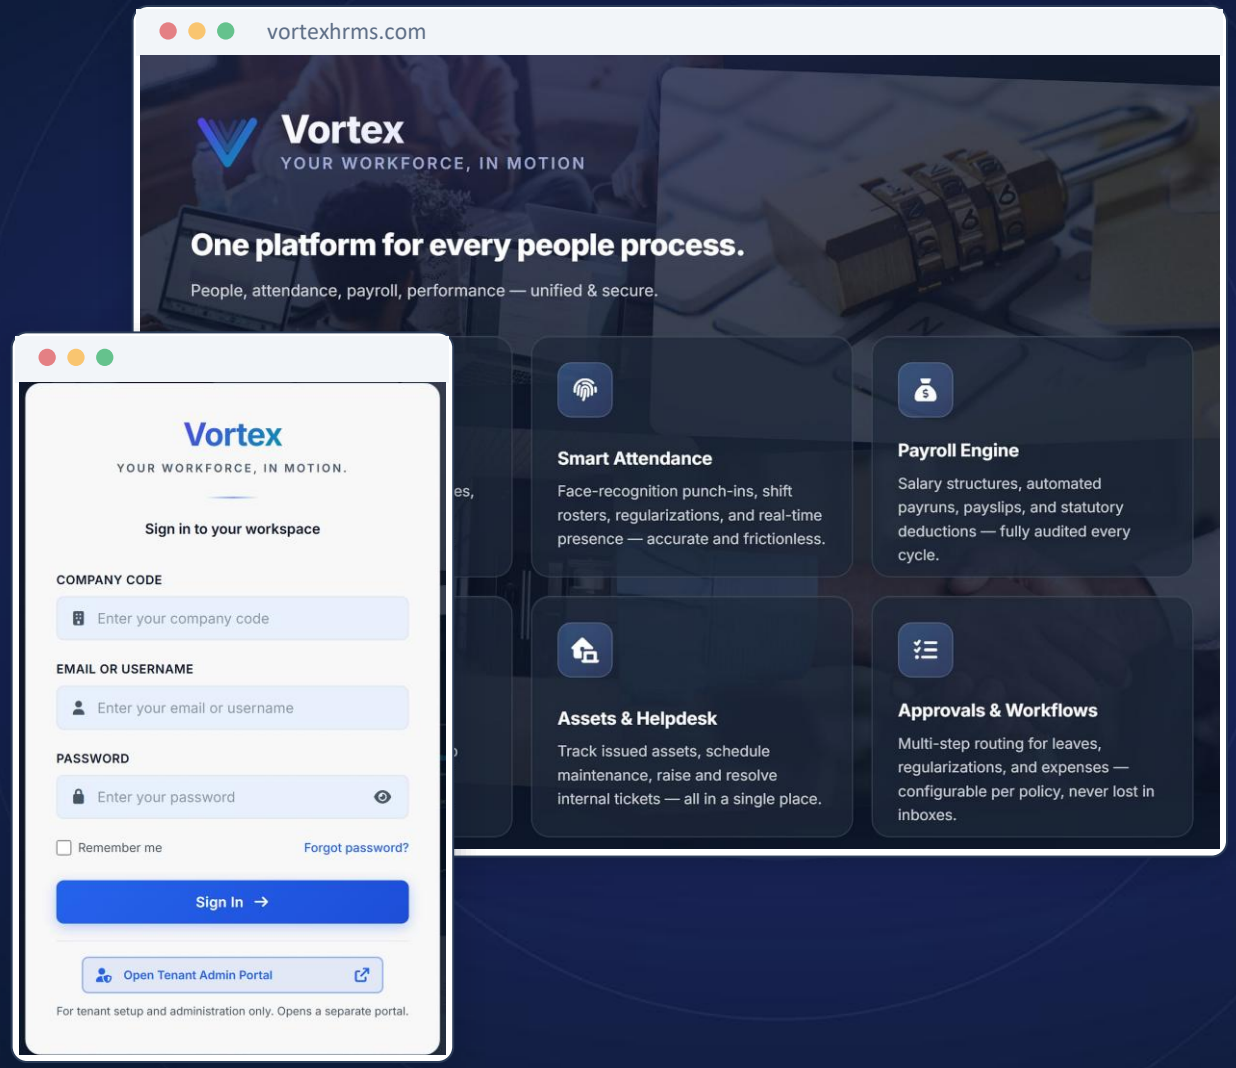

Vortex HRMS

UNIFIED PEOPLE PLATFORM

Hire to retire. Attendance to payroll. On one record.

Face-AI attendance, policy-driven payroll, leave and comp-off, approvals and employee self-service, in one secure multi-tenant HRMS.

Hire to retire | Face-AI attendance | Policy-first payroll

THE STATUS QUO

Why workforce platforms break at scale

Disconnected systems

HR, payroll, attendance and helpdesk live in separate tools that never quite agree.

Manual reconciliation

Finance reconciles attendance to payroll by hand, every cycle.

Compliance debt

Statutory rules change faster than legacy systems adapt.

Poor employee experience

Several logins and a ticket just to update a phone number.

Hidden cost of ownership

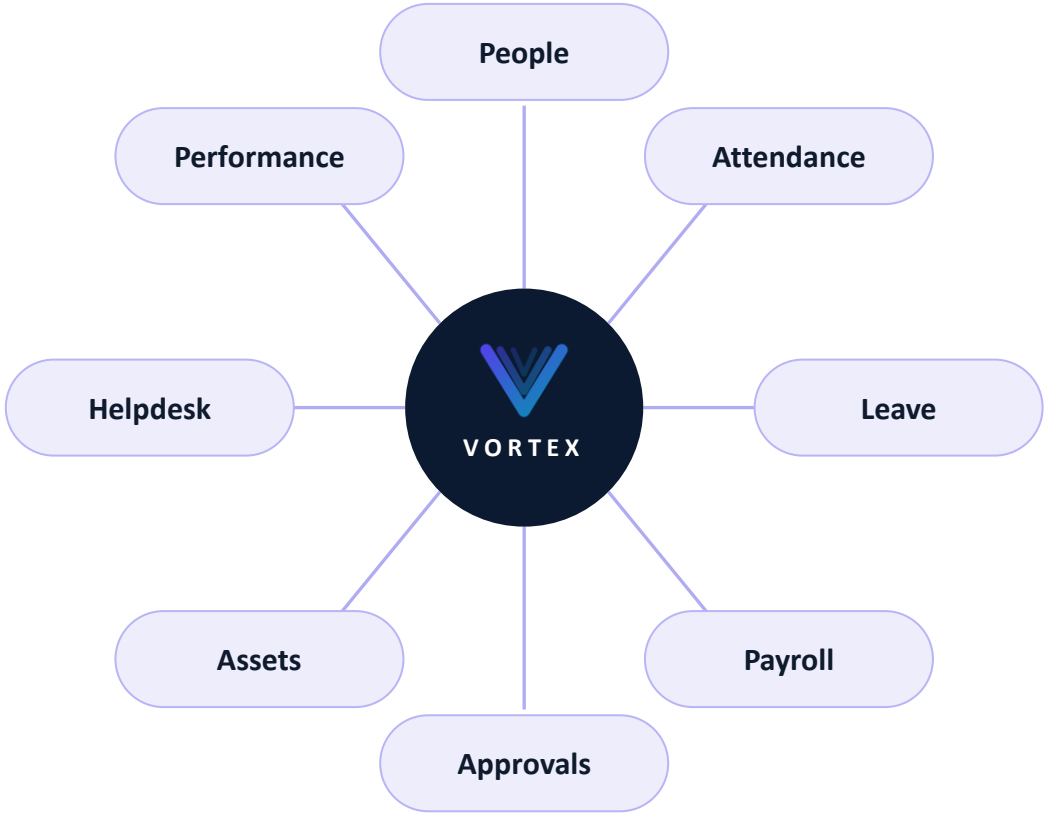

Licence sprawl, integration effort and double data entry.

No data trust

Reports don't match across systems, so decisions wait.

ONE PLATFORM, ONE RECORD

Attendance flows into payroll; approvals flow into balances

Unified

One record per employee: every event, document, balance and payslip.

Intelligent

Face-AI attendance, policy-first payroll and no-code workflows.

Secure

A database per customer, role-based access and audit trails.

BUILT FOR EVERY PEOPLE ROLE

Each role works from the same record

HR team

Lifecycle, documents, policies and onboarding.

Payroll & finance

Payruns, statutory deductions, sign-off and bank files.

Managers & approvers

One-tap approvals for leave, regularisation and expenses.

Employees

Self-service profile, punches, balances and payslips.

Field & shift staff

Mobile punch-in, geo-fenced check-ins and rosters.

Admins & IT

Tenant setup, roles, security policies and assets.

PRODUCT MAP

Start with core HR, then switch on exactly what you need

Base bundle

Every employee gets

- People management
- Attendance tracking
- Leave management
- Employee self-service
- Company policies

Premium modules

Switch on any month

- Payroll management
- Performance (PMS)
- Expense management
- Helpdesk
- Asset management
- HR document generation
- Learning (LMS)

Attendance & mobile add-ons

For field and remote teams

- VortexGo mobile app
- Remote punch-in
- Geo-fence attendance
- On-shift location sharing
- Punch step-up verification
- Remote check-in

Underneath everything: the approvals & workflow engine, role-based security, audit logging and a database per customer.

EMPLOYEE LIFECYCLE

Hire to retire, in one record

Pre-boarding
Tasks before day one

Onboarding
Checklists and documents

Profile & vault
One record, all documents

Transitions
Role and reporting changes

Separation
Exit clearance

Alumni
Archived record

Secure uploads

Onboarding documents uploaded through secure pages, linked to the employee record.

Document vault

Letters, verification files and records kept per employee.

Full timeline

Reporting changes and life events tracked with history.

Clean exits

Exit clearance and an alumni archive, with assets recovered.

SMART ATTENDANCE

Friction-free attendance, audit-grade accuracy

Face-recognition punch

Punch in and out by face, with sub-second matching (InsightFace).

Shifts and rosters

Shift, roster, weekend and holiday logic.

Geo-fenced check-ins

Location-bounded attendance for field teams.

Regularisation

Self-service correction requests through the workflow engine.

Live presence

Real-time presence by location, team and role.

Devices & gates

Biometric terminal and access-control integration.

FIELD & MOBILE WORKFORCE

Attendance for the field, with privacy built in

VortexGo

The employee app: punch-in, leave, approvals, payslips and helpdesk on the phone.

SnapLens

A dedicated attendance app for capture on site.

On-shift location sharing

Optional, employer-enabled tracking for attendance verification and field work.

PRIVACY SAFEGUARDS FOR LOCATION SHARING

- ✓ Off by default
- ✓ Employee consent required
- ✓ Interval set by employer: 5–60 min
- ✓ Work-hours-only option
- ✓ Visible notification while active
- ✓ Retention 30 / 60 / 90 days
- ✓ Mock-location detection
- ✓ Never sold or used for ads

LEAVE & COMP-OFF

Honour every leave policy, automatically

Configurable leave types

Accrual and carry-forward rules per type.

Multi-step approvals

Mobile-first approval chains.

Half and quarter days

Fine-grained leave units.

Weekend & holiday credits

Work on off-days earns comp-off by policy.

Comp-off engine

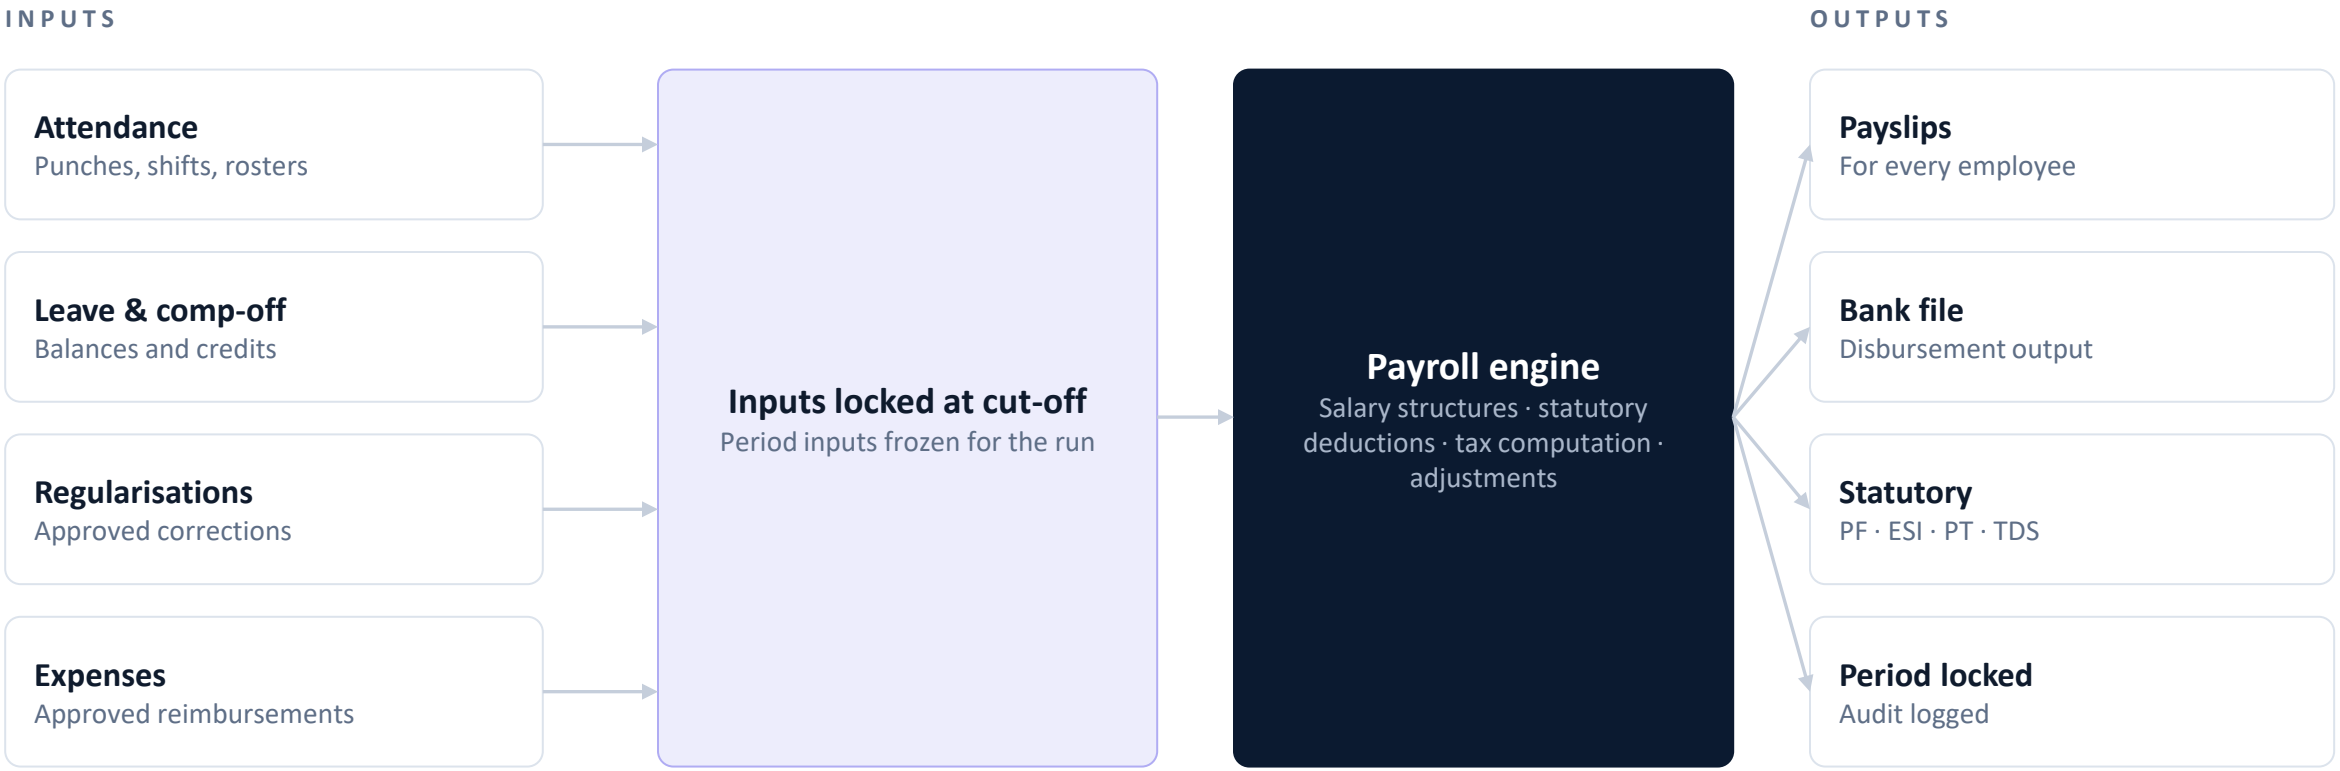

Policy-driven comp-off generation with a credit ledger.

Live balances

Remaining vs allocated, per employee per year.

FROM ATTENDANCE TO PAYSLIP

Payroll consumes attendance and leave directly

Re-runs are versioned and periods lock after sign-off, so every payroll is reproducible and auditable.

PAYROLL ENGINE

Run payroll on policy, not on spreadsheets

1 **Inputs locked**
At cut-off

2 **Engine computes**
Per policy

3 **HR reviews**
Finance signs off

4 **Disbursement**
Bank file generated

5 **Period locked**
Audit logged

Salary structures

Configurable components and payruns.

Statutory compliance

PF, ESI, PT and TDS deductions.

Tax declarations

Declarations and proofs from staff.

Versioned re-runs

Re-run a payroll with full version history.

Multi-entity payroll

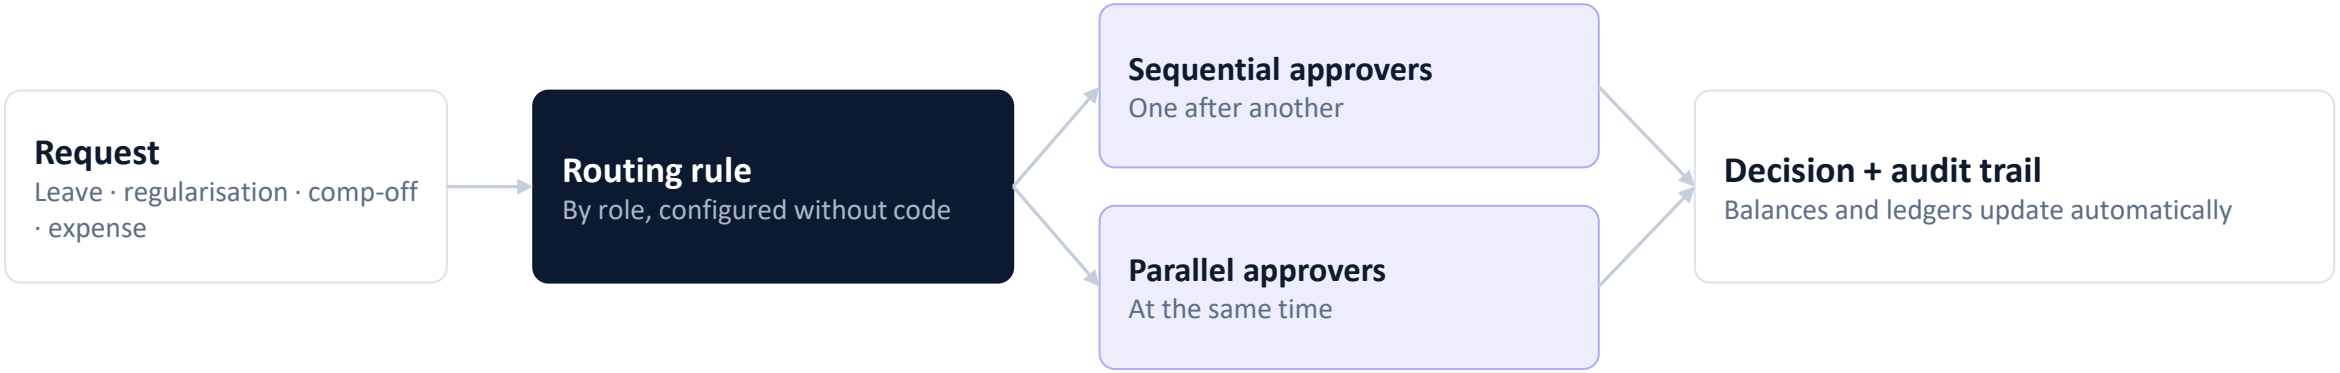

Run payroll across legal entities.

Payslips

Generated for every employee, every cycle.

APPROVALS & WORKFLOWS

Decisions at the speed of policy, not the speed of inboxes

Out-of-office cover

Approvals never stall when someone is away.

Escalation timers

Overdue requests escalate automatically.

Mobile-first approvals

Approve from the phone in one tap.

Audit per request

Every decision recorded and defensible.

EMPLOYEE SELF-SERVICE

Self-service that ends routine HR tickets

Personal dashboard

Balances, punches, pending approvals and announcements.

Profile updates

Employees maintain their own details.

Payslips & tax

Payslips and tax declarations in one place.

Company policies

Publish policies everyone can read.

PERFORMANCE MANAGEMENT

Appraisal cycles that run themselves

Goal plans
Set and track goals

→

Self-appraisal
Employee input

→

Reviewer actions
Manager review

→

Appeals
Fair, recorded process

→

Reports
Performance reporting

Goals that connect

Goal plans per employee and appraisal cycle.

Structured reviews

Self-appraisal and reviewer stages with audit trails.

Due process

Appeals handled inside the workflow.

EXPENSES, ASSETS & HELPDESK

Operational modules on one workflow chassis

Expense management

- Claims with receipts
- Multi-level approvals
- Reimbursement through payroll

Asset management

- Register with categories & warranties
- Allocation history and maintenance
- Return requests at exit

Helpdesk

- IT and HR ticket queues per team
- SLA timers and escalations
- Self-service knowledge base

Assets recovered at exit, faster resolution of day-to-day issues, and reimbursements that flow into payroll.

HR DOCUMENTS & LEARNING

Letters and training, built into the HR record

HR document generation

42 branded letters and certificates generated as PDFs from the employee record: offer to relieving.

Learning (LMS)

Courses, compliance training and certifications for the workforce, managed alongside HR records.

Need more? Organisations that need standalone document automation or an enterprise skills and compliance LMS can extend with MavionTech's Signet and MavionLearn.

SECURITY & PRIVACY

Built to govern a sensitive HR dataset

A database per customer

Strict isolation with separate credentials; no shared schema.

Company-code sign-in

Each organisation signs in to its own workspace; tenant administration in a separate portal.

Access policies

Session settings, access policies and IP rules.

Role-based access

Role-based navigation with configurable permission and approval structures.

Audit logging

Across onboarding, payroll, document review, employee changes and approvals.

Published privacy policy

Covering data categories, retention, consent and individual rights.

ARCHITECTURE

Built for scale, secured by design

EDGE	Web app · VortexGo & SnapLens mobile apps · biometric devices · access gates
APPLICATION	People · Attendance · Leave · Payroll · Performance · Expenses · Learning · Assets · Helpdesk · Approvals
WORKFLOW & SECURITY	No-code workflow engine · role-based access · session and IP policies · audit logging
DATA	A dedicated MySQL database per customer, with separate credentials

AROUND IT

Integration APIs
REST APIs for connected systems

Identity & directory
Role-based access, company-code sign-in

Audit & events
Logged across sensitive workflows

Observability
Operations monitoring

TECHNOLOGY

Django + Python | MySQL, one database per customer | Face-AI (InsightFace) | Tailwind UI | REST APIs

WHERE VORTEX WINS

How Vortex compares with the alternatives

Against legacy suites

Modern and mobile-first, with a biometric core. No implementation army required.

Against point HR tools

Vortex is the platform of record, not another module to integrate.

Against generic SaaS

Strict multi-tenant isolation, Indian statutory payroll built in, and Face-AI attendance native.

Against building in-house

Every module your team would build, plus the ones they would never get to.

PRICING

One base price, then add exactly what you need

BASIC SERVICES

₹45

per employee / month

- People management
- Attendance tracking
- Leave management
- Employee self-service
- Company policies
